PHONE TALK IS CLEW IN L. A. MURDER

Mysterious "Dada," Who Is Known to Have Called Up Victim on Afternoon Prior to the Murder, Is Sought

Police Engage in Hunt for Mexican Herder, Who Is Believed to Have Seen the Fatal Fight of Women

BY UNITED PRESS.
LEASD WIRE TO TRIBUNE.
LOS ANGELES, July 15.—A telegram from Sheriff Traeger, received by Under-Sheriff Biscailuz here at 2:30 this afternoon, declared that Mrs. Clara Phillips, charged with the murder of Mrs. Alberta Meadows, would be brought here tomorrow.

The message, dated at Tucson, Ariz., said:
"Leave here 11:30 tonight on Southern Pacific train No. 3. Arrive Los Angeles tomorrow at 1 P. M. (signed) TRAEBER."

BY INTERNATIONAL NEWS SERVICE
LEASD WIRE TO TRIBUNE.
LOS ANGELES, July 15.—The revolving "hammer murder" last Wednesday afternoon at a lonely spot along Montecito Drive, in which Mrs. Clara Phillips is alleged to have snuffed out the life of pretty 20-year-old Mrs. Alberta Meadows by beating her head to a pulp with a hammer, because she thought Mrs. Meadows was keeping company with her husband, was at a standstill tonight, pending the arrival of Mrs. Phillips in Los Angeles tomorrow from Tucson, Ariz., where she was taken into custody following the crime.

Meanwhile detectives were busy checking up on clues uncovered here and connecting up the detailed story of the gruesome slaying into the best shape possible.
Further investigation was made tonight into the story told by Mrs. Peggy Caffee, former chorus girl and friend of Mrs. Phillips, who says she was an eye witness to the crime, having gone on the automobile trip with Mrs. Phillips and Mrs. Meadows, which ended in the murder.

SEARCH MADE FOR MEXICAN HERDER.
A thorough search was also under way tonight for a Mexican herder who is thought to have been on a nearby hillside and to have seen the two women fighting.

A. L. Phillips, husband of the alleged slayer, and who betrayed his wife to the sheriff's office after he had sent her away in an effort to escape, was kept under close surveillance by the police. Everywhere he went an officer accompanied him. Phillips recited again tonight that he will "stick by" his wife and that he believes "she must have been insane to commit such a crime."

PHONE CONVERSATION BEING TRACED.
A man, known only as "Daddy," with whom Mrs. Meadows is said to have held a conversation by telephone, and possibly to have seen on the fatal day, was also an object of search by investigating officers tonight.

Sheriff Traeger was reported to have left Tucson tonight with the woman prisoner.
The hammer murder—the story of how two women, stripped of all the trappings of civilization, fought on a sun-bathed hill, as an eye witness looked on, until one had been slain in cave fashion, for the love of a man—was the talk of all Los Angeles tonight.

SUSPECT PROCLAIMS HER INNOCENCE.
TUCSON, Ariz., July 15.—(By Associated Press).—Still refusing to admit that she is Mrs. Clara Phillips wanted in Los Angeles for the murder of Mrs. Alberta Meadows, the woman held here today issued a signed statement proclaiming her innocence of the brutal hammer murder.

The following is the statement which the prisoner signed in the presence of peace officers and newspaper men:
"What is it all about? That is the question I ask myself as I sit in this strange place which they call a jail, waiting for Sheriff Traeger and his wife to take me back to Los Angeles.
EAGER TO FACE L. A. ACCUSERS.
"I am eager to return to Los Angeles for it is unbearably hot here and the little plaza with its lazy Mexicans lounging in front of my window is not an inspiring view."

"Why I am here, I don't know. I was on the way to visit relatives in El Paso. When the train from Los Angeles stopped in Tucson a coatless man, of burly figure, pushed his way through the car and came to my berth.
"He said he was a detective and told me I was wanted.
"I didn't know what it was all

Principals in L. A. Hammer Murder

Left—MRS. ALBERTA MEADOWS, found beaten to death; center—MRS. CLARA PHILLIPS, held at Tucson, accused of the crime; MRS. PEGGIE CAFFEE, who saw crime committed, described details and accused Mrs. Phillips, her friend.

FAMILIES FLEE AS FIRE PERILS TOWN

Sparks From Raging Timber Blaze Shower on Village, Apparently Doomed.

SEATTLE, July 15.—Apparently doomed by a rising wind that is sweeping a raging forest fire across many acres of virgin timber, the village of Panther Lake, four miles east of Kent, is a scene of intense excitement late this afternoon, as families hastily are gathering what belongings they can carry and are evacuating their homes, already covered by the blinding pall of smoke and falling embers.
Scores of additional fire fighters were rushing to the scene in response to calls for help sent out by King county Fire Warden Higbe, who, with a small band of men, has been fighting the flames all day.

So menacing has the fire situation become that State Forester E. S. Pope this afternoon issued orders for the fire fighting crews to ignore smaller blazes and concentrate their efforts to those menacing property.

By FRANK A. CLARVOE.
United Press Staff Correspondent.
PORTLAND, Ore., July 15.—The Pacific Northwest squared away tonight for a fight to the finish against its old enemy, the forest fire.

Spotted with blazes literally burning up thousands of dollars an hour, two states sent every available man in a dozen districts to the front, fighting in many places with bare hands to stem the sweep of the flames.

Griffin Beats Suhr In Oregon Singles

BY UNITED PRESS.
LEASD WIRE TO TRIBUNE.
PORTLAND, Ore., July 15.—Billie Griffin of San Francisco, today won the men's singles tennis championship of Oregon, defeating Herman Suhr of San Francisco, 6-1, 6-3, and 12-10.

Miss Mayne MacDonald of Seattle won the women's singles championship of Oregon for the fifth consecutive time by defeating Mrs. J. C. Cuching of Berkeley, Cal., this afternoon at the close of the state tournament by a score of 6-2 and 6-14.

Stabbing Follows Street Fight

Neil O'Boale, 1171 Seventh street, was taken last night to the Emergency hospital, where he is in a serious condition from a knife wound in the abdomen sustained in a quarrel with an unidentified man. According to O'Boale at Eighth and Adeline streets a man pushed against him and cursed him. A fist fight followed in which O'Boale vanquished his opponent. As he walked away the man stabbed him.

Townley Returns To Power in N. D.

BY UNITED PRESS.
BISMARCK, N. D., July 15.—Arthur C. Townley was again given the whip hand in the National Non-Partisan League here tonight.

Practically dethroned last fall, the originator and former chief of the league was designated by the special state convention here to take complete charge of reorganization work in the league.

Oregon Champion Is Defeated at Golf

BY UNITED PRESS.
LEASD WIRE TO TRIBUNE.
PORTLAND, Ore., July 15.—Dr. O. E. Willing of Portland today won the golf championship of Oregon, defeating Rudolph Wilhelm of Portland, 6 up and 4 to play. Wilhelm, who has been state champion four times, lost through his inability to hole short putts. The match was played over the Tualatin country club course.

BOOZE PERMITS IN U. S. VAULT TAKEN

Whisky Already Withdrawn on Stolen Documents; Dry Officers Quit.

By Universal Service
WASHINGTON, July 15.—From nine to ten thousand of the new form of whisky withdrawal permits printed, but not yet issued, by the government have been stolen from the vaults of the United States bureau of printing and engraving.

A corresponding number of confirmation blanks also are said to have been stolen from safes in the prohibition enforcement office here.

Whisky has been illegally withdrawn from one Pennsylvania distillery on one of the stolen permits. Government officials' signatures have been forged to them.

These facts explain the order of Prohibition Commissioner Haynes in the past week that the new permits were not to be placed in official circulation until September.

GOVERNMENT DECIDES ON NEW SIGNATURES

"So many forgeries of the old form of permits printed on ordinary paper had been made that the government decided months ago to have new signatures and paper, with serial numbers and confirmation duplicates.

Holder of such a permit was to present it at a bonded warehouse or distillery, the keeper of which waited for a confirmation from Washington before transferring the whisky. Application for permits had to be made of local prohibition officers and approved at Washington. It was thought that an airtight system had been found.

Investigators have been hot on the trail of the crooks who engineered the theft. Progress has been slow, it is declared, owing to political influences exercised over the prohibition enforcement bureau in the several communities involved.

Papers proving withdrawal of vast quantities of whisky upon the forged permits from a distillery near Pittsburgh have been in the hands of prohibition authorities, but for some unexplained reason are understood to have disappeared. Several officials responsible for these papers have left the prohibition enforcement service. One of them is just across the Canadian border.

Lloyd George Seeks To Assist Germany

By Universal Service.
LONDON, July 15.—(Special Cable Despatch).—Following Germany's payment of today's indemnity in gold it became known tonight that Premier Lloyd George was conducting diplomatic conversations with Premier Poincare of France in an effort to reach an agreement whereby France would make concessions on German indemnity if Great Britain makes concessions in her Near East policy.

S. F. Rent Bandits Hold Up Collector

SAN FRANCISCO, July 15.—Otto Ruth, collector for the James Dougherty real estate company, at 2028 Mission street, today was robbed of \$400 by two armed men in the hallway of an apartment house.

The police believe the bandits today are responsible for similar robberies on Saturdays for several weeks, with rent collectors as victims.

COAL MINERS REJECT PLAN FOR PEACE

Hope for Early Settlement Is Blasted as Workers Unanimously Refuse to Accept Harding's Arbitration Plan

No Announcement as to the Next Step Until Mine Owners Have Made Reply; Report Expected Monday

YOUNGSTOWN, O., July 15.—Gradual close down of the score of steel mills in the Mahoning-Shenandoah valley—the second largest steel manufacturing district in the United States—started late today because of a shortage of coal.

The Republic Iron and Steel company laid off 1200 of the 5000 men employed in the local plant, and closed down two of its giant blast furnaces. Tonight the Trumbull-Cliffs Furnace company at Warren, Ohio, announced that operation of a six hundred ton blast furnace could not be continued. Four hundred men of the 500 men employed there were affected.

By JAMES T. KOLBERT.
(United Press Staff Correspondent)
WASHINGTON, July 15.—The federal government's hopes for a speedy termination of the two-fold nationwide menace of coal and railroad strikes received a severe setback today when the miners declined to accept in its present form President Harding's proposal for arbitration of the mine tieup.

The vote of the miners' policy committee, for rejection of the Harding arbitration proposal was unanimous. Only the section of the plan providing for an exhaustive investigation into mine production, transportation and other costs was approved.

A White House statement said: "The President met the policy committee of the United Mine Workers and received the written declaration to accept the voluntary plan proposed for settlement of the dispute, which is responsible for suspended mining activities. There will be no announcement of any government plan to relieve the situation until the response of the bituminous operators is received. It is expected to have their report Monday morning."

"The President did not comment to the mine workers' committee on the decision reported, except to say that he hoped they fully appreciated the responsibility they assumed in declining the government offer of a means of instant adjustment and the resumption of mining."

Fugitive Rail Worker Believed Castor

RED BLUFF, July 15.—Sheriff Ballard late today started a search for a man known as Frank Collins, employed as a strike-breaker at Gerber, near here, in the belief that Collins is really Walter Castor, sought by the police in connection with the murder in San Francisco last May of Mrs. Anna Wilkens.

Collins, or Castor, according to Ballard, had been employed at Gerber, since the walkout of the railroad workers there and has been a source of trouble and annoyance to the authorities. Ballard said that the man suddenly disappeared last night and that he had reason to believe he is Walter Castor.

Policeman's Wife Betrays Burglar

DETROIT, July 15.—George Brown, alias Gurney, 32, of Cleveland, employed in a downtown restaurant here, in jail charged with stealing an automobile, because he was polite to a woman, a former co-worker.

The woman, Mrs. J. Eaton, wife of a Cleveland patrolman, who, with her husband, is honeymooning in Detroit, entered the restaurant for breakfast.

When Brown worked with her in Cleveland she was a "Miss." He went up and spoke to her. Mrs. Eaton recognized Brown as George Gurney, who had stolen an automobile from the Searley Mercantile Agency in Cleveland, where she had worked. She told her husband who the man was, and the Cleveland patrolman took Brown to the Central Station.

Lord Northcliffe Is Critically Ill

LONDON, July 15.—(Special Cable Despatch).—Lord Northcliffe's condition was reported today as unchanged. He is still critically ill.

Since the publisher's breakdown in Switzerland a month ago, specialists have been trying to stem what they described in a bulletin this week as an "obscure toxic process." His heart also remains dangerously weak.

Radio news, features, questions and answers on Page 8-X.

Paralysis of U. S. Industries Now Strike Menace

Situation Grows Acute as the Big Steel Companies Close Their Works.

BY UNITED PRESS.
LEASD WIRE TO TRIBUNE.
WASHINGTON, July 15.—The menace of industrial paralysis hung over the United States tonight.

Despite the efforts on the part of the government agencies in Washington and Chicago to bring together the leaders of the warring factions in the great basic industries of coal and transportation, prospects for an early settlement grew steadily dimmer throughout the day.

Imminent danger of a complete tieup of all shipping on the Great Lakes as a result of the coal shortage is reported in a despatch from Cleveland, which says only a four-day supply of bunker fuel remains east of Duluth.

The United States Geological Survey declares the shop strike last week has already cut the limited production of coal and car loadings to one of the lowest points since the coal strike began.

At the same time, despatches from Youngstown declared that unless the great bins of the steel mills are immediately replenished, a shutdown, throwing thousands of men out of work, is inevitable.

CONGRESSMEN BACK PLANS OF PRESIDENT

Congressmen from the North-western states, which would be among the first to feel the pinch of winter, are strongly with President Harding in his determination to force an end of both strikes and are ready to back him up should he decide to take over the mines and railroads.

Reports that Harding favors conscription of labor to run these industries were widely discussed today, but at the White House it was stated the executive is not contemplating the drafting of labor, although he believes the draft justified in event of grave national emergency. Congressional authority would be necessary before the draft power could be used, in the opinion of government legal experts.

Settlement of both the railroad and mine strikes is necessary to save the country from serious effects this winter as fuel shipments are so far behind now there would be no hope of catching up with the demand if the nation's transportation arteries were clogged by broken down rolling stock.

Suggestions of nationalization of the mining and railroad industries by the government were coldly received by the coal and rail executives and the leaders of the striking unionists.

TENSION GROWS IN RAILWAY CONFLICT

Harding was in conference with maintenance of way union leaders here today and informed them the decisions of the railway labor board must be upheld. The shopmen's strike was called in revolt against wage cuts ordered by the board.

The area of highest tension in the industrial strife shifted to Ohio today, where Colonel Robert Haubrich took command of state troops ordered mobilized in three cities, to be ready for instant action. The troops included one battalion of infantry, a machine gun company and two motor transport companies.

Meanwhile, the postoffice department rushed plans to mobilize thousands of motor trucks and squadrons of aircraft to keep the mails moving in event of a complete breakdown of rail transportation.

Lady Beatty Loses Diamonds at Ball

LONDON, July 15.—(Special Cable Despatch).—A brooch of diamonds and pearls worth \$10,000 was lost by Lady Beatty in her home yesterday during a ball given by Mrs. Marshall Field for her daughter, Gwen-dolen.

The Prince of Wales and the Duke of York, together with a large number of Americans, attended the ball.

Lady Beatty discovered her loss at 3 o'clock in the morning and immediately notified detectives. The brooch was a wedding gift and an extensive investigation is being made with the hope of recovering it.

Troops Called Out In Rome Rioting

ROME, July 15.—Many persons have been wounded in 24 hours of fighting between Fascist and Socialist at Cremona, said advices from that city today. Several buildings have been burned. Regular troops have been sent.

SAN BERNARDINO ASKS STATE TROOPS TO CHECK ATTACKS ON RAIL MEN

Governor Sends Matthewson to Investigate Reports; Draft Hint Stirs Ire of Shop Strike Chief.

LITTLE HOPE OF PEACE NOW

NEW YORK, July 15 (United Press).—Seventy-five thousand maintenance of way men, section hands, track walkers and other employees associated with the American Federation of Labor shop crafts, will stop "work" Monday morning in the metropolitan area about New York.

This was announced tonight by John J. Dowd, chairman of the Central Strike Committee of the shop crafts.

CINCINNATI, Ohio, July 15 (by Associated Press).—There will be no convention of the general chairmen of the National Association of General Chairmen of the Brotherhood of Maintenance of Way Men at this time, to decide whether strike orders will be issued, T. C. Carroll, president of the organization, announced tonight.

SACRAMENTO, July 15.—Full investigation will precede any action by Governor W. D. Stephens on the appeal of the mayor, the sheriff and Santa Fe railway officials for troops to do strike duty at San Bernardino, it was indicated tonight.

Labor Commissioner W. C. Mathewson will proceed at once to San Bernardino to make an investigation.

AMEND RAIL LAW, SAYS ITS AUTHOR

Senator Cummins Thinks It Should Guarantee Living Wages.

BY ASSOCIATED PRESS.
LEASD WIRE TO TRIBUNE.
WASHINGTON, July 15.—Senator Cummins, who had a long conference last evening with President Harding, said today he was convinced that amendment of the transportation act was necessary. He said the committee hearings, which will be designed to secure all possible aid in drafting a new formula on railroad wages, would begin soon but would not interfere with the present strike negotiations.

The committee chairman did not believe possible that the amendment legislation could be disposed of soon enough to be a factor in the present strike, his thought being that corrective legislation would prevent future trouble.

"The men undoubtedly are entitled to a guarantee of a living wage, inasmuch as the transportation act attempts to define wage standards," said Senator Cummins. "I do not mean a nationwide, standardized wage, but the law should be so amended as to guarantee a living wage, under a better formula of law than the present transportation act, which will be capable of better administration by the railroad labor board."

Later, according to Senator Cummins, who is a co-author of the present law, must come legislation to make the board's decisions enforceable.

"They are binding now, on both sides, but not enforceable," said Cummins.

"I think we must have an amendment which will make them enforceable, by providing penalties against the union if they violate the law, and also fines and imprisonment penalties against railway officials for violating the board's orders."

Sixty Shop Workers Taken Suddenly Ill

BY UNIVERSAL SERVICE.
CHICAGO, July 15.—Health Commissioner Bundeson started an investigation tonight to ascertain the cause of the sudden illness of sixty railroad shopmen employed by the Chicago, Milwaukee & St. Paul railway to take the place of striking shopmen. The men had been served meals in the company's dining room at the shops. The poison was believed to have been given in milk.

Striker Shot Dead In Big Four Yards

CLEVELAND, July 15.—(United Press).—An unidentified striking car repairer was shot and instantly killed by a colored stationary engineer employed by the Big Four railroad, near the shops of the railroad at Linndale, late tonight. The negro, it is stated, claimed that the striker, who was pickingeting the shops, threatened him.

Woman Accused of Stone
Age Crime Refuses to
Talk of Charges.

(Continued from Page 1)

about, but I went with him to this city jail. I was locked in this room, where I sit looking out through the heavy screen at my own window, still wondering what it is all about.

"I have been well treated in the jail. The army cot on which I try to sleep, while the desert heat tortures me day and night, is with a mattress. The blanket is laid only on evenings. But I suppose it is the best the jail affords and I have no complaint to make.

"Here is the message I send back to Los Angeles:

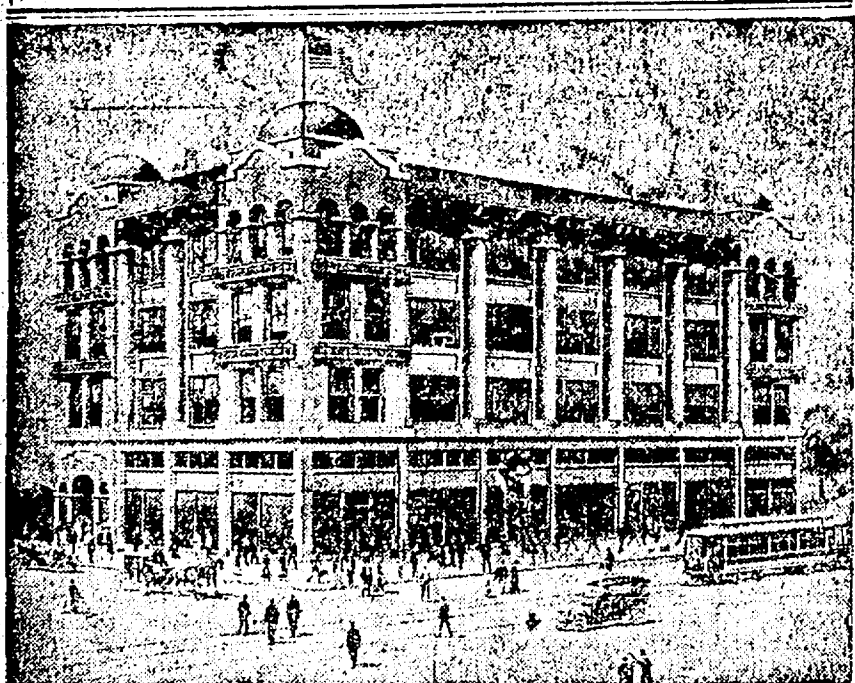

"I am innocent of any crime. But when Sheriff Traeger calls for me I will be glad to go back and face whatever the unknown holds in store for me."

BAKERSFIELD, July 15.—(By Associated Press.)—Mrs. Peggy Caffee, eye witness of the murder last Wednesday evening of Mrs. Albert Meadows in Los Angeles, resided at Taft, Calif., intermittently during the past three years, according to a despatch from there today. She spent her time in Taft and Los Angeles where her uncle is connected with the motion picture industry. It was said. Her husband, H. Caffee, an oil worker, left Taft one week ago for the south, where he was transferred by an oil company from the local fields. Caffee is an overseas veteran of the World War, and married Mrs. Caffee upon his return here after the war when she came to Kern county in a vaudeville troupe from New Jersey.

Mrs. Caffee and Caffee, according to Taft reports, first met in New Jersey before Caffee went overseas. Mrs. Caffee, according to her story, to the Los Angeles grand jury, saw Mrs. Clara Phillips beat Mrs. Meadows to death with a hammer.

German Humorist Is Sued by the Kaiser

BERLIN, July 15.—The ex-Kaiser's lawyer, in Berlin, has filed suit for "libel" against the well-known humorist, Carl Sternheim, for poking fun at the ex-Kaiser in his latest book, "Libussa," in which the ex-warlord charges Libussa "knocks" his memoirs on the floor of the stable. It is a sharp satire on the role the ex-Kaiser played in politics at Petrograd, London and Berlin while he was in power.

POLYTECHNIC COLLEGE OF ENGINEERING
Thirteenth and Madison Streets, Oakland, California

A College of Practical Engineering

Combining High School and College Training
(Incorporated Capital, \$200,000)

Grants Degrees to those who complete full course in
Civil Engineering, Electrical Engineering, Mining
Engineering, Mechanical Engineering and
Architectural Engineering.

Special Diplomas awarded to those who complete courses in Auto-
motive Engineering, Machine Shop Practice, Mechanical and
Architectural Drafting, Surveying, Battery and Ignition, Build-
ing Estimating and Contracting; also special course for Elec-
tricians.

Advantages—A complete College Engineering Course in from
24 to 30 months, with non-essential subjects omitted. An oppor-
tunity for the most rapid advancement by students whose educa-
tion has been neglected.

Tuition and all expenses very reasonable. Shops, Laboratories
and Equipment unsurpassed, including Electrical, Hydraulic,
Chemical, Steam, etc. Automotive Courses, Battery and Ignition
by experts.

Best Equipped School West of Chicago

A faculty of Experienced Educators and Engineers.
Every graduate in a position.
College in session year round. Students may enroll at any time.

Free Staters Rout Valera's Irregulars

Strong Positions in Limerick
Captured After Heavy
Fighting.

By DENIS O'CONNELL,
Universal Service Staff
Correspondent.

DUBLIN, July 15 (Special Cable
Despatch).—Strict military cen-
sorship on the news of the fighting
in Munster the past week has been
lifted today by Free Staters.

Fighting has been raging in
Limerick. According to official re-
ports national troops disclosed ir-
regulars from all strong positions
held in Limerick, taking many pris-
oners and capturing arms and am-
munition.

The irregulars summoned rein-
forcements from Cork and Liam
Lynch and his followers are rush-
ing to the rescue by Lynch's
taken over the direction of the op-
erations.

BATTLES IN LIMERICK.
Since Tuesday the fighting in
Limerick has been proceeding be-
hind street barricades, the whole
city being swept by machine gun
fire. At the outset of the battle
the irregulars commandeered large
supplies of food and all week
civilians have been in a desperate
plight. The general commanding
the Nationals was forced to dis-
tribute food to the population.

Lieutenant Frank Teeling, who
was sentenced to death during the
black and tan regime and later made
a sensational escape from the Kil-
mainham jail, was seriously
wounded leading his men against
the irregulars.

Thursday the Nationals stormed
William street, which the irregu-
lars strongly fortified, having
erected barricades and covered
them with men. Irregulars com-
manded the street from the win-
dows with machine guns and
rifles.

ARMORED CARS USED.
The Free Staters swept through
the thoroughfare in armored cars,
bursting through the barricades
and routing the irregulars with
rifle grenades and Hotchkiss
machine guns. This was the heaviest
engagement since the start of the
civil war.

Having been swept into eastern
counties, the irregulars are now
falling back on Waterford. Busi-
ness is generally suspended in
southern Ireland, because of
mined roadways and broken
bridges.

The irregulars are leaving Clon-
mell and the strongholds, and
are breaking up into small groups.
They are also making a desperate
effort to seize Waterford, on the
Limerick railroad.

Short Line Road Is Facing Foreclosure

MUSCATINE, Iowa, July 15.—
Foreclosure proceedings for \$517-
800, brought by the Continental and
Commercial Trust and Savings Bank
of Chicago, against the Muscatine,
Burlington and Southern Railway,
engrossed the district court here
for the third day. Claims aggregat-
ing several hundred thousand dol-
lars in addition to that sought by
the bank, are being argued by at-
torneys. It is understood that
agreements have been reached up-
on practically all accounts. How-
ever, it will be up to the court to
determine priority.

JAPAN'S PLANS IN SAGHALIEN TOLD IN TOKYO NOTE

Plans to Retain the Northern
Port Until Claims on Russ
Are Adjusted.

WASHINGTON, July 15 (By As-
sociated Press).—The text of the
foreign office statement in Tokyo
yesterday announcing Japan's pur-
pose to withdraw her troops from
the mainland portion of the prov-
ince of Saghalien, Siberia, shows
that, coupled with previous an-
nouncements on the intended with-
drawal by October from the Vlad-
vostok region, it is Japan's purpose
to hold only the northern or Rus-
sian end of the island of Saghalien
pending adjustment with some
Russian government of Japanese
claims arising out of the massacre
of Japanese troops at Nikolsk.

The text of the Japanese an-
nouncement as received today at
the state department follows:
"The Japanese government, con-
sidering it expedient to reduce the
extent of territory occupied by
their troops in the province of
Saghalien, has decided to with-
draw by the end of September of
the present year all their troops
from the districts opposite the
island of Saghalien.

"As for the northern or Russian
part of the island of Saghalien, it is
their intention to terminate the oc-
cupation as soon as a satisfactory
settlement for the Nikolsk mas-
sacre is reached.

Japan has always drawn a dis-
tinction between her forces in the
Siberia, the region about Vlad-
vostok and those in the province
or old Russian administrative dis-
trict of Saghalien.

Oakland N. G. Goes To Monterey Camp

Under the command of Captain
Wayne Allen, line officer of the
National Guard in Oakland,
Oakland's six units of the 159th
California Infantry, composed of
305 men, entrained last night for
Monterey. The band and companies
of the Service Company, Regimen-
tal Band, Regimental Head-
quarters Company, and the Cal-
ifornia Medical Corps Detachment.
Colonel David P. Barrows, reg-
imental commander, preceded his
troops to the Del Monte encamp-
ment. This camp is under federal
orders, commanded by a Federal
officer. Each battalion is under
direct supervision of a Federal
regular army. The Oakland
units are under the supervision of
Captain Fred Logan.

Major Samuel Downing is camp
surgeon.
Capt. Wayne Allen is commander
of Co. C, with First Lieutenant
Chester Case, Second Lieutenant
Richard Cross.

Capt. LeRoy G. Gile is com-
mander of Co. A, with First Lieu-
tenant Robert A. Jovner and Sec-
ond Lieutenant W. I. Osborn.

Capt. Floyd E. Stewart is com-
mander of the Service Company,
and the Band, with First Lieu-
tenant George W. Griffin and Sec-
ond Lieutenant William Christensen.

Capt. Edwin E. Hinchen is
commander of the Regimental
Headquarters Company, with Sec-
ond Lieutenant Berry L. Griffin.
Major Samuel R. Downing com-
mands the Medical Corps Detach-
ment, with Capt. Jesse C. Edwards
and Capt. Cuthbert Fleischer as his
assistants.

Friends of the Guardsmen are
requested to address them at 159th
Infantry, National Guard, Del
Monte, Cal., Encampment, Mon-
terey County, California.

NEW CLUB ACTIVE.

The Coyote Point Yacht Club,
elected to membership in the Pa-
cific Inter-Club Yacht Association
in June, is to take a most active
part in the affairs of the summer
season, according to those at the
head of the organization.

Ladies!

SOCIALISTS FORM COALITION FOR REICHSTAG UNITY

"Working Alliance" Between
Majority, Independent
Groups Effected.

By KARL H. VON WIEGAND
BERLIN, July 15. (Special Cable
Despatch).—Majority Socialist and
Independent Socialist deputies of

the Reichstag announce the forma-
tion of a "working alliance".

Vorwaerts explains today that the
purpose of the coalition is merely
"to bring about maximum unity."
The Independents of the factions
and organizations represented by
them is not affected.

Efforts will continue, however,
toward a complete fusion of the
two parties.

There is much reason to doubt
whether the new working alliance
will prove of any value in over-
coming the present political crisis,
which despite optimism in some
quarters is apparently as acute as
ever.

Indeed, it is possible that the al-
liance may sharpen the crisis since
Independent Socialists of the party
stronghold at Dusseldorf, Koenigs-
berg and other cities have official-
ly disavowed the plans of the party

leaders to enter the government
coalition.

Moreover, the majority Socialists,
Independents and Communists in
the Dusseldorf district, have joined
with labor organizations, reiterat-
ing their demands for a "minimum
program of proletarian which in-
cludes the demand for prohibition
of every monarchic or anti-repub-
lican agitation in word, print or
picture, under prison penalties.

Schiedemann, in an article in
Vorwaerts, declares also this mini-
mum program must be accepted or
the Reichstag must be dissolved.
He thus puts himself squarely in
opposition to Ebert, who desires to
avoid dissolution.

BURGERS STEAL DOG.
CHICAGO.—Burglars who robbed
the home of L. T. Jones at Evans-
ton stole a watchdog bought two
days before.

OFFICER'S WIT WINS IN FIGHT WITH GUNMAN

Wit is responsible for the fact
that Policeman E. F. Murphy is
alive today.
Murphy, with E. A. Yanneke,
both of the morals squad, was
walking down Pine street last
night when Oscar Jones, colored,
who was a few paces ahead of
the officers, accidentally dropped
a revolver from his pocket.
Immediately the gun fell Jones
whirled, picked it up and trained
it on Murphy, calling to him to
throw up his hands. Murphy
complied and started a running-
fire monologue with Jones, fi-
nally getting near enough to
grapple with and overpower him.
Jones was charged with carry-
ing a concealed weapon.

Crude Oil Output Declines in Week

NEW YORK, July 15.—The daily
average gross crude oil production
of the United States decreased,
8650 barrels for the week ending
July 8, totaling 1,450,650 barrels, as
compared with 1,454,200 barrels the
preceding week, according to the
weekly summary of the American
Petroleum Institute.
According to figures collected by
the institute, imports of petroleum
(crude and refined oils), at the
principal United States ports for
the week ended July 8 totaled
2,747,029 barrels, a daily average
of 392,432 barrels, compared with
3,623,050 barrels, a daily average of
517,578 barrels for the week ended
July 1.

The Daylight Fur Shop—larger,
handsomer and more convenient—is
now placed directly at the left of the
elevators on the Third Floor.

Livingston Bros.

GRANT AVENUE GEARY STREET
SAN FRANCISCO

Announce—BEGINNING MONDAY

Our Great July Fur Sale

in our newly enlarged and conveniently placed DAYLIGHT FUR SHOP

Save 20% to 35%

by purchasing the wanted fur now!

Because of the early date set for our JULY FUR SALE, the Livingston Fur Buyer was in the New York market weeks in ad-
vance of the majority of fur purchasers. Manufacturers were eager to book business and willing to give startling price concessions.
So good were the values obtained by our Fur Buyer that it will be impossible for us to duplicate JULY SALE
FURS at JULY SALE PRICES! Fur prices are now steadily advancing and will undoubtedly be 20% to 35%
higher later on! Plan to buy the coveted fur, Monday. Select now from an immense variety of fur pieces and wraps for Fall
and Winter wear—every one at a special price!

The July Sale Furs are new—just received by fast express—and show the new style trend of Advance Fall and Winter
modes. You will delight in the new silhouette (slender shoulders and flaring skirt), the exaggerated mandarin sleeves,
the luxurious chin collars, the braided and tasseled girdles!—The quality of the furs speaks in their richness, softness
and lustre—selected pelts of rare beauty, handled by skilled craftsmen and master designers. The linings are as
sumptuous as the furs themselves.

We have also reduced our own splendid Fur stocks to correspond with the furs bought
for this JULY FUR SALE, and you will find many extraordinary values among these.

GOVERNOR PROBES SAN BERNARDINO CALL FOR TROOPS

Situation in the East Grows
More Serious as Strike
Drags On.

(Continued from Page 1)

planned to throw their shops open on a larger scale.

"The situation is much better in the east than elsewhere," a statement issued by the Western President's committee on public relations declared.

"On the other hand men are returning throughout the west in gradually increasing numbers. Practically all roads report train service normal.

Developments have proved that the one necessary step was protection for the men who remained at work. Wherever injunctions against unlawful interference with workers have been issued, there has been an immediate increase in the number of men at work."

The committee declared it stood ready and willing to attend any hearing before the United States Railroad Labor Board with a view of effecting a settlement that would not nullify any of the board's rulings.

Despite the fact that hope of peace had apparently disappeared, few acts of violence were reported. Maintenance of way men in a few shops have walked out in sympathy with the shopmen.

Additional injunctions were asked by several railroads.

Nebraska Prepared To Call Soldiers

OMAHA, July 15.—Warnings to peace officers at Fremont, Long Pine and Chadron, Neb., were telegraphed today by Governor McKelvie, that unless they take steps to get the strike situation well in hand with reference to protection of human life from violence, the state stood ready to send state troops to take charge of the situation.

Railway Official Defies Authorities

ROSEVILLE, July 15.—Warrant for the arrest of Division Superintendent Ahern of the Southern Pacific today was sworn out here by a strike sympathizer, charging him with a misdemeanor in tacking signs on telephone poles.

City Marshal Gus Ottyrude said when he tried to serve the warrant Ahern stood behind armed guards.

SPIRITUALISTS TO SOLVE MYSTERY OF WHITE GHOST

By BASIL WOON,
Universal Service Staff
Correspondent.

PARIS, July 15.—Camille Flammarion, Conan Doyle, Sir Oliver Lodge and other famous spiritualists have been asked to meet at Annecy in the French Alps in August to solve the mystery of the "white ghost of Annecy," who, after forty years, has again appeared—according to villagers—walking on the waves of Annecy Lake at midnight.

Gossip goes that the ghost is that of the Duchess de Nemours, who was Countess Anne d'Este, once known as the unhappiest woman in Europe.

After years of sorrow and misery during which she married the Duke de Guise, who died, Anne married the Duke de Nemours, whose feudal castle at Duingt on Lake d'Annecy is still a tourist sight of the region, one of the loveliest in France.

So happy did the Duke make his bride that Anne announced that she would continue to live at Annecy even after death. The white ghost walking the lake is, hence, a proof that she has kept her word.

Maurice Geley, famous spiritualist, avers that Anne has been on a journey through the Seven Spheres of happiness equal to that she knew at Duingt castle.

In each of the seven spheres, says Geley, she must have met one of the men who in earlier life caused her misery.

So now she has returned to earth and wanders vainly over the lake seeking the affinity who is there no longer.

British Translate Manhattan's Meaning

LONDON, July 15.—(United Press.)—The dross over here have published an anti-booze book, the preface of which gives the following meaning to the word Manhattan: "The island on which New York City stands," the book says, "derived its name from a carousal between white men and Indians in 1609, the Delawareans referring to it as 'Manahataniok,' literally 'the place where we all got drunk'—a word afterwards corrupted into 'Manhattan.' A good many probably did, and still do."

and told him to come and get him. Ottyrude decided to await a more favorable time to serve the warrant, he explained.

\$25,000 Asked in Rail Strike Suit

CLEVELAND, Ohio, July 15.—A suit in equity, asking an injunction against the International Association of Machinists, the International Brotherhood of Boiler-makers, the International Brotherhood of Blacksmiths, the Alliance of Amalgamated Steel Metal Workers and the Brotherhood of Railway Carmen of America and general and local officers of these organizations to the number of 2400 was filed in federal court today on behalf of the Baltimore & Ohio railroad company. Damages to the extent of \$25,000 are asked also.

ANOTHER CRUISER QUITS SUN, JOINS NEUTRAL GROUP

Deposed Chinese President
Pins Faith in Return of
Forces in Kiangsi.

By Universal Service.

CANTON, China, July 15.—(By the Associated Press.)—Another of Sun Yat-Sen's cruisers has deserted him and today departed down the river to join the three which recently pulled away from the deposed Southern leader's navy with the announcement that they would remain neutral in the present struggle between him and Chen Chiung-Ming. Sun now has under his flag two cruisers, two destroyers and two transports.

The former president of South China still pins his hope of regaining power on the return of his forces from Kiangsi province, whither he led them some time ago in his abortive attempt to break through to the Yangtze valley. He also declares a volunteer army is being marshalled in the Canton region to cooperate with his Kiangsi troops in re-installing him as president.

From Shuiukwan, where some of Sun Yat-Sen's returning northerners have been engaged with Chen Chiung-Ming's forces, come conflicting reports on the fighting. Both sides claim the victory.

It is considered significant, however, that none of Sun's Kiangsi units have yet appeared near Canton, although it is more than three weeks since he ordered them to begin the return march, and that Chen Chiung-Ming still retains control of the railway running northward to Shuiukwan. Chen has sent another 1,500 men northward to reinforce his fighting units around Shuiukwan.

Pursuing his unyielding policy, Sun sent an ultimatum to Yip Kue, commanding Chen's troops in Canton, to withdraw from the city to-day. Later, however, the ex-president modified his demand upon request of a committee of citizens and postponed indefinitely any move against Yip Kue. Observers here believe Sun would be unable to enforce his order to Yip Kue.

BRIDE DEFIES OMENS.
LONDON.—In defiance of two common superstitions, Miss Dorothy Loder got married on the 13th and also wore peacock feathers.

MILLION DOLLAR BOOZE AND GRAFT PLOT IS BARED

Ex-Collector of Revenue at
Head of Ring; U. S.
Officials in Net.

By Universal Service.

CHICAGO, July 15.—A million-dollar liquor plot was revealed tonight in the arrest of Henry W. Mager and Ben M. Mitchell. Mager was formerly collector of internal revenue in Chicago; Mitchell is a

former state representative, having served several terms.
Mager was leader of the plot, according to Colonel A. E. Earnshaw, special intelligence officer of the department of justice. Sixteen special federal agents have been working eighteen months on the investigation, Earnshaw said. Five confessions of graft payments, some as high as \$10,000, were secured by the investigators. It was claimed.

Scores of prominent officials and politicians are said to be involved and facing arrest. Among them are assistant United States district attorneys, members of the state legislature, political leaders and ordinary ward heelers and policemen.

Mager, according to Earnshaw's charges, used his official position to obtain money from scores of brewers, distillers, saloon-keepers and cabaret owners. Mitchell was described as the "pay off" man. Mager and Mitchell were arraigned before United States Commissioner Louis B. Mason tonight. Warrants for other arrests were

said to be in the hands of deputy United States marshals.
Operations of the plotters were to conduct a raid and seize liquor as evidence, according to Earnshaw. Two or three days later the victim would be called on the telephone and be told he could "see Mitchell and square it."

Girl 'Robin Hood'

Sent to Sanitarium

BUDAPEST, July 15.—If Robin Hood reappeared on earth today he would be sent to a sanitarium. This Robin Hood was a girl. Daughter of a wealthy family impoverished by the war, she stole from the rich and gave to the poor. They called her "Angel of the Slums."

Under various names she obtained employment as servant in the homes of rich but stingy families. There she filched valuables, sold them and gave the proceeds to needy friends.

"My conscience was numbed by

CHINA 'ROUND CORNER FROM THE POORHOUSE

By GUY S. MARSHALL,
(United Press Staff Correspondent.)

PEKING, July 15.—Just one definite result is apparent after China's annual political and military orgy.

China is poorer. As thoroughly as gunpowder, political intrigue and public wastefulness can do it, the country has been driven one step and almost the last step, toward large foreign loans and consequent foreign financial supervision. A large foreign loan, with resulting foreign supervision, or the poorhouse, is just around the corner.

The misery I saw," she told the magistrate, who committed her to an institution for nervous cases.

Tired Americans Find 'Life Saver' in Paris

BY UNIVERSAL SERVICE.

PARIS, July 15.—The man with the best business in Paris today is Sammy Pearce, a New Yorker, whose specialty is suggesting to Americans jaded after a week or so of hectic Paris life that he will "put them in shape to last over the season."

Sammy, who worked with Muldoon, if the lifesaver for hundreds of Americans who otherwise would be unable to stay in the great Paris race around the fashionable restaurants in the Bois de Boulogne and the more or less fashionable cafes in Montmartre.

Haunting these night places of entertainment, Pearce spots an American with weariness written all over him. Introducing himself, Sammy "spills his spiel."

"You can't overwork the old heart that way, trying to live a year every night, unless you counteract your habits," he suggests.

Be glad you live in Oakland today. With the spirit of enthusiasm that is now alive, Oakland is the city of golden opportunity for every worker. Forward!

Big Savings on Complete Home Outfits

3-Room Outfit

Only \$155 \$12.50 down \$2.75 week

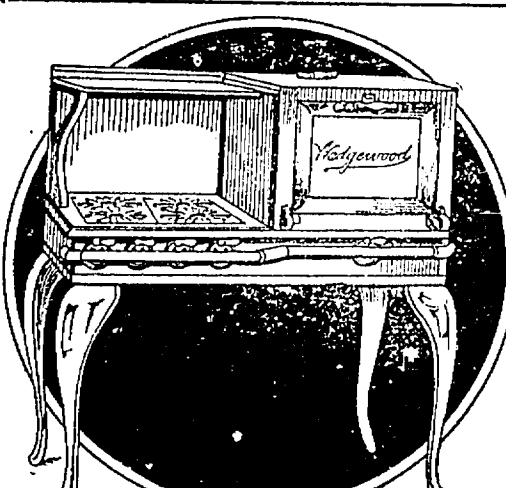

Here is an outfit that shows how really very little it takes to start housekeeping. Why, the payments on this are even less than you would pay for renting furniture. Put this outfit into your home and you will soon have it paid for. You'll never miss the payments.

Dining Room—Oak table of Mission style, well made, nicely finished, 6-foot extension, will seat 8 people when extended. The four chairs to match are of solid oak with beautiful quarter-sawn tops and full box seats covered with a long-wearing fabricoid.

Bed Room—Simmons full size, all metal bed in ivory or Vernis Martin finish; dresser in golden oak with French plate mirror and plenty of drawer space. Chiffonier to match.

Kitchen—3-burner Wedgewood stove with separate oven, white enamel door and drip pan; full size kitchen table, genuine spruce top and drop leaf. Two strong bow back kitchen chairs.

This is just a bare description. If you want to start housekeeping, come in and see the actual furniture and then you will appreciate what big value it is at this exceptional price.

Wedgewood
QUALITY FUEL ECONOMY SERVICE

Just ask your neighbor how she likes her Wedgewood! No matter where you live, someone near you is a Wedgewood owner, for there are 300,000 in use in the West. The first thing that you want to know about a stove is: Will it cook? The Wedgewood will. Your neighbor will tell you so.

The next thing: How does it consume fuel? Your neighbor will tell you that it is a real fuel saver.

Every Wedgewood you buy here carries two guarantees—ours and the maker's. There are 81 styles to choose from—and terms as low as \$1 a week.

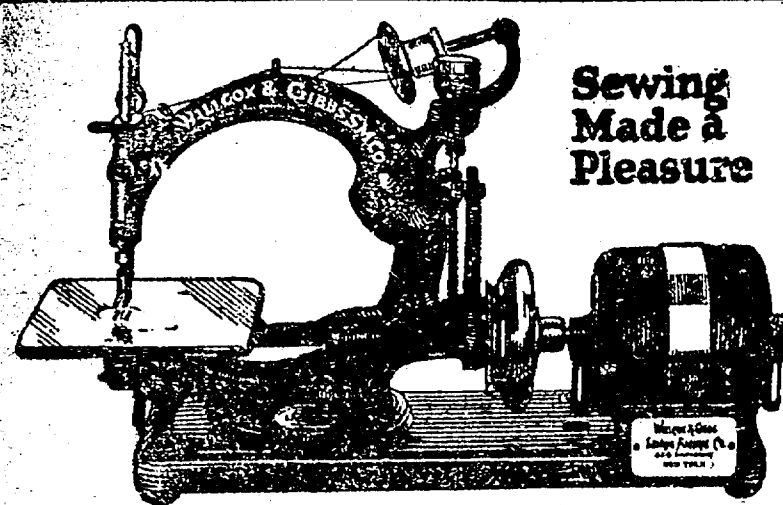

Why we sell it

Wedgewood quality is typical of the merchandise that we offer our customers. No matter what style of stove you buy you are certain of getting in a Wedgewood better value than you will get in any other stove.

ASSOCIATION OF HIGH SCHOOLS TO MEET WEDNESDAY

State Education Subjects to Be Discussed at Three-Day Meet.

BERKELEY, July 15.—What the educators of California think of methods now in operation in schools of today will be told when the ninth annual session of the California High School Teachers' Association is opened next Wednesday on the university campus.

With a membership of 2200 members in all parts of the state record sessions are expected for the three days of the meeting, which will have as its place of assembly the Greek Theater.

On Wednesday morning, after the address of welcome by Dr. Walter Morris Hart, dean of the Summer Sessions, and response by Horace M. Rebok, president of the association, two discussions of major importance will be held. Mr. William C. Toulson, editor of the Labor Clarion, will give an address on the "Labor Program in Education," and Dr. Elizabeth K. Owens of Mills College will speak on "Labor and Education."

These speakers will be followed by Wilford M. Aiken, director of the famous Scarborough school on the Hudson, who will speak on "The Junior High School."

JUNIOR HIGH SCHOOL. L. A. Williams, who it is reported will establish connections with this university in August as professor of secondary education, will talk on Thursday morning on the topic, "The Social Meaning of the Junior High School." The Friday morning session will be addressed by Frank C. Toulson on "Standards for Elevating High School Aims."

Another interesting speaker at this time will be Harold C. Tuttle of Pacific University, Oregon, who will use as a subject, "It Takes Two to Tell the Truth." Charles B. Rugh, chairman of a committee of fifteen, appointed to make a research survey of the high schools of the state, will make a preliminary report of committee investigations at the Friday session.

Round-table discussions will be held at various section meetings which will gather groups of teachers for the afternoon programs. Following are the various section meetings arranged and their chairmen:

Classical studies—James T. Allen, chairman; on Wednesday and Thursday afternoons.

Modern languages—Dagmar Knudsen of Oakland, chairman; Wednesday afternoon; Thursday afternoon.

Deans of girls—Sarah M. Sturtevant, chairman; Thursday afternoon.

Measurements and tests—J. W. Groves, chairman; Thursday afternoon.

Social sciences—George C. Jensen of Eureka, chairman; Friday afternoon.

Geography and general science—J. H. Norton of Sacramento, chairman; Thursday afternoon. To be delivered in Biological sciences, by Grace M. Findlay.

Economics—Agnes M. Morgan, chairman; Wednesday afternoon.

Physical education—George Hjelt, superintendent of physical education in Berkeley, chairman, on Wednesday.

Fine arts in the High School—Leo Cooper, chairman; Friday afternoon. This round-table will be addressed by Frank McGlynn, now starring in Drinkwater's "Abraham Lincoln," Columbia Theater, San Francisco, who will speak on "Pure Dramatics in the High School."

FARMER'S 30 SILK SHIRTS. ROME.—An Etruscan farmer arrested for defrauding two neighbors, was found to have thirty silk shirts.

Portrait of Associated Press Head for French Art Gallery

Picture of FRANK B. NOYES, President of the Associated Press of America, is acquired by French government. The portrait was painted by Perelma.

Painting of Frank B. Noyes Given Place of Honor in Paris

PARIS, July 15.—As a mark of honor to American newspapermen, the French government has given a permanent place in its art galleries to the portrait of Frank B. Noyes, president of the Associated Press of America. The portrait was painted by Perelma.

The painting is now on view at the Grand Palais des Champs Elysees, in the large hall, adjoining the annual salon, where state acquired canvases are first put on exhibition, awaiting their final destination in the Luxembourg or other public gallery.

The portrait was done at Washington, the home of Noyes. At San Francisco, Perelma, who is called the Russian Rembrandt, painted a picture of former U. S. Senator Phelan.

COURT ROW ON OVER WOOD ROAD

STOCKMEN PLAN FOR 'BIG WEEK'

SALINAS, July 15.—George F. Parker has filed a complaint in the court here for a court order to restrain T. W. Hinds and Peter Marquess and others from constructing a road over certain lands owned by said Parker on the southern Monterey county coast section. It is said that Hinds and Marquess own considerable acreages of timber land on the coast which is accessible only through Jacob's land. Being desirous of obtaining timber from their lands they have commenced a road which goes through Parker's land, without first obtaining his permission, and without heed to his warning of no trespassing.

If you see it in The TRIBUNE tell them so.

Gasoline Mileage Doubled

New Discovery Also Eliminates Carbon

Any car owner can easily get from 25 per cent to 50 per cent more mileage from his gasoline and eliminate all carbon trouble through the use of Moto-Vin by a Kansas Motor Expert.

Within a few minutes after adding Moto-Vin, which is really a fuel in a condensed form, to your gasoline you will notice an amazing pickup in the motor. The carbon will be dissolved and blown out the exhaust, and you will take hits on high that you formerly had to take in second.

So confident are the manufacturers that they offer to send Moto-Vin on 10 day trial. Send no money. Simply your name and address to the Moto-Vin Co., 5001 55th Avenue, Oak Grove, Cal., and a large can of Moto-Vin will be sent by return mail. When it arrives pay the postage \$1 and postage. "Time is ten days. If not satisfied, return the can from the can and your money will be refunded."

Always the Best Terms

523 13th St. OAKLAND

SCOUTS YOSEMITE CAMPING PLANS ARE COMPLETED

Boys to Start on Mountain Trip July 31; Many Are Given Awards.

Oakland Boy Scouts are counting the days until July 31, when the big Yosemite hike begins.

The opening of this trip will mark the closing of the summer season at the Diamond Canyon and will be the last touch of freedom before the lads return to school.

The boys will leave Oakland in motor trucks, accompanied by a fully equipped field kitchen from the army. They will camp the first night at the foot of Priest Hill. The second day they will go into the valley and establish their permanent camp.

Scout Executive Homer J. Bemis himself will be in charge, assisted by Field Executive Chester J. Withington.

MERIT BADGES.

Bemis announced the following merit badge awards at the Diamond Canyon Court of Honor last night: Christy Allen, machinery and pathfinding; Jean Bell, forestry, poultry keeping, bee keeping, handicraft, horsemanship, first aid to animals, machinery and pathfinding. He was made an Eagle Scout.

Elmer Drosky, first aid and life saving, a Life and Star Scout.

Franklin Chape, safety first and personal health.

Robert Chasney, horsemanship, leather working, masonry, bee keeping.

Harold Chastals, music, plumbing and business.

Vernon De Maza, hiking, replacement and art.

Gerald Desmond, forestry, automobilism, camping and machinery.

Willie Brown, personal health.

Bruce Green, poultry keeping.

Raymond Goldworthy, pathfinding and Eagle Scout.

Marshall Hibbard, masonry.

Edward Hietich, machinery and electricity.

Eastern Holmes, masonry, fireman'ship and craftsmanship.

Frank Herberich, painting.

Richard Jones, life saving and first aid to animals.

Raymond Kennedy, interpreting, swimming and athletics.

Life and Star Scout.

Charles Likstein, first aid to animals and athletics.

GIVEN MANY AWARDS.

Chester Lavin, public health, marksmanship, swimming, cycling, fireman'ship and personal health.

Malcolm McNe, machinery, pathfinding and safety first.

Arnold Macool, first aid to animals and public health.

Gilbert McKay, craftsmanship and fireman'ship.

Brooks Manchester, first aid to animals, first aid, public health and life saving.

Rush Manhart, pathfinding.

Perham Nahl, fireman'ship.

Howard Peterson, painting and forestry.

Bob Sandstrom, horsemanship, athletics, craftsmanship, electricity and machinery.

Heare Sheffert, scholarship.

Herbert Smith, safety first and poultry keeping.

Robert Smith, fireman'ship.

Edwin West, machinery and conservation.

George Williams, pioneering, electricity and safety first.

Max Williams, swimming, signaling and scholarship.

Graham Weenart, public health.

W. Oden, automobilism, handicraft, poultry keeping, electricity and physical development.

A Life and Star Scout.

Thomas Roemer, swimming.

Leslie Campbell, athletics, physical development and camping.

Life and Star Scout.

Thomas Brady, public health, erecting, personal health, physical development and athletics.

James Louchrey, physical development, athletics and electricity.

Life and Star Scout.

Cliff Harris, electricity and machinery.

Chester Lavin, Duncan McKinley and Gilbert McKay were made first class scouts at the same Court of Honor.

Jugo-Slavs Gather For Celebration Of Triple Union

D. E. ANDRICEVICH, formerly of Oakland, who is a local delegate to the Serb-Croat-Slovene patriotic gathering in Yugoslavia.

Former Oaklander to Act as Delegate From U. S. in European Event.

Jugoslavs from California as well as other portions of the United States are included in the great gathering in Ljubljana, Yugoslavia, for the first general meeting of all Jugoslav "Sokols." In celebration of the unions of Serbs, Croats and Slovenes. The great event is to be held in August, according to word received in Oakland today from D. E. Andricevich, formerly connected with the Central National Bank and now a member of the staff of the Adriatic Bank of Ljubljana.

The "Sokols," Andricevich explains, are Jugoslavs banded together for two purposes—sportsmanship and patriotism. The program of the August gathering will include international games and also discussions regarding national questions.

Delegates will be present from Poland, Russia, France, Belgium and many other countries, while the United States will be represented by a large delegation, according to Andricevich. Andricevich will act as one of the representatives of the Jugoslav colony on the Pacific Coast.

Conference Will Elect New Officers

Members of the Bay District Conference, which is composed of officers and employees of civic and commercial organizations in

the nine counties bordering on San Francisco bay, will elect officers for the coming year at a meeting to be held next Friday at the Tavern on Mt. Tamalpais.

The retiring officers include Charles A. Simmons, executive secretary of the San Francisco cham-

ber of commerce, president, and Charles Keeler, secretary of the Mt. Berkeley chamber of commerce, vice-president.

A program arranged for the meeting will include talks on community matters, and a luncheon served at the Tavern, at which for-

mer Congressman William Kent, J. W. Dolliver and officials of the Mt. Tamalpais and Muir Woods railway will be hosts.

Nebraska has 27 municipal camp grounds along the Lincoln Highway for automobile tourists.

Dog Shatters Window In Leap After Cat

YOUNGSTOWN, Ohio, July 15—It was late at night. A stray dog, roaming the streets, spied a cat sleeping in a window at Sam Mack-

shin's store, 811 West Federal street.

The canine's jump at the feline resulted in a shattered window glass, according to Mackshin's report to the police.

Don't overinflate your tires.

JAPAN BUSINESS LEADERS PEEVED BY U. S. TARIFF

By CLARENCE DUBOSE.

(United Press Staff Correspondent.)

TOKYO, July 15.—The Japanese government has avoided—and in effect declined—participation in the fight being made by Japanese interests against the Fordney tariff bill.

Some of the biggest business interests of Japan are bitterly opposed to the tariff, but the Japanese government has avoided—and in effect declined—participation in the fight being made by Japanese interests against the Fordney tariff bill.

Certain of these interests proposed appealing to the Japanese government, asking it to make formal protest against the new tariff. The business men back of this movement declared the proposed new American tariff rates would ruin business between Japan and America. Japan's foreign trade being already in rather a sorry plight, they asserted, the danger was sufficient to justify government action.

The Japanese government sent a high official, a sort of confidential courier, to the business groups. He talked long and earnestly. He persuaded them not to petition the government to protest the American tariff. Somewhat reluctantly they agreed and redoubled their telegrams of personal protest to America.

ENROLLMENT IN U. C. EXTENSION SHOWS INCREASE

Last Year 22,402 Received Instructions in Work of That Division.

The number of students enrolled in the Extension Division of the University of California last year shows an increase of 2,000 over the previous year according to the annual report issued from the Extension office.

The total number of persons in California who received instruction through this branch of University work was 22,402. Practically all of these persons attended evening classes which were given in 26 different towns. The report shows that San Francisco had the largest enrollment of evening students, the total registration being 6,889. Los Angeles was second with an enrollment of 5,537.

The courses offered last year included over 200 subjects similar to the courses of instruction given on the campus. According to the annual report some of the students took extension courses for university credit, others for further training in line with their occupation, and still others merely for the pleasure of training themselves for some avocation. Among the requests for extension courses, the largest were business men, bankers, lawyers, songwriters, clerks, teachers, clubwomen, housewives, social workers, factory workers, mechanics, engineers—men and women representative of a hundred and one different professions.

Of the total number receiving instruction by the Extension Division, over 4,000 men and women completed courses by correspondence. This enrollment showed students registered from practically every state in the union and many foreign countries in the Orient and South America. Of these students 777 were prisoners who had successfully carried on courses of university standing in subjects such as engineering, electricity, English, law, mathematics, languages, courses, economics, and journalism. The Extension Division announces that the fall program has been arranged and the offices at 140 Kearny street, 264 Pacific Building are open for enrollment. There will be 32 new courses offered in August in San Francisco.

V. F. W. Encampment Program Arranged

SEATTLE, July 15.—Ralph A. Hour, general chairman, has announced a tentative schedule of entertainment and sports events to take place during the twenty-third national encampment of the Veterans of Foreign Wars in Seattle August 15 to 19.

The opening day of the big conclave will be known as big brother day, when the B. P. O. Elks will stage their annual picnic for boys. Naval day is on August 16, while August 19 will be known as "Cootie day" when the Order of Cooties will stage an initiation ceremony.

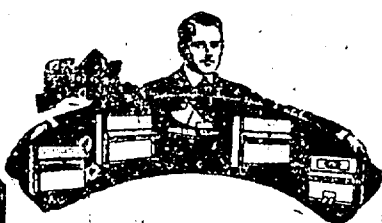

Lightning Causes Old Bell's Last Peal

FAIRMONT, Va., July 15.—(United Press).—The huge bell of the Methodist Episcopal church of Hault, a village near here, which has tolled dolefully for many funerals and pealed merrily for scores of weddings, sounded its own requiem when struck by a bolt of lightning.

Residents of Hault, wakened during the storm, heard the mighty peal of a bell. All sorts of theories as to the origin were conjured, but looking from their windows, people saw the church in flames.

CITY COUNCIL MARK

A great increase in the business transacted by the city council for 1921-22, over 1920-21 is shown in an annual report issued by City Clerk H. K. Sturges, who shows 318 new ordinances passed for 1922 as against 172 for 1921, while there were fewer council meetings and fewer contracts awarded.

FRANCE LEADING EUROPE IN RACE TO RUIN, CLAIM

U. S., English Must Unite to Avert Danger, English Editor Declares.

By A. G. GARDINER.
Britain's Greatest Liberal Writer.
BRITAIN'S GREATEST LIBERAL WRITER.
LEADING WIRE TO TRIBE
LONDON, July 15.—The latest collapse of the German mark has created widespread alarm in English financial and political circles. It is well recognized that the mark is the barometer of European society. The ruble may be waste paper, the krona waste paper, yet Europe can recover. With the mark waste paper, the vertebrae of the European financial system is broken. This waste paper stage now is perilously near. Exchange has fallen to 2400 to the sovereign and the momentum is increasing. The situation is passing beyond control. It might be remedied if good will and sanity prevailed, but, with Poincare at the helm, France leads Europe in a mad dash to death.

The renewed downward movement of the mark is the direct result of the failure of the bankers' conference in Paris. This conference was a last desperate expedient to keep European systems in being. Poincare's speech torpedoed it. This was most incredible, because a loan was the only means whereby Germany could pay reparations.

Does France want the bankruptcy of Germany more than her reparations? That is a plain question. The mutually destructive aims cannot be reconciled. She can have one or the other, but she cannot have both.

BANKRUPTCY MOTIVE.

It appears that bankruptcy of Germany is her first and dominant motive. France calls heaven and earth to witness that Germany does not pay. But the French policy aims to defeat every expedient that would enable her to pay. So Europe rushes toward a Niagara.

World trade is paralyzed with the collapse of the mark. Each country is living within itself. Modern Europe will perish on this basis. England is most immediately vulnerable. She lives on world trade. Half of her food is growing abroad. World trade is now diminished 50 per cent under 1914. That spells ruin for England. The recovery of Germany is necessary for the recovery of everybody. Economic ruin cannot be localized. Corpses are not healthy neighbors.

The present insanity spells ruin for France as well as the rest. She is the most self-contained nation of Europe, but she cannot live alone. Her private wealth is great, but her budget deficit is enormous. Instead of by taxation, she balances the budget by loans subscribed on the assumption of enormous reparations from Germany.

But the policy of securing reparations becomes more and more remote and visionary. Meanwhile the debt increases. More debt is created to pay interest. Where will this insanity end? When the French peasant finds himself with his safe empty, will he continue to lend money to pay interest on borrowings? He will discover that the economic and financial ruin of Germany could not end with the economic and financial ruin of England. He is beginning to make the discovery. France is showing ugly symptoms under the influence of the collapse of the mark. The present level of the franc is artificial, maintained on fiction. When that fiction no longer is tenable the franc will follow the mark and the present French policy will have achieved a complete triumph.

ACTION NECESSARY.

Unfortunately there is no prospect of a change in France while the present chamber continues. I am assured that in the provinces public opinion is more sensible, but the chamber and the French press are unteachable and a new chamber will not be elected for eighteen months. The present chamber will not listen to reason and any statesman who offered such a policy would fall. The elimination of Poincare, therefore, would be no remedy. He represents the mind of a chamber that would destroy any premier who dared tell France the truth. In the circumstances England, Italy and America will be compelled more and more to pursue an independent course.

The root of the catastrophe lies in America leaving Europe to stew in its own juices. Had America and England joined hands to impose peace in Europe, French policy would have been overridden. If worse yet is to be averted America and England must act. We have made no claim, but it would pay England to present a demand on France to pay six hundred million pounds sterling to be permitted to set her factories to work again.

VITAMINES AND HEALTH

Make no mistake, to be healthy, the body needs nourishment rich in vitamins. The child needs them in abundance to assure growth and strength; the adult to help sustain the body-forces against disease.

SCOTT'S EMULSION

OF PUREST VITAMINE-BEARING COD-LIVER OIL

is the ideal body-building food for a child or an adult. It is abundant in the vitamins-elements that science has found so needful for health and growth.

Just a little Scott's Emulsion, three times daily after meals, would be effective. Buy a bottle and start building your strength today!

Scott & Borden, New York, N. Y.

Society Happenings

Members of the bridal party of the Engestrup-Nielsen wedding at the Danish, Norwegian Church recently. (Left to right), they are: Miss Mildred Anderson, Mrs. Harold W. Nielsen, the bride, who was Miss Amy Engestrup; Miss Alice Marie Engestrup, her maid of honor, and Miss Evelyn Engestrup. The two little flower girls are Eleanor and Helen Olsen.

TRIBUTE PAID TO FORESTRY FATHER

WASHINGTON, July 15.—(United Press.)—One hundred years ago on Thursday (July 20) Franklin B. Hough was born. The name of this New York state lad will not enable you to recall that any monuments have been erected to him. He has erected his own monument, says the American Forestry Association in marking the date. Hough is the man who started what was to become the United States Forest Service. He was the first chief of the division, to which Congress in 1876 appropriated \$3000. That amount would not now pay the stamp bill of the service did it have to stamp its envelopes.

In the establishment of that work Dr. Hough erected his own monument, says Charles Lathrop Pack, president of the American Forestry Association, who adds:

"Dr. Franklin B. Hough is the acknowledged Father of American Forestry, and the American nation will always owe him a debt of gratitude for keeping at it until the forest service was established. There should certainly be a memorial forest named in honor of this man. He was graduated from Union College in 1843 and from Western Reserve Medical College in 1848.

"After his return from service in the Civil War as a surgeon he devoted himself entirely to scientific and literary work, and in the years which followed wrote many books and articles of importance. At last he was able to formulate his plan for execution of plans which resulted in the commencement of their management by the government.

"At the last moment before the close of the second session of congress in which the subject had been brought up, final favorable action was taken, and the law was passed establishing the Forestry Division of the United States Department of Agriculture. It was a victory won by Dr. Hough.

"Illustrative of the general lack of appreciation of this subject in those days an appropriation of \$3000 was made for three years' expenditures. Dr. Hough was appointed the first chief of the new division in 1876, and prepared the first reports issued."

Movie Machine in French Senate Hall

PARIS, July 15.—A motion picture machine and projection room have been installed in the palace of the senate, one of the most dignified legislative bodies in the world. Senators may now show their colleagues educational films illustrative of points they wish to drive home. A series of films illustrating life in the French colonies will be the initial program.

REFORMATION IN BERLIN.
BERLIN.—The police have carried their crusade against indecent "art" to the point where they arrest men carrying cigarette cases adorned with nude women.

Mr. and Mrs. John Thompson of 2855 Howe street observed their golden wedding anniversary Sunday, July 2, when a wedding breakfast for the family and reunion was held at their home.

All of the children and their families, including the ten grandchildren of Mr. and Mrs. Thompson were present. Twenty-eight guests were seated about the table. Mrs. G. K. Estes of Morgan Hill, eldest daughter, in behalf of her brothers and sisters, presented her parents with a gift from the family.

Many gifts and floral remembrances were received that day from friends in various parts of the state and the East. A reception was held at the home from 2 to 10 o'clock, about one hundred friends calling and extending their congratulations. Guests motored from Woodland and Fresno.

Mrs. Thompson was Miss Carrie Bart of Chicago, Ill., where the marriage of the couple took place, July 2, 1872. The couple came to California in 1876 and lived in the central part of the state for three years. They then moved to Oregon and Washington states. Returning to California they located in Oakland in 1886. Later they moved to San Jose, where they resided for 25 years, but have made their home in this city since 1916. They have ten children and ten grandchildren.

RICHMOND

Greek Home After Service in Army

RICHMOND, July 15.—George Zanes, part owner of the Gold Mine Restaurant on Macdonald avenue, who has just served 18 months in the Greek army, has returned to Richmond. Zanes left here two years ago to visit his mother and sister in Greece. While visiting his home folks he was drafted by the Greek authorities and forced to serve 18 months in the army. He saw fighting against the Turks, serving in the Medical Corps, where he acted as interpreter for the English and American Red Cross.

36 Autoists Held for Breaking Light Law

RICHMOND, July 15.—Thirty-six motorists were arrested last night by a posse of county and state speed officers operating along San Pablo avenue, for infractions of the headlight laws. Those arrested were ordered to appear before Justice of the Peace C. H. McCausland at San Pablo.

Officers engaged in making the arrests were F. A. Leber of the State Motor Vehicle Department, L. E. Buck, Bert Heath, E. P. Keefe and Merton Groom.

Material Shortage Checks Building

RICHMOND, July 15.—Shortage of building materials is holding up construction work on various jobs throughout the city, according to reports received by the Contra Costa County Building Exchange. The impetus in building lines during the past few months has completely absorbed the excess carpenters and building laborers, the exchange reports.

Richmond Suffers Slight Fire Loss

RICHMOND, July 15.—Richmond suffered comparatively slight fire loss during the past fiscal year, according to the report of Fire Chief Roy Lemoin, as read at the last meeting of the City Council.

The fire loss for the year was \$34,750, divided as follows: Loss on buildings, \$15,170; on contents, \$18,416; and on autos, \$1,164.

Elks to Play for Aroyo Patients

Frank Garrison, who for many years has been active in welfare work for the patients in the tubercular ward at Arroyo Sanatorium, has arranged for the Elks Club band to play for the patients. There will also be singing in connection with the program.

Unions to Discuss Political Situation

RICHMOND, July 15.—Representatives of the labor unions will meet tomorrow afternoon at the Labor Temple in Richmond to discuss the political situation. All parts of the county will be represented.

ONLY ONE CANDIDATE

RICHMOND, July 15.—Since the withdrawal of Helms Kammer as a candidate for the assembly from Contra Costa county, Attorney Thomas M. Carlson of Richmond has no opposition. Although there have been rumors of other candidates, the assembly, none has materialized.

COLLEGE GIRL IS SUCCESSFUL STOCK GROWER

WOODLAND, July 15.—Miss Anna Anderson, former Winters girl, but now manager of her own cattle ranch, is visiting in Woodland after an absence of several years. After graduating from the San Jose Normal Miss Anderson took up teaching in Woodland, but found it too uninteresting, so bought herself a great cattle ranch in the Coast Range section. Now she is managing a crew of cowboys during the summer season and spends the winter months at her home in Berkeley, which she closes about March each year. Miss Anderson rounds up her own stock and superintends their branding.

Big Traffic Sign May Be Installed

SAN LEANDRO, July 15.—The establishment of a large stationary traffic sign at the corner of East Fourteenth and Davis streets, San Leandro, is being considered. The proposal will be presented to the board of trustees at a future session.

CULTURED PEARLS EASY TO DETECT

WASHINGTON, July 10.—Very widespread interest was aroused last about one year ago in the London pearl market because of disclosures regarding real and "cultured" pearls, reports Consul General Skinner, London, to the Department of Commerce. Numerous articles in the press indicated that Japanese merchants were introducing "cultured" pearls upon a considerable scale and that the cultured pearls might be detected by experts with great difficulty, if at all, could identify them. Fear was expressed that these "cultured" pearls might become so abundant as to seriously affect pearl values generally. It was considered in the trade that a critical position had arisen as a result of which special committee was appointed to deal with the matter. The finding of this special committee is now announced publicly by the London Chamber of Commerce as follows:

"Cultured pearls have been on the market for some considerable time and were well known and were sold as such; that the Japanese cultured pearl was merely a head of mother-of-pearl covered with a coating of pearl substance; that it differed in appearance and in no way compared with the original pearl; that it was only produced in small sizes and was easily distinguishable; that mother-of-pearl bead, however treated, could be of little value, and that the highest authorities, while recognizing the value of the cultured pearl, were of the opinion that the true oriental pearl would always maintain its value as a gem on account of its unique beauty and rarity."

Women Have Part In Hawaiian Politics

HONOLULU (T. H.), July 15.—Nineteen women have been chosen as delegates to the coming Republican convention which will draw up a platform for the party in Hawaii. This is a considerable increase over the number of women ever sent to a previous convention and is taken by the politicians here to indicate rapidly increasing strength in the female vote.

Changes in the Organic Act to permit women to hold political office in the territory are now pending in Congress, and the likelihood of a woman being sent to Washington as delegate to Congress in 1923 is now seriously considered.

Japanese Worry as Shipping Declines

By International News Service.
HONOLULU, T. H., July 15.—Officials of Japanese steamship lines operating between the United States and points in the Orient are worried about a recent falling off in passenger traffic, which they attribute to sharp competition now being offered by American-owned lines, according to a report in Nippu Jiji, a leading Japanese language newspaper of Honolulu.

One American line particularly, operating ships for the United States shipping board, has greatly increased its passenger-carrying facilities in the last two years and is said to have cut into the business of the Japanese lines very heavily.

Cultural Education Needed, Says Speaker

WESTFIELD, Mass., July 15.—Henry Turner, U. S. director of the Cleveland School of Art, speaking before the graduating class of the Normal School in this city, declared that "bootlegging, loafing, gossiping and other forms of useless activities would disintegrate the entire social system if the majority of working people had four hours of leisure time."

Bailey emphasized the need of making the most of leisure time, saying that the present level of intelligence would disrupt the entire country if people weren't kept busy. "A cultural education is as important as a practical education," he said.

18.8 EGGS PER HEN AVERAGE IN SANTA CRUZ TEST

SANTA CRUZ, July 15.—The 620 hens strenuously contesting for first honors in the California farm bureau egg laying contest at Santa Cruz finished their ninth month with a monthly production of 59.9 per cent or an average yield of 18.8 eggs per hen. The average monthly production from the beginning of the contest, October 1 to July 1, was 51.3 per cent or 61.3 eggs per 100 birds per day.

Again Alex Stewart's pen wins the blue ribbon for high pen for the month with J. H. Hanson's Poultry Farm of Corvallis, Ore., second and L. A. Thorneville's pen third. Ford, Gray, Boehm and Noel, Russell, Kinnmont Poultry Farm, and Geo. Wood are the others whose pens are among the nine high pens this month.

Not only is Alex Stewart's pen high for the month but it again leads the contest to date and his pen, No. 38, is both high hen to date and high hen for the month. Hanson's pen is still second high to date and J. J. Shore high third.

L. A. Thorneville's No. 4 is second high hen to date and Alex Stewart's No. 41 stands third. Stewart's pen No. 38, Levi Mellon's No. 80, W. J. Neef's No. 70 and Webb's No. 33 tied for blue ribbon for high hen for June with a yield of 28 eggs, but the ribbon went to Stewart as per the contest rules, as his pen had a higher record for the previous month.

Four hens laid 28 eggs each, 7 laid 27 and 16 laid 26 in the 30 days of June.

The monthly feed consumption per hen was 3.07 lbs. of grain and 4.02 lbs. of mash. This is at the rate of 10.3 lbs. of grain and 13.4 lbs. of mash per 100 hens per day.

Girl Sets Unique Record At School

YOUNGSTOWN, Ohio, July 15.—Finishing her high school education at the age of 15 years, Miss Julia A. Ipcar, of this city, has a unique record.

When Miss Ipcar graduated from Rayen High school here this month she completed a four-year course in three and one-half years.

LABOR NOTES

Reporting to the Building Trades Council at its last regular meeting, Joseph Lloyd, business representative, stated that the situation is daily improving in the building trades. Practically all of the contractors are calling on us for men," he said, "and all of our mechanics are kept busy." This is a practical demonstration that contractors know that their best men in the building industry are to be found in the building trades unions. We are able to put our men to work, and keep them at work. The future is bright."

Secretary W. A. Spooner reported having received a letter from the San Francisco Iron Trades Council asking that Alameda county allow the Newark Stove Mounters to affiliate with San Francisco. The request was granted.

Retail Clerks' Union state that with few exceptions the 6 o'clock closing is endorsed and lived up to by Oakland business men. There are only some three business houses that keep open after that hour. The larger business firms have lived up to the early closing movement for some years. The Clerks' Union ask that all shopping be done before 6 p. m.

Mr. V. B. Burrows and Rabbi Coffee have been granted permission to address the council next Monday evening regarding the criminal syndicalist law. All delegates are asked to attend.

John J. Dean, organizer for the Pacific Textile Workers of America, addressed the council last Monday evening. He gave much interesting information regarding the striking textile workers, and had issued credentials to appear before all of the labor bodies in Alameda county.

President John C. Goad of the Federated Shop craft, addressed the Labor Council giving a brief resume of the situation. All of the men are standing firm, feeling absolutely sure of their ultimate victory.

Delegate Copey of the Bakers' Union reported that his organization had adopted the assessment for the Oakland Labor Temple. Similar reports were made by Delegate Fitzgerald of the Milk Wagon Drivers' Union, Delegate Roberts of the Engineers, Delegate Risley of the Steamfitters, a delegate from Carpenters' Union No. 1187, Delegate Griffin from the Retail Clerks' Union and representatives of some six other organizations.

The following resolution introduced by Chairman Hurley was adopted unanimously:

"Whereas, the charter of the city of Oakland is now about fifteen years old, and

"Whereas, many increases of salaries have been granted in many lines to public servants, except those of our servants who are directly in charge of our governmental affairs, and

"Whereas, economic changes, conditions and opportunities for the men now heading the city government appear that we feel warrants them to greater consideration than they had in the past; therefore be it

"Resolved, that the Central Labor Council of Alameda county request the council of the city of Oakland to submit to the voters of the city of Oakland, at the next election, a proposition embodying charter amendments which would increase the salary of the city mayor to \$7500 and the city commissioners to \$6000 per year."

About 150 members of Stationary Engineers' Union No. 507 gathered last Tuesday night for the organization's annual banquet. The affair, at which the members also entertained their wives and many of their friends, included an elaborate turkey dinner, speeches, amusement features and dancing.

Among the guests present were members of the Ladies' Auxiliary. J. H. O'Donnell of San Francisco, spoke in opposition to the proposed water and power act.

E. Peters, retiring president, was presented with two \$50 Labor Temple bonds in appreciation of his services to local No. 507 during the past year.

The latter part of the evening was spent with music and dancing.

WOMAN TEACHER OF ST. LOUIS PRAISES FLAPPER

Lack of Home Training Is Blamed For Shortcomings of Modern Girls.

By KARL M. ELLISH, International News Service Staff Correspondent.

ST. LOUIS, Mo., July 15.—Is the modern girl a home maker or a home breaker?

How do bare knees, painted lips and bobbed hair square up with the doctrine of home-made apple pie, biscuits and baby tending? What kind of a matrimonial bet is the modern maid and what chance for happiness does the man have who marries her?

A mighty good bet, says Miss Edna Kissinger, veteran teacher of domestic science at Soldan High School, St. Louis, best-known public secondary school. Miss Kissinger has been teaching Soldan girls the art of home-making for years and in her opinion the modern girl will "stack up" against any of them.

"It would say unhesitatingly that the type of girl who passes through our classes is the most promising home-maker material in the world," said Miss Kissinger.

"The girls take naturally to domestic science. They are very proud of the hats and dresses they make here and the simple meals they learn to cook. I've never heard one of them complain about washing dishes."

"Blame for the shortcomings of the modern girl is to be attributed to mothers, Miss Kissinger declared.

"Girls nowadays, as I see them, a chance with a girl like that with much more confidence than with are intelligent, wide awake and ready to look life right square in the face. If I were a man I'd take one of the ineffectual little good-goddies of a generation ago."

With Attendance of
Near 1000.

SAN FRANCISCO, July 15.—The Furniture Dealers' Convention and Market will open tomorrow in the Furniture Exchange at New Montgomery and Howard streets. It is expected that there will be about 1200 furniture dealers present, representing a large part of the furniture trade in the West.

The Furniture Exchange was constructed recently at a cost of \$1,000,000 and houses nearly 1000 separate exhibits from all parts of the United States.

Henry J. Moore is president, and Thomas T. Greaves is vice-president of the Furniture Exchange. Fred A. Carrick is president of the Furniture Association.

BIG ATTENDANCE EXPECTED. The semi-annual meeting of the furniture dealers in San Francisco has been growing in importance, and the attendance this time will be greater than ever before. It is announced that one of the added features of the convention will be a series of talks by artists and decorators on various angles of the subject, "The Home Beautiful."

Under the direction of the San Francisco Furniture Association a program of entertainment has been arranged for the visitors, to be featured by a luncheon in the ballroom of the Palace Hotel, where each day during the week of the convention, experts will discuss the various phases of the furniture industry.

At the Furniture Exchange each night informal talks will be given by Bernard C. Jackway, University of California Extension lecturer, on interior decoration.

The territory represented in the convention extends from Denver west to Honolulu and from the Canadian border south to the Mexican line.

CONVENTION PROGRAM. The convention program will be as follows: Monday—H. A. Saxe, president of the Retail Furniture Association of California, will speak at Clifford A. Williams, general manager of the Retail Furniture Association of California; "My Impressions of the Furniture Business."

Tuesday—Miss Marceline d'Alroy, "The Woman Who Buys and the Man Who Sells."

Wednesday—A. L. Crane, publicity director Furniture Exchange, "Advertising Mediums."

Thursday—"Stove Day"—J. O. Smith, secretary and general manager of a furniture company in Los Angeles, "The Stove Business From the Retailer's Point of View."

Friday—Bernard C. Jackway, extension lecturer, University of California, "Coining Good Taste Into Money."

Saturday—"Dealers' Day." The annual banquet and show is to be held Friday evening in the Colonial ballroom of the St. Francis hotel.

Bernard C. Jackway will lecture to the delegates, Monday, Tuesday, Wednesday and Thursday evenings at the Furniture Exchange building.

Romance at U. C. Is Revealed in Engagement

MISS GRACE JACKSON, college student, whose engagement to university man has just been disclosed. McCullagh photo.

Portland Student Will Wed Berkeley Girl, Friends Are Being Told.

BERKELEY, July 15.—Being students at the same university and worshippers at the same church, Miss Grace Jackson and William Earl Shriber have decided to share the same name together.

News of the engagement of Miss Jackson, the daughter of Mr. and Mrs. J. A. Jackson, 1533 Francisco street, and Shriber is being informally told to friends of the young people. Miss Jackson is a junior student at the University of California and is in training as a nurse at the University hospital in San Francisco. Shriber is registered at the university from Portland, Ore., and is a junior in the college of mechanics.

Both Miss Jackson and Shriber are prominent in young people's work at Trinity M. E. church and have a wide circle of friends about the bay. No plans have been made for the wedding as yet.

Fertilize Your Scalp

Falling Hair and Baldness Due to Hair Starvation. Hair is a plant that lives on blood, just as grass lives on water. If your hair is dry and brittle or comes out easily, it is simply a case of hair starvation.

This condition results from deposits of dirt, lime and acids in the scalp tissues, which surround the hair bulbs and prevent them from receiving nourishment from the blood. Like blades of grass in dry alkali soil, the hair must wither and die.

The hair bulbs, however, do not die. They merely remain dormant until the scalp tissues are cleansed of impurities that surround them. The scalp is then supplied with a new crop of hair will begin to grow.

The Sevin Hair Growth Dissolver and neutralizes the impure matter imbedded around the hair bulbs, so that the blood can again circulate freely and supply material for hair growth. It is sold on an absolute guarantee of money back if it fails to grow hair on any head.

For special advice or treatments, call on Prof. J. M. Sevin, 702 North St., San Francisco. Hours: 9 to 5:30. Advertisement.

Our Great Home-Makers' Sale

begins its second mighty week tomorrow, Monday

Hosts of New Furniture Bargains on Sale for the First Time, and at Terms Convenient to You. A Breuner Event of Widespread Interest

Stupendous Savings Offered on Rugs and Furniture for New Home-Makers

OAKLAND'S building record for June, in fact for all the months so far of 1922, has justified Breuner's merchandising prediction of a greater Oakland. Breuner's rejoice in Oakland's wonderful record of building permits, totaling \$3,381,045 for June. Other East Bay cities have made remarkable strides. Breuner's were confident of this growth, and prepared for it. Ample stocks of furniture and rugs, draperies and home furnishings are here for the new home-builders.

In addition, Breuner's provide a Convenient Payment Method, that you may enjoy the use of your furniture while paying for it.

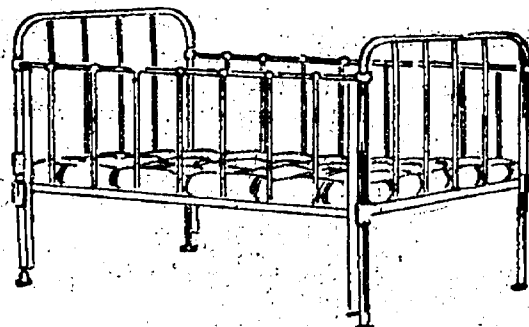

Now, most timely of all, comes this Home-makers' Sale, with its glad message of savings on quality merchandise, needed by the new Home-builder or the already established Home-maker. Visit Breuner's—wherever you see a yellow tag you will find a Furniture or Rug bargain—and there are hosts of them.

To have the graceful rounded figure, from the full bust down to the outside of the thighs, that will show you what MASTIN'S Vitamin Tablets will do for you.

MASTIN'S VITAMON
The World's Standard Used by Millions

EASTERN SIBERIA HAS MANY NOVEL, UNUSUAL CITIES

American Public in the Dark
Regarding Newest Republic
in the World.

By FREDERICK MCCORMICK,
Special Correspondent of The Ok-
land TRIBUNE. Author of "The
Flower Republic," "The Menace
of Japan," "China's Monuments,"
"The Tragedy of Russia."
(Copyright, 1922, by Frederick
McCormick.)

The world's youngest nation is
in East Siberia in territory nearer
to the United States than to any
other Western power.

And yet when a delegation from
this nation arrived in Washington
to ask for recognition, the public
was at sea. Not one American in
a thousand knew its name or
where it was or ever had heard
of it.

Transbaikalia, the regional
stronghold of this new country,
became independent and, under
the name of the Far Eastern Re-
public, claimed the district con-
necting with the Pacific. In this
unknown land are strange cities.
Three are famous for treaties
ancient and modern. At least five
are capitals of these being
Kaidolovo, at the junction of the
Stretensk and Trans-Siberian rail-
ways. Here was a famous prison
on the River Shilka, which was
the distributing point of convict
exiles sent to the imperial "hab-
itant mines" in the Nerchinsk dis-
trict.

Kara and Akatuf are places im-
mortally linked with Peter and
Paul. In 1858, in Petrograd, Kier-
koff Central prison, Tiumen Per-
warding prison, the centuries-old
tsarist exile system and Russian
revolution, and are immortalized
in literature that has been trans-
lated into all civilized languages.

Barguzinsk, the exile home of
Madam Breshkovskaya, "mother
of the revolution," is capital of
the fur world.

PREDATE CAROLINA.
Transbaikalia has cities older
than Irkutsk, the capital of all
East Siberia. They were settled
before South Carolina was colon-
ized. Nerchinsk was the depot of
trade with the Amur and military
base of war with China for the
Amur valley, in which Russia was
defeated. A famous treaty was
signed there and it became the
capital of trade with China. Later
Russia acquired the Amur. The
fixed population of Nerchinsk
never reached ten thousand, but
its culture and material posses-
sions astonished travelers. For
years it had the largest mirror in
the world—a huge glass brought
from the Far East and im-
ported via the Amur river, where
it was carried on a specially con-
structed barge.

At the other end of Trans-
baikalia, on the Selenga river, is
Seleninsk, in which all that is
national in the Buriat race is con-
centrated. Seleninsk has two sites,
the new one on ground above river
flood, and the old. It is the em-
bodiment of Transbaikalian antiq-
uity. "Seleninsk" is distinguished
for other things. The military forces
of Russia's first advance against
China were besieged here in 1687,
and the Treaty of Nerchinsk, which
ended the conflict, was revised
here in 1727.

About halfway between Ner-
chinsk and Seleninsk is Petrovsk,
where Peter the Great opened iron
mines and built a fortress. The
mines and the fortress are now
ruins. The mine is used to fortify
East Siberia have been made.
Today the production of pig-iron
at Petrovsk is in excess of re-
quirements.

Verkhne Udinsk has a famous
church as old as the church and
ruins of San Juan Capistrano.
Verkhne Udinsk was Transbaikalia's
first capital and became an ad-
ministrative center. It is the revo-
lutionary center of the revolution
for the soviet army of occupation in
Outer Mongolia.

CHITA IS CAPITAL.
Chita is the capital of the
youngest republic, and one which,
for a year was headed by a lawyer
from Chicago. Transbaikalia is
one of the world's high republics;
and as capitals go Chita is high,
being 2148 feet above sea level.

This city owes its importance
to the thousands of them and their
descendants it has been a capital.
When the original exiles began ar-
riving it was only a Cossack camp
on the Great Siberian Railroad.
Then it became the capital of the
province with only a few hun-
dred inhabitants.

Chita is the metropolis of
Transbaikalia, the center of about
100,000 people. It has the
Catholic Cemetery as its chief
shrine, a museum, wooded park,
theater, polytechnic and other
schools, hospitals, power and light
plants, waterworks, mills and fac-
tories, hotels, churches and im-
portant administration buildings.

LOAN SHARK'S PRIZE.
OXFORD, Eng.—Richard Bacon,
town clerk, testified in his bank-
ruptcy proceedings that he paid
\$5400 on loans of \$2600 from loan
sharks and still owed \$2723.

WIFE GOT LOVE NOTES; DIVORCE

SAN FRANCISCO, July 15.—
After he claims to have found love
letters from a man in Nemmark in
his wife's possession, George C.
Van Evelyn told Superior Judge
Graham today that he noticed
something peculiar about the con-
duct of his wife. The mistress, he
said, were addressed to Miss Violet
Sorenson. He became suspicious,
he said, and on December 1, 1921,
he found a note from his wife,
which read:

"I have come for my trunk. I
am going to the country. I have
after he learned that she had
taken her six-year-old son and
gone to Oakland. The couple were
married May 16, 1915. Van Evelyn,
who lives at 235 Eddy street, was
granted a divorce.

Oil Macadam to Be Used on City Streets

Oil macadam for pavement of
the city's streets receives no com-
mendation, but it has to be done,
according to Superintendent of
Streets W. W. Harmon, who as-
serts that only by this relatively
cheap but inferior paving can the
700 odd miles of the city be paved.
Harmon is now trying to prevent
the \$150,000 estimate for the
paving of E at Potomac street
from elimination from the budget.
"East Fourteenth, a main traffic
highway, should be permanently
paved with the best concrete-
asphalt surface," says Harmon.
"Part of this money comes from
the county and part from the as-
sessment district, but the city must
also pay a share, and we hope that
the city can find the funds. The
paving is vitally needed."

"I am no admirer of oil or water-
bound macadam. They do not last
and cannot stand up under heavy
traffic; but we have to use it, es-
pecially in poorer districts."
"It is not a easy job to try
laying asphalt, at \$10 per square
foot, in front of property worth \$2
or \$5 per front foot. The prop-
erty-owner naturally objects, for
his property cannot stand the load.
Consequently we have to use the
cheaper though inferior paving."

Huge Booze Cache Located by Hounds

CLARKSBURG, W. Va., July 15.
—Bloodhounds owned by Thomas
Everson, deputy sheriff, are now
known as "hooch hounds." Put on
the trail of robbers who pilfered
the apartment of C. W. B. Chap-
man, general claim agent of the
Monongahela Power and Traction
company, the hounds followed a scent
to a vacant house, in upstairs rooms
of which officers found a complete
distillery, one of the largest yet
found in the country, and hundreds
of bottles lying around.

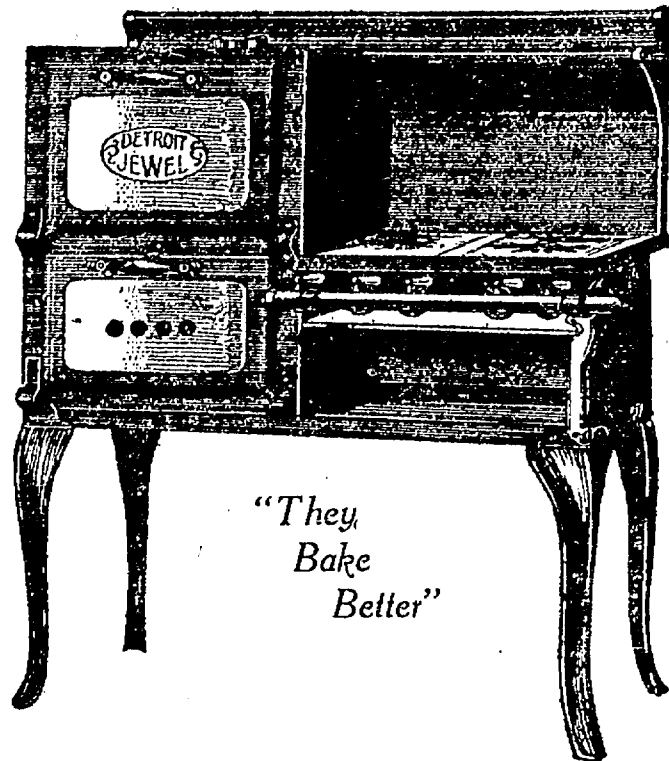

CHARGED WITH BAD CHECK GAME

SAN FRANCISCO, July 15.—
William Russell, an automobile me-
chanic of 662 Oak street, Oakland,
intent on obtaining sufficient
money for the needs of himself and
his bride of ten days, is alleged to
have embarked on a career of check
passing, and was arrested today by
private detectives. His bride, the
former La Verne Withers of Oak-
land, is said to have left him, fol-
lowing her discovery of his source
of income. The couple were mar-
ried July 5.
It is claimed that Russell passed
a check for \$29.55 and that he had
two other checks in his possession
made out in favor of local retail
establishments when he was
caught. The checks were endorsed
under the name of Karl Strange.

Abatement Sought Of Hunter's Cafe

SAN FRANCISCO, July 15.—
Abatement proceedings were filed
today in the Federal Court against
Hunter's Cafe, 1352 Park avenue,
Emeryville, in connection with al-
leged violations of the prohibition
laws. The really as well as the
cafe itself was attacked in the suit.

dants, indestructible French pearls,
hair ornaments, sports combs, white
bone beads, necklaces, bracelets, sil-
ver chains, crystal beads, earrings,
etc.

—First Floor, Capwells.

Monday—the First Ensemble Presentation of Fall Styles

In Windows and Departments

Like a Gypsy band, rich in color, full of mystery, Autumn ap-
proaches with its van of new styles—bringing from the workshops
of the great fashion originators of this country and the old world the
latest ideas evolved for a new season.

In this Book of Autumn Fashions it is written: Malay, Suchard, Zanzibar,
Genoise, Cinder, Fallon, Marten, Hawaiian, Sorrento and Java—all being
the names of some of the new shades for which artists have searched high and
low. And color is just one angle of the beauty revealed by the new modes.

The handsome hues find delightful parallel in distinguished lines, in nov-
elty of garniture and in fabrics of rich texture.

The Coats and Wraps

are stunning interpretations of the new modes. Developed of marleen, pan-
velaine, ardenna cloth, gerona, tarquina, marvella and new sports fabrics.

Comfort spelling wrappy effects with novelty sleeves and collars, stunning
panels, and blouse styles again inspired by Russia.

The furs mostly in evidence so far are caracul, squirrel and wolf.

Suits Smartly Tailored

The suit is to have high favor in the realm of distinctive apparel. Superbly
tailored models vie for favor with the aristocratic fur trimmed ones.

Skirts are longer; 9 or 10 inches from the floor but so far American
fashion designers refuse the ultra long skirt.

Imported Afternoon and Dinner Frocks

express the last word from Paris—apparel that beautifully fits into its set-
ting—the opera, the formal reception, the ball room and achieve dignity and
charm from their Spanish and Italian style source.

Of chiffon, georgette or flat crepe handsomely beaded. In wonderful soft
greys, greens, blues, navy, rust, brick, fire, Nile, henna and white. Some in
the new sleeveless models.

Although imported their prices are moderate ranging from \$49.50 to \$85.

Clever Wool Frocks

Of poret twill, tricotine and tricotine show a tendency toward greater
elaborateness in trimmings of braid, embroidery or beads. Prices \$29.50
and up.

—Second Floor, Capwells.

Millinery

The initial displays are wonderfully comprehensive—far greater
in quantity than could be expected so early. Hats that express grace
in outline and suppleness of material.

Picturesque models for dress occasions and the street developed
of duvetyn, satin, rich velvet, velvet and felt combinations, and
charming feather turbans. Such millinery artists represented as

Bendel	Consello
Cupid	Bluebird
Rawak	Belnord
Andrea	De Marinos and others

The colorings vie with those of Dame Nature herself. Beautiful, soft
Autumn browns, rich blue of sky, purple, orchid, grays, foliage greens and
flame color mark this coming season as a gay one.

You are cordially invited to visit the Millinery Section.

REALTORS FAVOR CHANGING THE FRANCHISE LAWS

Would Give Control of All Franchises to Railroad Commission.

Convinced that the most feasible solution of the suburban transportation problem now embarrassing California communities is that of putting into the hands of the State Railroad Commission authority to rent and regulate franchises for the operation of street railways, suburban lines and motor vehicle passenger enterprises, the Oakland Real Estate Board has enthusiastically approved recommendations of the California Real Estate Association, which has initiated an amendment to the constitution, which is to be submitted to the voters at the next general election.

Declaring decentralization, a general movement from city to suburbs or rural districts, to be the next great social change in American civilization, Charles C. Wilson of the California Real Estate Association addressed Oakland realtors on Wednesday last, pointing out that the successful guidance of such a movement depends very largely on intelligent and efficient control of the realty business.

That such a movement cannot be successfully conducted without adequate street railway extensions, development of suburban railways and of motor vehicle transportation lines was declared by the speaker to be fundamental. He called attention to the present financial condition of practically all street railway enterprises as such as to prevent any extension or new development of this character and urged that steps be taken by the citizens of this state to put such services in a position to render the service this predicted great social movement will require of them. "Muzzle not the ox that grindeth out the corn," Wilson quoted as a biblical text which applies to the present transportation problem in California. "We are not especially concerned with the financial welfare of traction companies as such, but every citizen, especially every realtor in this state, must be tremendously concerned with the ability of transportation concerns to render adequate service."

Oakland has been growing at the rate of a "porcupine's tail" for more than a decade, during which time there had been no street railway extensions. The almost unanimous desire is to get away from the high pressure of the average American city, as exemplified in the apartment house, and to the establishment of individual homes in the many most beautiful suburban areas which fringe this community. Obviously such an ambition cannot be realized except by the establishment of adequate transportation facilities.

"The prevalent custom of issuance and control of franchises as practiced in practically every California city has resulted in a chaotic situation of such embarrassment to the transportation companies, especially noticeable in the Eastbay cities, as to make it a physical and financial impossibility for such enterprises to extend their lines into new territories, thereby making possible the decentralization of urban society."

Attention of the California Real Estate Association was directed to this situation at its last annual convention in January at the Hotel Oakland. At that time Fred E. Reed of this city was appointed chairman of transportation committee and Guy W. Wolf, expert statistician of San Francisco, was employed as director of the research department of the association. Reed's committee, in cooperation with Wolf, made an exhaustive study of transportation conditions in California and brought in a report which, approved by the directors of the association, resulted in the initiation of the constitutional amendment to which Wilson referred.

TYPEWRITERS IN THE WORLD. More typewriting machines are used in the United States than in all the rest of the world.

Making Ready for Opening of New Market

Artistic Entrance of the new Eastbay Market, now practically completed at the corner of Seventh street and Telegraph avenue. The various booths are being installed in the building, and everything will be ready for the opening which is to be held on Saturday, July 29th.

More than fifty additional workmen were taken on last week at the East Bay Market at Nineteenth street and Telegraph avenue to rush the building to completion in time for the opening date, which has been set for Saturday, July 29. The various booths and stalls are beginning to take shape, while all the rough work on the building itself has been completed. All that remains to be done is the finishing and painting of the interior of the stalls, the walls of the market itself having been already painted a spotless white.

"While endless pains have been taken to secure the highest degree of sanitation in the new market, we have not overlooked the merchandising end of the business," said Senator Arthur H. Breed, president of the East Bay Corporation, in discussing the new venture yesterday. "The policy of the East Bay Market will be one of absolute honesty in all its dealings. A clause in the lease of each tenant provides for the cancellation of his lease upon proof being shown that he has misrepresented any goods for sale in the market. This clause will be enforced rigidly, and the housewife in the many most beautiful suburban areas which fringe this community. Obviously such an ambition cannot be realized except by the establishment of adequate transportation facilities."

"The availability of the market to the residential districts of the East Bay cities will, it is predicted, prove one of its main attractions to housewives. Automobile traffic can get to the market without passing through the crowded downtown section and drivers are assured of ample parking facilities by the acre and a half of ground behind the market, which will be used for parking the cars of the market's customers."

"All the street cars of the city lead practically to the doors of the market, thus making it easy for the shopper without an automobile. The market habit has not yet taken hold of the people of the East Bay cities, but it surely will when the realization of the cheaper prices and better quality of goods to be found in the East Bay Market dawns upon them."

Elaborate plans for the opening of the market are being made by the management and by many of the tenants. Special sales will be held at practically all booths and many souvenirs will be distributed

OAKLAND REAL ESTATE BOARD OFFICIAL BULLETIN

On recommendation of President Frank Flint Porter of the Oakland Real Estate Board this organization has pledged itself to present to the city one of the series of electroliners with which Lake Merritt is to be surrounded in carrying out the city's plans to make permanent the scheme of illumination so greatly admired during the recent Shrine convention. Formal action approving such a step was taken by the board at its last meeting of the board, at which time discussion indicated that several individual members of the organization would probably present similar electroliners privately, or, if permitted, on behalf of the organization.

For the purpose of outlining to members of the organization the various items proposed for the Oakland Real Estate Board's achievement program, the achievement committee will have full charge of the regular luncheon meeting of the board at the Hotel Oakland on Wednesday next, July 15. Reports from various subdivisions of this committee will be made as per the program outlined at the last meeting of the committee held Thursday evening.

On recommendation of Edwin T. Kessler, state real estate commissioner, and at the request of various real estate boards, the California Real Estate Association has prepared a series of standard forms free. Arrangements for two band concerts and a series of public addresses by officials of the market and others have practically been completed.

It is planned by the officials of the market to have the building itself completed a week before the official opening date to permit tenants to prepare their booths and lay in stocks so that every booth will be prepared for the opening day.

Of various documents in customary use in the real estate business and will shortly issue copies to all members throughout the state, forms for exclusive authorization to sell and for deposit receipt are now ready for distribution. Forms for deeds, mortgages and deeds of trust are now being formulated by a committee of the association in cooperation with representatives of the State Recorder's Association and of the state organization of title companies.

That the housing situation throughout the United States, serious as it is in many quarters, may be met through the logical working out of supply and demand, is the opinion of Roger S. Babson, one of the foremost students of finance and economics in the United States. Comments on this subject by Babson recently published in eastern realty magazines were reprinted against regarding the home shortage as a hopeless problem and reminds them that it, like other problems, is to be solved largely through supplying the demand.

Babson attributes the present shortage of homes to three main reasons, as follows: First, the high cost of building materials. This in turn is largely due to freight rates. We must look to the Interstate Commerce Commission to correct this. Many producers and distributors of construction materials also must cut prices still further.

Another reason is the high cost of labor. This is a matter for action on the part of labor leaders. They should recognize and teach their men that their yearly income is the product of wages per day times the number of days worked. The net result of reducing wages and increasing efficiency would be to increase the workers' annual income. A reduced wage scale and more efficient work now would mean that much more building

MORSE ESTATE BEING OFFERED TO THE PUBLIC

Splendid Property Is in Process of Being Subdivided.

Work is progressing in the subdividing of the Morse home on Seminary avenue. The main driveway through the attractive Morse grounds, which was for many years a show place of the city, is now being widened to the regulation street width and will be an extension of scenic way. This extension will open the block through to Fifty-fifth street where many new homes are going up in the Maxwell Park district. The California Subdivision Company state that they have instructed the engineer entrusted with the work of preparing Oakland's latest subdivision to preserve as far as possible the park-like beauties of this charming home section.

The improvement of the Morse estate on Fleming avenue is now completed with macadamized street, concrete sidewalks, sewer, water, gas, electric, telephone, cement curbs and gutters. Those wishing to get settled at once in this attractive section can secure large homesites on Fleming avenue, state the developers. A representative of the California Subdivision Company will be at Fleming and Fifty-fifth avenue Saturdays and Sundays, according to the company. With the record of a new home started each working day in this district and the opening to the public of such attractive properties as the Morse home it will not be long before this section will be well in front in home development, is the opinion of keen observers of the city's development.

would be forthcoming. This fundamental principle should be recognized.

The high cost of money has been a serious factor in curtailing building during the past few years. Investment has been an even more serious deterrent. We have been spending nearly all of our money on so-called consumable commodities during the past years. There has been practically nothing left for building. The banks can help the situation by pursuing a more liberal course with regard to granting building and real estate loans. Fundamentally, however, this money question will be righted only when the people, themselves, adopt the habit of saving.

What really is needed as much as anything else today is an earnest endeavor on the part of the people to produce more than they spend and save the difference. Money in the savings bank or other savings institutions operates at once to finance new building and thus to relieve the housing situation. Without such accumulation of surplus capital the nation is powerless to provide adequate new building. Legislation will not do it. Resolutions adopted by public spirited associations will not do it. In the final analysis, the solution of this problem depends upon the attitude of mind which the people adopt. If they adopt saving and prudent spending, instead of waste and extravagance, the housing problem, as well as other vexatious conditions, will right themselves and business will again move along the road to prosperity.

New Firm Comes to Oakland

Heads of the Deckelman Brothers Company, who have opened a new store in Oakland. From left to right, CYRUS D. DECKELMAN, H. A. DECKELMAN, President; and E. H. EPEBETH, Vice President and General Manager.

The invasion of Oakland by the cutlery firm of Deckelman Bros. Company marks another step in the recognition of the Eastbay district as a great buying center. Deckelman Bros. Company has a statewide business in cutlery and barbers' supplies, and they have been serving that trade through their main San Francisco house. But the growth of the Eastbay district has been so great that the company has finally established a complete

branch in this city that equals in size and stock the San Francisco house.

The new house has been located at the corner of Seventeenth and Telegraph avenue. Here is not only a complete, exclusive cutlery store, but a barber supply house where can be found not only barbers' tools, but chairs and all kinds of equipment from furniture to cosmetics.

The invasion of Eastbay business by San Francisco firms continues.

PINEHAVEN STILL ATTRACTS CROWD

The interest in summer homes and camp sites in Pinehaven is now at its height, according to the salesmen in charge of this work. While there yet remain many choice locations, both as to view and lay of land, those intending to take advantage of the modest price asked for this property had better make their selection as quick as possible, according to the information being given out at headquarters. The sale of this land in the beautiful hills in back of Piedmont has proven beyond a doubt that this side of the bay has a charm and appeal as strong as the heretofore more favorably known sections in Marin county. Oakland has at last secured its own recreation reserve for summer and week-end activities and the public's appreciation of this fact is being proved with every week-end sale at Pinehaven.

Consolidating Big Irrigation Plants

South Feather Land and Water Company, supplying water for irrigation for approximately 2000 acres in Butte, Yuba and Plumas counties, has petitioned the Railroad Commission for an order authorizing it to sell its system to the Oroville-Wyandotte Irrigation District for the sum of \$200,000. The sale is contingent upon the district's voting a bond issue. This is the second application filed within a week of a private company to sell to the irrigation district. Palermo Land and Water Company, supplying 2700 acres of land in Butte county, has also requested permission to dispose of its canal rights and water rights to the irrigation district for \$200,000.

CONSTRUCTION BY THERMO-WALL PROCESS BEGINS

Home and Commercial Garage Under Way; R. O. McCline Takes Agency.

Work was begun last week on the first building to be erected in Oakland by the Thermo-Wall Construction Company. This marks a new departure in building, not only for Oakland, but for California, as this is the first building to be built by this process in the state. Considerable interest has already been displayed by home-seekers, architects, builders and engineers and it is predicted that the new process will be generally adopted and result in material changes in building construction.

Thermo-wall construction consists of a reinforced concrete wall, and can be built of any thickness and strength, at a cost but slightly higher than that of ordinary construction. It closes out dampness, cold, heat and sound, there being a continuous air chamber running from top to bottom. O. G. Nicholas is the inventor of this new concrete building process and is president of the Thermo-Wall Construction Company. T. T. Buell is vice-president and J. H. Sellick is secretary and treasurer. Edward Glass, director of housing for the state of California, is advisory architect for the company.

R. O. McCline, well-known real estate man of East Oakland, is the representative of the bay district for this company. He announces that construction will begin shortly on a garage, 50 by 100 feet, at Fortieth street and Telegraph avenue and that plans for other buildings are under way.

"We would be pleased to have the public see the home we are building on Sixty-fourth avenue and Avenal avenue," McCline said this week. "It is something new in the building art for the bay region and I believe that it will only be a matter of time when this new form of construction will be in general use. The cost is little more than for frame buildings and a home of this kind will last practically forever. We will be pleased to show anyone interested how this new construction process can be adapted to any style or make of structure."

George W. Harney, County Horticultural Commissioner for Yuba county, has been reappointed to that position by the Board of Supervisors.

Only Home of the Kind in California

Now under course of construction at 64th and Avenal Avenues

You are invited to come out Sunday and see it.

We will gladly answer all your questions

Built by Thermo-wall process—reinforced concrete—and at small cost.

Go out East 14th St. to 64th Ave., then north to house.

LAST SALE OF JOAQUIN MILLER ACRES

The Realty Syndicate Is to Withdraw Joaquin Miller Acres From the Market After a Very Successful Sale

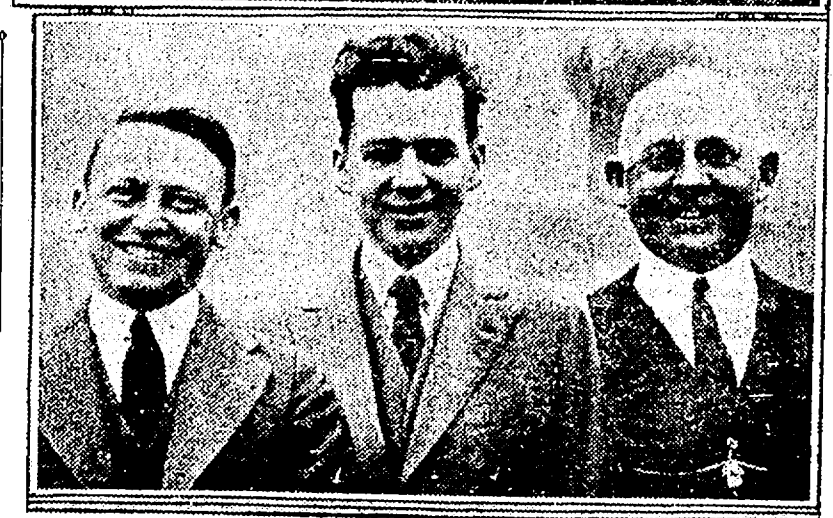

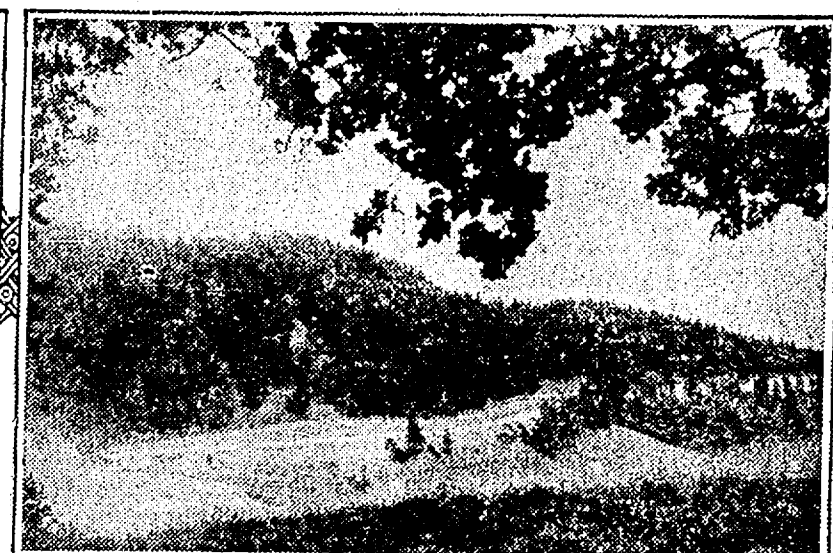

The final sale of Joaquin Miller Acres, the beautifully located residence park opposite Joaquin Miller's old home, takes place today. Two units of this park have been sold off in what is regarded as one of the most successful tract sales that has taken place in Oakland for many years and the last opportunity to secure a home site in this section will be today. After this the Joaquin Miller Acres will be taken off the market.

The sale of Joaquin Miller Acres was so successful that it has attracted the attention of tract developers in all parts of the state. It may be attributed to the sentimental surroundings, and it may be attributed to the property itself, which is splendidly located, and it may be attributed to the energy of the particular sales force, but the sale was an unqualified success.

There is a growing tendency upon the part of home-seekers to reach out toward the summits of the hills, and as this property has a superb view, this was undoubtedly one attraction.

The next attraction was that of the old Joaquin Miller home, of which this tract was once a part. The old home is now a city park and in process of gradual development. It will ultimately become one of the show spots of the Eastbay district. The sentiment surrounding the property was developed by W. B. Armstrong of the Syndicate's force, and proved a strong attraction.

The moving force behind the sale was that of the men to whom the sale was committed. This force was in charge of N. B. Myran, backed by E. W. Nagley, C. W.

The upper pictures are views in Joaquin Miller Acres, a tract that has had unusual popularity. The portraits are those of, from left to right, E. W. NAGLEY, N. B. MYRAN and C. W. THORNTON, of the Realty Syndicate sales force.

Thornton, Alexander Lopez and closed today on the grounds and visitors will be made cordially welcome whether purchasers or not.

East Bay Lodge Activities

HOSPITAL WARD IS ADOPTED BY OAKLAND REVIEW

One of the wards at the Letterman General Hospital at the Presidio of San Francisco has been adopted by the Oakland Review No. 14 of the Maccabees and in the future the members of the review will visit the ward at least twice a month and take things to the patients there. The committee in charge of the work consists of Leonard McNea and Dora Clifford. A class in sewing has been organized on Tuesday evening in Athens Hall. One application was also presented at that time. Among the visitors present were State Deputy Margaret Evans and District Deputy Laura Kuhl. Arrangements of the outdoor picnic and initiation to be held at Pinehurst on August 5 were discussed. All plans have about been completed. The picnic, under the command of the review, is actively engaged in the final arrangements. Sir Knights of Oakland Tent No. 17 will be the guests at the picnic to be given on Tuesday evening by the review. Mary Williams is in charge of the arrangements. A program has been arranged and dancing will be one of the features of the evening. Following the close of the business session on Tuesday evening a banquet was served and short talks were given by some of the visitors.

Oakland Tent, Maccabees Will Install Monday

The installation of its officers was held on Monday evening by Oakland Tent No. 17, the Maccabees. Deputy Great Commander Harry M. Elsenbier presided. Past Commander Joseph A. Garry, officiated. The new officers are: Joseph Mattos, past commander; Joe Johansen, commander; Paul Heugan, secretary; L. Fine, registrar; keeper; Charles Koehler, chaplain; Michael Rapp, sergeant; Andrew Nielsen, master at arms; Frank Pratt, first master; James Fletcher, second master; guard; Jack Hines, sentinel; Jay W. Blain, picket; Maynard Klane, organist; Frank Buhl, degree team captain; William Nelson, property man; William Tubbs, assistant property man; Dr. J. Emmet Clark, medical attendant; Dr. Ben Stetson, dental attendant; Dr. J. Emmet Clark, medical attendant; Dr. Ben Stetson, dental attendant. The dinner was served after the installation. Tuesday evening Oakland Tent No. 14, the Maccabees, will be the guests at the installation of the Maccabees at Athens Hall in the Pacific building. Oakland Tent will give a public whist party tomorrow evening at I. O. O. F. building, Eleventh and Franklin streets.

EAGLES TO PICNIC.
A picnic will be held today at Canyon Park, Redwood Inn, under the auspices of the California Scout Corps No. 1423, F. O. E. Dancing, races and games are to be the principal features of the day, with rewards for those winning in the various competitions. Arrangements for the occasion are being directed by a committee consisting of George Wagner, Reno Marengo, Martin Brown, William Peters and others.

Say you saw it in The TRIBUNE

She's Last of 15 Auto Victims

MISS OPAL McNAUGHTON, Red Bluff school girl, the only living member of a party of 15 school children run down in a school auto bus by a railway train near Proberta, Tehama county, last November. Some day, say the surgeons, she will be well, but the day is far off, and in the meantime the funds of her family have been exhausted and fraternal organizations as well as private individuals are making up the money needed for her further treatment in a Woodland hospital. The nurse shown in the photo is MRS. GERTRUDE MOHR, of Red Bluff.

KANSAS CITY TO HAVE COMPLETE FLYING FIELD

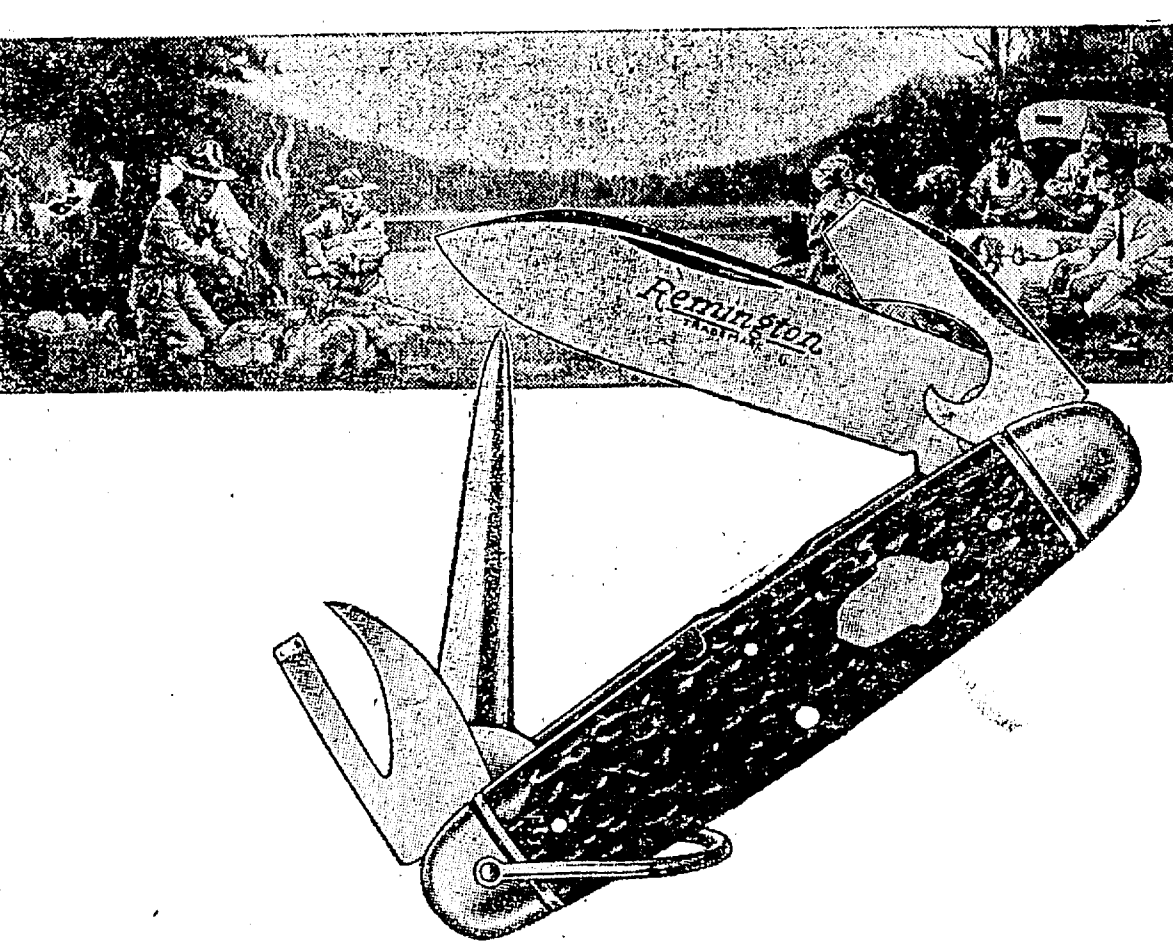

KANSAS CITY, Mo., July 15.—One of the largest and most up-to-date airdromes in the United States was virtually assured for Kansas City when army officers of the Air Service selected a tract of land here as a site for a proposed army airport. The Government recently appropriated money for the establishment of flying fields in ten of the principal cities of the United States. The land, according to stipulations at that time, was to be furnished by a corporation or community.

Only "Perfect Gents" May Fight in France

PARIS, July 15.—The privilege of "gentlemen" to fight duels has been denied to ordinary mortals by the superior Seine court. Maurice "The Terror" was sentenced to six years' imprisonment for slaying "Charlie the Assassin" in a duel with knives "a la loyale"—staged before witnesses and with both men getting an even break. One of the loveliest girls in the Paris underworld—Louise La Flanard—was the cause of the duel. Maurice the Terror and Charlie the Assassin had been rivals to her hand for years. She began by dividing her favors, but one day, Charlie the Assassin discovered Louise in the arms of the Terror. The dueling code provided that Charlie should forthwith withdraw his kid gloves and smite the Terror across the cheek with them. Not having even worn a pair of kid gloves the Assassin used his fist. The Terror promptly challenged him to a duel with knives and the challenge was accepted.

Important Notice! for BOYS

Hundreds of "live wire" boys in California have already secured WITHOUT COST the famous REMINGTON SCOUT KNIFE. YOU can have one—if YOU act at once

The Famous Remington Scout Knife

Always in demand on hikes, auto trips, when camping out, and in fact, every day in the year. A real knife you will be proud and delighted to own.

You can have one without paying a cent.

An unusual offer—for a limited time only. Of course you want one—every boy wants a good knife.

You can have your choice of handles—either the Stag Handle or the Red, White and Blue Patriotic Handle. See them on display at The TRIBUNE office, 13th and Franklin Streets, or send in the application blank below. Act quickly—secure your Remington Scout Knife at Once.

CLIP THIS COUPON

OAKLAND TRIBUNE, Knife Department, Oakland, Calif.
I want one of the famous Remington Scout Knives. Please send me full particulars without any cost whatever to me.
Name
Address
City
Phone
(Write plainly)

HERE IT IS:

The Remington Scout Knife is built for "business" and more than meets the requirements of the modern boy. The master blade is an extra gauge—giving greater strength. Closed, the knife is 3 1/2 in. long. Full weight throughout and of solid construction. Each special blade and implement is designed with a definite purpose in mind. Boys—a regular tool kit in itself!

A Real Man's Knife—Get Yours Now

YOLO-SOLANO RY. LINE SOON TO BE PUT UNDER WAY

WOODLAND, July 15.—Paving the way for the construction of forty-six miles of electric railroad from Woodland to Winters and on to Vallejo, thence to Oakland and San Francisco, the Sacramento Northern Railroad company filed here yesterday with County Clerk Harry R. Saunders its amended articles of incorporation. The articles so amended provide for the construction of an electric line from Woodland to Winters, to Vacaville to Willotta, to Napa Junction, there to connect with the San Francisco, Napa and Calistoga electric line. From there the road goes to Vallejo, where a line of fast steamers will connect with both principal bay points.

Rights of way for the road are being obtained in Yolo county and just as soon as these are available material will be assembled for the new feeder which plans to open up the rich fruit belt of the West Side of the Sacramento Valley.

Metal Propellers For Planes Tested

LONDON, July 15.—After years of trial and experiment Henry Lethner, a British engineer, has produced an all-metal propeller, which is now being submitted to practical tests by the British, French, American and Japanese governments.

France is so well satisfied with the results already obtained that she has placed a contract for the manufacture of propellers for her air force on this pattern. A factory has been constructed in France and dies are being made.

One of the first reports on the Lethner propeller in 1917 stated that it had been tested to 75 horsepower. Since that day the French official research station has given this metal propeller a test with an engine of 340 horsepower. It revolved at the rate of 1635 revolutions a minute, "without showing signs of fatigue," according to the official report.

A similar test by the British research department gave the same result. A propeller has been sent to the United States government to be tested on a still more powerful machine.

U. S. Born Japanese Defy Nippon Call

(By International News Service.)
HONOLULU, July 15.—Hawaii, breaking precedent of long standing by openly and defiantly refusing to obey an army conscription summons issued by the Japanese government, two American-born Japanese living on the island of Kauai have declared themselves to be American citizens and not subject to orders of the Japanese government, according to a story published in Kamehameha, a Japanese-language paper, of the district in which the two Japanese live.

The conscription summons was sent on the two Japanese by a Buddhist priest, acting as agent for the Japanese consulate at Honolulu. One of the men told the priest that he was "an American citizen and not subject to serve in the Japanese army." The other simply tore up the summons.

The incident is looked upon as significant of the attitude being taken by the younger generation of Japanese in the islands, who are thought to be drifting away from the influence of their government owing to Americanizing influences with which they are surrounded.

Swimming Not Hard Sport to Master

Swimming—both as a sport and as a physical equalizer—will soon be among the most favored diversions of both city and country people wherever a beach or swimming pool is available with the coming of summer days.

Such has been the spread in popularity of swimming, however, that with many nations, it now has become a matter of changing from an indoor pool to an outdoor lake or river. Swimming, despite the skepticism of the novice, is not difficult to learn, say the experts who declare that besides being great sport, it is a vitalizer for the entire human system.

"Swimming is an important part of the education of every man and woman, because it is of great value in self-protection and because it means gaining or retaining good health, strengthening and improving the body," says H. S. Glen, swimming coach of the Cleveland Central Y. M. C. A.

Heat of Capital Fails to Quell Senate Debates

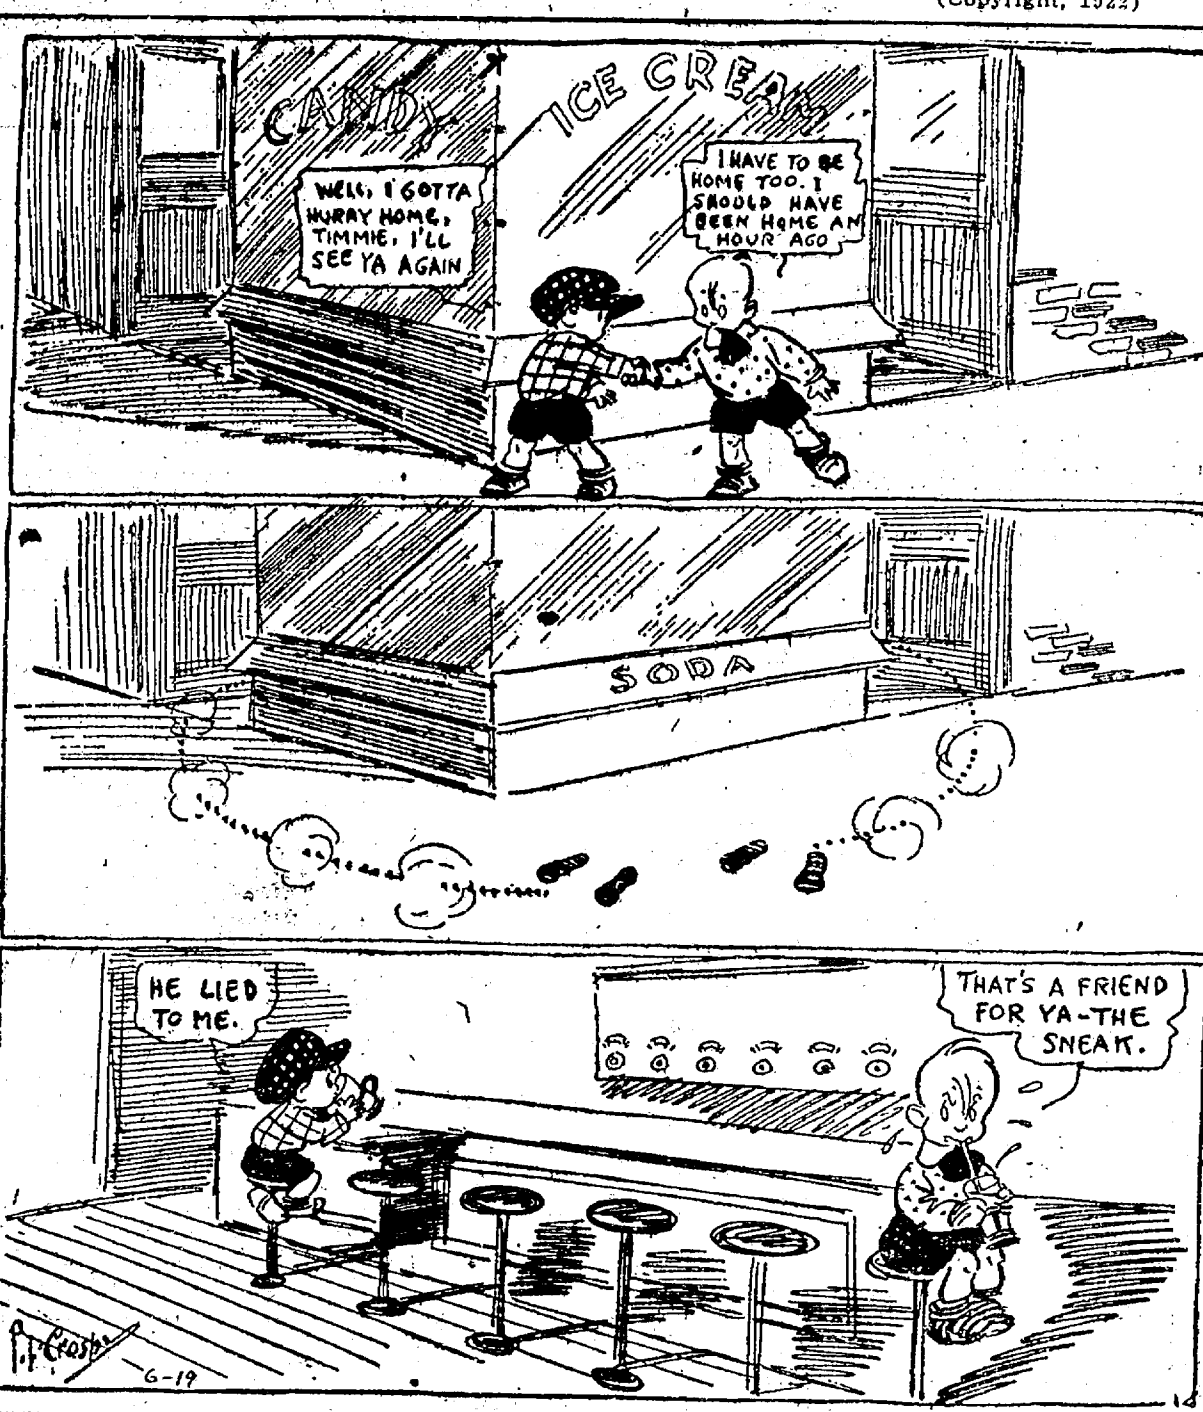

WASHINGTON, July 15.—Members of that exclusive millionaires' club—the United States Senate—are transacting the Government's business during the hot July days with all the comforts of a seashore resort.

In anterooms just off the Senate chamber are great luxurious lounges where senators may cast aside senatorial dignity and recline at ease while electric fans generate cool "sea breezes" on every side. Ice chests nearby contain cooling drinks, all, however, strictly within the limits of Mr. Volstead's law.

An ancient unwritten rule of the Senate, cast aside a few years ago, is again being ignored by senators and that helps to keep them cool. This rule formerly required senators to appear in black clothing. Today, in efforts to evade Washington's well-known heat, cool white linen and flannels are the rule rather than the exception.

While your senator does his best to "keep cool" outside the chamber the hot weather has not affected him in his debate. He frequently gets "all hot up" in oratorical effusions despite the rising temperature. Even a "hot spell" cannot cure senatorial debate.

ADDITIONAL SPORTS

St. Andrews Club Reports On Golf Balls

LONDON.—The Royal and Ancient Club of St. Andrews has issued for publication the following interim report on experimental balls by the golf ball subcommittee: When the rules subcommittee was appointed its members were instructed to investigate the possibility of evolving a ball which would restore the balance between length of the holes.

(b) Conserve certain essential features in the playing of golf.

Such a ball would be satisfactory to 100 per cent of golfers, and the subcommittee has set as its ideal the satisfaction of the entire community.

Feeling that the ideal could not be realized by theoretical discussion only, the subcommittee decided, with the co-operation of the golf clubs, to proceed by practical experiment, and to start with the most simple experiment possible, viz., specification of a uniform size. The championship clubs and four others have arranged to hold experimental competitions, and the subcommittee takes this opportunity of expressing its gratitude to them.

Experimental competitions have already been held at Holyoke, Sandwich, Sunningdale and St. Andrews. A detailed report on these and other competitions will be presented by the subcommittee before the autumn meeting of the Royal and Ancient club.

At this stage it may be noted generally:

(a) That a numerically large majority of golfers seem to be tolerably well satisfied with the present 1.625 inch ball, and are not alarmed at the possibility of specifications being changed.

(b) That the competitions so far held tend to prove a negative only, that standardization of size only would not effect the desired object.

(c) That a ball of more than 31 dwts. weight, whatever its size, is an unsuitable implement for golf, whether the strike of it is or is not gifted with exceptional physical power, and that the size of the ball must, therefore, be considered in relation to its weight. It would be premature to discuss this point further until the series of experimental competitions is complete.

The subcommittee reports that it has been unable to secure the co-operation of the Professional Golfers' association in the experiment presently being made.

Switzerland Plans For Sports Events

GENEVA.—Switzerland has already started preparing for the reception of the ballooning who are to compete in the Gordon-Bennett Anniversary Cup race which will start from here August 6. This country secured the honor of holding the event by reason of winning the cup last year.

England, France, Italy, United States, Belgium and Switzerland have entered three balloons and Spain two. It is the first time that such a large number of competitors has ever been brought together by the cup and the race should be a great event.

North Bend Names Boxing Commission

NORTH BEND, Ore.—The North Bend city council, which has had no boxing commission since the new law was established relative to boxing, has taken to the game again because of the urging on the part of the committee on sports and Mayor Loggie named five representative men to manage the sport for the city.

The committee is headed by Cliff Lohr, assisted by Dr. Phil J. Keizer, Ernest Frye, Henry Gushner and A. J. Eberhardt. The commission, since being appointed, has received several applications from promoters for staking bouts during the Independence Day celebration.

Exhibition Tennis Takes Second Place

Regularly Sanctioned Tournaments Must Come First, U. S. L. T. A. Ruling.

Lawn tennis stars who have acquired the exhibition habit will hereafter be required to watch their step, according to an official announcement issued by the United States Lawn Tennis association. The ruling is to the effect that regularly sanctioned tournaments have completed their season and the classic metropolitan championship will not have to play "second fiddle" to exhibitions at other clubs.

A spirit of rebellion has recently manifested itself among some of the old clubs in this vicinity because of the conflict between the scheduled and sanctioned tournaments and the increasing crop of exhibitions. This has spurred the national association to act for the first time in the history of the American game, and it notified A. J. Ostendorf, chairman of the tournament committee, that competitors entered for the metropolitan title must play according to schedule without any interference in connection with exhibitions scheduled for the Westchester Billmore Country club at Rye, N. Y., further, and pointed out that the affair at the Westchester Billmore club was not sanctioned. There was no obligation for a sanction, however, as no admission was charged.

To what extent this is likely to affect the exhibitions at the new and palatial country club was made plain in the draw for the metropolitan 128 competitors. It also included Vincent Richards, Solichiro Kashio, Frances T. Hunter, Dr. George King and other stars who had been announced for the exhibitions. What penalty will follow a failure to serve the wishes of the national association officials no one appears to know. There is the impression, however, that offenders may be suspended.

Those who talked with Vincent Richards state that he said he did not give a "damn" for the national association's ruling. He appeared to offer slight resistance, but in the end he acquiesced. Likewise he intimated that others would do the same thing and play when and where they pleased. He is reported to have taken the national officials to task for meddling outside of their affairs, and to have given it as his opinion that the United States Lawn Tennis association was doing more harm than good.

Oregon Looks for Large Entry List

A record entry is expected in the annual Oregon state golf championship at the Tualatin Country club, July 12 to 15. It was said by Dr. J. D. Sternberg, chairman of the tournament committee. Besides entries from the Waverley Country club, the Portland Golf club and the Eastmoreland Municipal club, at least 100 players are expected from other clubs in the state and northwest.

Eleven Get Letter On Lafayette Team

EASTON, Pa.—Because the same men played in practically every game only eleven members of the Lafayette College baseball team were awarded letters at a meeting of the "L" Club.

Those to receive letters were Captain Bleher, Captain-elect Gazella, Berry, Chilson, Wilver, Brunner, Ernst, Starcher, Tierney, Longaker, Seaman and Manager Connors.

Canadian Cricket Men to Make Trip

Norman Seagram of Toronto will take at his own expense a team of Canadian cricketers to England this summer. The party will leave Monday for Southampton July 19, arriving July 27. They will return to Montreal September 2.

Ott Romney To Coach at Montana State

SALT LAKE, Utah.—Ott Romney, since the fall of 1917 with the coach at the East High school, has been appointed athletic director at the Montana State college at Bozeman, Mont. The appointment to take effect next September, Romney will accept the position.

G. Ott Romney is one of the Romney family of athletes, famous throughout the intermountain west for their all-around athletic ability. In 1910 Romney took part in his first school athletics. His first year in college found him on the varsity football squad and before he had completed three years at the University of Utah he had made himself a four-letter athlete, winning honors throughout the Rocky Mountain conference through his remarkable ability and his performances in all of the four major sports. In 1912, his final year at the University of Utah, he captained the basketball squad to the Rocky Mountain conference championship.

Ott Romney attended Montana State college, where he returned as coach in 1912, when he established himself as an all-around athlete in the major sports and added a fifth letter to his string by starring in tennis.

After one year at the school, he went to Billings, Mont., as coach of the high school there. He took the coaching reins at the East high school in 1918. There was no football in 1919 due to the influenza epidemic and the following year saw the Leopards actively at work under Romney. They won the state high school football championship in 1919 and have continued to win it since that time, capping most envied percentage of wins in games played in the Rocky Mountain high school football championship by defeating the state champion in 1921.

Joliet Hurler Says He Will Be Winner

Guy Hoffman, southern twister, who Joliet nine in the Midwest league, says he has just begun to pitch. In the games that he has pitched he has not done badly, but with his flinging arm in shape there is every opportunity for him to bowl over the other teams in the country to use Fred, a catcher with the New York Yankees and has played in a number of games with the result that he will probably be kept as a relief pitcher.

Pittsburgh Plans Seven-Mile Swim

PITTSBURGH.—Plans are now under way for a professional championship swimming race to be held in this city on Saturday, August 20. It is hoped to attract the leading swimmers of the country to the city for the event.

The distance of the contest will be seven miles, the course being from the starting point at Sixth street bridge in the Allegheny river and then return over the same course and finish at the starting point. Prizes of cash, gold, silver and bronze medals will be offered as well as a trophy to be held by the winner.

Swimming Said to Be on the Decline

NEW YORK.—Particular interest among local followers of swimming has been attracted to the international water carnival held in this city last week. The results indicate that European swimmers, as a class, have not kept pace with the remarkable progress made here since the Olympic games at Antwerp in 1920. Germany and Austria had no contestants at either meet and Great Britain did not send its foremost men to the Monte Carlo fixture, but otherwise the field was representative in most events, so that results give an excellent idea of the rating of European leaders of both sexes.

Whitman Selects Comrado as Coach

WHITMAN COLLEGE, Walla Walla, Wash.—Ben Comrado, star tackle and captain of Whitman's championship football eleven last fall, who received honorable mention from the Associated Press, has been elected to succeed Elmer Butler as athletic coach at Moscow, Idaho.

Comrado will coach football, basketball and baseball. At Whitman he was one of the "Missionaries," best all-around athletes having earned a total of ten letters in three sports and captained both football and basketball teams. Last fall the Royal F. Niles football trophy was won by the team which most to the team was awarded him.

Yank Hurler Has Dazzling Fast Delivery

Bush Has a Variety of Stuff;
When Batters Connect
Ball Travels.

The planet Mars, with a tankful of gas, plenty of oil and a new set of tires is approaching the earth at something like two million miles a minute, and when Joe Bush unangles his ball from the old mill it hops over home plate at approximately the same rate of speed.

Whether "Bullet" Joe has any upshots, drops or curves of the in and out variety is hard to say. Watching the ball after Bush starts it going is like learning to speak Russian in one night.

Whenever a batter slaps one of his dazzers for a couple of sacks, it is a safe bet that he closed his eyes and let the Goddess of Fortune do the swinging.

Bush recently pitched seven winning games in a row, which started Jake Schaefer wondering if he really had a corner on the ball running business.

But the man we really feel sorry for, the man in whose behalf we drag out the gayly bordered handkerchief and weep a couple of sobas, is the man behind home plate who catches the "Bullet." The National Reform league should take a day off from the bathing beach and the art institute and build a concrete wall around the catcher in the name of humanity. The left hands of the backstops who catch Joe are spreading out and taking on the appearance of Mr. Swift's promoter breakfast food and soulmate of the well-known egg.

"Bullet" Joe Bush was born in Minnesota, but tired of the east and went to Montana, where he started his baseball career in Missoula in 1912. His winning over half of the fifty-four games he pitched attracted Connie Mack's attention, and he took Joe on.

In 1917 Mack made a trade with the Red Sox in which Bush was included.

In December of last year Bush, Sam Jones and Everett Scott, were traded to the Yankees for Packinpaugh, Quinn, Piercy and Collins.

The cognomen "Bullet" hardly seems fair to Joe, for he makes any bullet look like a slow freight alongside one of his speed balls.

In This Case Comiskey Got Worst of Deal

Whenever the issue regarding salary arises between owner and player the former frequently refuses to pay a pitcher his demands on the ground that he cannot better himself elsewhere. This view has been knocked into a cocked hat by the cases of Dickie Kerr and Dutch Leonard, both of whom have refused to sign.

The former engaged in a duel of words and passage-at-arms, so to speak, with Comiskey. Kerr held out for some sum in five figures, which may or may not have been sensible. For Comiskey to refuse to sign pitchers held out or refused to sign, and apparently have not ruled their act.

In the case of Leonard he asked some \$11,000 or \$15,000 salary, and Navin, president of the club, said that he was doing nothing doing. Both pitchers held out, refused to sign, and apparently have not ruled their act.

At least Leonard is pitching for a Fresno club while Kerr has a good contract to pitch some professional ball in Chicago and on the road.

Without entering into the logic of the players' demands or the rightness of the owner's cause, let us say that Comiskey appeared foolish in the extreme. He refused because of a salary dispute to keep a rattling fine left-hander like Kerr, one who was the soul of honesty in the tainted series and who pitched grand ball in that woe-filled debate.

Detroit Manager After Altenberg

Manager Cobb of the Detroit American League team has made an offer to the Toronto club for outfielder Altenberg, now under suspension. Cobb does not want the outfielder for the Detroit team, but would send him to the Augusta, Ga., team in the South Atlantic League, of which he is a shareholder. The Augusta team is managed by Neil Ball, former Toronto and Cleveland shortstop and afterwards manager of the Bridgeport team of the Eastern association.

Altenberg, who led the hitters of the Toronto team last season with an average of .346, declined to report to Toronto in the spring, preferring to remain at the University of Michigan, where he will be graduated in law on the first of next month. In spite of his fine batting average, every club in the International League has waived claim to the player. He will be sold.

Woman Centenarian Defends Flappers

SPRINGFIELD, Ill., July 15.—If the judgment of 100 years is worth anything, the flappers of today are not the terrible beings they are sometimes represented to be.

In fact, 112 years of life say the much-slendered young lady of the present is "just about all right."

land in 1810, is speaking:

"The flappers' dresses are a little short, but I guess they are pretty good girls—about as good as the girls ever were."

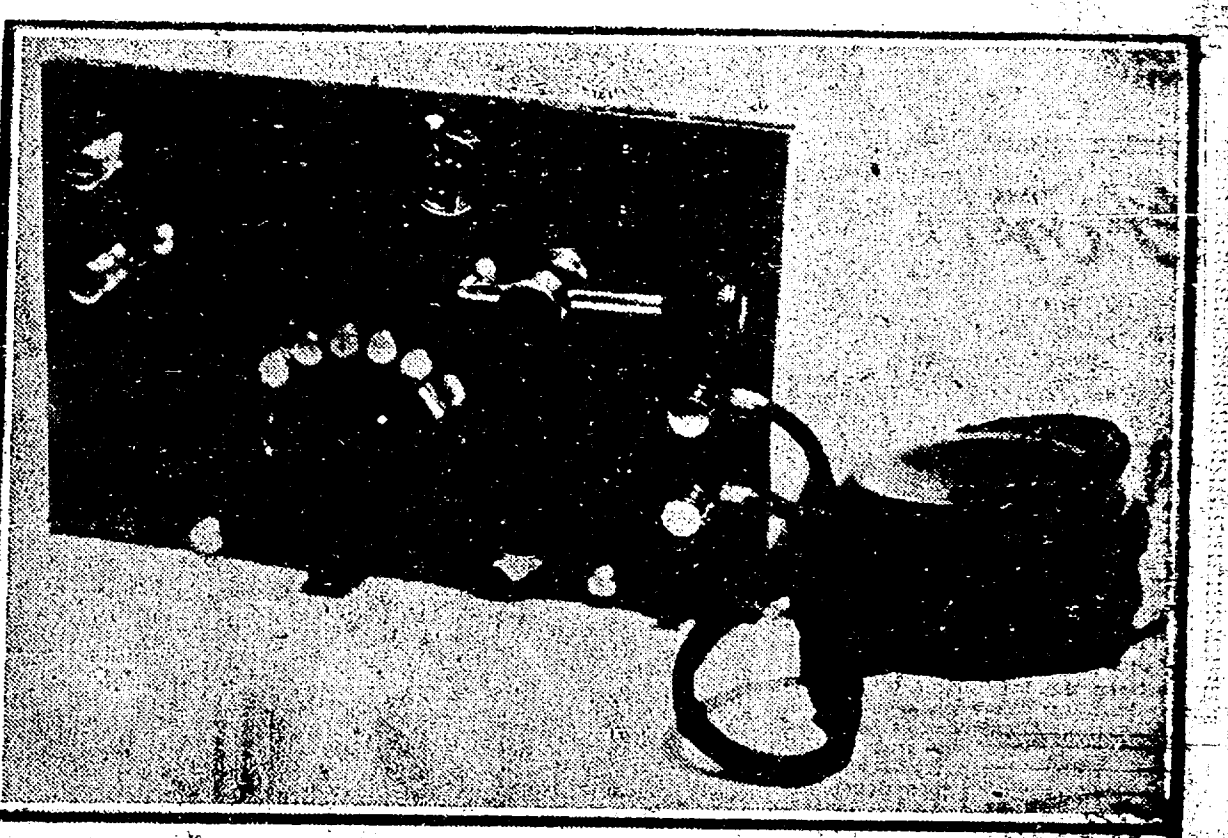

Mrs. Duffy came to America when she was a little girl. The passage took three months. Her husband, Thomas Duffy, died thirty years ago. She attributes her longevity to "just natural living."

Asked for a reason, she replied: "Oh, nothing—just worked! I always did what I wanted. I wasn't particular."

Pittsburg Pirates Get Veteran Player

The Pirates have purchased Walter Hammond, second baseman, who last year managed the Pittsburg team in the Eastern League pennant race. From the Cleveland American League club. In the Eastern league last season Hammond batted .351 in 151 games, 42 of his 208 hits were two-baggers, 17 triples and two home runs. Hammond is no "youngster" as has been stated. He was in the old Ohio and Pennsylvania league in 1911.

FREE RADIO SETS

This Is the TRIBUNE Crystal Set

A set designed by TRIBUNE radio experts and guaranteed by The TRIBUNE to receive all the stations around the bay.

"A set that will surprise the radio fans" is how a radio engineer described the new crystal set that is being manufactured for The TRIBUNE Radio club members. The first of the new sets produced results far above those hoped for. The effectiveness and selectivity of the new set is credited to the hook-up, which is declared to be as good as can be made for a crystal set.

Ten new three-months' subscriptions to The Oakland TRIBUNE gets you this set absolutely free.

Join the Tribune Radio Club

Nearly every amateur in the Bay district already belongs to The TRIBUNE RADIO CLUB, said to be the biggest of its kind in the U. S. Get in on the interesting meetings—send in this coupon and receive your membership certificate by return mail.

Ask The TRIBUNE Radio Editor to answer your Radio questions. A query received one day will be answered the next on the Radio page of The TRIBUNE. If a personal answer is desired, send a self-addressed stamped envelope.

Please enroll me as a member of The TRIBUNE Radio Club. I agree to abide by all the rules and regulations.

Dream of Alchemists in Part Realized and Principle Established That Elements May Change

With chemists well on the way to the ready transmutation of any of the elements from one to the other, the world is faced by the prospect of being completely rebuilt in the scientific laboratory.

For the scientists are rapidly learning the solution of the age-old problem of transmutation of the elements, and when that is learned there is no end to the possibilities for altering the original work of the creation that will be put in man's hands. The question will become, not can man do a certain thing, but whether it is right, and the problem of moral control of those who would unscrupulously use the new powers of scientific knowledge possibly for the destruction of the universe will become stupendous.

In this world there is a superabundance of silicon, one of the chief constituents of sand, tons of which lie in the great waste places of the earth, useless to man. The world lacks platinum for scientific work and radium for medical use. Very well, the chemist will make you radium or platinum from sand. It is all within the realm of possibility.

A census of the world's needs in raw materials thus would probably show that while nature has been prodigal in the gifts she has lavished upon man, a better distribution of the forms of these materials would be more useful to the physical and spiritual advance of mankind. All right, the thing to do is to call in the scientist of some years hence and have him rebuild for you, entirely, the very stuff of which our earth is made. Too much sand and not enough steel; then make some from sand. Too much sea water and not enough gold; then make some gold from sea water.

It all sounds impossible, crazy, foolish, but these things are not as far off as they may seem and a realization of their nearness comes from a serious review of the actual achievements of the chemists and physicists of the world during the past twenty-five years. In the first place it is absolutely necessary to understand the entirely different basis of the problem of changing one element into another than that presented by the changing of chemical compounds.

In the years since 1850 many have been the advances of chemistry: the making of clean, sweet lards from vile-smelling fish oils, the manufacture of the most beautiful colors from dirty, sticky coal tar; the improvement of hundreds of technical processes for the production of many foods and medicines of everyday use, and a host of other contributions which have made material living easier for man and released more of his energies for his spiritual advance and cultivation of the beautiful.

But these advances have been brought through the scientific study and best use of such metals and minerals and substances known as "elements" in the language of the chemist. What is an element? An element is a thing which chemists have been unable to decompose into simpler things.

Thus rock salt can be decomposed into sodium, a soft metal, and chlorine, the poisonous gas used during the war at the beginnings of chemical warfare. But no ordinary means have ever succeeded in breaking up sodium or chlorine into simpler things.

Water can be decomposed into hydrogen and oxygen, two gases, but these have not been decomposed into other things.

There are about ninety of such substances which have stood the test of all attacks made upon them. These are the elements. And these are the things from which chemists have builded thousands of useful compounds, dyes, foods, medicines, etc.

The possibilities for improve-

ment in the manufacture of these compounds and the discovery of valuable new ones are by no means exhausted. To the advance of this branch of the science hundreds of men and women in the universities and industrial laboratories of the world are dedicating their lives. But others have taken up the study of the true nature of these so-called elements and have sought to know of what stuff is matter made and how one of these elements can be transformed into another at will.

It is this latter branch of the related sciences of chemistry and physics which have led to the great new discoveries of transmutation of the elements which, should they be developed to a commercial scale, offer vast and inestimable possibilities for the remaking of the world.

The problem which worried the alchemist of the Middle Ages, which led him to stew and fuss around with powders and herbs and in his activity give birth to the science of chemistry, today has, in a limited sense, been accomplished and the spirit of man turns

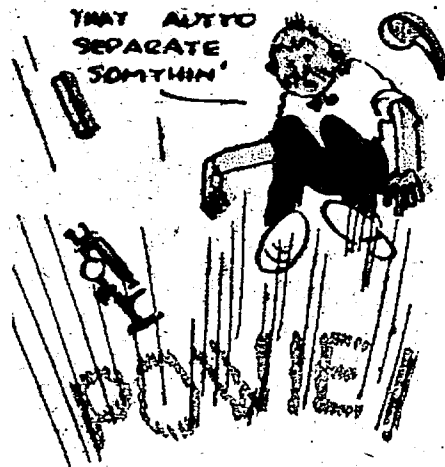

to greater conquests whereby he may bring the entire material structure of the world under his control.

Chemists a century ago found it useful to think of elements as being made up of minute atoms. Billions and billions of them were presumed to make up the smallest speck of iron filing, for instance. These atoms were supposed to definitely combine with other atoms in thousands of various groupings to form chemical compounds. These ideas, which are familiar to everyone who has studied elementary chemistry, explained many things.

For these first studies the scientist was not concerned with the stuff of which the atom was made, nor the structural plan on which it was built. All his attempts to study individual atoms had failed and he was content with the vast possibilities afforded him in the study of their combinations.

Scientific attention was first focussed upon the atom itself in 1896 and 1898, when the discovery of uranium was closely followed by the discovery of radium. Both of these metals are extremely heavy and chemical theory indicated that their atoms were the largest then known. Nor have any larger since been discovered.

These substances instead of lying idle like a harmless bit of iron or heap of powdered sulphur were found to be throwing off minute electrical particles, which were named electrons. They were also giving off helium, a light gas sometimes used in place of hydrogen for balloons, and indications were that the atoms of these substances were actually breaking up into simpler atoms. It was since proven that radium and uranium,

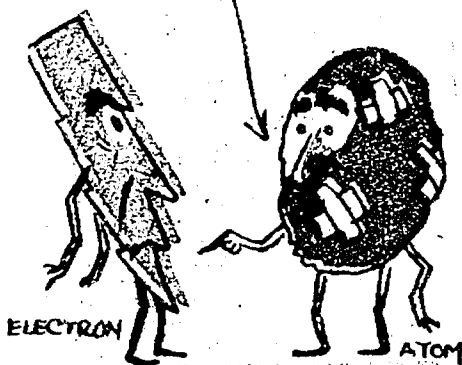

after going through a long series of changes finally becomes simply lead.

Here is transmutation of the elements going on before our eyes! But man stood helpless beside it. Nothing that he has tried to do has either hastened or retarded the rate at which radium changes into lead.

A new field of study was opened up, having for its object the understanding of radioactivity and more generally the understanding of the manner in which these minute electrons are put together in the architecture of all of the atoms. A vast amount of data concerning the behaviour of electrons and atoms was gathered in the twenty years that followed and scientists now believe that they are on the right track to the correct solution of the alchemist's problem. This belief is greatly strengthened by recent successes in breaking up atoms.

These researches pointed to the idea that the electron, which is an infinitesimally small particle of negative electricity, is the fundamental unit of electricity; that atoms are made up of electrons revolving around a central charge of positive electricity in a manner

TAKE MY ADVISE - DON'T
LET THEM 'PROFS' GET
TOO FAMILIAR - THEY
BEEN TRYIN' TO BUST
ME UP FOR 20 YEARS

somewhat analogous to the revolution of the planets about the sun in the solar system, and that an electric current in a wire is in reality a flow of a stream of electrons between the atoms of the copper in the wire.

The electron thus having gained

When Things Get Going Right We May Convert Desert Sands Into Some Really Useful Material

so much attention is well known to scientists. It has been weighed and the amount of electricity that it carries measured. But there is no such agreement as to the arrangement of the electrons which go to make up the atom and it is to this problem that scientific research of today is directed.

In the laboratory, when the problem of transmuting the elements was revived, it was found comparatively easy to knock off an electron. The atom, minus an electron or two, was said to be ionized and showed different electrical properties. The thing that baffled the workers and which was absolutely necessary before transmutation could be accomplished was development of a means of breaking down the positive nucleus at the center of the atom.

Sir Ernest Rutherford, a leading English physicist, was the first to break down this central nucleus and so can be said to be the first man ever to have transmuted one element into another. His method was to bombard the atoms with a stream of rapidly moving electrons. A few of these struck the atom in such a way, in a vital spot, so to speak, as to break it to pieces, yielding simpler substances. The elements which have been broken up in this way include:

Boron—a light substance occurring in borax and when not combined a black powder appearing somewhat like powdered graphite.

Nitrogen—a colorless gas making up four-fifths of the atmosphere.

Flourine—a yellow poisonous gas closely akin to chlorine, used as a poison gas during the war.

Sodium—a soft metal never occurring except in combination with other substances and which, combined with chlorine, gives common table salt.

Phosphorus—a soft non-metallic substance.

Aluminum—white metal, well known for its use in cooking utensils.

It is to be observed that all of the metals decomposed in this way are of the lighter kind. It is further to be noticed that in all cases the atoms are broken up, and something still lighter made from them, in these cases hydrogen and helium gases. Moreover the method used has a low efficiency as after long bombardment by the electrons only a very few of the atoms are broken up.

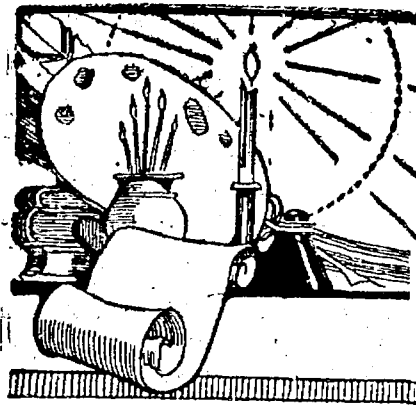

Thus far it has not been possible for scientists to build up heavy atoms out of lighter ones and the methods used for breaking up atoms are obviously of no use in building larger ones. So the matter of making artificial gold from lighter metals seems, in a sense, as far from realization as ever.

A new and crowning achievement in the study of the structure of the atom has just been made by Gerald L. Wendt, an associate professor at the University of Chicago, who has reported the large scale decomposition of the atom of tungsten, one of the heaviest of the known elements.

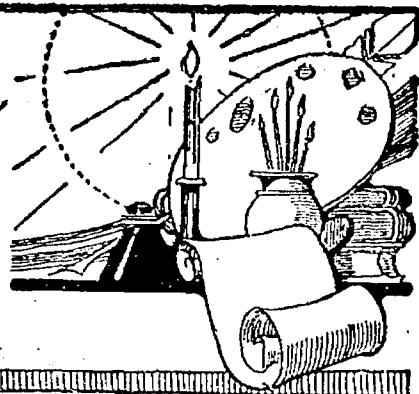

His work was just carried out a month or two ago and has created a furore in physical laboratories throughout the country, many of which are setting about to repeat and verify the Chicago scientist's reported successes.

His method of breaking up atoms depends simply on suddenly heating them to enormously high temperatures, higher than have ever before been reached. He took a tip from astronomy, which a few years ago reached the conclusion that only the lighter atoms exist in the stars which are supposed to be the hottest. The indication was that heavy atoms could not exist at the very high temperatures of the hot stars, stars where the temperature was

No Wives, No Worry, Live 100!

by Andrew Cochran

Eveless Paradise at Veterans Home in Napa County Where Heroes Spend Days in Content

No Nagging, No Dictation from Spouse Responsible for His Long Life, Declares Centenarian

HOW can men live to be 100 years old? The problem of long life has been mysterious, insoluble.

Solomon held the magic key and he had a great many wives.

In California a little group of Centenarians and near-Centenarians have solved it and they have no wives.

It is an Eveless paradise, so far as wives are concerned, this beauty spot in the Napa county foothills, where more than five score war veterans are nearing the century mark. The peacefulness of a quiet countryside broods over the quaint old barracks, situated in groves of oak and fir and eucalyptus.

All the inhabitants of this village of centenarians are war veterans because this place is nothing more nor less than the Veterans' Home at Yountville, nine miles from Napa (Calif.).

"Shure and I've solved the mystery of life," declared Private Patrick O'Donnell, late of the Ninth Massachusetts, and formerly of County Mayo, who has just turned the hundredth leaf in the book of time.

"I have a good home to live in, plenty of tobacco, enough to eat and \$12 a month pension money," said Patrick, "an' I'm spry enough to walk to Washington barefoot if I could prevent another war. And shure I would walk it meself if it would stop men from killing each other, for war is hell, as Sherman said twice in his book, and as I know meself from my experience in Libby prison, Antietam, Chancellorsville and second Bull Run.

"It's not conducive to long life, war is not, and that is why us auld fellows live longer without wives."

And Pat O'Donnell is not the only one who blames a womanless paradise for his longevity. There are more than 100 near-centenarians among the 807 Civil, Spanish, Indian and World War veterans at the Veterans Home, and they are almost unanimous in agreeing that wife-rule tends to shorten the lives of men.

"I've been addicted to all the vices known to mankind," declared Harrison Westcott, formerly of the Seventh Maine regiment of the Army of the Potomac, "but I would never live to be 100 if I had a wife tellin' me this and jawin' me about the other. I've drank enough hard stuff to sink a battleship; I've chewed enough tobacco to found a barge, and if all the smoke that has passed through my lips was accumulated, it would obscure the sun.

"But I am now 93, and thanks to single blessedness, I expect to be among 'em present for some time to come."

Nor are the centenarians at the soldiers' home too feeble to go out on larks, according to the records of Captain S. M. Montgomery, adjutant.

Youthful M. P.'s, ranging from 70 to 80 years old, frequently are sent out in pursuit of some jazzy youth of 28 summers, who has gone

TOP: Patrick O'Donnell of County Mayo, aged 100 years, who says he attributes his long life to an Eveless Paradise.

Bottom: Settling the Gans-Nelson fight all over again! The colored contender is Private Frank E. Green, formerly of Tenth Cavalry. The "white hope" is C. H. Wilcox, late of the Sixty-fourth Illinois Infantry. Both are Civil War veterans.

AT right: Veterans' Home, Napa county. **At left:** Starting a hundred-yard dash. Lieutenant Harrison Westcott of the Seventh Maine, Army of the Potomac, starts Thomas I. Draper, Fourth California Infantry, on a sprint against time. Draper is the champion short distance man of the Veterans' Home. Among the spectators are A. Everets, S. W. Taylor, John Heales, George M. Dickenson, W. J. McDermott and John Daco.

A. W. O. L. and who may be found hanging around a dance hall in Napa or playing pool with the professionals at St. Helena.

After payday the great battles of the Civil War and all the other wars in which the United States has been involved are fought out all over again, vigorously and sometimes fistically.

Occasionally a pensioner will decide to celebrate his 99th year by a trip to San Francisco or Sacramento or Oakland and after becoming satiated with the excitement of city life will return to the country home to play checkers, talk with his cronies and wander contentedly in the shady groves beneath a torrid California sun.

No less a person than Colonel R. C. Martin, commandant of the Veterans' Home, comes to the support of the feminine element, however, by attributing the long life of the war veterans to other causes.

"Regular hours of rest and sleep, regular meals, freedom from worry, wholesome food, expert medical attention and a healthful outdoor life in the country adds years to the allotted time of these men who fought for their country," declared the Colonel.

"Reveille is at 6:30 for all who are not in the hospital, and breakfast follows immediately at 7 o'clock. Sleeping in a stuffy room until late in the morning is a life shortener. Then there is sick call at 9:15 to which any who are indisposed may report. Here we catch the minor ailments that might develop into serious troubles, and cure them."

"Those who are able bodied work on the farm and get paid for it in figures ranging from \$10 to \$90 a month, depending on the task. The others who cannot work wander through the grounds, play croquet, checkers or some other game, or read, always keeping outdoors in good weather.

"Their minds are free. No restraint is placed upon them. They need not worry about their next meal or a place to sleep and they can come and go as they please."

"The bugle blows the call to quarters at 9:20 p. m., and ten minutes later taps are sounded. This means that all lights must be out and the men in bed."

"Cleanliness is a big item in figuring the reasons for long life. Every man must bathe periodically and provisions are made for this

in the form of shower and tub baths."

That there are some sprinters among the centenarians at the Veterans' Home who shake a mean hoof is the contention of Private Thomas D. Draper, formerly of the Fourth California Infantry, champion 100-yard man of the institution.

Despite his 88 years, Private Draper can do the 100 in fifteen seconds, and also he runs the other distances with considerable celerity. Being one of the youngsters Private Draper never misses an opportunity to shake the shimmy at the local hops and his eye for beauty is said to be highly developed.

Even the blind soldiers in the hospital aspire to live for a century. "Blindness is not ageing," said Edmond de Jarnac, former bugler in the Indian war of 1870, looking up from the Old English History which he was reading by running his fingers over raised letters.

"I have been reading about William the Conqueror," he continued. "I reflect that men today have a much greater chance to live to be 100 years old than in the days of the conquering William, when one was only a pawn in the hands of some king or prince."

Because he was a slave, sold by one owner to another like a horse, Private Frank E. Green, colored, formerly of the Tenth cavalry, does not know his age.

Green was rescued from slavery in Tennessee by the Federal troops in 1864 and enlisted, serving as a drummer at Milliken Bend, Mobile and in other battles. He remained in the service for twenty-eight years.

"Ah may be getting on toward a hundred," said the colored man, "but ah shuah enough feel like a young man. You don't seem to get any older here in this salubrious country place."

"Wives! Say no wives for Mistah Green, thank you. Wa'fare and wives and picanninies brings you closer to kingdom come."

Reading fiction by the best authors makes the old soldiers forget themselves and helps prolong their lives, according to Frank Tennant, Spanish war veteran and librarian.

There are 5520 volumes in the library of the Veterans' Home, and the most popular books are the love and adventure stories. In the absence of wives, the veterans indulge their erotic fancies by reveling in novels that deal with the love of a man for a maid, and the old, old struggle of youth that will not be denied.

Thirty books a day are taken from the post library by borrowers.

Three times a week the centenarians and near-centenarians are regaled with a motion picture performance. Here the comedians are the favorites. There are those today at the Veterans' Home who grieve over the demise of the plasmashing comedian who depended upon hitting fat women in the face with custards to secure a laugh. Yet the majority of these warriors like the five reel dramas with lots of punch, suspense and

(Continued on Page Six)

Sherman's Broken Promise

BY JESSIE JULIET KNOX

Transplanting of Famous
Rosebush at Monterey
Recalls Love Affair in
Which General Figured

THE historical "cloth of gold rose" at Monterey is to be transplanted, and thereby hangs a tale—a love story.

Josephine Mildred Blanche, an artist of note, who lives in a cottage between Del Monte and Monterey, put in her bid for the old rose tree, and also for the part of the old adobe wall to which the fragrant rose still clings. As the adobe cottage chanced to be on a street which has since become the principal business street of the quaint city, the city fathers have agreed that it must go—rose or no rose. Why? Because that valuable space is needed for an office building; for you know we are living in a sordid, prosaic world.

Here the rose has bloomed in beauty for more than three generations, but now, modern progress decrees that it shall bloom elsewhere, if at all. Thus modern business conditions will erase the last mute evidence of a love-story which is deathless.

When General William T. Sherman was a young lieutenant and stationed at Monterey he plighted his troth with the radiant Spanish

beauty, Maria Ignacio Bonifacio, with this rose. Together they planted it, and he said: "When this rose blooms I will return." The rose bloomed, but he did not keep his promise, but was married a few years later in Washington, D. C.

The woman was faithful, and that was the one love of her life. "Cloth of gold rose" took its name from an event in history,—that may have been the reason this particular rose was selected by the young military man. Who can say?

Since the death of the Senorita, three years ago, the old home has been occupied by Romey T. Jacks, but his lease is up, and when the news was spread abroad that the historic rose-tree must go, Josephine Mildred Blanche, a well-known artist of Monterey, begged that it might be removed tenderly to her own cottage.

We all know it—Sherman's rose—it is called, and in the event that you do not, we will take you with us on a never-to-be-forgotten visit. The charm of yester-year enveloped us, as we wandered at will through the quaint streets of the old historic village of Monterey. Listening to these historic legends, we became filled with the dreams and the poetry of another day. But the story which appealed to us more than all others perhaps, was the story of the rose which General Sherman gave to his beautiful Spanish sweetheart—Maria Ignacio Bonifacio—three generations ago. It happened this way.

Shortly after the war General Sherman (then lieutenant) was stationed in the old custom house in Monterey, that attractive adobe building by the edge of the blue bay, and whose ancient charm has been renewed and perpetuated for the benefit of future ages. At that time Monterey had about 1000 inhabitants, and life was very primitive. No vehicles were to be had, save the old Mexican two-wheel carts, drawn by two or three pair of oxen, yoked by the horns. In Sherman's Memoirs, written by himself, he says: "Riding, dancing, shows of any kind the people liked. The girls were very fond of dancing, and were graceful. Every Sunday they had a dance, and sometimes during the week. Learned a smattering of the Spanish language, etc., etc."

Ah yes—for the old legend indicates that the young and ardent

Above are two views of Sherman's rose at Monterey and a photo of Maria Ignacio Bonifacio, once a radiant Spanish beauty and sweetheart of General Sherman, shown holding a rose, shortly before her death.

soldier learned at least enough of this language to whisper: "Te amo, dule—corazon" (I love thee, sweetheart) into the all-too-willing ears of the radiant belle of Monterey. Nor did he strive to conceal the fact, but all through the long, sensuous days of a Monterey summer was this sweet cuentec de amor (story of love) whispered into her ear.

There was no reason, she meditated, why she should not give all her warm heart to this young cavalier, who was a West Point graduate, a man of note, and of strong and dominating personality. She was beautiful; she was an aristocrat; what incongruity could there be in such a love and union?

And so it was the old, old story, ever new: She met him everywhere, he wooed her everywhere, and at these same dances, to which, in his Memoirs he gives only a passing remark, he gazed into the dark languorous eyes of La Senorita, and was intoxicated by them, and by the touch of her lithe form in the mazes of the dance.

"And eyes looked love to eyes that spake again,
And all went merry as a marriage bell."

Never name sounded sweeter than his own—Guillermo—(William), when spoken by the scarlet lips he loved, and in her own seductive Spanish tongue. Life and the future seemed indeed a fair thing to her. Ah, well—she was

young, and she loved. The fiesha de cupida (shaft of love) had gone forth, and could not be recalled at will.

Each night found him at the quaint old Spanish home, and in its perfumed garden with Maria. Upon the harp she played exquisitely, and sang him tender love songs, for at that age there seems nothing else worth having, in all the great world. The fibras del corazon (heart-strings) were deftly played upon by Cupid, too, and the melody has vibrated through all the years, and still vibrates, though the harp has long since rusted.

One marvelous day, while still wrapped in the wonder of first love, he gave her a token—rosa de oro (a rose of gold). It was as rich as the wealth of her own young heart, and together they knelt, at a religious rite, and planted it in her garden of youth, and dreams, and he said to her:

"Carlita" (dearest), I must go away for a time, for war calls, but when our rose blooms, I will return!" And she, being a woman, believed him. The steamer "California" had just arrived, and on it were many of the young lieutenant's friends. It was decided that he should accompany General Percival F. Smith to San Francisco, acting as his adjutant-general.

And so—he loved and rode away, and never returned. After hearing this legend we were naturally eager to see the senorita, who was still faithful to this love. The bells of the old San Carlos Mission

were chiming musically as we entered the massive adobe gate of the old home.

Oh, perfect day in a world beautiful! The charm of the past lingered everywhere, as we entered the gate, and walked beneath the fragrant bower of the rose-tree. Up to the door of the long, low adobe building we went, feeling it almost a sacrilege to intrude upon the woman who was true, but as knowledge-seekers, must trample on all such delicate scruples; so we at last tapped on the heavy door, and when it opened there appeared before us—the Senorita herself.

There is no mistaking the patrician blood of old Spain. It survives all manner of ill-treatment. Here was a real lady, and we felt instinctively that we dare not probe the recesses of her inner life, altho perhaps we may have come for that purpose. But we had hardly expected just this. Here was a small, refined gentlewoman, a delicately nurtured lady showing in every move refined breeding, but the traces of a deep sorrow in her sweet old face. Now that we were here we scarcely knew what to say, as she graciously ushered us through the coolness of long, low halls, with their three feet thick Spanish walls, and at last into her tiny parlor, which was the acme of simplicity.

We made desultory remarks about the weather, etc., but all the Spanish we had ever known seemed now to vanish into thin air—and she could speak no English. How peaceful and quiet it was, and withal, how simple. No rich furnishings nor gaudy hangings, only a picture of the Pope, a crucifix, a table cover which the Senorita herself had made from cigar ribbons, and upon whose yellow surface reposed a huge scrap book, filled with letters and calling cards of the world's greatest men and women. All alike had been here to do homage to this sweet old relic of another day.

Over the table hung a life size painting of the Senorita herself, when she was young. One could readily see why the young soldier would have been infatuated with such beauty as this, that shone down upon us. But whenever we would venture upon a question that touched on the personal, or mentioned the name of Sherman, she would only smile sweetly, and murmur in her melodious Spanish: "No

(Continued on Page Six)

The Story of Hilda Hutman

by GEO. C. HENDERSON

How Young Girl Went to Big City, Lured by Fake Promises, and Fell Into Clutches of Slavers

WHITE slavers were at work in the national capital. Young girls, unsophisticated and inexperienced were lured from the country by some strange means and were initiated into the night life of Washington, D. C.

A suicide now and then punctuated the regular hearings in the cases of such unfortunates in the police and juvenile courts.

Mrs. Mina Van Winkle, woman lieutenant of police, was given charge of the investigation. The woman sleuth had succeeded in finding 138 lost girls in the period of a year and in returning them to their homes. This she had done, in addition to the other work of the women's bureau, with the aid of her twenty policewomen.

Mrs. Van Winkle is head of the first women's bureau established by the police of any city in the United States. Since its organization several other cities have formed similar bureaus. The bureau at Washington, D. C., was established during wartime for the purpose of handling the 90,000 girl war workers that poured into the national capital to do war work. The twenty policewomen patrol the streets looking for unfortunate girls, perform welfare work among the department stores and other industrial institutions, seek out women crooks, shoplifters, dips and petty thieves, and above all combat the white slaver.

It was this force of girl sleuths which was set upon the trail of the traffickers in white slaves.

Mrs. Van Winkle reached out into the police courts and female wards of the city prison and brought forth the wantons one by one. She questioned them kindly, speaking of their homes, their mothers and of the happy life which they had abandoned. She was seeking to solve the mystery which surrounded their presence in Washington.

A slip of a blue-eyed doll, scarcely 16, broke down when confronted by her mother. She said her true name was Hilda Hutman.

"I wanted to see life," she cried. "I wanted to have fun. Then I saw an advertisement in a Washington paper. It told how much money I could make by dancing. All I had to do was dance, and I could make \$10 or \$15 a night."

She produced a copy of the display advertisement from her purse. "Girl Dancing Instructors Wanted," was the caption. The ad went on to tell how scores of young women were making good wages and having lots of fun teaching men to dance.

"It sounded easy and I was awfully tired of small town stuff," continued the girl. "I knew I could dance with the best of them."

"I borrowed the money from a friend and ran away from home. When I arrived in Washington, D. C., I found that there were four dance halls, all of whom wanted girls. I could take my choice. I decided to go to work for the Terpsichorean academy, as it was situated in a better section of the city and the hall was in a fine looking building, part of which was used as a hotel."

So Hilda applied for work at the Terpsichorean academy.

The manager, a dapper little man with his black hair plastered tightly to his head, smiled and chirruped as he welcomed this beautiful girl. Hilda would be a decided attraction among his assortment of painted, blase entertainers. Her natural vivacity, vivid color and the perfect symmetry of her limbs and body appealed to this fellow.

"You can go to work tonight," he said. "You get four cents a dance and there will be a chance to pick up tips on the side."

Mrs. Mina Van Winkle, woman lieutenant of police of Washington, D. C., who revealed at recent police convention in San Francisco how ring of slavers in National capital was broken up in campaign to save girls

Woman Lieutenant of Police Runs Down White Slave Traffickers After Quiet Work as Sleuth

All the humiliation that could have been crowded into a lifetime. She tried to pull away but the blase youth squeezed her tightly, whirled her off her feet and writhed through what seemed to be an eternity of seconds, while mouth-ling enticements, which seemed less odious because they sounded so incredible.

As the evening progressed Hilda began to realize that most of the girls on the floor were becoming intoxicated. She saw them leave the floor with men.

About 11 o'clock a finely dressed man of professional appearance began to dance with her. He told her she was the prettiest girl on the floor, fascinated her by praising her dancing and ended by suggesting that they go up and have a drink.

"I don't drink," answered Hilda. "Thank you just the same."

"Well, you can't take something soft and watch me drink," insisted

HILDA ARRIVES AT WASHINGTON, D.C.

HILDA FOUND BY POLICE WOMAN

HILDA TAKES AN INNOCENT DRINK

HILDA GOES TO DANCE HALL

the other. "Don't you need a little rest?"

She accompanied him to an upstairs parlor.

Hilda realized that she was tired. No seats were provided for the dancers, although the male patrons had benches upon which to rest.

"Here is a glass of ginger ale," said Doc, indicating the beverage that he had poured out. "Come on in, sit down and be friendly. You can't rest standing up."

When the stranger tried to put his arm around her she resisted and he apologized. Apparently he did not resent her attitude.

They returned to the dance hall and he monopolized her.

By midnight she was exhausted and welcomed his invitation to rest. He persuaded her to take a drink of something.

"It will brace you up," he said. "Gulp it down."

She gulped and the burning fluid strangled her so that she could not speak for some seconds. The surroundings became more colorful, the face of the man was strangely attractive and fatigues left her. A pleasant oblivion enveloped her senses. Her forehead felt cold. Darkness drifted in on her. Consciousness snapped out.

When she awoke she was in a strange room alone. The cold, cheerless light of early morning only increased her sense of desolation.

It was not until some days later that Hilda learned that she had been given knockout drops. Doc was always hanging around the hall, but he paid no more attention to her. Instead he danced incessantly with another new girl.

Ethel wised her up in a few words.

"Doc has a new victim," she told Hilda. "Whenever the boss has doubts about a new girl he always turns them over to Doc. He makes them reasonable."

When Mrs. Mina Van Winkle's policewomen put the Terpsichorean dance hall and two others like it out of business, they struck a vital blow at the white slave traffic in the national capital.

How many girls were lured to Washington, D. C., to experience the fate of Hilda Hutman, it is impossible to estimate.

Mrs. Van Winkle declares that the greatest white slave market in the national capital was abolished when, after a long fight, she put the three dancing academics out of business.

"Can I get a room in this hotel?" she asked.

The manager scrutinized her to make sure that there was no hidden meaning in this request; then he shook his head in the negative.

"No, you better find another rooming house. These rooms are generally pretty well occupied at night." He leered at her as he spoke the last words.

When Hilda appeared at the Terpsichorean academy that night she almost turned back at the sight she beheld. In the center of the great room was the roped off arena where a number of girls were standing around talking, waiting for the music to start. Completely surrounding this area was a cordon of men who made obnoxious remarks to the girls as they entered.

She tried to press through this crowd, but someone caught her by the arm and she heard him demanding to be kissed. Hilda broke away and ran to the dressing room, where she deposited her hat and coat. In this room, a small and vilely dirty place, she found several of the girls sitting on a table with a great expanse of undergarments showing, drinking a yellow substance with a ticket seller, a bouncer and the boss.

When the boss saw her, he winked at the others and then called to the country girl.

"Come on over, kid, and let me introduce you to the boys. Hilda, this is Mr. Flinn, who keeps order around here. He's a special policeman, and if any of the fellows get fresh he can throw them out."

Flinn extended a great paw and crushed Hilda's hand until she

cried out, "at which the others roared with laughter."

"This other gentleman is Charlie, who sells the tickets and keeps his eye out for the live ones. This young lady with the angelic expression is Gertie, and her sidekick with the yellow garters, is Ethel. They will show you the ropes."

Gertie was openly contemptuous, but Ethel led the palpitating Hilda out onto the floor and explained her duties.

"No matter how drunk or awkward they are, you gotta be nice," said Ethel. "If you don't step out you're a dead one around here. There are a lot of cheap skates hanging around this joint, and you've got to be able to spot them. Never date out a cheap skate. He'll take you to a ten cent coffee house, feed you on sinkers and take you for a walk in the park."

Hilda faced the crowd of men who stood about the rope corral. All were staring at her, it seemed. She felt that she could not face them much longer. Then she noticed that the other dancers never looked at the males, but talked among themselves nonchalantly or gazed into space. She followed this example.

The orchestra broke into a blare of music and three men came toward her holding out tickets. One was a dusky youth, the other was a husky red-faced man of corpulent build, while the third was a boy who appeared to be slightly under the influence of liquor.

"Grab one of them," hissed Ethel. "You can't stand there all day. The management will can you if you don't dance."

Hilda chose the lesser of the three evils and took the youth.

In that minute and a half of dancing the country girl suffered

Lipstick Girls of Yesteryear

by HELEN DUPREY.

Milady's Face Once Used as Palette on Which All Shades of White, Blue, and Red Were Applied

THE girl of today has a lot to learn about facial makeup from the girls of fifty and one hundred years ago. The girl of the court was especially adept. Her face was used as a palette upon which all shades of blue, brown, white and red were applied. After a foundation coat of cold cream was applied, white, called silver or pearl white, furnished the background for the picture.

There were many shades and degrees of white, but the essential element of their composition was alabaster. This marble was pounded and pulverized in special mills in Paris. A quarry of fine marble was exhausted every year in the manufacture of "Foundation powder" alone.

After this application the red, chosen from among seventeen shades ranging from magenta to vermillion, was laid on lightly in layers and graded from the top of the cheek to the beginning of the neck.

With pastels made of talc and indigo, delicate veins were traced, and a final layer of powder was added to blend and tone the whole. The face was made up to suit the occasion, for a face intended to shine under the rays of artificial light could not receive the same treatment as one which would be seen in the daylight. There was one kind of make-up for the theater and another for the ballroom.

Painting was at one time replaced by enameling, because while the most successful of paints cannot resist the action of heat and moisture, and must be renewed at least once a day, enamel lends the face a clearness that will last for several weeks. This process held the face, however, with a ceramic stiffness and the application was a long and painful one.

To fix coloring upon the face, cold recourse was made to dangerous acids. Part of the enameling had to be done in darkness, and two or three days of intermittent treatment were necessary.

Grave accidents and chronic affections of the skin resulted from enameling. But the very risk seemed to add to the temptation of this mysterious process which was so jealously guarded by its practitioners that the secret of its makers is lost. Many self-condemned martyrs braved the pain and danger for the sake of the pearly splendor that transformed their faces into colored pieces of art pottery.

Imagine what would happen if a pimple, mole or wart should ap-

pear. It is unfortunate that the finest skins are most subject to misadventures of this kind.

Surgery was the form of treatment formerly employed. By slashing, tearing and burning with acids it came to the assistance of the

professional beauty doctor. Modern beauty-seekers shrink from such painful methods, and have recourse to the electric needle, with its less certain results.

Josephine Beauharnais had the courage to have sixty freckles re-

Painting at One Time Replaced by Enameling, Very Painful Process; Secret Now Lost

moved from her face with a knife. But the crown of self-inflicted martyrdom belongs to a celebrated actress, famous at the close of the nineteenth century. She was driven to despair when she discovered her beauty was compromised by the unattractiveness of her skin. She decided to have the skin of her neck, arms, shoulders and face removed.

After a long search two doctors were found who would undertake the operation and the strange work of renovation was begun. All the skin was chemically burned and detached bit by bit. After two months of uninterrupted suffering the old skin had disappeared and was replaced by one as rosy and tender as a baby's.

This baby-like complexion was very inappropriate for a woman of 30 and the desperate actress found herself more ill-looking than before the operation. After a month's enforced seclusion, however, the new skin became aged a little more and she was completely rejuvenated and transformed.

Suppressing of undesirable growths has always taken a good deal of the beauty-seekers' time, but adding to them is just as important a feature.

The use of "patches" was inaugurated in the seventeenth century and has its counterpart in the "beauty spots" that adorn the powdered backs of our modern beauties when they are dressed for the dance.

They were cut out of black satin or sarcenet in the shape of suns, crescents, stars and comets, and were gummed on the back. They were considered an indispensable accessory to the play of the features, and their placing was a special art.

A lady of quality always wore from eight to ten, and never went without her box of patches for the replacing of those that fell off, or the addition of fresh ones as the occasion might require.

Each one of these patches had a characteristic name; at the corner of the eye, "the impassioned;" in the middle of the cheek, "the gallant;" near the lips, "the coquette," and on a pimple, "the concealer." With all her patches properly placed a lady of quality looked as if she had met with some accident to her skin.

In 1902, before the reign of the "flapper type," her so-called conservative predecessors had had little bits of brown India rubber inserted under their skins to resemble moles or "beauty spots."

NO WIVES, NO WORRY, LIVE TO BE 100

(Continued From Page Three)

love interest. Of wives they will have none, but of loving couples aplenty.

At the Veterans' Home at Napa the old soldier is monarch of all he surveys. Unless he is paid to work he answers to no beck and call, and the only summons that he recognizes is the familiar blare of the bugle sounding reveille, mess calls, sick calls, retreat, calls to quarters or taps.

The organization at the home is divided into seven companies, each of which is in charge of a veteran captain. This captain has little authority except to keep track of his men, report the number on mess call and act as intermediary between the individuals of his "command" and the adjutant of the home.

At the present time of the total number of veterans assigned to the home 534 are actually in attendance, 236 are on furlough visiting relatives and spending their pension money in some city, 34 are on pass for ten days or less and three are A. W. O. L.

Oh yes, old age does not prevent the soldier from going A. W. O. L. (absent without leave). Just because a man has passed his hundredth year is no reason why he should not sneak off to one of the small valley towns and put on a bit of party. And if he remains away for more than one day, he should worry if he is posted as A. W. O. L. It may mean a few extra days of fatigue duty, but there is no guardhouse or "brig" at the home, and punishment for delinquencies is uncertain and lenient.

The Civil War veteran is passing. In five years they will be all gone. The grim reaper is no respecter of station, heroism, wealth or rank. One by one the heroes who fought with Grant, McClellan and the rest are dying, to be buried in the little cemetery on the hill where 2392 graves are marked by white grave-stones.

Ten years ago there were 949 Civil War vets in the home. Today there are only 420. They are dying at the rate of about ten a month.

There are 320 Spanish-American war survivors, forty-five who fought in the Indian wars and fifteen World War men. There are no soldiers who fought in the Mexican war now at the home. There are seven men who have been admitted into the home on the strength of foreign service.

The Veterans' Home, located nine miles from Napa on the highway, was opened April 1, 1884, on a farm of 910 acres, purchased at that time at a cost of \$17,750. About 200 acres of this land is in the valley and well adapted to viticulture and grain raising. The home was secured through the joint effort of the veterans of the Civil War and survivors of the Mexican War.

Much of the food consumed at the home is now raised on this ranch, and butter and milk is furnished by the fine herd of dairy cows. More than 3000 chickens are kept on the chicken ranch, and twenty-seven tons of prunes were sold from the orchard to other state institutions last year.

Calling attention to the fact that over 160,000 soldiers, sailors and marines of the World War are eligible for admission to the Veterans' Home, Colonel Nelson M. Holderman, who resigned as commandant to resume active army service, asked that an amount be appropriated by the state legislature for the rebuilding of the home.

Colonel Holderman in his 1920 report called the attention of the board of directors of the home to the fact that the present wooden buildings are firetraps, that it is almost impossible to keep down bedbugs and other vermin, that the two-story barracks are not suitable to feeble men who cannot climb stairs, and that good civilian help cannot be secured because there are no quarters for the families of such workers.

Colonel R. C. Martin, the present commandant, states that the hospital of the home is filled to capacity and that the fire peril has been demonstrated by a serious blaze that broke out in the hospital kitchen in June of last year and by a later fire that started on the roof.

GENERAL SHERMAN'S BROKEN PROMISE

(Continued from Page Four)

comprende—no comprende" (I do not understand).

One soon knew that the others might tell the details of the old legend, and sightseers might come and go, yet never from her own lips would they glean any facts upon her life story.

We had heard that an old chest held the remains of her girlish finery, and how we longed, woman-like, to be in her confidence, that she might lift the lid and show us this leaf from the past. Oh, how we would have enjoyed seeing the soft clinging gowns worn when she danced with "Guillermo"; the little satin slippers, the self-same satin fan, which served to hide her blushes when the gallant young officer whispered to her of his love, and called her "La Tullita," away back "in the splendid-idle forties."

From the quaint parlor we were then conducted out on the low balcony, and into the ancient garden, bringing to mind so vividly Tennyson's Day Dream:

"Here all things in their place remain,
As all were ordered long ago."

This garden was a story in itself; a poem set to the music of wind in the pines, the ripple of the blue bay, the chime of old Mission bells, and the song of nesting birds.

It was the place of the siesta, and brought forth all hidden romance in one's soul. It was here, perhaps, in this old-fashioned garden that her hero first told of his love; under these very giant pear trees and rose trees, which are almost immortal.

How more than beautiful, for it was the season of the spring. The winds made delicious harmony through all the tender network of

the leaves, bees hummed, and butterflies danced, in exquisite flashes of color, but seemed to linger more tenderly on the rich heart of the rosa de oro.

The garden at the rear, as well as in the front of the old home, was shut in by a high adobe wall, with picturesque red tiling, and Lady Washington geraniums climbing over it in a mad riot of color. In this garden there were all kinds of old fashioned flowers; those we knew in the far-off gardens of childhood. It was all full of peace, and sanctity, and full of the charm of another day.

Lovingly the Senorita touched each flower, as if it had been the face of her own child—and they were her children. How often had she paced to and fro beneath the beloved rose tree and murmured like Mariana: "He cometh not. I would that I were dead."

The wind ruffled the sea, and stirred with the black lace mantilla of this old Spanish gentlewoman; the bells of the old Mission pealed out on the quiet air, and she said that she must go to mass.

So, standing under her own rose tree of love she bade us goodbye. We watched her as she wended her way to the old Mission, and shall always remember the Senorita as we last saw her, just entering the great iron door—her slight form silhouetted against the low adobe wall, and her well-worn prayer book clasped in little brown, nervous hands.

She has gone from this life now, into the Gardens Eternal, but it was only recently that in the old home, which she bequeathed to the former mayor of Monterey, was found—an ancient chest, and it contained the very silks, laces and brocades we had once so longed to see.

But—most sacred of all—a photograph of the young Sherman, in his uniform, carefully laid away in rose petals—the very rose he had planted; the rose that was husband, child—life itself, to this sweet Vestal Virgin of old Monterey.

But always—when our memory harks back to that time we can catch the faint perfume of the rose, and we hear her murmur: "No comprende—no comprende."

The Story of Mankind

by Hendrik Van Loon

PART ONE

Where Do We Come From? Whither Are We Bound? The First Living Cell That Floated on the Waters of the Sea---Man Was the Last to Come, but the First to Use His Brain---Prehistoric Man---Hieroglyphics and the Art of Writing---The Nile Valley and Civilization

THE SETTING OF THE STAGE

We live under the shadow of a gigantic question mark.

Who are we?

Where do we come from?

Whither are we bound?

Slowly, but with persistent courage, we have been pushing this question mark further and further towards that distant line, beyond the horizon, where we hope to find our answer.

We have not gone very far.

We still know very little but we have reached the point where (with a fair degree of accuracy) we can guess at many things.

In this chapter I shall tell you how (according to our best belief) the stage was set for the first appearance of man.

If we represent the time during which it has been possible for animal life to exist upon our planet by a line of this length, then the tiny

line just below indicates the age during which man (or a creature more or less resembling man) has lived upon this earth.

Man was the last to come but the first to use his brain for the purpose of conquering the forces of nature. That is the reason why we are going to study him, rather than cats or dogs or horses or any of the other animals, who, all in their own way, have a very interesting historical development behind them.

IT RAINED INCESSANTLY

In the beginning, the planet upon which we live was (as far as we now know) a large ball of flaming matter, a tiny cloud of smoke in the endless ocean of space. Gradually, in the course of millions of years, the surface burned itself out, and was covered with a thin layer of rocks. Upon these lifeless rocks the rain descended in endless torrents, wearing out the hard granite and carrying the dust to the valleys that lay hidden between the high cliffs of the steaming earth.

Finally the hour came when the sun broke through the clouds and saw how this little planet was covered with a few small puddles which were to develop into the mighty oceans of the eastern and western hemispheres.

Then one day the great wonder happened. What had been dead, gave birth to life.

The first living cell floated upon the waters of the sea.

For millions of years it drifted aimlessly with the currents. But during all that time it was developing certain habits that it might survive more easily upon the inhospitable earth. Some of these cells were happiest in the dark depths of the lakes and the pools. They took root in the slimy sediments which had been carried down from the tops of the hills and they became plants. Others preferred to move about and they grew strange jointed legs, like scorpions and began to crawl along the bottom of the sea amidst the plants and the pale green things that looked like jelly-fishes. Still others (covered with scales) depended upon a swimming motion to go from place to place in their search for food, and gradually they populated the ocean with myriad of fishes.

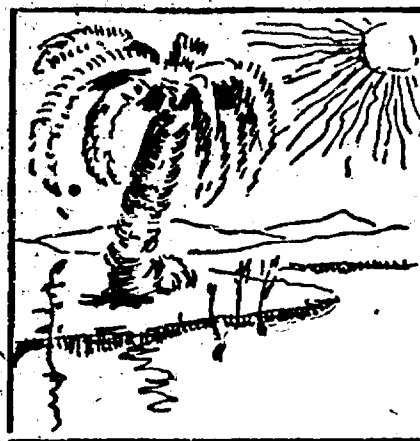

Meanwhile the plants had increased in number and they had to search for new dwelling places. There was no more room for them at the bottom of the sea. Reluctantly they left the water and made a new home in the marshes and on the mudbanks that lay at the foot of the mountains. Twice a day the tides of the ocean covered them with their brine. For the rest of the time, the plants made the best of their uncomfortable situation and tried to survive in the thin air which surrounded the surface of the planet. After centuries of training, they learned how to live as comfortably in the air as they had done in the

High up in the North in the land called Svithjod, there stands a rock. It is a hundred miles high and a hundred miles wide. Once every thousand years a little bird comes to this rock to sharpen its beak.

When the rock has thus been worn away, then a single day of eternity will have gone by.

water. They increased in size and became shrubs and trees and at last they learned how to grow lovely flowers which attracted the attention

THE PLANTS LEAVE THE SEA

of the busy big bumble-bees and the birds who carried the seeds far and wide until the whole earth had become covered with green pastures, or lay dark under the shadow of the big trees.

But some of the fishes too had begun to leave the sea, and they had learned how to breathe with lungs as well as with gills. We call such creatures amphibious, which means that they are able to live with equal ease on the land and in the water. The first frog who crosses your path can tell you all about the pleasures of the double existence of the amphibian.

Once outside of the water, these animals gradually adapted themselves more and more to life on land. Some became reptiles (creatures who crawl like lizards) and they shared the silence of the forests with the insects. That they might move faster through the soft soil, they improved upon their legs and their size increased until the world was populated with gigantic forms (which the hand-books of biology list under the names of Ichthyosaurus and Megalosaurus and Brontosaurus) who grew to be thirty to forty feet long and who could have played with elephants as a full grown cat plays with her kittens.

Some of the members of this reptilian family began to live in the tops of the trees, which were then often more than a hundred feet high. They no longer needed their legs for the purpose of walking, but it was necessary for them to move quickly from branch to branch. And so they changed a part of their skin into a sort of parachute, which stretched between the sides of their bodies and the small toes of their fore-feet, and gradually they covered this skinny parachute with feathers and made their tails into a steering gear and flew from tree to tree and developed into true birds.

Then a strange thing happened. All the gigantic reptiles died

(Continued on Next Page)

World Empire of the Reptiles Overthrown

within a short time. We do not know the reason. Perhaps it was due to a sudden change in climate. Perhaps they had grown so large that they could neither swim nor walk nor crawl, and they starved to death within sight but not within reach of the big ferns and trees. Whatever the cause, the million year old world-empire of the big reptiles was over.

The world now began to be occupied by very different creatures. They were the descendants of the reptiles but they were quite unlike these because because they fed their young from the "mammas" or the breasts of the mother. Wherefore modern science calls these animals "mammals." They had shed the scales of the fish. They did not adopt the feathers of the bird, but they covered their bodies with hair. The mammals however developed other habits which gave their race a great advantage over the other animals. The female of the species carried the eggs of the young inside her body until they were hatched and while all other living beings, up to that time, had left their children exposed to the dangers of cold and heat, and the attacks of wild beasts, the mammals kept their young with them for a long time and sheltered them while they were still too weak to fight their enemies. In this way the young mammals were given a much better chance to survive, because they learned many things from their mothers, as you will know if you have ever watched a cat teaching her kittens to take care of themselves and how to wash their faces and how to catch mice.

But of these mammals I need not tell you much for you know them well. They surround you on all sides. They are your daily companions in the streets and in your home, and you can see your less familiar cousins behind the bars of the zoological garden.

And now we come to the parting of the ways when man suddenly leaves the endless procession of dumbly living and dying creatures and begins to use his reason to shape the destiny of his race.

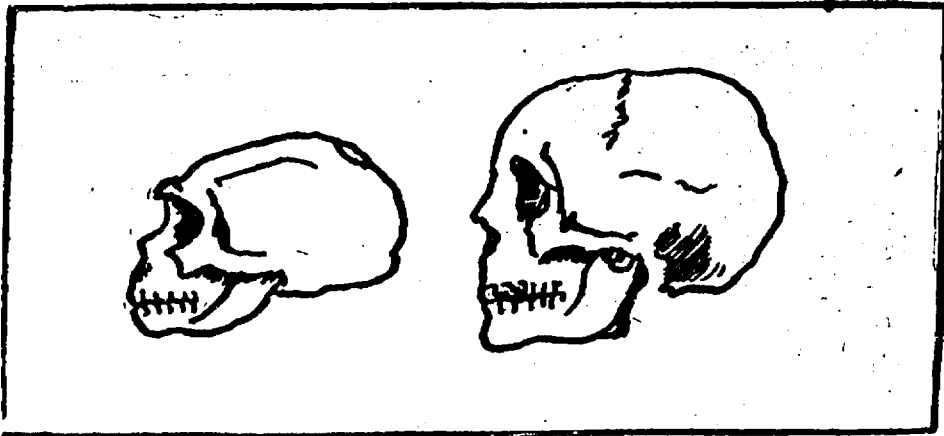

One mammal in particular seemed to surpass all others in its ability to find food and shelter. It had learned to use its fore-feet for the purpose of holding its prey, and by dint of practice it had developed a hand-like claw. After innumerable attempts it had learned how to balance the whole of the body upon the hind legs. (This is a difficult act, which every child has to learn anew although the human race has been doing it for over a million years.)

This creature, half ape and half monkey but superior to both, became the most successful hunter and could make a living in every clime. For greater safety, it usually moved about in groups. It learned how to make strange grunts to warn its young of approaching danger and after many hundreds of thousands of years it began to use these throaty noises for the purpose of talking.

The creature, though you may hardly believe it, was your first "man-like" ancestor.

OUR EARLIEST ANCESTORS

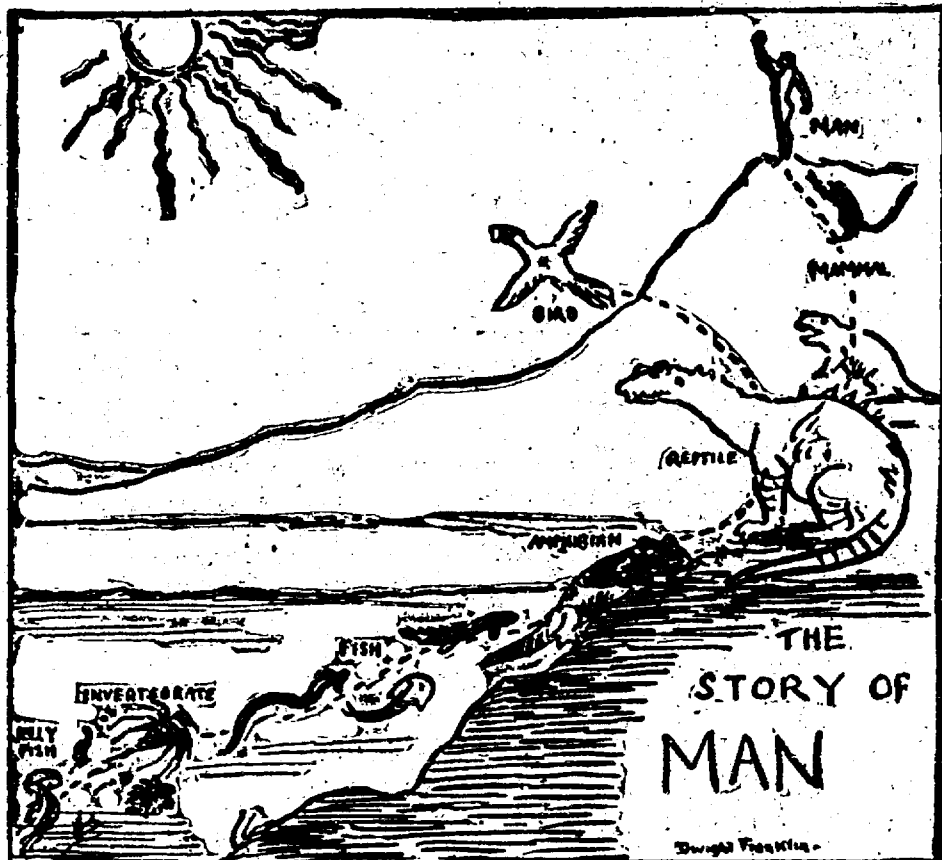

We know very little about the first "true" men. We have never seen their pictures. In the deepest layer of clay of an ancient soil we have sometimes found pieces of their bones. They lay buried amidst the broken skeletons of other animals that have long since disappeared from the face of the earth. Anthropologists (learned scientists who devote their lives to the study of man as a member of the animal kingdom) have taken these bones and they have been able to reconstruct our earliest ancestors with a fair degree of accuracy.

THE GROWTH OF THE HUMAN SKULL.

The great-great-grandfather of the human race was a very ugly and unattractive mammal. He was quite small, much smaller than the people of today. The heat of the sun and the biting wind of the cold winter had coloured his skin a dark brown. His head and most of his body, his arms and legs too, were covered with long, coarse hair. He had very thin but strong fingers which made his hands look like those of a monkey. His forehead was low and his jaw was like the jaw of a wild animal which uses its teeth both as fork and knife. He wore no clothes. He had seen no fires except the flames of the rumbling volcanoes which filled the earth with their smoke and their lava.

He lived in the damp blackness of vast forests, as the pygmies of Africa do to this very day. When he felt the pangs of hunger he ate raw leaves and the roots of plants or he took the eggs away from an angry bird and fed them to his own young. Once in a while, after a long and patient chase, he would catch a sparrow or a small wild dog or perhaps a rabbit. These he would eat raw for he had never discovered that food tasted better when it was cooked.

THE ASCENT OF MAN

During the hours of day, this primitive human being prowled about looking for things to eat.

When night descended upon the earth, he hid his wife and his children in a hollow tree or behind some heavy boulders, for he was surrounded on all sides by ferocious animals and when it was dark these animals began to prowl about, looking for something to eat for their mates and their own young, and they liked the taste of human beings. It was a world where you must either eat or be eaten, and life was very unhappy because it was full of fear and misery.

In summer, man was exposed to the scorching rays of the sun, and during the winter his children would freeze to death in his arms. When such a creature hurt itself, (and hunting animals are forever breaking their bones or spraining their ankles) he had no one to take care of him and he must die a horrible death.

Like many of the animals who fill the Zoo with their strange noises, early man liked to jabber. That is to say, he endlessly repeated the same unintelligible gibberish because it pleased him to hear the sound of his voice. In due time he learned that he could use this guttural noise to warn his fellow beings whenever danger threatened and he gave certain little shrieks which came to mean "there is a tiger" or "here come five elephants." Then the others grunted something back at him and their growl meant, "I see them," or "let us run away and hide." And this was probably the origin of all language.

But, as I have said before, of these beginnings we know so very little. Early man had no tools, and he built himself no houses. He lived and died and left no trace of his existence except a few collar-bones and a few pieces of his skull. These tell us that many thousands of years ago the world was inhabited by certain mammals who were quite different from all the other animals—who had probably developed from another unknown ape-like animal which had learned to walk on its hind-legs and use its fore-paws as hands—and who were most probably connected with the creatures who happen to be our own immediate ancestors.

It is little enough we know and the rest is darkness.

PREHISTORIC MAN

PREHISTORIC MAN BEGINS TO MAKE THINGS FOR HIMSELF.

EARLY man did not know what time meant. He kept no records of birthdays or wedding anniversaries or the hour of death. He had no idea of days or weeks or even years. But in a general way he kept track of the seasons for he had noticed that the cold winter was invariably followed by the mild spring—that spring grew into the hot summer when fruits ripened and the wild ears of corn were ready to be eaten and that summer ended when sudden gusts of wind swept the leaves from the trees and a number of animals were getting ready for the long hibernal sleep.

But now, something unusual and rather frightening had happened. Something was the matter with the weather. The warm days of summer had come very late. The fruits had not ripened. The tops of the mountains which used to be covered with grass now lay deeply hidden underneath a heavy burden of snow.

Then, one morning, a number of wild people, different from the other creatures who lived in that neighborhood, came wandering down from the region of the high peaks. They looked lean and appeared to be starving. They uttered sounds which no one could understand. They seemed to say that they were hungry. There was not food enough for both the old inhabitants and the newcomers. When they tried to stay

Coming of the Glaciers: Man Invents Clothing: Early Man on the Nile: Egypt

PREHISTORIC EUROPE

more than a few days there was a terrible battle with claw-like hands and feet and whole families were killed. The others fled back to their mountain slopes and died in the next blizzard.

But the people in the forest were greatly frightened. All the time the days grew shorter and the nights grew colder than they ought to have been.

Finally, in a gap between two high hills, there appeared a tiny speck of greenish ice. Rapidly it increased in size. A gigantic glacier came sliding downhill. Huge stones were being pushed into the valley. With the noise of a dozen thunderstorms torrents of ice and mud and blocks of granite suddenly tumbled among the people of the forest and killed them while they slept. Century old trees were crushed into kindling wood. And then it began to snow.

It snowed for months and months. All the plants died and the animals fled in search of the southern sun. Man hoisted his young upon his back and followed them. But he could not travel as fast as the wilder creatures and he was forced to choose between quick thinking or quick dying. He seems to have preferred the former for he has managed to survive the terrible glacial periods which upon four different occasions threatened to kill every human being on the face of the earth.

In the first place it was necessary that man clothe himself lest he freeze to death. He learned how to dig holes and cover them with branches and leaves and in these traps he caught bears and hyenas, which he then killed with heavy stones and whose skins he used as coats for himself and his family.

Next came the housing problem. This was simple. Many animals were in the habit of sleeping in dark caves. Man now followed their example, drove the animals out of their warm homes and claimed them for his own.

Even so, the climate was too severe for most people and the old and the young died at a terrible rate. Then a genius bethought himself of the use of fire. Once, while out hunting, he had been caught in a forest-fire. He remembered that he had been almost roasted to death by the flames. Thus far fire had been an enemy. Now it became a friend. A dead tree was dragged into the cave and lighted by means of smouldering branches from a burning wood. This turned the cave into a cozy little room.

And then one evening a dead chicken fell into the fire. It was not rescued until it had been well roasted. Man discovered that meat tasted better when cooked and he then and there discarded one of the old habits which he had shared with the other animals and began to prepare his food.

In this way thousands of years passed. Only the people with the cleverest brains survived. They had to struggle day and night against cold and hunger. They were forced to invent tools. They learned how to sharpen stones into axes and how to make hammers. They were

obliged to put up large stores of food for the endless days of the winter and they found that clay could be made into bowls and jars and hardened in the rays of the sun. And so the glacial period, which had threatened to destroy the human race, became its greatest teacher because it forced man to use his brain.

HIEROGLYPHICS

THE EGYPTIANS INVENT THE ART OF WRITING AND THE RECORD OF HISTORY BEGINS

THESE earliest ancestors of ours who lived in the great European wilderness were rapidly learning many new things. It is safe to say that in due course of time they would have given up the ways of savages and would have developed a civilization of their own. But suddenly there came an end to their isolation. They were discovered.

A traveler from an unknown southland who had dared to cross the sea and the high mountain passes had found his way to the wild people of the European continent. He came from Africa. His home was in Egypt.

The valley of the Nile had developed a high stage of civilization thousands of years before the people of the west had dreamed of the possibilities of a fork or a wheel or a house. And we shall therefore leave our great-great-grandfathers in their caves, while we visit the southern and eastern shores of the Mediterranean, where stood the earliest school of the human race.

The Egyptians have taught us many things. They were excellent farmers. They knew all about irrigation. They built temples which were afterwards copied by the Greeks and which served as the earliest models for the churches in which we worship nowadays. They had invented a calendar which proved such a useful instrument for the purpose of measuring time that it has survived with a few changes until today. But most important of all, the Egyptians had learned how to preserve speech for the benefit of future generations. They had invented the art of writing.

We are so accustomed to newspapers and books and magazines that we take it for granted that the world has always been able to read and write. As a matter of fact, writing, the most important of all inventions, is quite new. Without written documents we would be like cats and dogs, who can only teach their kittens and their puppies a few simple things and who, because they cannot write, possess no way in which they can make use of the experience of those generations of cats and dogs that have gone before.

In the first century before our era, when the Romans came to Egypt, they found the valley full of strange little pictures which seemed to have something to do with the history of the country. But the Romans were not interested in "anything foreign" and did not inquire into the origin of these queer figures which covered the walls of the temples and the walls of the palaces and endless reams of flat sheets made out of the papyrus reed. The last of the Egyptian priests who had understood the holy art of making such pictures had died several years before. Egypt deprived of its independence had become a storehouse filled with important historical documents which no one could decipher and which were of no earthly use to either man or beast.

Seventeen centuries went by and Egypt remained a land of mystery. But in the year 1798 a French general by the name of Bonaparte happened to visit eastern Africa to prepare for an attack upon the British Indian Colonies. He did not get beyond the Nile, and his campaign was a failure. But, quite accidentally, the famous French expedition solved the problem of the ancient Egyptian picture-language.

One day a young French officer, much bored by the dreary life of his little fortress on the Rosetta river (a mouth of the Nile) decided to spend a few idle hours rummaging among the ruins of the Nile Delta. And behold! he found a stone which greatly puzzled him. Like everything else in Egypt it was covered with little figures. But this particular slab of black basalt was different from anything that had ever been discovered. It carried three inscriptions. One of these was in Greek. The Greek language was known. "All that is necessary," so he reasoned, "is to compare the Greek text with the Egyptian figures, and they will at once tell their secret."

The plan sounded simple enough but it took more than twenty years to solve the riddle. In the year 1802 a French professor by the name of Champollion began to compare the Greek and the Egyptian texts of the famous Rosetta stone. In the year 1823 he announced that he had discovered the meaning of fourteen little figures. A short time later he died from overwork, but the main principles of Egyptian writing had become known. Today the story of the valley of the Nile is better known to us than the story of the Mississippi River. We possess a written record which covers four thousand years of chronicled history.

As the ancient Egyptian hieroglyphics (the word means "sacred writing") have played such a very great role in history; (a few of them in modified form have even found their way into our own alphabet,) you ought to know something about the ingenious system which was used fifty centuries ago to preserve the spoken word for the benefit of the coming generations.

Of course, you know what a sign language is. Every Indian story of our western plains has a chapter devoted to strange messages written in the form of little pictures which tell how many buffaloes were

(Continued on Next Page)

The Valley of the Nile, Where Man Found Time to Think About Civilization

killed and how many hunters there were in a certain party. As a rule it is not difficult to understand the meaning of such messages.

Ancient Egyptian, however, was not a sign language. The clever people of the Nile had passed beyond that stage long before. Their pictures meant a great deal more than the object which they represented, as I shall try to explain to you now.

Suppose that you were Champollion, and that you were examining a stack of papyrus sheets, all covered with hieroglyphics. Suddenly you came across a picture of a man with a saw. "Very well," you would say, "that means of course that a farmer went out to cut down a tree." Then you take another papyrus. It tells the story of a queen who had died at the age of eighty-two. In the midst of a sentence appears the picture of the man with the saw. Queens of eighty-two do not handle saws. The picture therefore must mean something else. But what?

That is the riddle which the Frenchman finally solved. He discovered that the Egyptians were the first to use what we now call "phonetic writing"—a system of characters which reproduce the "sound" (or phone) of the spoken word and which make it possible for us to translate all our spoken words into a written form, with the help of only a few dots and dashes and pothooks.

Let us return for a moment to the little fellow with the saw. The word "saw" either means a certain tool which you will find in a carpenter's shop, or it means the past tense of the verb "to see."

This is what had happened to the word during the course of centuries. First of all it had meant only the particular tool which it represented. Then that meaning had been lost and it had become the past participle of a verb. After several hundred years, the Egyptians lost

sight of both these meanings and the picture

came to

stand for a single letter, the letter S. A short sentence will show you what I mean. Here is a modern English sentence as it would have been written in hieroglyphics.

The  either means one of these two round objects in your head, which allow you to see or it means "I," the person who is talking.

A  is either an insect which gathers honey, or it represents the verb "to be" which means to exist. Again, it may be the first part of a verb like "be-come" or "be-have." In this particular

instance it is followed by  which means a "leaf" or "leave" or "lieve" (the sound of all three words is the same).

The "eye" you know all about.

Finally you get the picture of a

It is a giraffe. It is

part of the old sign-language out of which the hieroglyphics developed.

You can now read that sentence without much difficulty.

"I believe I saw a giraffe."

Having invented this system the Egyptians developed it during thousands of years until they could write anything they wanted, and they used these "canned words" to send messages to friends, to keep business accounts and to keep a record of the history of their country, that future generations might benefit by the mistakes of the past.

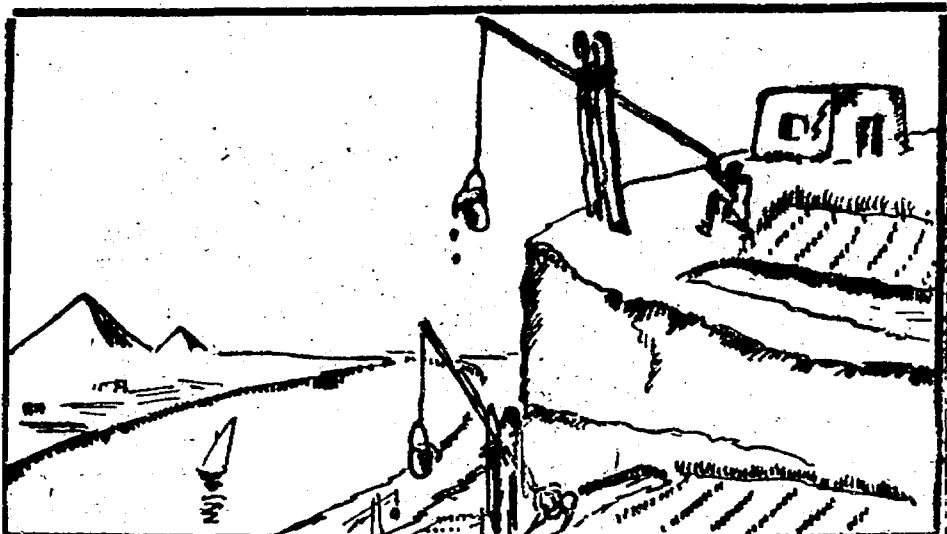

THE NILE VALLEY

The Beginning of Civilization in the Valley of the Nile.

The history of man is the record of a hungry creature in search of food. Wherever food was plentiful, thither man has traveled to make his home.

The fame of the Valley of the Nile must have spread at an early date. From the interior of Africa and from the desert of Arabia and from the western part of Asia people had flocked to Egypt to claim their share of the rich farms. Together these invaders had formed a new race which called itself "Remi" or "the Men" just as we sometimes call America "God's own country." They had good reason to be grateful to a Fate which had carried them to this narrow strip of land. In the summer of each year the Nile turned the valley into a shallow lake and when the waters receded all the grainfields and the pastures were covered with several inches of the most fertile clay.

In Egypt a kindly river did the work of a million men and made it possible to feed the teeming population of the first large cities of which we have any record. It is true that all the arable land was not in the valley. But a complicated system of small canals and well-sweeps carried water from the river-level to the top of the highest banks and an even more intricate system of irrigation trenches spread it throughout the land.

While man of the prehistoric age had been obliged to spend sixteen hours out of every twenty-four gathering food for himself and the members of his tribe, the Egyptian peasant or the inhabitant of the Egyptian city found himself possessed of a certain leisure. He used this spare time to make himself many things that were merely ornamental and not in the least bit useful.

More than that. One day he discovered that his brain was capable of thinking all kinds of thoughts which had nothing to do with the problems of eating and sleeping and finding a home for the children. The Egyptian began to speculate upon many strange problems that confronted him. Where did the stars come from? Who made the noise of the thunder which frightened him so terribly? Who made the River Nile rise with such regularity that it was possible to base the calendar upon the appearance and the disappearance of the annual floods? Who was he, himself, a strange little creature surrounded on all sides by death and sickness and yet happy and full of laughter?

He asked these many questions and certain people obligingly stepped forward to answer these inquiries to the best of their ability. The Egyptians called them "priests" and they became the guardians of his thoughts and gained great respect in the community. They were highly learned men who were entrusted with the sacred task of keeping the written records. They understood that it is not good for man to think only of his immediate advantage in this world and they drew his attention to the days of the future, when his soul would dwell beyond the mountains of the west and must give an account of his deeds to Osiris, the mighty God who was the Ruler of the Living and the Dead and who judged the acts of men according to their merits. Indeed, the priests made so much of that future day in the realm of Isis and Osiris that the Egyptians began to regard life merely, as a short preparation for the Hereafter and turned the teeming valley of the Nile into a land devoted to the Dead.

In a strange way, the Egyptians had come to believe that no soul could enter the realm of Osiris without the possession of the body, which had been its place of residence in this world. Therefore as soon as a man was dead his relatives took his corpse and had it embalmed. For weeks it was soaked into a solution of natron and then it was filled with pitch. The Persian word for pitch was "Mumiai" and the embalmed body was called a "Mummy." It was wrapped in yards and yards of specially prepared linen and it was placed in a specially prepared coffin ready to be removed to its final home. But an Egyptian grave was a real home where the body was surrounded by pieces of furniture and musical instruments (to while away the dreary hours of waiting) and by little statues of cooks and bakers and barbers (that the occupant of this dark home might be decently provided with food and need not go about unshaven).

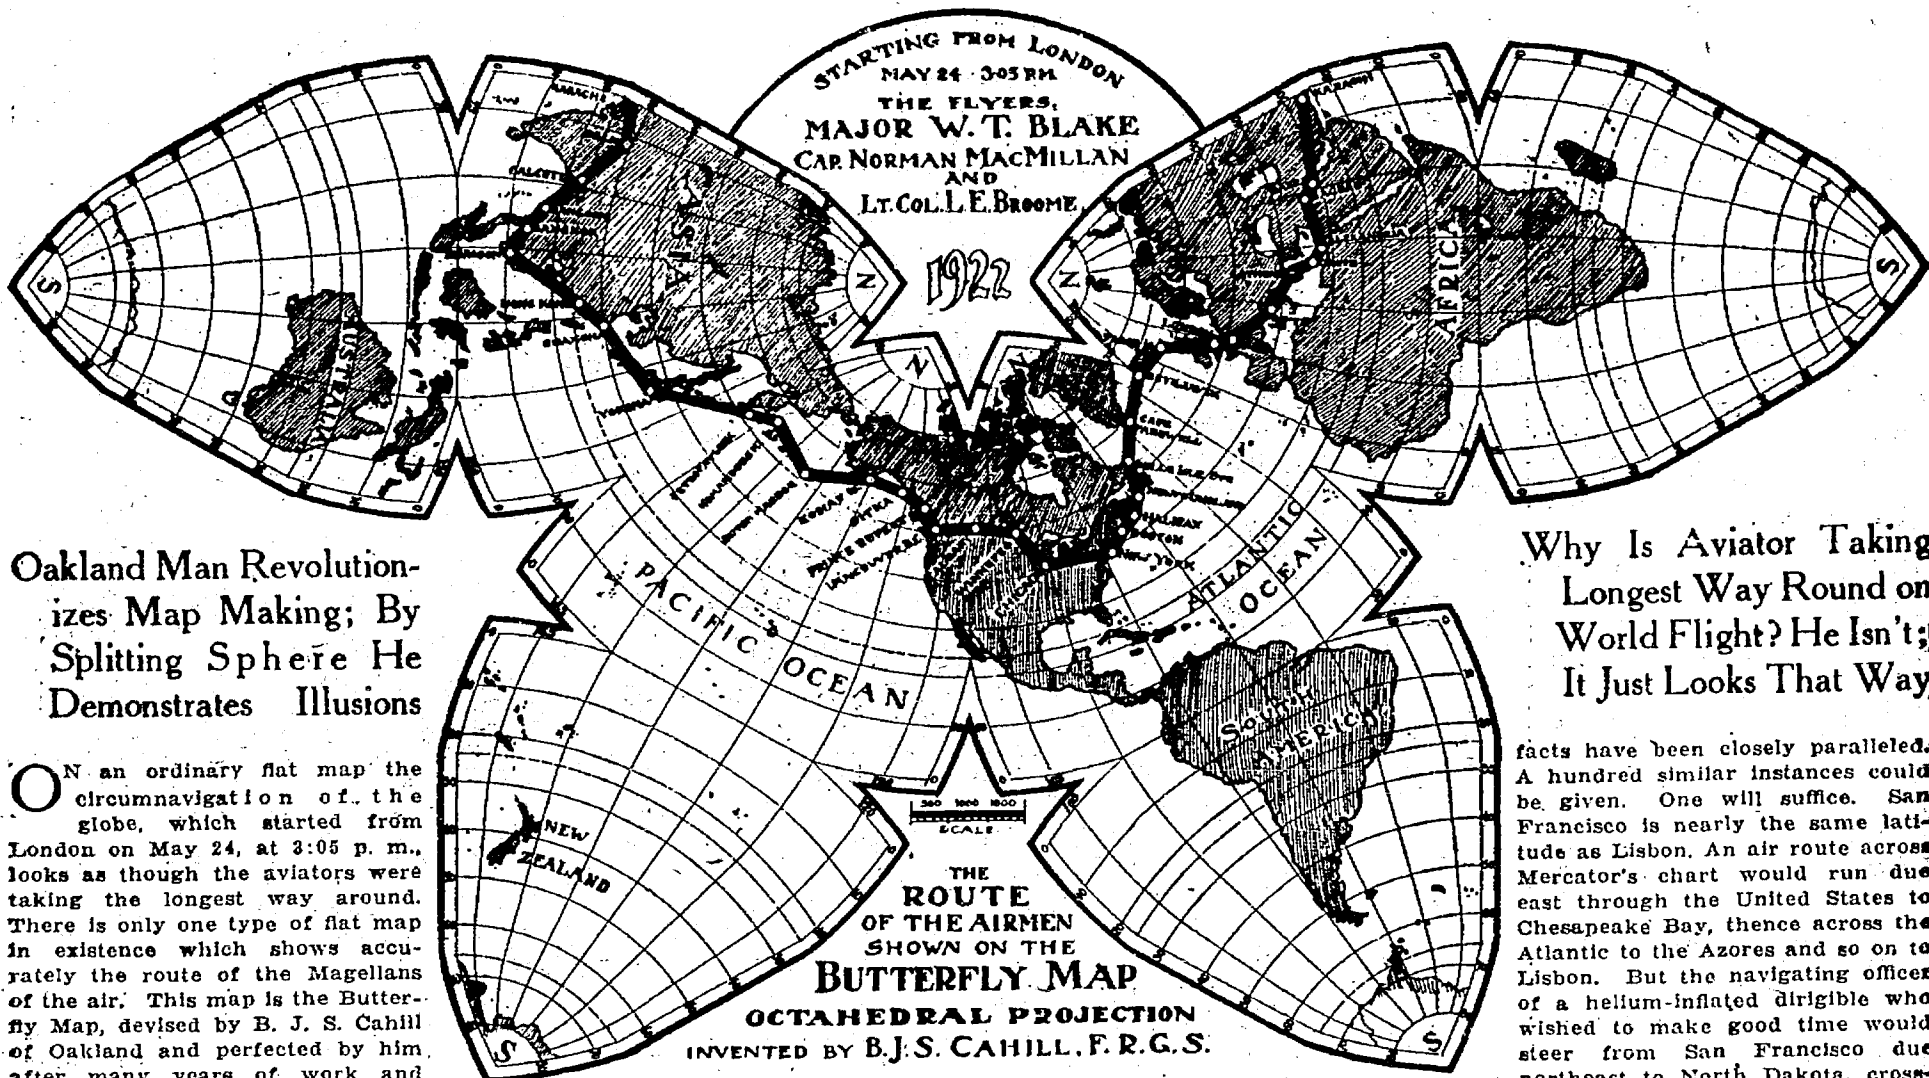

Originally these graves had been dug into the rocks of the western mountains but as the Egyptians moved northward they were obliged to build their cemeteries in the desert. The desert, however, is full of wild animals and equally wild robbers and they broke into the graves and disturbed the mummy or stole the jewelry that had been buried with the body. To prevent such unholy desecration the Egyptians used to build small mounds of stones on top of the graves. These little mounds gradually grew in size, because the rich people built higher mounds than the poor and there was a good deal of competition to see who could make the highest hill of stones. The record was made by King Khufu, whom the Greeks called Cheops and who lived thirty centuries before our era. His mound, which the Greeks called a pyramid (because the Egyptian word for high was pir-em-us) was over five hundred feet high.

It covered more than thirteen acres of desert which is three times as much space as that occupied by the church of St. Peter, the largest edifice of the Christian world.

During twenty years, over a hundred thousand men were busy carrying the necessary stones from the other side of the river—ferrying them across the Nile (how they ever managed to do this, we do not understand), dragging them in many instances a long distance across the desert and finally hoisting them into their correct position. But so well did the King's architects and engineers perform their task that the narrow passage-way which leads to the royal tomb in the heart of the stone monster has never yet been pushed out of shape from all sides.

The Circumnavigation of the Globe

Oakland Man Revolutionizes Map Making; By Splitting Sphere He Demonstrates Illusions

ON an ordinary flat map the circumnavigation of the globe, which started from London on May 24, at 3:05 p. m., looks as though the aviators were taking the longest way around. There is only one type of flat map in existence which shows accurately the route of the Magellans of the air. This map is the Butterfly Map, devised by B. J. S. Cahill of Oakland and perfected by him after many years of work and study.

An idea of the superiority of the Butterfly Map over all the ordinary flat maps of the world may be had by considering the principle on which it was designed. By peeling an orange into four sections, halving the quadrants and then flattening out the entire skin, an illustration is furnished of how the map actually shows the oceans and continents in their proper proportions.

Cahill also illustrates this by painting the continents in their proper positions on a rubber ball, cutting the ball into eight sections and flattening it under glass.

In a brief resume of the history of the Butterfly Map, Cahill states that he was prompted to develop it through the fact that there was

Gold From Feathers

(Continued from Page Two)

estimated by the tens of thousands of degrees.

Working with Dr. J. A. Anderson of the Mt. Wilson Observatory, near Pasadena, Professor Wendt devised a means of reaching for an instant a temperature of 20,000 degrees Centigrade or 35,000 degrees Fahrenheit. This is done by sending electricity through a very fine wire under a pressure of close to 100,000 volts. The current travels for but an instant. The wire is melted and vaporized and for a minute fraction of a second (1-300,000th, according to Dr. Anderson), a temperature of 35,000 degrees Fahrenheit is reached.

A tungsten wire about 0.001 inch in diameter was submitted to such treatment in a closed space. The wire used weighed about 1-100,000th of an ounce and after the electric current had passed it was found that a small amount of helium had been formed. The amount formed indicated that nearly half of the tungsten of the wire had been completely converted into helium, showing the possibility of breaking down even a heavy metal like tungsten into one of the lightest gases known.

Further researches are expected to result in large scale decomposition of other atoms than tungsten and then, when man has completely succeeded in breaking down the big atoms into little ones, attempts will be made to build up larger atoms from the smaller ones. To make gold, say, from iron, or from charcoal or any other of the base substances with which the alchemists started in their fruitless quest.

Another aspect of the new knowledge, it is pointed out, is the possibility of releasing the vast amounts of electrical energy which are known to be stored within the billions of atoms which make up the smallest speck of material. If means can be found to use this power and to control its use, agencies of mechanical work will be placed in the hands of man which will release him forever from the fatigue of routine physical labor and leave him wholly free for the development of his mind and the directed growth of the human race.

no such map in existence, showing the entire world on one flat sheet without distortion of the land masses.

Cahill, an architect with 25 years' experience in problems of scale, form and projection, spent five years devising the map, after which he spent an additional ten years procuring criticisms and suggestions from authorities all over the world.

In explaining the basic idea of his map, Cahill says: "As not more than one-eighth of the surface of a sphere can be seen without noticeable foreshortening, and as the sphere naturally divides itself into four parts above and four parts below the equator, and as the land masses can be fitted into these divisions, the surface of the globe is first divided into eight equal parts or octants."

"In order that the land may fall within these octants, the dividing meridian does not begin at 0 degrees, but at 22 1/2 degrees west of Greenwich, which is also the average historical prime meridian."

"These octants, each containing 90 degrees of latitude and 90 degrees of longitude, when laid flat, become equilateral curvilinear triangles."

"They are then assembled east and west for the northern octants and north and south for southern octants and half the sides of each flattened so that each octant can be joined to its proper neighbor."

Major W. T. Blake, Captain Norman MacMillan and Lieutenant Colonel L. E. Broome do not hope

to make their trip "Around the World in Eighty Days." They figure on about three months' time, with approximately 300 hours in the air. Their 22,310-mile itinerary, shown above, is divided into four parts, showing the type of airplane to be used on each leg of the journey.

Another important service rendered by the Butterfly Map is pointed out by Cahill, who shows that on the ordinary flat map or chart illusions both of distance and direction are produced.

In this connection Cahill cites the instance of a tramp steamer that went ashore off Monterey with a valuable cargo. When the owner in New York consulted the underwriters' agents and told them to send a wrecker from the nearest point there were two wreckers available—one at Acapulco and the other at Juneau.

A glance at the map gave the idea that Acapulco was nearer the scene of the wreck than Juneau. As a result the wrecker from Acapulco was sent instead of the one from Juneau.

There was a margin of several hours lost and the heavy seas battered the ship to pieces before the wrecker arrived.

A glance at the Butterfly Map would have shown instantly, even to a person who knew nothing about navigation, that Juneau was nearer Monterey than was Acapulco.

"The loss," Cahill explains, "was due to the very misleading nature of the chart in question, whose scale of distance increases from the equator to the poles at an ever-enlarging ratio."

"Substitute names have been used in the above instance, but the

Why Is Aviator Taking Longest Way Round on World Flight? He Isn't; It Just Looks That Way

facts have been closely paralleled. A hundred similar instances could be given. One will suffice. San Francisco is nearly the same latitude as Lisbon. An air route across Mercator's chart would run due east through the United States to Chesapeake Bay, thence across the Atlantic to the Azores and so on to Lisbon. But the navigating officer, of a helium-inflated dirigible who wished to make good time would steer from San Francisco due northeast to North Dakota, crossing the Canadian border just below Winnipeg, thence to the southern end of Hudson Bay and across Labrador to the North Atlantic seaboard some hundreds of miles north of the Belle Isle Straits, thence across the water, arriving at Lisbon from the northwest. Who would realize from the other map that in the trip from San Francisco to Lisbon more of the land route would be over Canada than over the United States?"

Cahill explains that Mercator's chart was made for the use of navigators, but that geographers have been compelled to use it, as hitherto there has not been any other adequate projection available.

This need, Cahill points out, has been filled by the Butterfly Map, showing as it does the surface of the world on an eight-part decentralized projection.

A comparison of the around-the-world air route as shown on the above map, with the same route traced upon an ordinary flat map, will show how accurately the Butterfly Map shows distances and directions.

Mongolia Racing

WHERE JOCKEYS CARRY HANDKERCHIEFS FOR THEIR RACE HORSES.

Very few travelers penetrate into Mongolia, the bleak and almost uncivilized table-land of Central Asia. This vast country does not even boast of a single mile of railroad, so that the people have remained almost the way they were, the powerful Tartars of the Middle Ages.

If a daring adventurer braves the dangers of a trip into Mongolia he is fascinated by the natives at the time of their summer festivals. Then, every Mongolian family puts on its best bibs and tuckers and goes to the fair, much in the same way the people in our own country sections go to the county fair.

However, at the Mongolian county fair you do not "hit the baby" and get a 5-cent cigar, or throw the rings at canes to obtain a prize, but you do see horse races.

Instead of sitting in a grandstand and watching the entire race as you do here, you see only the start or finish. For the races in Mongolia are thirty miles long!

The Mongolians are great horsemen, and learn to ride at a very early age. Their lives are spent with and on horses. The women ride as well as the men, and by the time a boy has reached the age of 10 he is an expert horseman. In fact, the jockeys are 10-year-old boys.

These little fellows are mounted on the very fast Mongolian ponies, without saddles. Their only trappings are a bridle, a whip and a handkerchief.

They start on their wild ride over the steppes with the courage and spirit of men, whipping their horses fiercely, but often reaching over kindly to wipe the dust from the eyes and nostrils of their ponies. Yes, in Mongolia the inhabitants don't use handkerchiefs, but horses do.

NEW NATIONAL ANTHEM SUGGESTED

The suggestion made by Augusta E. Stetson in an advertisement in a Baltimore paper to the effect that a new national anthem should be written to replace "The Star Spangled Banner" did not prove popular.

Mrs. Stetson, who was associated closely with Mrs. Mary Baker Eddy, the Christian Science leader, during the latter's life, says the people of America will never accept "The Star Spangled Banner" and Congress will never make the song the national anthem because its air is that of "Anacreon in Heaven," a "ribald, sensual drinking song," and because "the spirit of America is not suitably expressed by hatred, nor by the horrors of war."

"Oh, tell her to go along," said Mrs. Reuben Ross Holloway, national historian of the Daughters of 1812. "Men will fight and there will be wars as long as men are men."

"Such criticisms are absurd. 'The Star Spangled Banner' has been recognized by everyone all over the land as the national anthem. The people have agreed that it was inspired, that national anthems cannot be written without inspiration. I am interested in a bill now before Congress, introduced by Mr. Linthicum, to make 'The Star Spangled Banner' by act of Congress, officially our national anthem."

A majority of the leaders in Chicago's musical world expressed themselves as being unfavorable to

the passage of an act by Congress making "The Star Spangled Banner" the official national anthem.

"Why is it necessary to take an action of that kind?" asked Dr. Peter C. Lutkin, dean of the school of music at Northwestern University. "Personally, I should regret to see the song made the official anthem. It is by no means an ideal tune, and it lacks the proper sentiment and the proper dignity for a national anthem."

"You cannot make a national anthem by legislation," said Kenneth M. Bradley, president of the Bush Conservatory. "Popular taste is what makes a national song. It is very unfortunate that 'The Star Spangled Banner' has come to be considered the national anthem, and only tradition has made it so. From a standpoint of music, the song is rotten. The words are beautiful."

YOUNG FOLKS WIN

Youth is occupying high literary posts in New York these days. Burton Rascoe, just past 20, has been made a book reviewer of the New York Tribune. John V. A. Weaver, the 21-year-old poet, is now the rage among the lovers of poetry. The Bookman—one of the most scholarly of periodicals—is edited by John Farrar, who is also in his early 30s. F. Scott Fitzgerald is author of one of the most recent best sellers. He is only 25.

The Trail of the Serpent

Chapter XVII

By TORREY CONNOR.
(In Collaboration)

I KNEW there was somethin' stirrin' right from the jump, the minute my 'phone starts janglin' in the middle o' the night. And I'll say I wasn't slow rollin' out and connectin' with the other end o' that wire.

"Hello, Smith!" the Chief says, low and quick. "Report to 78. Pile on all the clothes you've got and bring along your automatic and rifle. Shake it up."

Peggin' over the stones in the direction of the docks I tried to "sabe out" what was doin'. The Chief wasn't much on explainin', and bein' a probationer in the Service, it was up to me to check my curiosity. Still a fellow couldn't help wonderin'.

Duckin' down an alley I started criss-crossin' for the wharves. The moon hadn't come up yet and the stars were clotted with fog clouds, scuddin' in from the West. On the water front the big arcs were burnin' bright about the docks, but it was quiet all along the line. A lumber schooner was breastin' in at 76, and a coaster kickin' out into the tide at 77. But 78 was black as the ace o' spades.

From the shadows huggin' the gateway to the dock the night watchman picked me out with his search. Then his light faded quick.

"Come along, Sonny," he said. "They're waitin' for ye on the end o' the dock. Look sharp to yer feet that ye make no noise."

Leadin' the way through the musty darkness of the silent warehouse he kept mumblin'.

"Big doin's afoot me lad, wit' never a chance for the Old Pensioner to kick into the ruction. 'Tis the Devil to be left ashore on a night like this. Give 'em Hell, Boy! But keep in the clear o' their guns or they'll send ye into drydock the same as they did me."

They wasn't any time to ask him what he meant for we was already at the end o' the dock, and the old man was drillin' straight for the side.

"You'll be hurryin' aboard," he whispered. "For 'tis not likely Mr. Belshaw 'll be carin' to wait for the turn o' the tide wit' the job he's got ahead of him 't'night."

I was close at his side as he spoke, looking down into the black water that was suckin' strong around the pilings. But I couldn't make out even a dinky.

A Sausalito ferry-boat was slidin' down the bay, and the gleam of her lights silvered the shadow-outline of a long, gray hull, huggin' the water close alongside the wharf. Narrow o' beam she was, with a rakish bow and a torpedo stern, built low and spindlin'. Her decks were shiny white, stripped clean for action. But from stern to stern they wasn't a man in sight, or a ray o' light showin'. Before the ferry slipped by, I made out a Jacob's ladder saggin' downward from the wharf.

"Good luck to ye, Boy!" the Old Pensioner was sayin', as I swung my leg over. "If ye shouldn't come back—"

His words were swallowed up in the low hum of a heavy-muffled, multi-cylindared motor below me; and the next minute my feet were feelin' for the rail. Hands reached up from the blackness to steady me as I dropped to the deck. All 'round me were little bunches of men huddled quietly about the rail. The air stunk with creosote and raw linseed oil. The Chief was standin' close beside me, speakin' low in my ear:

"Go for'ard, Smith. And keep in the clear o' the sailors at work. When I want you I'll send for you."

In the bow the boatswain was tinkerin' with a hooded blinker-light. But if he was wise to where we were goin' or what we was goin' to do, he wouldn't spill.

"Better be puttin' on one o' these slickers yonder if you're goin' to stay out here," was all he said. "The 'Swift' 's a wet 'un when she gets 't' ramblin', an' the goin's apt to be rough."

Jones was foolin' with a sawed-off shot-gun when I come along-side.

"Fill up your 'magazine," he tipped me off. "Before the decks begins to glaze up and she starts rollin'. I got a hunch you'll need your firearms before mornin'."

I was just finishin' loadin' up when I felt the deck shiverin' under me and lookin' up quick I see the pillin's slidin' away from us. We were backin' out into the stream.

"What's the matter with the lights?" I asked Jones, "tryin' to make out I didn't care much whether they come on or not."

"Thought 'twas against the regulations to run without 'em."

"Tis," he growled. "An' I never saw it done before. How the Chief ever got the Revenue people to swing in with the Customs to break one o' their own rules, 's sure got me guessin'. Must be almighty important."

Scrapin' the dock we shot out into the current and whipped 'round like a chip in the outgoing

tide. The engines were purrin' louder, an' the deck was slantin' as we spun 'round. The wharves dropped away fast, an' the lights on the piers were fadin'. The black water was beginnin' to whiten 'round the bow, and the spray was pickin' up an' hazelin' back over the deck. No moon or stars showin' overhead, an' a misty wind risin'. All 'round us flashin' lights, red, green an' white. But us still as black as midnight.

Frisco bay never looked so darned small before. They was boats everywhere, comin' down on us from every point of the compass. And us a ziz-zaggin' across their bows an' through their wakes like a snake, never even botherin' to answer their signals; breakin' all the rules o' the road an' gatherin' speed with every whirl o' the wheel.

"Tain't nothin' in here," Jones kept sayin'. "Wait 'till we get out and begin overhaulin' the fishermen. The fog 's droppin', an' if the breeze holds, in a half hour you won't be able to cut it with a knife."

I didn't say much, but I was doin' a pile o' thinkin'. Prowlin' 'round on shore was bad enough; but, it was a lot worse at sea. If everybody else was lit up, 't would be a risky game in a mist like that. But suppose some other guy takes it into his head to run dark too! The ocean wasn't as big as it was cracked up to be. 'Twas even money we'd smash into somethin' before we got into the Narrows. And where were we goin', sneakin' out like this, racin' along like an express train without lights? And what would we find if we ever got these? Was the Chief playin' a 100 to 1 shot, or was he just plain loco?

The tide was hellin' out the Gate when he hit the P'int, and the wind was freshenin'. On the Bar, it was already kickin' up some; an' the wind-capped combers were slappin' strong at our bow. The decks were gettin' wet an' slippery, an' the salt was beginnin' to bite. At our stern the windin' lights o' the city were hazin' fast. Ahead, just black water an' no star showin'.

Headin' straight out, the "Swift" began to plunge, stickin' her nose deep in the big swells an' smashin' 'em into clouds o' stranglin' spray. Breathin' was gettin' hard work, an' seein' more 'n a few lengths ahead was a cat's job. We were speedin' up every minute, an' the wind was cuttin' at our faces like a handful o' razor-blades.

Off to the starboard an' not far away a big steam fog-horn started in bellowin' at two-minute intervals. We veered to Port, and shut down to half, listenin' for the slush o' the water breakin' from her bow an' tryin' to pick up her lights smudgin' the fog. A ship can slide a long ways in two minutes. And they ain't got any brakes. If we didn't see her first, she'd cut us in two.

A siren screeched dead ahead. It was movin' to Port an' travelin' fast. We doubled back and begun to speed up—just in time to cut under the bow of a big freighter plowin' the water only a few boatlengths ahead.

Dodgin' the fog-horns an' sirens we kept headin' straight out, doin' a clean thirty in the teeth o' the freshenin' wind. The "Swift" was ridin' high, planin' along the crests o' the swells an' tossin' the spray clean over her. Grippin' the rail I felt somebody brushin' past me as the bridge struck two bells.

"Look sharp, men, we're goin'

to head in! You know what that 'll mean. It's thickenin' and apt to get worse. Don't use the blinkers 'till you have to. We're takin' ever' chance there is 't'night."

The Skipper o' the Cutter was talkin' low an' quiet; but his words bit deep. For a minute he clung by the rail, lookin' ahead. Then he went aft.

Roundin' to, he began headin' in, with the wind droppin' and the air gettin' wetter an' colder every minute. What swell was runnin' was abast the beam an' kickin' us along.

Cuttin' through the fog before long, we hit the fishin' grounds. Everybody was lookin' hard. The cannery fleet would be just about puttin' out, an' they'd be runnin' wild.

"If the boys are out driftin' 't'night, they'd better have their lights turned up or—"

Jones's breath petered out sudden in a sickish gurgle.

"Godamighty! Look at that!" I got him the first time. Then my breath went.

Right under us was a big, black hull lumberin' along, as dark as we were. Cuttin' straight across us!

The port blinker was already splutterin', shootin' the air full full o' flashin' red sparks. Then the quartermaster threw her over.

I grabbed at the rail and hung to it as the deck shot up. The "Swift" was whirlin' clean over on her side. My feet were sprawlin'. The water was miles down. Lookin' up into the gray sky I braced an' waited for the crash.

But it never come. The deck quit risin' with a jerk, an' begun to drop, sweepin' down like a gull divin' after fish. The water was slushin' over my feet. We was dippin' clean under. Right alongside was the fishin' boat, s' close I could-a tossed a biscuit to her deck. But headin' away from us. We righted an' the blinker died.

"Some handlin'!" Jones jerked, when he got his voice. "If he hadn't give her that back twist, that old scow 'd ha' nipped off our stern. Gotta hand it to the Revenue men for pullin' us through."

He forgot I was a fisherman, but knowin' I was new in the Service he went on to explain:

"Trawler within' the limit, runnin' dark to dodge the Commissioner. Jap, most likely. Didn't see us 'till we was right on top of her. Kept goin' straight. All that saved 'em. That and quick thinkin' in the wheel-house. Slewed her to starboard to cross her bow and back to port, to clear our stern. Paralleled her and shot by. Close squeak! With the "Swift" an' a crew like this I'd sail to Hell an' shanghai the Devil!"

We were talkin' it over when we picked up the lights o' the fishin' fleet. Then I heard Dorgan callin' my name.

"Chief wants you, Smith."

He took me in tow and led me aft to the little cabin-house over the engines. Inside that room it was black as it was outside, except for two little red lights glowin' over in one corner. The Chief was talkin' to somebody when I come in, but he shut up quick an' told Dorgan to close the door.

When it swung to, the lights come on an' I saw Mr. Belshaw sittin' at a little table, or nchin' down on a black cigar. Across from him was the Lieutenant o' the Revenue Service in command o' the Cutter. Both of 'em was gimletin'

me through and through. Then the chief began to talk.

"Smith," he says. "Johnson 's being sick is lucky—or unlucky—for you, either way you make it. Ordinarily I wouldn't give a probationer a look-in on a job like this. But I expect you to come through just the same. Whatever you do tonight will count strong, for you or against you."

He didn't expect me to make any speeches, so I listened hard as he went on:

"We're headin' in now, and in a few minutes we'll be putting a launch over the side. You'll be standin' by to join the party in command of Mr. Monahan. There's a fishing boat cruising off the coast of San Sebastian that we want bad. She's known as the Saya Maru. She may be loaded with chemicals used in the manufacture of explosives. And they may tell you they're on their way north to bill them out to South American mining concerns. But whatever they say, I expect you men on that launch to find out the truth."

I ducked my head and he chewed hard at his cigar.

"You'll use no violence unless absolutely necessary," he went on after a minute. "Mr. Monahan 'll be judge of the necessity. I want you to know that we're playin' the tallest kind of odds tonight. And we can't overlook the smallest bet. Don't forget it! It means your job. Report to Mr. Monahan at once. You'll find him aft by the launch."

We were slowin' down when I got on deck an' the fog was liftin'. Monahan was lookin' over the machine-gun mounted in the bow o' the launch, and he hardly noticed me as I come up. He didn't have much use for me and I knew it. I'd beat out a friend o' his for the probation job not more 'n a couple o' weeks back, an' he hadn't forgot it. Fat chance I'd have o' gettin' on steady with him in command, unless I hecked in mighty strong.

We were still slowin' down an' nosin' inshore when the bell jangled, an' we begun to drift. Then Monahan begin assignin' us our places in the launch. They was five of us besides him, an' he put me clean in the stern.

"We're ready to shove off, men," he says. "Keep your eyes an' ears workin', an' if you hear anythin' that sounds like a boat, pass the word along to me."

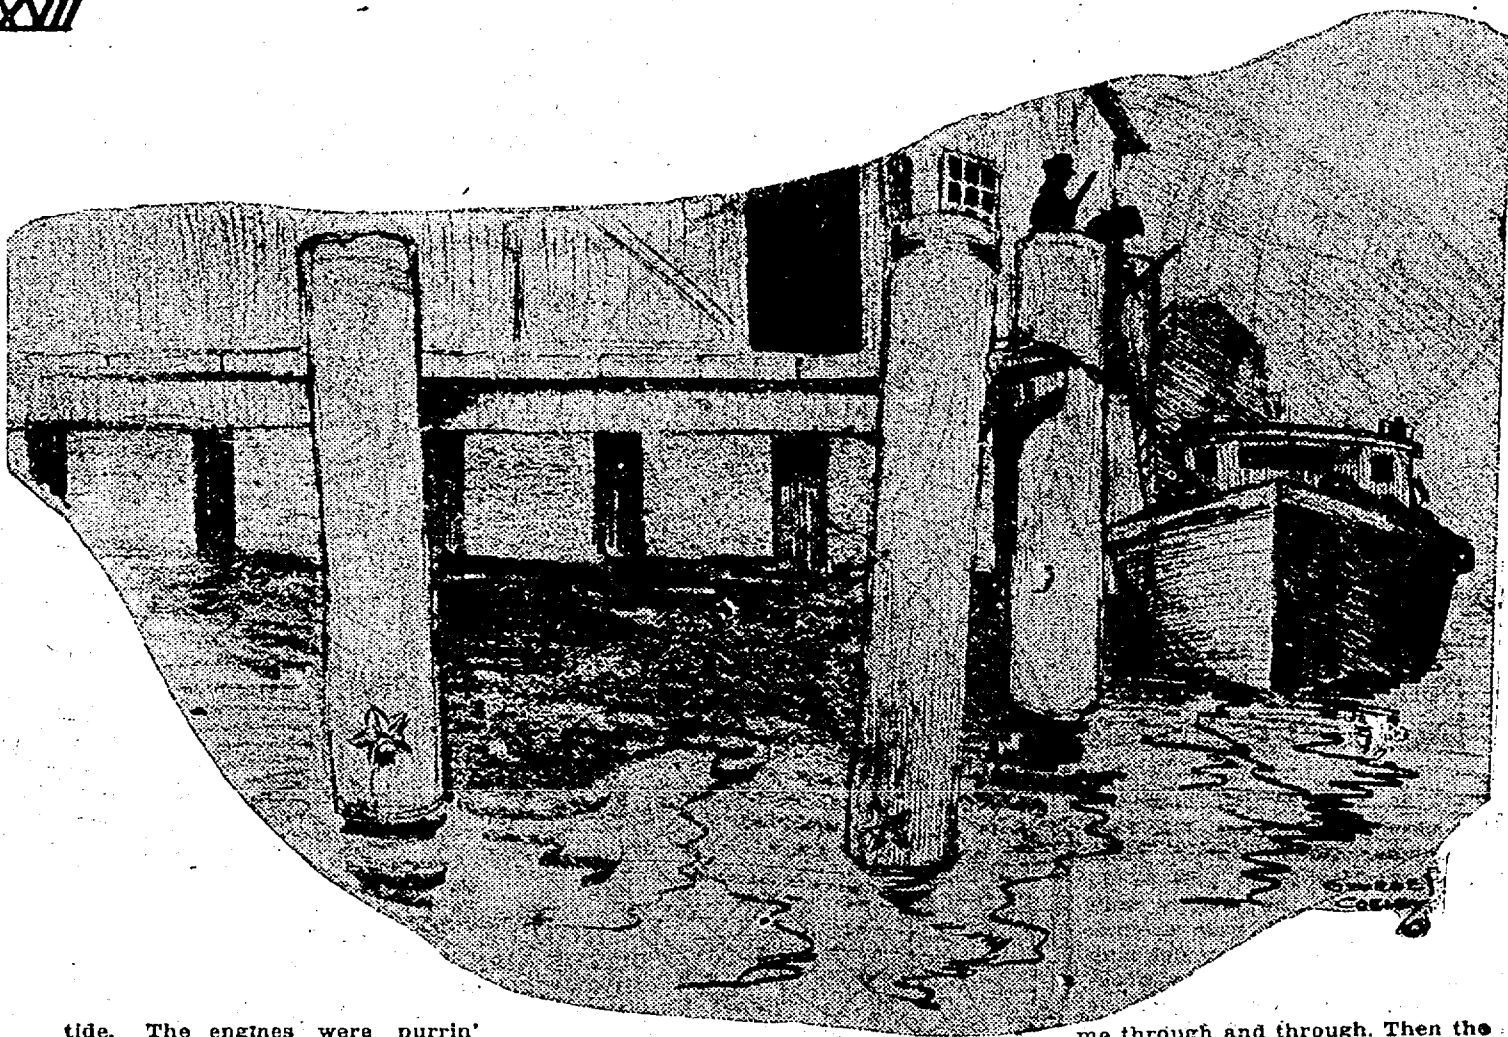

Climbin' in the bow next to the machine-gunner, he gave the order to lower away.

The motor was goin' the minute we hit the water, an' fendin' her off we sneaked round the "Swift" an' slid away toward shore. The sea was patchy with fog, an' the moon was tryin' to cut through. Nothin' in sight from any quarter, and the only sound stirrin' the muffled hum of our own exhaust.

Peggin' into a big bed o' kelp, we circled an' nosed in closer, stoppin' an' shuttin' off every little bit to listen. We must ha' been gettin' pretty close inshore for the surf was poundin' loud, an' the swells were pickin' us up an' carryin' us along. The man at the throttle was easin' her down an' berdin' out when we caught the low gulp of an under-water exhaust dead ahead.

Jones gripped my arm. "If that's the baby we want, in a minute you'll see some fun."

Through a rift in the fog a big, gray fishin' boat was lumberin' along, with her stern light flickerin'. She was edgin' out from the shore to clear the p'int; and as

Contraband and Frisco Bay

by Brayton Norton

we begun to overhaul her, she started in speedin' up. The chug of her heavy-duty motor was gettin' faster. Then it changed to a splutterin' hum.

"That's her! She's wise to us already, an' hooked in her auxilliaries! She's going to make a run for the fog bank."

Jones was gettin' excited. "If she ever gets in the cover o' that mist, we're out o' luck!" he cut loose in my ear. But I couldn't hardly hear him above the roar of our exhaust. With wide-open muffler he was ripplin' through the water like a hydroplane, pullin' down the distance between the two boats. In a clear sea, overhaulin' her would be a cinch. But the fog was hangin' round the p'int like a big blanket; an' with her lead she had all the best of it.

Monahan wasn't takin' any chances.

"Is she wide open?" he yells back at the engineer. And when he finds out she's turnin' up all she can do, he whirls on the man at the machine-gun.

The next minute our runnin'-lights flashes on, and our search begins to cut the water ahead. Trailin' a path to the Jap-boat, it plays 'round her stern an' shoots straight on for the fog bank, not more 'n a hundred yards ahead. Then the gunner begun to "grind."

The rattle o' the machine-gun drowned out the roar o' the exhaust. Followin' the path o' the search, the bullets begin to kick up the water like rain, hammerin' down the swells. The gunner was raisin' his sights, sprinklin' the waves at her stern.

"She don't scare worth a damn! He'll have to puncture her to stop her. She's goin' to—"

Jones chopped off quick. From the Saya Maru's deck red jets of flame cut the mist, an' the water about our bows begin to kick up. The splinters flew from the coamin', and a man for'ard tumbled back into the cockpit. For a second or two the machine-guns shot at each other's flash. Then everything went dark ahead, and the Saya Maru slipped into the fog.

For a couple o' hundred yards we kept goin' straight ahead, edgin' into the mist. Then the engine quit dead, an' we heard Monahan whisperin'.

"Jones and Ryan, man the oars! Be sure the canvas fits tight around the locks. We got to sneak. I got an idea they won't go far. They'll figure to lay to and drop their hook, thinkin' we'll beat it by 'em in the fog. But we'll fool 'em!"

While the boys was getting busy at the sweeps, he crawls aft and gives me the dope.

"Rifle ready, Smith," he says. "We're goin' to board. Get the drop on 'em the minute you get over the rail, and make 'em stick up. Don't shoot unless they refuse."

Grippin' the stock of my rifle, I got good an' ready. But a guy couldn't see anythin'. Nothin' but fog. And the only sound was the boom o' the breakers, hittin' the rocks at the end o' the Point. As we went on, the swells begin to boost us an' slew us 'round. The tide was settin' in strong. If the Japs were in that close they were takin' long chances. I knew the coast. But they were foxy little devils, and knew how to handle a boat.

A comber capped an' caught us broadside, skewin' us half 'round. Grabbin' the coamin' I kicked clean an' got ready to jump. But we righted an' swung around, the stern twistin' an' suckin' under in the surge o' the back-lash.

Circlin' the reef we started out; an' cuttin' through the kelp slid out into open water, and began to drift. Then we sighted her, clottin' the fog to the sea-ard. She was lyin' at anchor in the lea o' the p'int.

Shippin' his sticks, Jones grabbed up his sawed-off while Ryan eased away. Comin' up on 'em from the shore side fooled 'em, an' we slid in under their stern without 'em knowin' we was around. The machine-gunner was trainin' full on their hull when Monahan climbed over the rail, with Jones an' me followin'.

We was half way across the stern deck before they spotted us. Then a fellow amidships let out a whistlin' yell, an' they come tumblin' out o' the engine-house, makin' straight for us.

"You're under arrest!"

Monahan's search was pickin' 'em out as he spoke, an' for a minute they hung back, blinkin' into the light. They was six o' 'em—all Japs. They was all o' 'em about half naked; an' crouchin' down the way they did made 'em look lower and squattier. Their beady little black eyes was shinin' like snakes' eyes; an' the muscles o' their arms an' legs were knottin' an' ripplin' like whipcord. Two o' 'em had rifles, an' the rest was fingerin' their knives.

Monahan's automatic clicked. "Up with your hands! You're prisoners of the United States."

He hadn't more 'n got it out, when another o' 'em busted out o' the engine-house, jabberin' as he come. His hands were up, and

whatever he said to the gang made 'em drop their weapons.

"They understand no English. Tell me what you would have them do."

The boss Jap stopped and crossed his arms over his chest.

Monahan spit out his orders.

"Line 'em up along the starboard rail and tell 'em to stay there, while my men go over your boat. And warn 'em not to resist arrest again."

"We did not resist. We will submit quietly. Then we will see the Japanese consul."

The Japs lined up along the rail with the Boss on the end, lookin' straight at Monahan an' never battin' an eyelash.

"How about openin' up on us with your machine-gun?" the old man flared, as he gave 'em the once-over. "One of our men can swear you did that if he gets out of the hospital."

"We have no machine-gun. There is some mistake. We will help you search if you like. We have nothing to conceal."

"What boat is this? Where are you bound for? And what's your cargo?"

The Boss Jap rattled off the answers to the Old Man's questions like he was readin' 'em out of a book.

"Saya Maru. San Francisco. Aluminum dust for consignment to South America, from William Bigelow, an American citizen, of San Sebastian, California."

Monahan never let on like he heard him.

"Smith," he says, "stand by the prisoners while Jones and I go over the boat. At the first hostile move, shoot to kill. The report of your gun will be the signal for the machine gunner to riddle the hull."

Switching on my light, I stepped back and covered the Japs while Jones and Monahan went aft. 'Twas just like the Old Man to lay me away like that! Why didn't he 'hog-tie' the Jap fishermen an' let me in on the search? Fat chance I'd have o' pullin' anythin', actin' as jaller!

Monahan's light was flashin' round the stern, an' him and Jones were talkin'.

"Nothin' here," they were sayin'. "Must have dumped the gun overboard."

After a while they come for'ard, workin' up the bow. Then they went below. The Japs were glarin' into the light, an' tryin' to whisper without my catchin' 'em at it. All but the Boss. He was leanin' back against the mainstay rollin' a cigarette.

He didn't take much interest until an axe begin smashin' things down under the deck. Then he started up, quick, crunchin' the paper.

The smashin' went on for a minute, then quit sudden. Down in the hold I could hear Monahan and Jones mumblin', but I darsent turn to look. I was watchin' the Boss Jap. He was turnin' sideways, edgin' out o' the line, listenin'.

When Monahan come on deck he come right to me.

"We're goin' back to the cutter," he said. "The launch won't hold us all, so I'm goin' to leave you and Jones here with two of these men. We'll take the others with us. You'll light the runnin' lights and mast-head of this boat at once, and lay at anchor until we swing round with the "Swift" and pick you up."

When I come back from lightin' up, they were gone. Then Jones give me the dope.

"Never got 'em with a thing!" he told me. "Not even a machine-gun. Down in the hold was a bunch o' boxes labeled aluminum

dust. We smashed 'em open. And 'twas aluminum dust all right. Monahan's up in the air a mile. Thinks maybe we hit the wrong boat. He's takin' Charlie back to the "Swift." He was pretty bad shot up. While they're scoutin' 'round, let 's take these birds below where they's a light."

Shovin' the Japs ahead of us we went below. Aft o' the engines was a little two-by-four cabin, lit by a swingin' oil lamp, hung from the hatch. Back o' that was a decked over cockpit which served as a kind o' cargo hold. Lookin' round, I saw a half dozen boxes busted open. Shiny filin's covered the floor.

Jones motioned to the Japs to flop in the corner under the light.

"Monahan guessin' hard," he said. "Don't know which way to jump. Only thing he's got 'em 's runnin' without lights. And that Boss Jap 's just clever enough 't make trouble with the Consul."

"Then we'll all come in," I come back at him. "Passin' the buck 's a good game in the Customs Service; and a probationer makes a good goat."

The Chief's words come back to me strong, hittin' me right between the eyes.

Whatever they say, I expect you to find out the truth. We can't overlook the smallest bet. It means your job."

But Monahan hadn't give me a chance. And he didn't intend to. I was as good as laid off right now—unless I got busy on my own hook. I made up my mind to have a look round.

"'Twon't do any good," Jones cut in. "We been over her from stem to stern. But go ahead if you want to. I'll watch the Japs."

Switchin' on my light I started aft, rummagin' through the boxes and workin' toward the stern. Lookin' back, now and then, I could see Jones parked by the engines, watchin' the prisoners. But the Japs were watchin' me.

That set me thinkin'. If they wasn't anythin' to find, what was the idea o' 'em cranin' their necks an' edgin' out where they could follow me 'round? It come to me sudden that the Boss Jap had been mighty interested when he heard the smashin' below. Maybe Monahan had overlooked his hand.

The Saya Maru wasn't much of a boat, an' it didn't take long to go over her. If she was a fishin' boat, they was lots o' room runnin' wild somewhere. And that wasn't like the Japs. Goin' on deck, I begin lookin' her over careful, takin' rough measurements. Bein' a fisherman myself, boats were like houses, built for service an' comfort. This 'un didn't have either. There was too much waste.

My "hunch" was warmin' up when I got below again, an' begin nosin' 'round in the hold. She might be carryin' fuel tanks in some o' those waste spaces between the linin' and the hull. The Japs was great on carryin' lots o' oil. Still, it looked kinda phoney.

I made up my mind to have a look. Ripplin' off a board or two wouldn't hurt anythin'. I'd be huntin' a new job tomorrow anyway, by the look o' things; so what 'd be the odds? Grabbin' up the axe by the broken boxes, I swung it full at the linin'. The plankin' splintered, an' the blade cut through.

Jones was gruntin' something back by the engine, but I wasn't hearin'. For my search was already shinin' through. An' the rays was glintin' on a row o' gun barrels, racked 'round the hull!

Turnin' quick to tell Jones what I found, I saw him crumpled up by the engine base. Crouchin' be-

side him were the two Japs. One o' 'em had his revolver.

Droppin' my light an' axe, I went for my gun, shootin' from the hip. But the Jap beat me to it by about a hair. Ripplin' into my leg the bullet twisted me half 'round. Then the light tumbled from the hatch. The last thing I saw was a half-naked body spread-eaglin' through the air straight for me.

I give him the last three I had, and somethin' dropped, bumpin' the floor hard an' draggin' over behind the boxes. Before I could jam in a fresh clip, somebody grabbed me from the side an' we tumbled to the floor. Garlic breath was pantin' in my face, an' a bulgin' chest was pressin' hard on mine. Bare arms that was like steel cables were circlin' my neck an' twistin' it back against my shoulder. Thick legs were knottin' round my thighs, pinnin' me down. Jerkin' a hand free, I caught at the Jap's throat, wriggled a little higher to get more purchase, and shut down. The muscles set an' tightened, but my fingers was workin' through.

The air was gettin' heavy an' thick. My head was twistin' sideways and back. The boat was whirlin'. Blood was fillin' up my eyes an' blindin' me. I was gettin' numb all over. All but the hand on the Jap's throat. He was goin' to break my neck—if I didn't strangle him first.

I shut down harder. I could hear him gaspin' as my head went back. It was bendin' about as far as it'd go. In a minute somethin' 'd snap.

A fog was rollin' over us—thick-enin'. But there was stars shinin' through. Millions o' 'em—all red. We'd broke the hook an' were driftin' in on the beach. The roar o' the surf was deafenin'. A saw-toothed comber caught us broadside an' sucked us down. The water was singin' an' swirlin' about our ears—bustin' our heads plumb open. The Jap was 'urglin'. He was almost gone. But—I mustn't overlook the—smallest—bet.

When I come to, I was lyin' on the deck o' the cutter, lookin' up at the moon. My leg was achin' like a bum tooth, an' red-hot pains was tearin' up my neck. Bumpin' the "Swift" was a fishin'-boat, lashed 'longside, her mast anglin' her wheel-house shadowin' the deck. Somewhere close Jones was talkin'.

"Like a damned fool I turned my head when Smith's axe smashed the linin', and before I knew what was doin', I was down and out. The Japs must ha' clouted me with a wrench or somethin', for I didn't come to till you boys boarded. Lucky for the prisoners you come when you did! One o' 'em 'd have bled to death in another hour, an' Smith would ha' gone clean through that other fellow's wind-pipe if they hadn't a pried 'em loose. Say! I'll tell the world that kid must be some scrapper! Hope Monahan gives him a squar' deal."

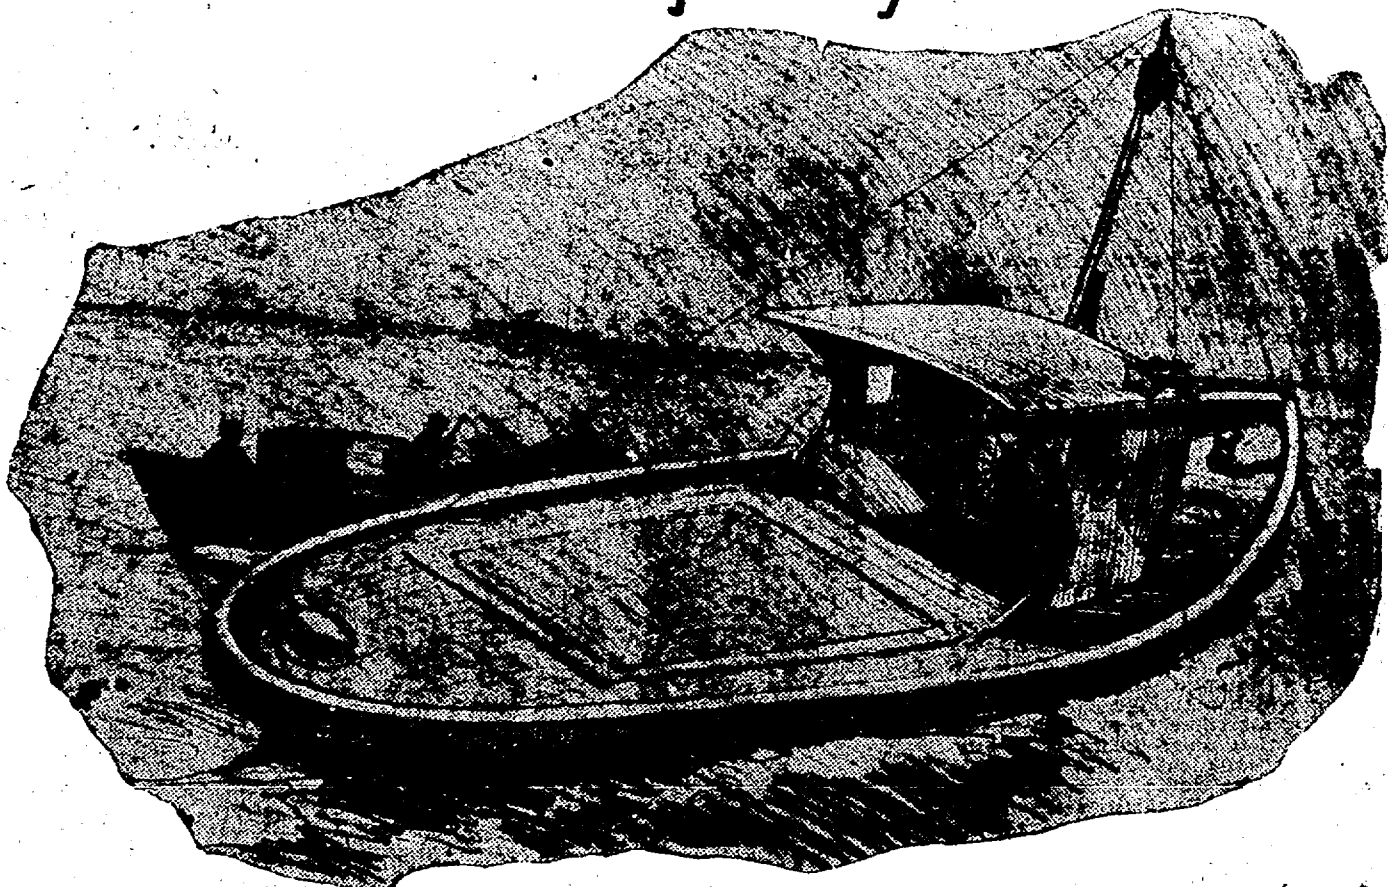

Listenin' hard, I heard another fellow cut in:

"He's goin' to. Tumblin' on to all them guns an' ammunition 's the biggest thing the Customs has pulled in years. It'll mean a life job for Smith. The Old Man said so himself. He's goin' to recommend the kid for a steady job as soon as the Chief comes back."

My leg quit achin' an' right off the bat the pains in my neck quit botherin' me. Settin' down into my blankets, I went to sleep.

Next week: Chapter XVIII, "Corky Plays Detective," by John Hamlin.

Geraldine on "I thee Endow"

"All My Earthly Goods" Sounds Good in Wedding Ceremony, But Often in Three Months It's Different Story

"WITH all my earthly goods I thee endow" he promises while the village music teacher murders the well known toddle from Lohengrin and the Gang tie white ribbons to the new suit case, and hide around the corner armed with old shoes and two bits worth of rice. An' then, before the honeymoon is three months old he's crabbing because she wants to get a carpet sweeper. "With all my earthly good I thee endow, but mind you don't use any of 'em," is the way the marriage ceremony should read for a lotta folks.

Well, how about it? How far should this earthly goods endowment stuff go? What's fair? What's the solid, economical basis upon which marriage should rest? Before marriage, very few of us believe that marriage rests on any sound, economical basis. We think it's all a matter of love n' kisses. And our resultant rows when we do find out how large a place money plays in marriage, are quite in proportion to our preliminary ecstasies—and often quite as unreasonable. Obviously, we need sensible training for this most important human partnership, and perhaps when the millenium rolls around, we'll have it. In the meantime, we have to learn as we go along, mostly by getting our shins barked, and watching the other fellow. And here today is a splendid chance to learn.

Presents a Problem

The following letter is important, not only because it presents an interesting personal problem, but because it expresses a widespread misunderstanding, in which it is very likely that YOU are taking part. So lend an ear—

Dear Geraldine:

Can you and the gang drop the silly discussion of the flapper and short skirt long enough to discuss something of the most vital importance to every woman in California?

The community property law of California is a disgrace to civilization; every decent self respecting man should consider it a brand of shame that such a law is on the statute books of a modern state.

According to the law of California a married woman does not own the clothes on her back even if she has paid for them out of her own earnings; a married woman has less rights than a negro slave before the war. A slave owner was compelled to provide his slaves with shelter, food and clothing; a married man in California can turn his wife in the street when she becomes old or helpless and though he be a millionaire he does not have to give her a loaf of bread, or a penny.

A married woman's earnings are community property and the community property belongs absolutely to the husband, he can dispose of it in any way he sees fit and the wife has nothing whatever to say. If a married woman works for wages her husband can go to her employer and demand her wages and the employer is compelled to give it to him.

Money in the Bank

If she earns money and puts it in the bank, if it is less than a thousand dollars he can go to the bank and demand it and the bank is compelled to give it to him. If you doubt that go to any bank and ask them.

I will cite my own case as to what is liable to happen to any woman:

I am past sixty years and in very bad health, my husband and I have been married more than forty years. We came to California many years ago with nothing but youth and hope. I worked shoulder to shoulder with him through all the years. For many years of the time I did all the work of a large house for seven people, cooking, baking, washing, ironing, sewing, and all the thousand and one things required to keep things going. When I had fewer people to work for I did work for other people, sewing, millinery, teaching. I even canvassed from door to door. At the end of my day's weary toil I forgot how tired I was thinking of the future when I would be able to sit down in my own home and have comfort in my old age.

We saved a nice little sum of money, which my husband invested in business for himself. In two years he lost every dollar. I made no reproaches; only redoubled my efforts.

In a few years we had saved another nest egg, which he again invested and lost; then I took charge of the finances. By economy and

Turtle doves—billing and cooing! Well, the cooing's easy, particularly before she wears that narrow gold ring. But how about the BILLING, after the honeymoon is over? Bills for butter and eggs, laundry, gas and chops. Bills for hats and shoes, marcel waves, and manicures. You gave her your heart, but how about your pocketbook? "To have and to hold"—but how much does she have, and how much do you hold?

Turtle doves, billing and cooing—a pretty sight! Only humans aren't doves and homes aren't aviaries. It takes more than a musical thrill and a flutter of wings to detach some Friend Husband from the wherewithal to keep the human nest warmly lined. How much should Friend Wife have to flutter—if any? What's the right of it—and what's the law? Unless you're a turtle dove the page is for YOU today.

good investments. I accumulated \$35,000, not a large fortune, but it was enough to insure shelter and comfort in our old age.

With the passing years and the hard work I lost my girlish beauty. My husband is six years older than I am. He grew tired of me and said he wanted a young woman. He said when a woman grew old and lost her good looks or became an invalid she should be compelled to commit suicide or go to the poor house so her husband could have all the community property and enjoy himself with young women.

He finally deserted me and applied for a divorce. I compelled him to drop the divorce, as every charge he brought was absolutely false, and I threatened him with perjury.

He took every dollar of the community property; by the outrageous laws of California it belongs to him.

No Redress

I consulted four of the best lawyers in the state; they told me I had absolutely no redress; that he was entirely within his rights; that I could not claim one dollar.

He is now living with another woman, although we are not divorced. She flaunts her silks and diamonds, the fruits of my long years of hard work and self denial.

At my age and ill health I cannot

go out and do hard work, and with my aching heart and brain I cannot go into business.

He acknowledged that I had been the best wife any man could have, but I was old and he wanted to get rid of me so he could get a young woman.

Mine is only one in thousands, in cases of that kind the deserted wife usually creeps away and dies of a broken heart. That never seems to interfere with the man's pleasure.

A Hopeless Future

I am facing a hopeless future; the only thing in sight is the poorhouse or the bay. I think I very much prefer the bay.

Geraldine, use your column and your influence to bring about more just community property laws, so the old wife can claim a shelter and a bit of bread safe from the world's cold charity.

The young girl of the present day is entirely capable of taking care of herself. She is facing the golden, wonderful future, where all her dreams will some day come true.

Turn aside sometimes and send a word of comfort and a kindly thought to those lonely hearts for whom the shadows are already slanting toward the west.

MERELY MARY ANN.

That's a very tragic and emotional letter, my friend. Because

This Is a Dangerous Letter Because It Isn't True, and It Will Be Read and Believed, Says Jerry and Gives Her Reasons

It will be widely read and believed it is a very dangerous letter. It is dangerous because IT ISN'T TRUE. Don't misunderstand me. I believe you're quite sincere in writing it and that you have suffered greatly. But you have either been grossly misinformed as to the laws of California or are deliberately misinterpreting them. Such a condition as you describe does not exist and never has existed in California. As a matter of fact, the California laws are famous, if not notorious, for giving the women the best end of things.

With your husband's and your personal problem I have nothing to do. Your love, or lack of love for each other, and the delicate questions of loyalty and gratitude, must be worked out by yourselves. No law can ever possibly manage such things. But I do happen to know the laws regulating community property, and the general rights of wife and husband, and I assure you they are not as quoted by you.

Entitled to Support

You are absolutely entitled to support by your husband, whether you are living as his wife, or divorced from him. If he refuses to support you, you can have him arrested and jailed. You can also prevent him living with the other woman, if you can prove it. You don't need to seek the poorhouse, nor jump in the bay, nor implore Geraldine's help, nor employ an army of lawyers. You can simply go down to the prosecuting attorney, state your case, and if it is as represented, you'll have the full judicial force of California behind you in your fight.

There are certain things the law WON'T do for you, however. It WON'T force your husband to live with you. It couldn't do that without violating a basic human right. And it can't prevent him from "acting up" in a mighty mean manner if you balk his determination to get a divorce. The law recognizes a man's (or woman's) right to have a divorce. It protects the divorced woman. If you had allowed your husband to get a divorce, or if you would sue him yourself, the judge would allow you your full, just share of the community property or a stated amount each month, or both. But it won't allow you to divide the community property while you insist on retaining the condition of widowhood.

The root of your trouble is, I suspect, that you won't give your husband the freedom he demands, and you're waiting to claim the law's aid in giving you the rights of a divorced woman while you hold on to the prerogatives of a married one. Of course that's unreasonable.

Yes, a man CAN collect his wife's wages if she is working, just as a wife can do strange and divers things with her husband's wages. But I'd like to see cases where either of 'em get by with any such little tricks. And whether he collects 'em or not, HE MUST SUPPORT HER, AND HALF THE COMMUNITY PROPERTY, ACQUIRED AFTER MARRIAGE, IS HERS.

Community Property

The subject of community property has been a much contested point in California within the last few years. Two years ago a law was framed which was passed by the legislature, but defeated when a referendum election was called. That proposed law enabled a wife to will her half of the community property to her children without the consent of the husband. It was defeated on the ground that it was arbitrarily taking away a man's business. A woman may earn her share of an income, but theoretically it's the husband's business that brings in her share. If a woman with a peeve wished, she could have willed her share to the children and the man would be forced to sell or divide his business to settle the estate. That law was defeated. It is being revamped now.

As for alimony—that is a whole chapter by itself, but again the Californian woman gets the best of it. No one denies that support should be given for any or all children. But why should a healthy, childless young woman receive alimony any more than a healthy, childless young man, when the markets of the world now offer work to women as well as men?

What They Say To Geraldine

WHEN A HUSBAND DESERTS "BEST WIFE ANY MAN COULD EVER HAVE"

WHAT DO YOU THINK OF THIS, PALS? WRITE YOUR OPINION AND WE'LL HAVE A SUNDAY EDITION ON ALIMONY.

Some Californian laws relative to community property are here-with quoted:

Section 137 of the Civil Code of California:

When the husband wilfully deserts the wife, or when the husband wilfully fails to provide for the wife, or when the wife has any cause of action for divorce, as provided in Section 92 of this code, she may, without applying for divorce, maintain in the superior court an action against him for permanent support and maintenance of herself or of herself and children. During the pendency of such action, the court may, in its discretion, require the husband to pay as alimony any money necessary for the prosecution of the action, and for support and maintenance, and execution may issue therefor in the discretion of the court.

The court, in granting the wife permanent support and maintenance of herself, or of herself and children, in any such action, shall make the same disposition of the community property and of the homestead, if any, as would have been made if the marriage had been dissolved.

Section 146, Civil Code of California: Disposition of community property on divorce:

If the decree be rendered on the ground of adultery, or extreme cruelty, the community property shall be assigned to the respective parties in such proportions as the court, from all the facts of the case, and the condition of the parties, may deem just.

If the decree be rendered on any other ground than that of adultery or extreme cruelty, the community property shall be equally divided between the parties.

M. M.—I can't decide your question for you. It looks like a plain case of a middle-aged woman making an idiot of herself over a youngster, but if you can't manage the situation, what do you expect me to do, Pal? Why don't you stand on your hind legs and use a little plain English to both of them? He would probably get mad and clear out. She might do likewise—but I can't see where you'd be the loser if she did.

Cutting a Paragraph

I'm going to print the following letters one after the other. I should apologize for them, but I won't. In regard to the first one, from Vincent Skelly, I have had to cut out one paragraph. I have had to cut that paragraph because of the WAY he expressed himself. He has scrambled the English language and things like an egg beater, and for that I have no criticism, but an idea can be across in a CLEAN manner. Since he couldn't, or DIDN'T—I exercised my prerogative and cut out the "names." Thinking about it, though, I don't know why I should mind so very much—coming from a man who can call the BIBLE a JOKE BOOK! It's that I have a rather high opinion of the REAL Jerry Gang and don't see why their sense of decency should be outraged.

Dear Geraldine:

This communication may be somewhat belated, but I beg leave to assure you that the fault was not mine, as I was out of town for several days and have just returned, and on picking up a recent issue of The TRIBUNE, I see where you take one Mr. Ardo of 532 Hobart street to task. Not, as it seems to me, that he has written falsely, but that he speaks too plainly, for it must be admitted that when you can find such terms prevalent in a country as Salamander, Vamp, Flapper, before the altar and beyond it such words as Divorce, Alimony and Kept Woman, being worked overtime, none can deny but what there is something decidedly wrong. I would like to inform Mr. Ardo that he, being a man, must bear his share of the blame for the existence of the flapper for had the American man not placed woman upon an altar and made her not his equal but his God, the Flapper would never have been heard of and the American woman would not have her head turned by flattery, adoration and worship. So much for that.

Ancient Events

As for the execution of Joan of Arc, the Bible, etc., I would wager if it could be proven, there was no dearth of Bibles or other joke books or prayer books at her execution, for if my memory serves

me right, there was plenty of Holy men or, at least, church men (French) present, chanting the praise and commending the actions of their British despoilers, while the flames consumed this hapless Maid of Domremy, whose only crime was the defense of her, and what should have been their country, but such things are not uncommon to history.

Geraldine, you are something of an enigma. In one and the same article you pass the palm to Bernard Shaw for erudition and then you state "in the vernacular of our great and free country, if there is anything Mr. Shaw has done, it is to make a joke of the claims of freedom put forth by your country." From this I take it that you have not read him as extensively as you might have, and, in concluding, let me state that I am not so much concerned in the merits or demerits of the points in dispute between you and Mr. Ardo, but I must say that I don't like your style in lampooning a man who makes use of the open forum to state a truth as he sees it. Another thing, your attitude of non-interference in the flapper question convicts you of a lack of moral courage. It is a case where you can't approve and you will not condemn.

Who Is She?

Now, Geraldine, you say you don't know, nor do you care who Mr. Ardo is, and in that you have nothing on me, but I have heard a great deal of surmising in Oakland as to who and what Geraldine is. I've heard her name run the gamut from the Neanderthal caveman to the kind and loving Josephine or Faust's Marguerite.

So now I have gotten so much off my mind and if I have given offense you may open the floodgates of your vituperation.

VINCENT SKELLEY,
1441 Broadway.

And now comes A. W. Ardo himself, warm under the collar because his last letter wasn't printed. He says the reason I didn't print it was because he wasn't a YES man. The reason I didn't print it was because it was absolutely coarse and abominable. I've printed letters criticizing me just as willingly as those giving praise or love. It is the criticism I profit by in my work. I'm human, I like being liked—but honest criticism is a crossing of swords that shows me where and how I stand and WHY. It gives me the other side of a question, and for that I am grateful. BUT I'LL NOT PRINT VULGARITY FOR A. W. ARDO OR ANYONE ELSE.

While his second letter doesn't carry the odor of roses, still it's printable—if you turn your head slightly to one side:

The Letter

"Chief Agonizer of
"The Agony Column."

"When I write to you, I apologize to myself. I have a sneaking contempt for my action. An argument generates heat. Controversy of any kind also. I realize that your woman nature precludes the possibility of any other than your 'YES' brigade from using your column. Tonight Oswald (childish abuse omitted—Jerry) had two shots for his jitney. I cannot hope to be so fortunate as your chief YES man."

"Yet I feel I must—although you refused my recent letter answer to the 'HE MAN,' whose delightful anthem—whose beautiful bouquet secured space. To him I will say that I am quite sure—by virtue of my position (and what it is you can't guess) that—as I proclaimed the 'flapper' the rotten-hearted, vain, shilly-shallying ape of the full-blown woman of the streets—is the cancer of our present civilization. In this position I note I am not alone."

"His contention of a 'low mind' is merely assumptive. Leave, if you please, personalities out. It is not intelligent. Ordinarily I would ignore the blunted shaft of shallow sarcasm. 'He-Man' conjectures that I might meet with mishap at his (?) hands. Andre Tridon would 'psychoanalyze' it as indicative of a wish, and 'amen-ed' by YOU, in publishing it. You both have my pity—really. If VIOLENCE could make MIGHT, RIGHT, if brutality was not an evidence of CARNALITY—JESUS CHRIST would have been proven a LIAR by his crucifixion."

"Geraldine, I assume you destroyed my letter because it is detrimentally critical. You psychoanalyze your thought process—have hitherto given such indication."

"It's a fine phrase. It's bandied by blithering idiots who seek self-aggrandizement, and who crucify by law—by exclusion—by expurgating from the channels of public

thought, commentaries or timely topics.

"Detrimentially critical is hypocritical, to be brief. It covers a rotten sore. Countless men and women, Christ, Mother Nature, whose destructiveness of monstrosity—of non-conformance to LAW is most pronounced—are guilty of it."

"When humble me dares to function my God-ordained capacity to form and express an opinion—I am stoned by the shallow-witted. I don't expect to see this published, but I ask you earnestly—if I, as a watchman of the night, betrayed the Christ, (Truth), if I adopted the alibi, 'Am I my brother's keeper?' If I did not depict an error—would I not be, in reality, a pusillanimous-minded thing, too cowardly to stand as a sentinel for Truth."

"Evil to Him"

"The flapper is an embryonic woman of the streets. Go to our slums, the rescue homes, our cheap dances; note the garb, demeanor and see the brazenness of those poor weak creatures. I know this breed of woman is but a small percentage of the whole, but cannot acquiesce in the sickening sophistries in 'Evil to him who evil thinks.'"

"The evil isn't in the mind that conceives EVIL. It's in the action—that fatuous, benign tolerance that permits a victim of a wrong mental attitude to give expression to its ERROR. In other words, it's you, Mr. He-Man, Waldo, Geraldine and the whole dinged flapperesque coterie."

"A. W. ARDO."

No, Mr. Ardo, I can't guess what your position is, but I'm mighty glad your desk isn't next to mine.

SEVENTEEN THINKS HER PARENTS UNFAIR; HAS HER OWN OPINIONS

"THIS IS FOR PARENTS! I'm not going to edit it, add to it, or comment upon it. It goes to the press in its original jacket of spirited green ink, and if it doesn't drop with a sickening thud into some paternal hearts, I'll eat the paper. Lend an ear, or, if you're deaf, borrow an ear trumpet. THIS—IS—FOR—YOU! Don't miss it."

Dear Jerry:

You're right there when you say that kids have just as much right to their opinions and thoughts as anyone else, and the right of expressing their opinions. Parents don't seem to agree with you there—at least mine don't. If in any way my opinions, especially on what's right and wrong, don't agree with theirs, and I dare express those opinions, I'm in for a bad time."

Of course I realize that they know more than I do, but at least they might give me a chance. My intelligence isn't so low but what I can do a little thinking for myself, and if they're so narrow minded that they can't see that, down a hop they go in my estimation and respect. I have no illusions concerning them. I can see every one of their bad and good points. But oh, gosh! if I attempt to tell them that they aren't perfect, and that to my mind they don't even wear halos and wings! It's the truth that always hurts and is resented. But I do manage to remind them occasionally, and get by with it. (Maybe that don't sound nice, but it don't hurt them)."

Doesn't Respect 'Em

Jerry, I don't respect my parents very much. Why should they holler (that's what they do) at me about things that they do themselves? Why should I take the brunt of all the mean, nasty things

Your reasoning powers are a trifle fogged, don't you think? You maintain that I haven't the moral courage to attack the flappers. I maintain that it takes moral courage to defend them. Any one can attack an institution, a custom, a government, a girl—but it takes courage to stand practically alone and say I BELIEVE. I do believe in them—but more than that, I believe in the thing they are aiming for."

A Subnormal

If your exhaustive studies into psychoanalysis had taken you very far you'd find out that the woman of the streets you sound so mercilessly is mentally and physically a subnormal. The men in our prisons are not fully developed mentally—that's why they're there. The women of the demi-monde are usually such because of ECONOMIC conditions and because their brains are the brains of SUB-NORMAL CHILDREN."

"Flappers," so-called, are snappy, quick-witted, independent girls—school girls, working girls and home girls. You take the signs of freedom and call them vile."

MORAL COURAGE! If I didn't have it, I'd be on the band wagon, doubting the virtue of every little girl wearing a short skirt and a "cootie bungalow."

And far be it from me to interfere with your "God-given" capacity to express your opinion, but you can't do it here unless you're capable of expressing your thoughts in words that decent people can read without blushing."

You may think like a dozen purple giraffes for all o' me, but if you can't speak and write like a gentleman, out you go!

Happy in General

In general my life is very happy. My boy pal is the best in the world, and when I think of him the world grows bright again. They like him, too, which is one good thing."

I guess this is getting long, so goodbye. Keep up the good work, Jerry, and think of the many advocates you must have on the rights of kids to have their opinions and their right to express them. Believe me, my children shall have those rights."

Oh, another thing—is it necessary for married people to fight all the time? My mother and father squabble incessantly, and I get so disgusted I want to get married, as does any other girl, but it seems like a life that would be a living hell. My mother tells me it is always done, and is necessary. Why should it be? My folks aren't fifty-fifty pals. Please tell me the truth about this."

Print this or not—I should worry. SEVENTEEN,

Los Banos.

(The end.)

La-may Face Powder
is Guaranteed
Pure and Harmless.

Pure face powder cannot injure the most delicate baby skin. The trouble is, too many powders are made in the old-fashioned way, with rice powder. Rice powder is starchy, and, like bread flour, it is quickly turned into a gluey paste by the moisture of the skin. This paste clogs the cuticle, swells in the pores, causing enlarged pores, blackheads and rice-powder irritations. A specialist makes a harmless powder by using an ingredient doctors prescribe to heal the skin. Every time you apply this improved powder, you give your complexion a real beauty treatment. There

is a thousand dollar guarantee of purity printed on the box, certifying it does not contain white lead, rice powder or any harmful substance. This guaranteed pure powder is called La-may (French, Poudre L'Ame). Because it is pure and because it stays on, La-may is now used by over a million American women; it is now the most popular complexion powder sold in New York. Women who have used even the most expensive face powders say they cannot buy better powder than La-may anywhere at any price.

Good news for your children

How this digestible shortening removes the "taboo" from the foods they love

WHAT a joyful opportunity our children offer us! Promising little human putty for us to mould! Lives which we grown-ups may largely fashion as we will!

How concerned we are, then, when Surgeon General Hugh S. Cumming, (head of the U. S. Public Health Service) tells us that we are sadly neglecting our responsibility to our little boys and girls. In speaking of our millions of under-nourished school children he said in part:

"Although they may be supplied with plenty of food at the home table they are as truly under-fed as are the unfortunates of foreign lands. When the public understands the facts the remedy will be applied automatically, so to speak."

Yes, thoughtful mothers are already supplying the remedy—in their own kitchens. Take, for example, the selection of the fats which are so essential to young health; the fats which, of all our foods, are the chief producers of energy.

Nowadays well informed mothers will often tell you of the importance of choosing a digestible fat.

These alert housekeepers, we find, are quick to appreciate, in Crisco, its peculiar qualities of healthfulness. They understand the full meaning of the simple statement that Crisco is a vegetable shortening. They know that Crisco contributes its own healthfulness to so many foods that children love.

Fried foods which are crisp, brown, inviting—and *digestible*. All kinds of cakes, light, tender—and *digestible*. Pie crust which is flaky—and *digestible*.

Common sense tells mothers that so healthful a shortening as Crisco must cost, in a week's cooking, a few cents more than do fats of questionable digestibility. They would no more deliberately use a cheap unwholesome shortening than they would deliberately buy inferior milk.

So remember, mothers, it is easy to avoid indigestible fats when almost every grocer sells Crisco—a truly digestible shortening.

How to use Crisco

IN PAN FRYING: Crisco has reached proper frying heat when it browns a bread crumb in 40 seconds. (Do not wait for Crisco to smoke.)

By frying with Crisco you keep your whole house fresh and free from the odor of cooking fat.

IN DEEP FRYING: As in pan frying Crisco has reached proper heat when it browns a bread crumb in 40 seconds. (Do not wait for Crisco to smoke.) Remember this, too: By straining Crisco you can use it again and again. Crisco does not absorb the flavor of the foods it cooks.

ASSHORTENING: In welcoming Crisco to all of your favorite recipes for hot breads, cakes, pies and cookies remember this. You can secure delicious results by using 1/5 less of Crisco than you would of animal fats. Otherwise, use Crisco as you do your present shortening.

Two simple home tests

Low Melting Point Easy Digestibility!

Into half a glass of lukewarm water drop a small lump each of Crisco and any other fat. With a spoon gradually add hot water until Crisco melts. You will find that few other fats melt at this point. Food authorities say that an easily digested fat should melt near body heat—98 2/5 degrees. Crisco, you will find, melts even below this temperature. It melts at 97 degrees. (This test does not necessarily condemn the digestibility of the other fat, but it will aid you to establish Crisco's fine digestibility.)

Avoid Smoke and Odor!

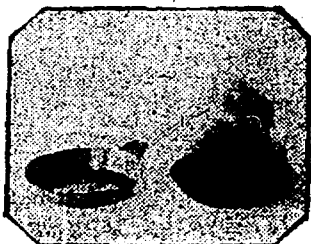

Put into separate pans equal amounts of Crisco and any other fat. Heat slowly for eight minutes or until they reach a temperature where a bread crumb browns in 40 seconds.

Notice that the Crisco, unlike most cooking fats, does not smoke at this proper frying temperature.

You will find that frying with Crisco will be very helpful in keeping your whole house fresh and free from the odor of cooking fats.

Digestible
[VEGETABLE]
Shortening

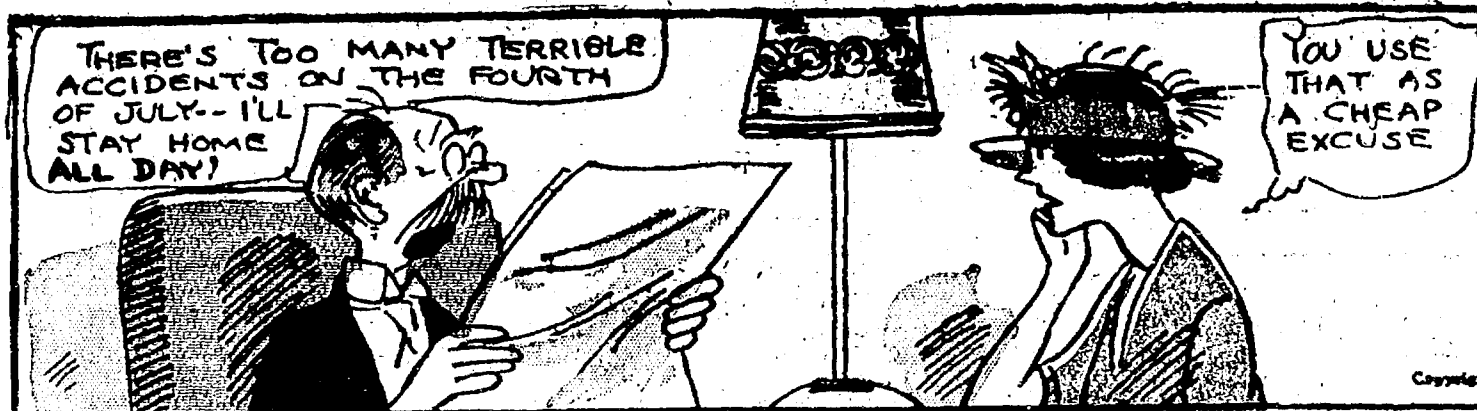

For delicious, digestible cakes
For digestible and flaky pastry
For crisp, digestible fried foods

Special Cook Book Offer:

This unique book is entitled "THE WHYS OF COOKING." It answers 164 puzzling questions about cooking and serving. Contains 148 delightful recipes, gives 45 standards for cooking measurements. Illustrated in 4 colors. Written by the well-known authority, Janet McKenzie Hill. To receive this book simply mail 25c in stamps or coin to Section 27-29, Dept. of Home Economics, The Procter & Gamble Co., Cincinnati, Ohio.

FOR ALL THE
GIRLS & BOYS

There's a special treat this morning, 'Witches!' An extra-special dandy story from Vivietta Archer. You'll all love it:

TOBY

(PRIZE STORY)

By Vivietta Archer.

The taxi rumbled along the dusty road, rocking first to one side, then the other (and no wonder, for it was a Ford). The passengers, a small boy, a tall gaunt woman, and the driver (a regular "hick"), were bounced around like a peck of feathers.

"Gee! This ain't like the taxis in New York," said the boy. "These are too ill!"

"Thomas, do not say 'ain't' and please round your consonants" answered the woman sharply. There was silence.

"P-please call me Toby," ventured the boy at last.

"I am informed that you were named 'Thomas,' and if I have my way you shall remain so," was the answer.

"What shall I call you?" Toby asked.

The woman gave him a quick glance and when she spoke her voice seemed softer.

"You may call me 'Aunt Belle' she said. "but please don't talk so much."

Toby didn't say anything until they reached the town. Over and over he kept thinking of the strange things that happened to him. How Miss Belle Carrigan had needed a boy to work on her farm, and how she had come to the Orphanage and chosen him, Thomas John Winthrop, to live with her. He was sure she would make a lovely mother, but was a little disappointed when he could not call her "mother."

As they were driving into the gate Thomas exclaimed very much excitedly:

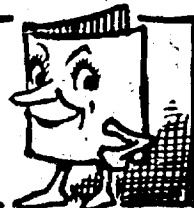

"Oh, Gee! Ain't this jus' simply grand!"

"I am glad you like it," said

(Continued on Page Two)

AUNT ELSIE'S LETTER TO YOU

GRAY-SHUS!

I've been pounding and pounding and POUNDING my head until it felt like a feather pillow. And it was all because of those stories from the tiniest tots. There didn't seem to be room for them in the Witches Cave and I didn't DAST put them in with all those ripping-roaring-Pirates. I began to be

afraid that they'd have to go out and sit on the sea gulls' tails. And then I had an IDEA. There was the last page. Sometimes the Boy Scouts filled the last page. And sometimes they didn't. So I decided to give a party for the TINY TOTS every once in a while on the back page. And here comes one today. How do you like it? We're going to have great fun with those Tiny Tot parties. There'll be paper dolls, and no end of surprises. Just you wait and see. They won't come EVERY Sunday—but when they do come they'll be whizzers.

We have some regular masterpieces on the page today. Benny Martin's picture came in too late to print in time for the Veteran's Convention week, but the spirit in it fits any time of the year. I'm proud of Benny for feeling that picture, aren't you? And there's a lovely one for the Witches by Clara Marie Serpa. She says that she named it "Rivalry" because it shows the rivalry between a garden

A new Pirate takes the place of honor this week.

THE WORK OF THE "DART"
(PRIZE STORY)

Swiftly the "Dart" steamed out of London harbor. The "Dart" had an important mission, to be one vessel of a fleet of four American cruisers to capture or sink a German light armed cruiser. This German cruiser was a terror to merchant-ships and small armored vessels.

The "Dart" is an American cruiser, 390 feet from stern to bow and fifty-two feet amid beams. She had eight 6.4 inch guns, six 4.2 inch guns, a few small portable pieces, and ten machine guns. She was capable of twenty-five knots at her best, and was built in San Francisco in 1915.

"We sure are traveling some, eh, Roland," said Second Lieutenant George to his friend Roland, who also was a Lieutenant on the cruiser "Dart."

Roland and George, sturdy lads of eighteen and nineteen years, had been in the navy two years each. They had been in England traveling when the war was going on, and as they had no parents except far relations, they had joined the British battleship "Victory." They had served on this ship as midshipmen until they had been promoted on account of active service. After being on the "Victory" a year, America declared war on Germany and both lads being Americans were transferred to the American cruiser "Dart." Roland and George had been on the "Dart" a year up to the present time.

"We are wanted in the main cabin," said George to Roland. Both lads hurried forward, eager to hear what the Captain had to say to them. The Captain's name was

(Continued on Page Five)

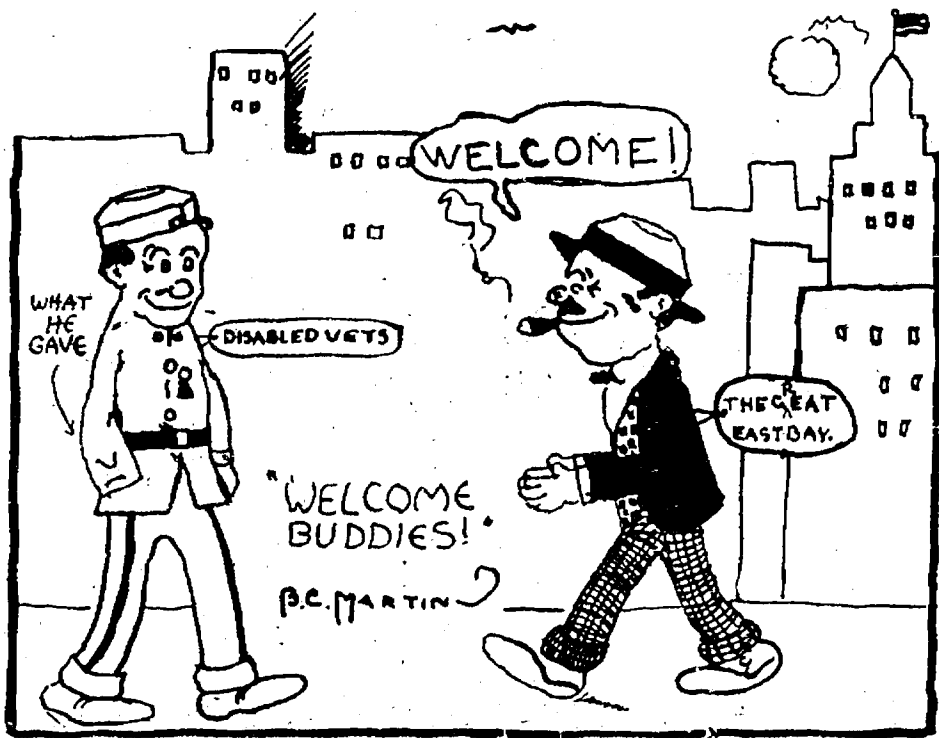

rosebud, and a rosebud of a girl. Seems to me the girl is winning that little game—what do you think? And then, to keep the page from being too peaceful, here comes Chief Fire-in-the-eye in full war path regalia. It's a dandy drawing—just the sort of thing we like for the magazine.

Little Pals, I'm prouder of you every week. No one ever had such wonderful partners as Aunt Elsie and I feel all sizzling inside with friendliness to you (just like a tamale) every time I think of you. So here's a grin with a sorta gingerbread taste—and my love to last for keeps.

Your own chum,
AUNT ELSIE.

A
TRUE
AMERICAN.
By Frances Elwood

(Continued From Page One)

Aunt Belle cooly, "but how many times have I told you to sound all your letters, and not say ain't?"

"Only twice, mum."

"My name is Aunt Belle and I am not a 'mum' she said haughtily.

When they entered the house Toby was taken to his room in the attic and told to dress for dinner.

"I haven't got much else," he said.

"Well, I am not fond of having you eating in my house with those dusty trousers on, but as it is you may merely brush them off," Aunt Belle said, looking at him from head to foot.

The dinner was a very silent affair and Toby was glad when it was over.

He went to bed immediately, but did not go to sleep for an hour or so. He kept thinking over to himself "I hate her! I hate her!" Finally he went to sleep and it seemed but a moment until he was awakened by Miss Carrigan.

"It is half past six, and you must hurry and get dressed, for there is a lot you must do today," she said. Then she left. Toby listened until the rattle of her silk skirts could be heard no more. He then jumped out of bed, thinking it very strange that he should have to begin work so soon.

After breakfast he was turned over to Moses, the colored caretaker.

"You sure all is gonna have a hard time, young feller, with Miss Carrigan, and the bestest thing you can do is to do just what she wants yer to," Moses said, shaking his head.

"Oh, I always intend to obey her," answered the boy. "An' say, will you please, call me Toby?"

"Sure I will, I sartinly hates the name of Thomas," responded Moses laughing.

Toby felt sure he had a friend now.

The summer passed very quickly, Miss Carrigan getting crosser all the time it seemed.

One evening she called Toby into her room and said, "I did not intend to send you to school when I adopted you, but after seeing how ignorant you are, I have decided to do so."

"Thank you, I am very glad," said Toby sullenly. Then he left the room immediately.

"Well, if that don't beat all," he thought. "No more vacation days for me."

That evening he told Moses what his Aunt Belle had said.

"Well, in a way you is a mighty lucky kid, an' den again you is not. But as I tole' you before you is sposed to do jist what she wants or—Oh, My!" said Moses wisely.

Toby laughed at the funny way Moses expressed himself, but when he went into the house he felt a bit comforted.

Monday morning Miss Carrigan took Thomas to school and introduced him to the teacher, a tall, lanky woman, stricter and crosser than Aunt Belle.

"I am informed," said the teacher, after Aunt Belle had gone, "that you have never been to a public school before, and I suppose that you don't know very much, so you will begin with the younger class."

"Yes mum," said Toby, "I mean mam," he corrected.

"My name is Miss Watson, and I intend to be called by it," the teacher said, then turning, to the class she began:

"This boy is going to start in school, so we must be very kind and help him along. His name is Thomas John Winthrop."

Toby felt as well as saw all the eyes turned toward him and he blushed a deep scarlet.

"You may sit here," Miss Watson continued, "I will give you your books in a few minutes."

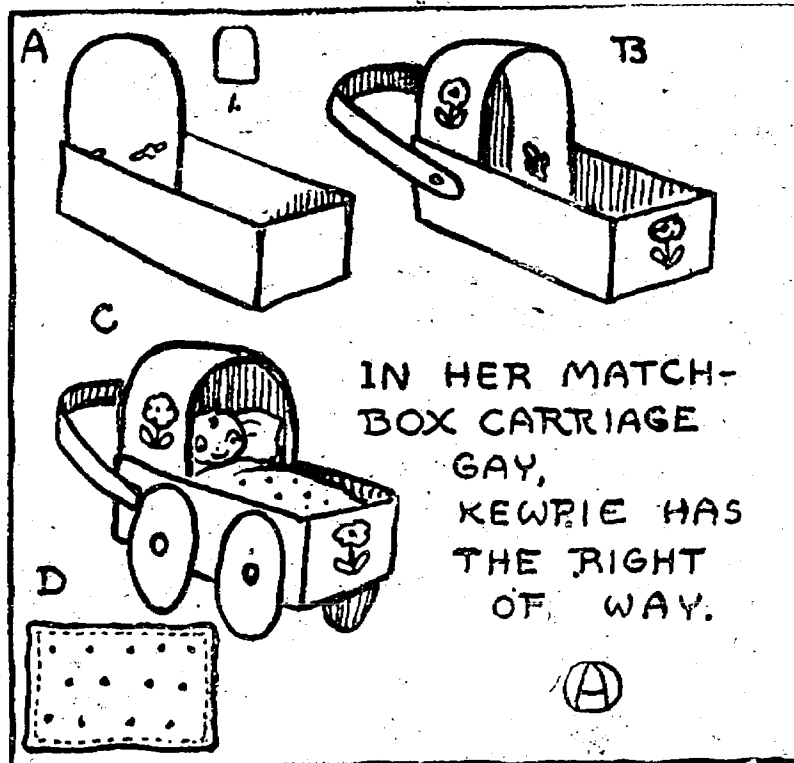

Toby just knew something was going to happen, as he told Moses that night, but it didn't.

"Never mind, honey, everthings will turn out all right when de end come," Moses comforted.

The first week of school passed like most all the first weeks do (I think we all have experienced them), but the second Toby began

MERRY MAKINGS

BUILT FOR YOU BY AUNT ELSIE

IN HER MATCH-BOX CARRIAGE GAY, KEWPIE HAS THE RIGHT OF WAY.

The best thing about Betty was her Wanter. She was always wanting something and it was usually something that was very hard to get. This time she wanted the contrariest thing—a Baby Carriage for her Kewpie Doll! Now who ever heard of a carriage tiny enough for a three-inch dolly?

"Don't be stubbornish!" said Peter Poodle. "Want something reasonable!"

"That's reasonable," said the Understanding Scissors who loved to argue with Peter Poodle. "Just watch me—I'll do it."

"Betcha a rag doll flea you can't," barked Peter Poodle. And that's just where Peter Poodle lost his rag doll flea, for the Understanding Scissors made that baby carriage and this is how he did it:

First, he took a match box—one of the larger size. Next he cut an upstanding piece of pasteboard, shaped like Fig. 1, exactly as wide as the end of the box and twice as high, with rounded corners. This he fitted into the end, as shown in A, fastening it with two paper clips.

Next he took some light weight, bendy cardboard and made a "hood" which was a straight strip of paper, wide enough to reach down one-third of the length of the box, and long enough to go around the upstanding end piece.

Before he put this on, the Busy Brush painted a gay little flower on each side and on the end of the box. Next he cut a long bendy piece for the handle, and fastened it on as shown in B, making the same paper clip fasten both handle and hood. Then the wheels went on. They were simply circles of stiff cardboard fastened to the sides with paper clips, or wire hair pins. The holes were cut large enough so that the wheels rolled easily.

Last of all, Betty made the carriage blanket shown in D. She made a tiny bag of bright cloth, stuffed it a bit with cotton, and caught it here and there just as a puffy blanket should be caught. That looked so jolly that she made a wee pillow, too. Then in went Kewpie, smiling as you see her in C.

(Copyright, 1922.)

to get acquainted, first with the boys, and then there was Mabel. She was a girl with small features and best of all a lot of red curly hair. Toby simply adored her and he never missed a night to carry home her books.

One day when he got home from school there was a visitor at the house.

"This," said Miss Carrigan, "is your uncle, who wants to take you away. Do you want to go?"

Toby stood erect, "I hate her! I hate her!" kept running through his mind, but he said:

"No, I do not want to go."

"Well then," said the uncle laughingly, "as I must have Thomas, and Thomas and you," turning to Aunt Belle, "I shall merely take both."

"Why, John!" exclaimed Aunt Belle.

Toby was surprised that his aunt was so familiar with the uncle.

"Yes," persisted Uncle John, "you refused me when I asked you before, but you simply can't now."

"Well, I don't intend to," she said smiling, and Toby thought she really looked pretty.

Within a week they moved to the city where Mr. Winthrop had bought their new home, and of course Toby could not be left behind.

"Well, if this ain't the beatinest world you ever saw! Toby said on the night of the wedding.

Aren't we becoming famous chums? Here's a new witch way off in Ontario, Canada.

JOHN'S FIRST NIGHT AT BOARDING SCHOOL.

It was John's first day at boarding school. He had reached there two days before school opened. He was the only new boy there and the other boys planned to play a joke on him at night.

When John had gone to bed he

was soon asleep as he was very tired. The boys met in another room and planned to have a pillow fight after some fun. The boy's names were Joe, Tom, Jack, Sam and Jip.

Every boy jumped into bed and pretended to be asleep while Ben pretended to have a nightmare. He went first to John's bed and then Jip came in dressed as a ghost and frightened John so that he climbed into bed with Tom.

Then a pillow fight began. Tom said he preferred to sleep alone but John did not move. It didn't last very long for the verger had heard the noise and was up there in no time. John was just getting back in bed when he came in and so John had a lecture given to him while the other boys listened and laughed.

This ended John's first night in boarding school.

THE BLOODY GANG.

On a high mountain there was a beautiful castle which was very large. In it was a beautiful princess and a prince. Some robbers that had a cave under the castle planned to capture the princess.

One day when the princess was going out for a walk she chanced to pass over a part of the cave. Suddenly she began to sink down, down, down. When she reached down the cave she heard voices saying, "Now we have got her." Two masked men came and tied her up.

After two hours her father was searching for her. He passed the cave and spied it. Heard yells and said:

"Those are my daughter's voices." He hunted for a trap door and found one. It was very small, so he had to crawl in. He saw a sign that said, PETE THE BLOODY GANG. He knew that if he captured this gang he would receive a large reward. He wanted to get his daughter first, so he started on. He soon came to the place where she was and untied her. She fled home and her father went to call the police. When the police arrived they read the sign and said, "\$50,000 reward for this gang." The police got the robbers and took them to San Quentin for all their lives.

The father went home very

STORY SECRETS

Do you want to belong to the AUNT ELSIE CLUB? Do you want to wear the prettiest pin in Oakland, swear to the secret vow, and be admitted free for the next six months to THE MERRIEST SHOWS AND MEETINGS THAT EVER WERE THOUGHT OF? There'll be lots of them, each one more fun than the one before. So you had better sit right down and send a letter to

THE AUNT ELSIE CLUB,
OAKLAND TRIBUNE,
OAKLAND,
CALIF.

Say that you want to Join the Club and give your name and address. A letter will come back to you at once with directions which will tell you exactly how to join. Then do what they tell you as fast as ever you want, and at once the pin and all the secrets and Magic Card that will admit you to all the fun will go flying back to you. And you had better HURRY—for you don't want to miss a single giggly somersault.

SPECIAL NOTE—Lost or broken pins will not be replaced. But your card will always admit you to any of the parties, within the time stated upon it. If you lose your card you may have another.

happy with the money. The next week he gave a ball and invited all the poor people and some of the rich. He gave some money to the poor people. After a while they got married. Everybody gave her gifts and the father gave her a gold bracelet with two diamonds on and the gift was worth \$75. After that they all lived happily ever after.

A LITTLE STRANGER.

Once when I was playing in the garden I saw a little face peep through the vines. I went and looked, and to my surprise I saw a little beggar child, ragged clothes and hungry eyes. I asked her to come in and play. She said she would.

When I asked her where she lived and who her parents were, tears came into her eyes and she said, "I have no mamma nor papa." I then told my mother to make a nice party for us and another gave her a good scrubbing and combed her hair and when she came out I hardly knew her. She looked so nice. We ate our supper and I let her have my bed. Then I slept with my mother and daddy.

The next morning we got up and the little girl said she had to go, but would be back soon.

THE WITCHES' BAND.

Twilight was sweeping over the land.

When out from a tunnel came the witches' band.

Then the leader that all of us dread

Came forward, and this is what she said:

"A hundred dollars I will bet That we can get those pirates yet. Tonight we will ride to their nasty old camp,

Whether the weather be dry or damp."

The witches then got on their broomsticks,

While the leader called two, four, six,

Then off they flew

O'er the sea of blue.

Finally they came to the forest so deep

In which the pirates lay fast asleep.

Up to the leader they softly did creep,

Each one taking a good big peep.

"Tomorrow we shall make our plan About getting their leader, the one they call Dan.

When we shall be able to dwell in peace,

For these terrible wars shall very soon cease."

UNTRE! UNTRE! WITCHES

AND PRIRATES UNITE!

THE END OF THE WAR.

Once upon a time when witches and pirates lived, there lived the witch queen Marvella. The witches lived on one side of the river and the pirates lived on the other side. The pirate king's name was Russell.

Now the pirates and the witches were always fighting against each other. The pirates were always losing the battles. Pretty soon the witches began to lose out in the fights. But the pirates said that they didn't want to beat the

(Continued on Next Page)

witches, as they were girls, and also cowards.

One pirate had such a big mouth that he began to blab about it. The witches were mad when they heard about it, so that they started in to fight all the more. Then the witches began to win all the fights. The pirates began to be afraid, since they were losing.

After a while the pirates asked the witches to come over to the pirates' side. So the witches came.

Pretty soon the pirate king said that he had long been in love with Marvella. Marvella consented to be his wife.

The next week we hear a band playing "Here Comes the Bride." We see a beautiful girl and a handsome man coming out of the church. It is Marvella, the Witch Queen, and Russell, the Pirate King. So we find the witches and pirates unite.

THE A—A—HOUSE.

One afternoon Estella (Chick for short) and Frances (Ducky for short) went on a trip of exploration. I shall tell you a little about these girls while they are exploring. Chick and Ducky lived in San Francisco, but were now on their vacation. They lived at Cozy Cottage, Blackberry Lane, Fairfax, during the summer. They were not related to each other, but seemed so. Frances went with Estella and Estella went on many trips with Frances. I'd better not leave them alone any longer or they'll get lost.

The two chums had traveled for five miles to the source of a nearby stream, when they notice a large, deserted-looking mansion.

"I would like to go up and look at that house," said Ducky. "Will you come with me?"

Chick replied in the affirmative. "Very well; but we had better hurry. The weather does not look very promising. Come on," commanded Ducky.

"I don't feel frightened, but that house looks like—oh, you know what I mean."

"Oh, come along, it's perfectly all right," cried Ducky.

So she did, frightened as she was.

The two entered the house, with Frances in the lead, when she suddenly heard Chick scream, "Oh, ghosts!"

"Nonsense," said Frances. "It's only bats."

They then walked into a large salon, where they found a note. It read like this:

"This house belongs to a very old gentleman, but he does not know it. He is very poor and the value of this house would make him rich. Please try to find him. His name is A. W. Dun Vorlees. You will be rewarded for it."

From ————

The two girls stared at each other and said "WE WILL."

And they did.

Two weeks after they found Dun Vorlees, who gave them each five hundred dollars as a reward.

FRANCES SULLIVAN.

EMMA PAREW,

No Address, 9 Years.

B-r-r, but this is a scary story for Pirates!

"BLOODY TOOTH."

Once upon a time a baby witch was born to the queen of the witches. The queen's name was Black Hat. One day Black Hat died, and the baby witch was queen. Her name was Broomstick. When she grew up she was very, very, VERY UGLY! Her cheeks were brown as dirt, her nose was five inches long, her right eye was green as grass and her left eye black as night.

She and 49 other witches got together and planned. This is what they planned: One of the witches was to kill a pirate called "Bloody Tooth" and dress up like him and live with the pirates, so as to learn their secrets, and tell the other witches, and then they would capture them.

This witch's name was Foxy. One night Foxy, who was the make-believe pirate, crept up to the pirates' den and all of a sudden they yelled "Pat-Sat" so as to warn the pirates, and all the pirates jumped up and just as they were looking for the witches the witches jumped out and captured them, and that night they had a feast of ROAST PIRATE!

PROFESSOR POTHEAD.

On a corner downtown a conversation was going on among about a half dozen men. Among them was our hero, Professor Pothead. The others, as usual, were joshing him. "How fur did ye git in school, Prof?" asked one.

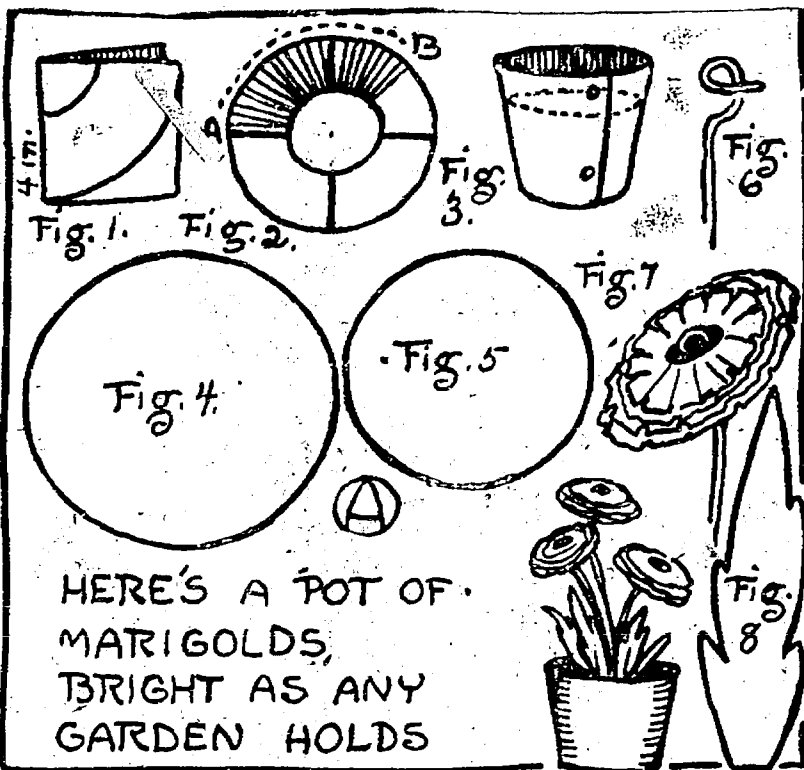

"Why, clear up to the seventh," replied that worthy, and walked on.

He walked until he came into the country, and then he stopped and lo and behold we see him throw off his long grey mustaches and sit wearily down on a log. In his stead was a young man of about twenty, with brick red hair and twinkling blue eyes. He spoke aloud to a little squirrel, "Well, I've been in this place for three

MERRY MAKINGS

BUILT FOR YOU

BY AUNT ELSIE

HERE'S A POT OF
MARIGOLDS,
BRIGHT AS ANY
GARDEN HOLDS

"Mother's going to have a party tomorrow for her three best friends and I just wish I could make a surprise for each place at the table," said Betty.

"Why don't you give each one a pot of flowers?" said the Paint Box Pal.

"How can I buy pots of flowers? I have only seven pennies in my bank and my bank's lost anyway."

"You don't have to buy these pots of flowers," laughed the Paint Box Pal. "Clear the table and watch them grow!"

And before you could powder a Lady Bug's nose, there stood the pots of flowers. They were so jolly you'll want to make some too for your next party, and here's how:

First, they made the pots of light weight cardboard. They needed a pattern for this, so the Understanding Scissors took a piece of paper, eight inches square, folded it twice, and cut out a circle with a hole in the middle as shown in Fig. 1. This doughnutty piece was four inches thick from inside to outside. When opened out, the creases divided this circle into four sections. He cut away all but the whole of one section and the half of the next, leaving a piece like the shaded part in

Fig. 2. This was the pattern for the pasteboard pot.

When he had cut the pasteboard he fastened it together with paper clips, as shown in Fig. 3. Twisted bits of hairpins would have done as well. Then he cut a circle of pasteboard, slightly smaller than the top, and fitted it inside, as shown in Fig. 3. This was to be the "ground." The little pots were painted bright blue. Then they were ready for the flowers.

From sheets of writing paper, colored bright orange and yellow, they cut many circles, like Fig. 4 and Fig. 5. Next they cut centers of dark brown pasteboard. Then Betty put the flowers together. First, there were two large circles, then two smaller ones, then the brown center. When they were piled neatly, she fastened them at the end of the wire hairpin "stem." It went up through the center, down again, and was then bent back, as shown in Fig. 6. Then the Understanding Scissors went to work and snipped the paper into neat "petals," as shown in Fig. 7. Last of all the green leaves (Fig. 8) and the wire "stems" were stuck into the "ground" and what a merry little pot it was!

(Copyright 1922)

days and I've not found the pearls yet." On his lapel we see a Secret Service badge.

At this time Miss Vangie Hall was having a furious quarrel with her uncle. She was in tears.

"I don't care, I don't want to stay in this dumpty old place and I won't," and she flung herself out of her chair and up the stairs. Once there she phoned down for a horse, got into her riding habit and ran down the back way. Old Peterson had "Star" ready for her, but she got "Max," a colt which had just arrived a few days before.

Chap. 2.

"Yes, it's sure a funny business," mused our hero. There he stopped, for he had heard in the distance a cry for help. He ran to the road. Yes, there was a young woman on a runaway horse, screaming and trying to hold it back.

The man caught the horse just in time to save Vangie from falling off. Fortunately there was a stream close by and our young man carried her to it, bathed her face and laid her on his long black coat.

When she revived she looked about her with frightened eyes. "Where is my horse?" she asked calmly. "Are you one of my uncle's men?"

"I'm Jerry O'er—I mean—Professor Pothead!" he said.

"You are not," said Vangie. "Professor Pothead, indeed? No, tell me your right name."

"Can I trust you with a secret?" asked Jerry O'Day.

"After saving my life," said Vangie, "you could trust me if you were a secret-service man and I a thief."

"Oh, Lordy, you've guessed it!" he gasped. "Are you one of them mind readers?"

"Not at all," she retorted. "You shouldn't be wearing your badge outside anyway."

Chap. 3.

Eight o'clock and Jerry, with Vangie on his arm (he was again Professor Pothead) was laughing over the events of the day.

He stopped suddenly—there was the sound of voices in the next room. "Yah—yer better not give them pills to that ol' pawnshop fool; why them pills is worth \$100,000."

"Well, Bill," said another voice

"we gotta git the money—"

They in the other room listening jumped when they heard a startling thump. They quietly stepped out into the hall and so over to the next door. As they stood there, Jerry with a pistol in his hand, Vangie behind him, the door suddenly opened and a head poked out.

Jerry was quick to poke his pistol into the man's neck and say, "Hands up!" in a very loud voice. The man said, "Hey, watcha doin'?"

"What were you doing in that room?" asked Jerry.

"I'm de janitor!" said he in a loud, mirthless voice.

"Miss Vangie, will you keep this man here for a moment? If he makes a false move, shoot him," said Jerry.

"All right, Mr. Jerry," said Vangie in a very offended tone.

Chap. 4.

Fifteen minutes two seconds after the police found Jerry's charge standing firmly in the door, pistol in hand, holding a cowering man at bay. When they went in they found Jerry engaged in counting pearls.

After the matter had been cleared and Jerry had received the due \$30,000 reward, Vangie and Jerry were sitting out on the terrace of Vangie's new country home, talking over the events of the last few days, and after they were better acquainted they were married and Jerry had many more adventures as a detective.

"RATTING FINGER BONES."

LOUISE SOMMERFIELD,

THE CRYSTAL GLOBE.

(A PRIZE STORY.)

Once upon a time there lived a great magician. He was a little old man with a wrinkled face and a long white beard. He looked like a kind man, but he was really a wicked magician. Yet everyone in the village liked him. They would walk and talk with him, but they never got an opportunity to walk past the stone posts, down the evergreen path to the old gray castle which loomed always mysteriously dark and silent.

One day a girl named Jeanette asked to accompany him home. She

Here's the way to write a story for your page—

And the ONLY way:

Make it short—about 300 words.
Make it snappy—full of thrills.
Make it original—all your own.
NEVER COPY.

Write only on one side of the paper.

Write in ink, or heavy pencil—or, best of all, have it typewritten if you possibly can. Your story will be printed almost as soon as received if it is typewritten.

Anyone may write stories, whether he or she belongs to the club or not.

Send your story to "Aunt Elsie," Oakland TRIBUNE, Oakland, Cal.

And now grab your pen and start right in, for we all want to hear from YOU.

begged so hard that at last he consented. When the magician appeared next day, Jeanette was not with him.

Jack had always been Jeanette's playmate, and the next day when she did not appear he consulted her mother. She told him the dreadful news and he was so angry, that he decided to hunt for Jeanette. That night he silently crept from the shadow of one dark tree to another. He mounted from the trees to the ground and his shoes crunched soft things. They were SNAKES! His heart sickened as he thought of many dangers Jeanette might have to go through. He mounted another tree and climbed high enough so that he could look through into the window. This is what he saw:

Directly in the center on the table was a small glass globe from which a peculiar light radiated. Otherwise the room seemed to be empty. Then, as the light flashed first into one corner, then into another, he almost lost his hold on the tree; for chained around the room were animals—gaunt wolves, bears, starved-looking foxes, pigeons and many others. Like specters of a dream, they all gazed on the crystal ball on the table. The door opened and in walked the magician leading Jeanette. No longer did he resemble a kind grandfather. His eyes gleamed, his teeth showed a hateful grin and he laughed a horrid laugh. He drew poor Jeanette to the table and its globe.

"Put your hand in, girl, and draw out a card."

"I can't, sir," she said. "Oh, please don't make me do it."

"You won't, eh? Well, I'll show you," and he took the globe and said some magic words and immediately she was changed into a white bear.

Fainting and trembling, Jack got down from his perch. He went over the wall and got into the house by the side entrance. He changed clothes with the butler, who was the only one who lived with the magician, and stood up by the wall. Presently the magician came in and said, "Ha, James, I have another spider in my web."

Then James, the supposed butler, said, "You are so terribly clever, won't you tell me how you did it?" The magician snarled and laughed a hateful laugh and said, "Well, I will tell you because you are trustworthy and have been my companion for several years."

"I carry with me a stick which was given me by my ancestors and which is very valuable. Just touch it to the globe and it will immediately turn what you say into it quicker than a flash. But you must say the magic rule." He told him the rule and then snarled again and went to bed.

Jack had earned his information easily, but to get the stick was not quite so easy. He went to the magician's room and found him asleep. He soon found the magician kept it under his pillow. He started to take it once and the magician turned in his sleep. Then Jack had to wait again for the magician to turn again. After what seemed hours he turned, and Jack quietly snatched the stick and went down stairs.

The stick was queerly shaped and had strange figures on it. He hastened to the crystal globe and pronounced the magic words and touched the globe. Instantly all the animals were changed into boys, girls, men and women. They couldn't thank him enough. Just then they heard a crash, and then Jack ran upstairs to the magician's room and it was empty. Nowhere could he be found.

The next day while he was exploring the castle a voice came to him and said for him to bring the magic stick and throw the magic globe over his left shoulder into boiling hot water, and he would be rewarded. Jack buried the stick and threw the globe into hot water. It disappeared and he walked into the magician's room and found two

(Continued on Next Page)

caskeits of gold. He went outside and went home.

The next day he started for the castle again, but there was no castle. It had disappeared.

Five years later Jack and Jeannette were married and they lived happily ever after. In the evening Jack would tell his adventures to his children and they all hoped that there would be another magical some day so that they could have adventures, too.

LOUISE SOMMERFIELD.

MARIE BOYER.

3516 Richmond Blvd., Oakland.

THE GIANTS' CAVE.

Once upon a time there lived a little girl named Jeanne and a boy named Bobbie. They were twins. One day they were walking in the forest and they got lost. It happened that they knew a little dwarf. He was just coming along at that time and he said, "If you are lost you can come with me to my home, but you must be careful of my wife, for she is taller than the tallest building in Oakland, and she is very deaf, too."

But Jeannie and Bobbie said, "Yes, yes, we are very tired. We will come with you."

So they went to the little dwarf's house. When they came there the wife said, "Who are you?" very loudly.

They tried to tell her what their names were, but all she could say was "What? What?" so they had to take ladders and climb up to her ear to tell her their names.

That night they tried sleeping in the dwarf's bed, but they broke it. So they had to sleep in boxes. The little dwarf had to sleep in his wife's bed and he felt lost.

The next day was Sunday, so the wife suggested that they go to the giant's cave. So the dwarf took them. They went through long passages until they came to a room filled with copper coins, and they filled their pockets. The next room was filled with silver, so they threw out the copper and filled their pockets with the silver, and the next was gold, and the next was full of skeletons. Jeanne said they had better turn back. So they were just starting from the last room back into the passageway when they heard the giants coming. The dwarf hid them in the magic wall and the dwarf hid on top of the door.

The giants asked the wall, "Has anyone been in here since we left?"

And the wall said, "Jeanne and Bobbie and the dwarf have been here."

The giants said, "That is nothing," but just the same they wanted to catch the dwarf. After a while the giants began eating and drinking and having a good time. So the dwarf hollered the magic names to the wall to open, and Jeanne and Bobbie ran out. But just as the dwarf was going to run out the giants caught him and they ate him, but Jeanne and Bobbie ran out and got safely home, and lived happy ever after.

THE RACE.

Once in Alaska there was a gold mine and two men started on a race to stake out a claim for it.

The villain's name was Bill McCall and the other's name was Jack Foster.

Silverbeam, the leader of Jack's dog team, loved his master very much, which is quite unusual with Malmute dogs.

When Jack and Bill started in different directions, Bill went over the mountains and Jack went around the mountains, each thinking that their way was the shortest way to the land office.

Bill was caught in a snow storm in the mountains and was delayed. As they neared the end of the race Bill saw Jack was ahead and would win, so he shot and wounded Jack.

Silverbeam would not let the other dogs harm Jack; but he pulled his master upon the sled and then led the dogs to the land office. Jack regained consciousness as he came up to the land office—Jack had won.

Betty, the daughter of the agent at the land office, nursed Jack and when Jack got well he married Betty and then they went to live at the mine, which was a very valuable one.

LEMON PIE.

"Aw, Ma, just give me one more piece of pie," pleaded little Johnny one hot afternoon.

"No. Do you want to be sick? You've had three pieces already," replied his mother.

"Aw, they were little pieces, and one more little piece won't hurt me," went on Johnny.

"If you don't be still I won't make that lemon pie I promised for supper," said his mother. You know, lemon pie was Johnny's favorite pie.

With this Johnny slouched off and laid in the shade of a big chestnut tree.

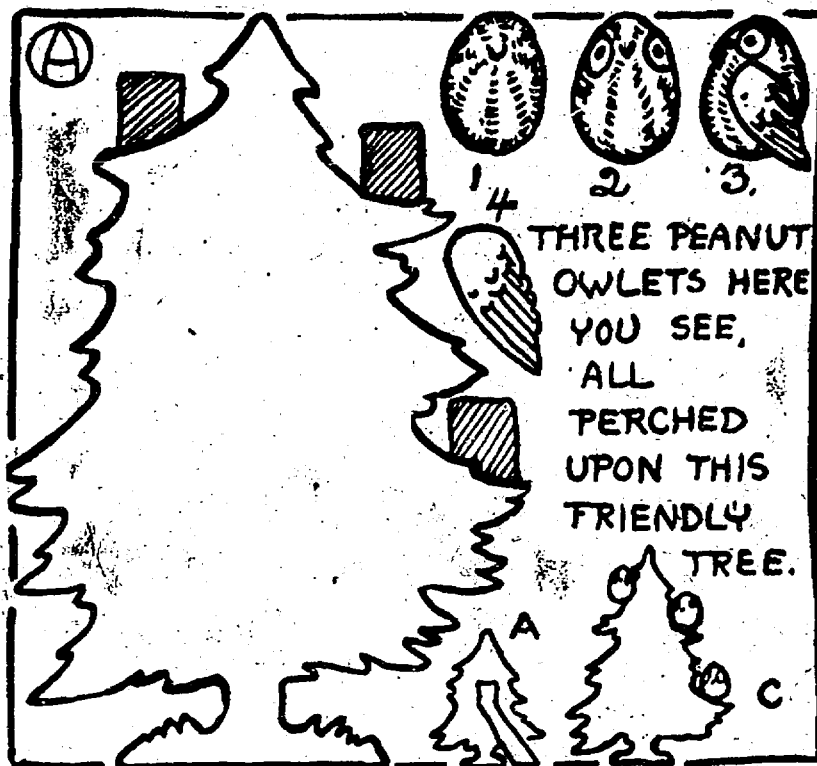

All of a sudden Johnny saw a queer man coming toward him. Johnny was afraid, but the man smiled kindly, so Johnny just stared.

The man's body was a big lemon.

MERRY MAKINGS

BUILT FOR YOU

BY AUNT ELSIE

Betty had been doing the STUPIDEST things all morning! If you ever have stupid mornings—and I'm sure you have—you'll understand. She had spilled and stumbled and sneezed without her hanky and broken three pencil points, two dolls and one water glass, and worked herself into a Most Bristly Temper. As we all know, a Bristly Temper is about the worst kind, so Understanding Scissors decided that something must be done.

"You need a few owls around to teach you wisdom," said he, "and if you'll hand me that peanut bag—"

"Whoever heard of owls in a peanut bag," rudely interrupted Betty.

"You will, if you keep still long enough," snapped the Understanding Scissors.

Betty started to growl, but she was really so curious about the pea-

nut bag plan that in a second she was giggling while she watched Understanding Scissors get to work.

"First we'll make a tree for them to live in," said he. He cut a tree from pastboard, exactly like the pattern I have given you, which you may follow. Then Paint Box Pal painted it all a bright green and the Friendly Paste Box fastened a brace in back so it would stand up, as shown in A. Then they bent back the shaded tabs, for that was where the owls were to perch.

The fattest, wisest looking little peanuts were chosen for the owls, and they were made in a jiffy. On went two round paper eyes, and two round paper wings, like the pattern in Fig. 4. Then a dab of paste fixed each owl to his perch and a wisper tree you never did see. (Copyright, 1922.)

foods are not good for us."

That was the unhappy ending of my life. Boo hoo!

And now the children have grown healthy and strong.

THE LEGEND OF A DEER.

Once a great Indian chief, whose name was Se-wam-awatta, had two children, a boy and a girl. Wapatcha was the boy's name and New Moon was the girl's.

On his deathbed the chief told his children to leave the village at once or they would be killed. He also told them that in an old oak in the forest that lay directly five miles northeast of the village they would find a comfortable shelter, for the oak was hollow.

That night after their father's death the children started out in search of the tree. As it was moonlight they could see quite easily. They soon found it and to their surprise it was furnished just as comfortable as could be.

Years passed and the girl grew into womanhood, a tall, beautiful girl. The boy grew into a handsome brave. Now it happened when they were small that a prophecy had been told of their lives.

One day when Wapatcha was hunting he became very hot and thirsty. He hunted for a spring of cool, clear water. He soon came to one. The water had a spell on it, and the stream told of it. But Wapatcha did not listen, but drank of it, and soon his legs and arms became long, slender, hooved legs. His head became long, with horns of wondrous beauty. His body became a light reddish brown, and away he bounded into the forest. He was called a stag by the red-men.

New Moon meanwhile became worried about Wapatcha and went in search of him. Soon she also became very thirsty and found the same stream and drank of it. She also became a deer, only without horns. She was called a doe. New Moon soon came to her brother, and wherever there's a doe a buck is sure to be around somewhere. "DEARIE"

HOW EDITH HELPED HER COUNTRY.

Edith was sixteen years old and she had always wanted to be a nurse. Just at that time there was a world's war. Edith begged her mother to let her go to some Red Cross hospital and nurse the sick.

But her mother said no, she was too young.

Now when Edith's brother went to war he said he would have a letter written to Edith's mother if he was killed or wounded.

About two years later Edith's mother got a letter saying her son was wounded and not expected to live. Edith was eighteen years old now and her mother consented to let her go to France and nurse her brother.

Edith nursed her brother till he was well and strong again and then she nursed other wounded soldiers. Edith had nursed the soldiers for about six months when an officer came in and said there was a soldier dying not far away, but the ambulance could not get out there to help him. Edith got some water and medicine and started off to find the soldier. She found him and gave him some water and dragged him back to the hospital. She had just reached the hospital when a bullet hit her. She lived to see America win the war and then passed peacefully away.

FRED'S WISH.

Once upon a time there was a boy whose name was Fred. He was a very good boy except that he had one fault and that was he was greedy for such things as candy, ice cream, cake and the like, but he never wanted to share it with his little friends.

One day as he was playing in the yard he asked his mother if he could buy some candy. His mother told him no because he was so greedy with it. He was very angry and exclaimed, "I wish the whole world would turn into candy."

Now a fairy was near—as there were fairies in those days—and heard his wish. So she thought it would be a good punishment for him and she turned everything into candy. At first he was very happy and ran around taking a taste of everything in sight.

After he had eaten, candy for about half an hour he began to scream. His mother came running and asked him what was the matter.

"Oh, my stomach, my stomach!" was all he could say, so his mother put him to bed and gave him a dose of medicine.

After a while he said, "Oh, mother, I wish everything would turn back the way it was."

Now the fairy heard him and felt sorry for him and turned everything back the way it was. Fred was very glad and was never greedy again.

"A CONVERSATION BETWEEN A RACE HORSE AND A RACE CAR."

It happened in the stable of "Lady Bess."

A motorist was visiting her master and there being no garage, the race car was put in the stable.

"Lady Bess" was attentively looking at the Pierce Arrow car which was brightly polished. "Lady Bess" rather liked its yellow color, but disliked its big lamp eyes.

On his side the race car was scrutinizing the well-groomed, sleek black racing horse.

After looking at each other for a while the race car said: "What good are you in the world, I'd like to know?"

"I win all my master's races and he loves me," she replied modestly. "This is a new world. We don't need horses. We run the races," retorted the race car.

"But I possess feelings and am a companion to my master," said she.

"So am I."

"Who ever heard of a man putting his arm around a car's neck, petting and talking to it," laughed the horse.

"Well, I save my master money," angrily replied the race car.

"Yes, you make him spend money on gasoline. When one of your tires is punctured you stop, and if you are not cranked up you can't move," said the horse.

"What! Don't you cost your master food? Don't you get tired after a long gallop? I never tire out," replied the race car.

"But my master doesn't crank me up to make me start. One of my ancestors carried George Washington on his back. Ha, ha, just think of George Washington mounting you! Can you see Caesar commanding the Romans on a car like you!" laughed the horse.

She laughed so loud that her master came to see what was the matter. Thinking that "Lady Bess" was hungry, he sent her off to pasture. And the race car wondered why he hadn't won the argument.

THE NEST.

What can that little spot be, Up in the old oak tree? None other than a dear little nest, Filled with birdies three.

There the mother keeps them warm, Guards them closely from all harm, While the father watches by, Brings them food of fly and worm.

MARGARET THURSBY.

(Continued From Page One)

Stonover, and he liked the boys very much.

"Seeing that this isn't a secret voyage, I will tell you boys where and what we are heading for. As you already know we are to join three other Allied cruisers. These cruisers are about the same size as this one. One cruiser will go north, one east, one south, and one west. We are to go south through the Mediterranean Sea. The object of our search is the German cruiser 'Krogul'. The 'Krogul' is a terrible menace to merchantmen ships and cruisers smaller than herself. The 'Krogul' is larger in size, guns and men than the 'Dart', but this brave little ship has the heels of the 'Krogul'. We can go twenty-five knots while the 'Krogul' can only make twenty-one knots per hour. That is all I have to say."

Roland and George left the cabin and went below, and as neither of them was to be on watch that night, they turned in and went to sleep.

The "Dart" swiftly steamed south. Nothing unusual happened the next few days. One bright sunny morning the lookout shouted "Smoke off to the south, Sir." Slowly the ship we had sighted drew nearer, and George, who had been looking over the rail on deck, could distinguish the German flag flying in the breeze on the unknown ship. The next moment the wireless was clicking away in the wireless room. The message that the wireless operator handed to Captain Stonover bore the one solitary word "Surrender."

The message had come from the German ship on the horizon. The message that was sent off from the Dart's aerial was "Never will we surrender. Catch us first."

With binoculars in his hand, Captain Stonover turned to George who was by his side. "The name on that war vessel is 'Krogul'." Quickly the "Dart" turned about and headed north. The "Krogul" was in chase. "I don't like this running away from the enemy," said George to Roland, who was now beside him. "We are not running away," said Roland. "The Dart will keep just close enough to the enemy so as to keep out of range and to egg the enemy on after us. After we have picked up another Allied ship with the wireless, we will turn around and fight. The Allied ship will come up and help us. We could not fight the 'Krogul' alone because she is more than our match." This bit of information Roland had learned from Captain Stonover.

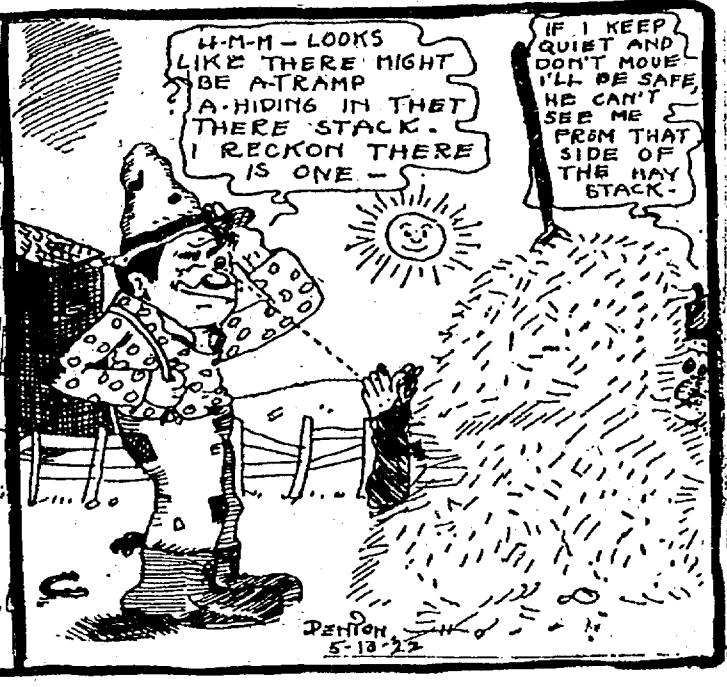

Just as Roland predicted, an Allied ship was found not far off. As luck would have it the Allied ship was none other than the large battleship "Victory," on which Roland and George had fought only a year ago. The "Krogul" was still following the "Dart." About an hour later a ship was seen behind the "Krogul". As it drew nearer it was recognized as the "Victory." The "Krogul" could not escape now. The only thing she could do would be to fight. The "Victory" was a larger ship than the enemy ship. The "Victory" had four submerged torpedo tubes while the "Krogul" had none.

Soon the "Victory's" big guns were in range while the "Krogul's" smaller guns couldn't reach as far. Both Allied ships were closing in on the German cruiser. When all the ships were in range with each other the battle started!

The "Victory" turned sideways and gave a broadside. The shells screamed over the water, and all of them landed true. They burst on the deck, scattering pieces of iron all over. The damage was terrible. Just for an instant did the "Krogul's" fire cease. Men sprang to take their dead companions' places.

While the "Victory" was at work on the other side of the "Krogul," the "Dart" steamed in close to the "Krogul's" side and let loose a tremendous broadside.

The German ship shuddered from stern to stern. When the smoke cleared, George saw that the side of the "Krogul" looked like a sieve. The enemy ship was list-

ing to one side badly, but she was still in the fight.

Suddenly a large torpedo was spinning through the water direct at the "Krogul." The "Victory" had launched a torpedo! With a supreme effort the German ship switched herself to one side and the torpedo fled harmlessly past.

Meanwhile, the "Dart" wasn't coming out unscathed. Several large shells had torn gaping holes in the hull of the "Dart" above the waterline. Other shells had found their way on deck. Three guns were silenced, a funnel was knocked down, the bridge was broken, and many men killed or wounded. A large shell from the "Victory" tore its way through the hull of the "Krogul" and burst in the boiler room. The "Krogul" couldn't move. Another well directed shell, and the enemy's steering gear was broken. One of the many shells sent forth by the "Dart" had hit the vital spot—the magazine room! The "Krogul" gave one vast heave and disappeared.

The "Dart" had done its work. What rejoicing there was on board that night. The "Krogul" that had been such a menace to the seas was no more. The "Dart" returned to London. She did many other brave deeds before the close of the war, but in the hearts of her boys the sinking of the "Krogul" seemed always to take first place.

Oakland, Calif.

BOB'S AND JOHN'S FORTUNE.
There was once a boy named Bob Smith. He and his family lived in the woods. One day Bob said to his mother that he was going to have a picnic. He said that his brother could come.

One summer morning the two boys started out. They heard queer noises in the woods. John was afraid but Bob was curious to find out what it was. Then they saw a sign "UCKLEBERRY FINN \$3000."

They came to a rock and sat down to eat their lunch. The rock fell in a cave and the boys went with it. They saw Huckleberry Finn tied up and a lot of robbers around him. The boys went and told the police. And the boys got the reward.

THE MAN OF THE MOUNTAINS.
Once upon a time way up in the mountains of Kentucky roamed a man named "Man of the Mountains." He lived in a cave on the side of a great big cliff. Not far from the mountains lived a man named "Qansh." He liked hunting very much and there wasn't a week that he wouldn't follow the chase. One day as he was out hunting he came to a great cave. He knew that the "Man of the Mountains" lived in a cave, but he didn't know which cave it was.

It was drawing night, so he crept in. Now it happened that this was the cave, so at that time there was a regular prize fight. Some hunters were returning from hunting; they heard the noise and came running to see what was the matter. When they came in and saw the two men fighting they went after the police. It wasn't long after when the policemen arrived. When they saw the men fighting they stopped the fight right away.

ADVENTURE TRAILS

BLAZED FOR YOU

B. Lewis Allen Browne.

"Ho, ho!" laughed Uncle Ben as Ned and Ted walked into his yard. "I don't see anything to laugh at," said Ned, and his cousin Ted agreed with him.

"You would if you could see yourselves," chuckled Uncle Ben. "Land sakes," exclaimed Aunt Mary who had come out to greet them, "it's poison ivy! You poor dears, come right in and I'll fix you up."

And Aunt Mary was right. Ned and Ted had stumbled into some poison ivy and knowing that their camp was only a few miles from the home of Uncle Ben, wisely decided to go there for treatment. It wasn't long before their aunt had bathed the burning, itching spots with a solution of sugar of lead and they felt better.

"I thought it was woodbine," said Ted, ruefully.

"That's what almost everybody thinks," said Uncle Ben, "but if people would only remember that poison ivy, which some people call mercury, has only three leaves in a cluster while woodbine always has five, there'd be much less itching. In the western states this 'poison ivy' grows in a shrub form and is called 'poison oak,' but the itch is just the same."

"A feller can't go 'round with a botany book in one hand in order to avoid all the poison weeds," complained Ted.

"Don't need to," commented Uncle Ben; "there are only five really poisonous weeds that folks are likely to stumble into, in all this country."

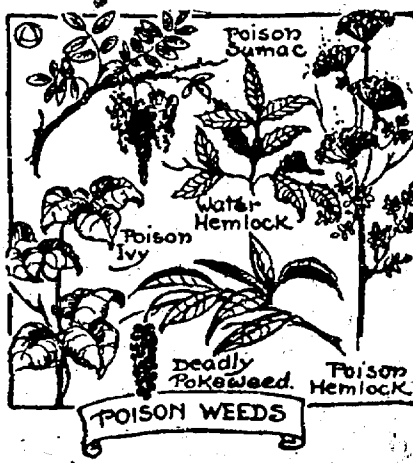

"Is that so?" exclaimed Ned in surprise. "Why, I thought there were hundreds."

"If there are only five, we sure can learn what they are like, and remember them," said the practical Ted.

"That's the way to talk," Uncle Ben said, "and I can find all of them right here on my farm. Come on, I'll show you."

"Not until after dinner," warned Aunt Mary. And after a dinner that tasted mighty good to the boys as a change from three weeks of camp food, they set out with their uncle to learn about poison weeds. On the way Uncle Ben explained that tiny little insects so small that scientists call them "organisms" live on the poison ivy and do all the damage. Sometimes they blow off on people and poison them, and people say they are poisoned simply by looking at the weed. Another peculiarity is that the weed will poison some people one year and not the next and will poison some folks every year and others never.

After showing them the difference between poison ivy, woodbine, and Virginia creeper—all except the poison ivy having groups of five

leaves—Uncle Ben found a poison sumac. "It's one of the worst varieties that poison through the skin," he said, "and you can tell it from ordinary sumac because its leaves have smooth edges and the red blossoms hang down while the non-poisonous sort stand up straight and have saw-toothed edges. Count the cluster of leaves, all odd numbers, never in even numbers, and from five to 13, on the poison kind."

Ted made little sketches as Uncle Ben talked. "I'm going to be dead sure about them all," he explained. "This is ordinary poison hemlock, with tiny, fern-like leaves," began Uncle Ben.

"The kind that Socrates drank?" asked Ted.

"Yes, sir, the very kind. And the ancient Greeks used to execute condemned men with it, but if you don't steep it and drink it, there's no danger."

"And here," continued Uncle Ben as he took them into a swampy spot, "is the water hemlock, not dangerous to the skin but deadly if taken internally. The danger lies in crushing the roots. Cattle sometimes crush them in swampy places and drink the water and it kills them. Always avoid drinking any but running water."

The boys examined the branches and roots carefully as Ted sketched. "The root looks and smells like horseradish, another danger," warned Uncle Ben.

"And here," he went on, "is the pokeweed, also called pigeonberry, pokeberry and inkberry. Not very dangerous to handle, but better left alone. It is poison, taken internally, either the dark purple berries or leaves, while the root is deadly—although, strange to say, it doesn't poison birds."

"We'll remember them all," promised Ned.

LAZY TOM.
One day there lived a boy whose name was Tom. He was a very strong and healthy boy, but he had one fault. He was very lazy. One day his father said, "I am going to send you to my mines to stop the workers from taking diamonds out—keeping them to sell." Tom did not want to go but his father forced him to.

Seven days after that we find Tom in the Kimberly Diamond mines. Everything went well for about three days, and then about two o'clock of the fourth morning

Tom was awakened by a sound that resembled a door swinging on rusty hinges. He jumped out of bed and snatched up his two Colts so as to be well armed.

Tom looked cautiously out of the window and saw the miners going through a secret door into the mines. After they had disappeared into the mine, Tom sneaked down to the door and listened. He heard noises that sounded like a fight, and when he peeked through the keyhole he saw two men fighting over a big diamond that they had found. Tom did not waste time in calling the police, but he opened the door and said, "If you move two steps you will be dead. Go

(Continued on Next Page)

single file out of the door to the Sheriff's office."

After the Sheriff had attended to the thieves, Tom went home and his father gave him an interest in the mine, which made Tom a very rich man.

IRVING CLUTE.

PAUL AEBERSOLD

1205 First Ave., Oakland.
(11 Years.)

We've had so many trips to the Moon it's getting to be as every-day as peanuts. But here's something new:

A TRIP TO JUPITER. (PRIZE STORY.)

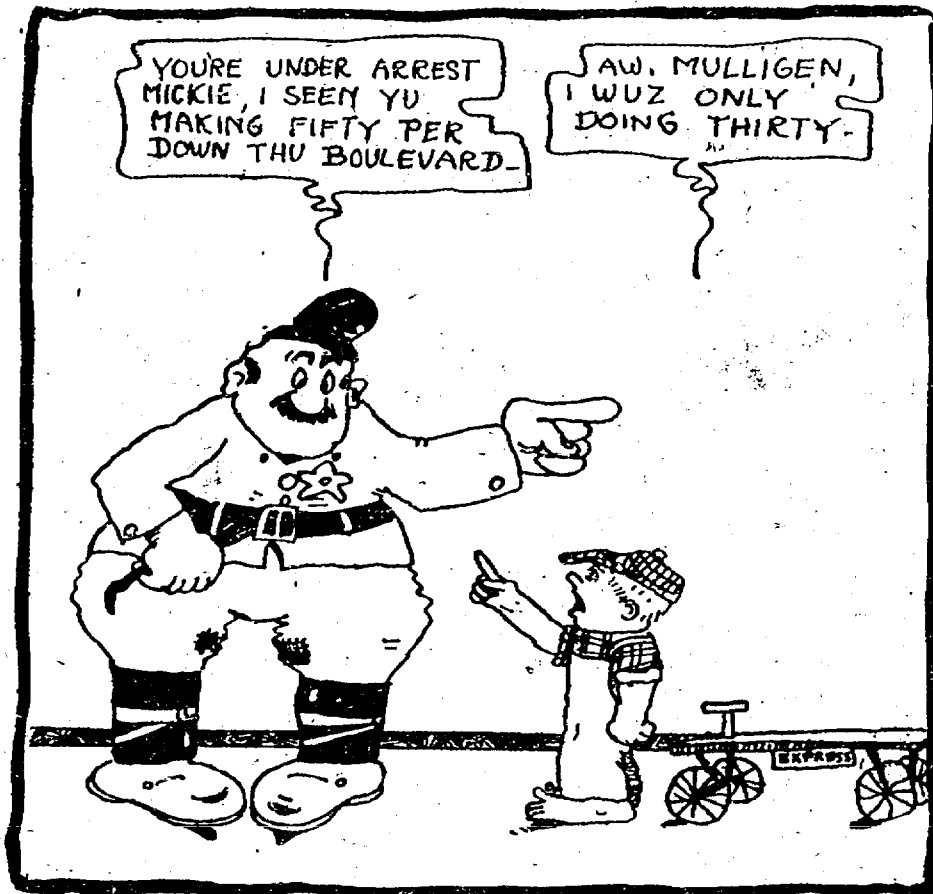

Jupiter is the biggest planet in the universe, and is 1300 times larger than our earth. It is strange, but it turns once on its axis in ten hours, while the earth takes twenty-four hours. Jupiter has large cloud belts around it and they are of different shades, red, white, yellow, blue, green and brown. The most interesting part is a spoon shaped object, red in color, which has been there forty years, and is now turning brown.

Prof. Andersen was trying to find out if life was on Jupiter. The other scientists were against him, saying that it went around too fast, so that any person could not stay on it, and it rained too much, and the land would be swampy.

There was one scientist, Prof. Johnson, who was on Prof. Andersen's side. He said that his boys could help build the rocket, and his servant could cook. Ralph and George, the two boys, were pleased and so was Rastus White, the cook.

The work was begun on a giant rocket a block long. The rocket was made comfortable, and everything was made so it would stay level. The table and stove were magnetic so everything would not slide off.

There was an electric stove, heater, ironing machine, washer, electric phonograph and also electric lights. The electricity was supplied from the air because there are always electrons floating in space. Their water would be supplied from the air because there is always moisture in the air. They

would also take air purifiers to purify the air on Jupiter.

They stored provisions away, also water and air. They had bunks to sleep in with heaters nearby to keep them warm, or fans to keep them cool. There were two shells on the rocket, an outer and inner, the air was pumped out and there was a vacuum left. This was done to keep heat or cold from entering in the rocket.

A week later the rocket was finished, and one end was raised

upward and the roof of the shed slid aside. The group of scientists watched the little group go in and look out the unbreakable windows.

The professors started the helium current and away they shot. When they reached ether or space, their rocket would not go any further.

The professors were not alarmed. They pulled a lever and they started through ether. Andersen explained that they had two machines, one for atmosphere and the other for ether. The one for ether was composed of two plates, one copper the other zinc, between these was a helium current, which caused vibration on the copper plate pushing forward, and pulling on the zinc plate making them go forward. The one for atmosphere being like an airplane motor but worked by helium currents. There was also an emergency engine to keep them from falling.

A week later the negro cook was looking out the window, when suddenly he gave a yell, and hollered "A big comet is coming towards us! Lands sakes what are we gonna do!"

The professors succeeded in steering the rocket around the head, but alas, they were going to go through the tail. They saw the flames of fire, and wonder-if they would be roasted.

They plunged into the flames but there were two shells, and the heat did not come through. They looked through the beautiful colored gasses, red, yellow, green, blue, purple and brown. Its tail was 1000 miles wide; they went through it in ten minutes.

After two weeks travel they were just 1000 miles from Jupiter. They were going to land in ten minutes. They got ready, and put on their air purifiers; they also took motorcycles and electric guns run by batteries. The gun was made so that when the trigger was pulled it discharged a spark. The spark goes through an ultrahelium cell and is enlarged so that it could kill an elephant.

They landed, and opened the door. Before them was a bewildering sight. The land was marshy and it was raining rain drops as big as a fist. There were mushrooms thirty feet high; also the grass was ten feet high.

The professor said, "We'll put on our special attachments. He left and returned with a huge box which seemed to be very heavy. He pulled out a number of steel plates and put them together. He said that it was a cabinet to sit on the motorcycles. Also he took a large circular band which was put on the wheels of the motorcycle to keep it from sinking in the marsh. They had a sort of waterproof skates to walk on the marsh. They attached the cabinets on the motorcycles and started to go down the little run-way.

They rode over to a large mushroom and stopped underneath to get out of the rain. While they were sitting there on their folding chairs a long tail had been lowering down from up in the mushroom. It wrapped around the negro and was now pulling him up into the mushroom.

He was kicking and shrieking in despair. Prof. Andersen took his gun and fired at the tail. It unwound and let the negro fall to the ground. He was not hurt, but was terribly frightened. George said that he would take their folding ladder and go up.

He went up and found a hole two feet from the top. It was just big enough to crawl through, so he went in and found that it led upwards inside of the mushroom.

It led into a chamber, and by

its looks it seemed to be dug out bare hands, because there were claw marks on the walls.

In one corner was an object looking like a ball of rope. While standing there, he was joined by the others, except Rastus White, who preferred staying down. The others did not know what to do.

Finally the professors talked together and then Prof. Andersen pulled a pistol from his pocket. He poured a liquid into a little hole in the gun and took aim and fired.

There was a green flash and the ball of rope rolled around and then stopped. Prof. Andersen unwound it and found that it was an animal resembling a monkey only it had three tails and a long slim neck. When attacked it would roll up. They took the Trianno, as the monkey is called, and continued on their journey.

After a day of travel they came to fields of grass. This grass was ten feet high, in the center of every bunch of grass was a large stalk with a tulip or a cup shape on top of it. The little group went over to one of the bunches to explore it.

Alfred was the first to reach it, and to his surprise a blade of grass reached down and picked him up. George immediately jumped on the blade, thinking he could hold it down. Prof. Andersen fired his gun at the stalk of the cup and then an oily substance oozed out. The plant immediately started to curl up so that it could crush the boys. Prof. Johnson shot the plant and it dropped the boys.

Prof. Andersen explained that the plant would have thrown them into the cup and the acid would eat them. Had he not shot the stalk and let the acid run out the boys would be dead.

They continued their journey and soon came to a small ridge of hills. They climbed to the top and beheld a wonderful sight. Before them was a modern city.

Its buildings were higher than the Eiffel tower in France. It had monorails instead of street cars. Instead of autos they had boat-shaped objects that could go on land, water, and also be used as a seaplane.

They had wireless instead of telephone. The men and women went around with coils of wire and tapper all concealed in a box, and receiving wires stretched on top of their hats. They also had a little box strapped on their shoulder, and all they had to do was press a button and they could fly.

You would expect to see giants, but to your surprise the people are dwarfs. Just as the old saying, "the wiser the weaker." They do not walk, except when they are in the house, and for that reason they have no sidewalks.

The little party went down to the city. The people saw them coming and flew over to meet them. They were surrounded by these people who jabbered in some unknown tongue. A man who seemed to be leader came over to them and said something.

To everybody's surprise, Prof. Andersen answered in the same tongue, continuing their conversation, they started down the street and the rest followed. They went in to a huge stone house, and the two professors were taken into a separate room and the two boys were left alone.

They had waited an hour of Jupiter time, or about twenty-five minutes of standard time, when the professors returned with happy faces. The professors said that the man was a scientist and had told them a long story. "He is of the people of the extinct race of people, half negro, half Indian," explained the professors. "He or rather his ancestors, have come to Jupiter in a funny way," continued Prof. Andersen.

"One day," he continued again, "a hundred years after the Sphinx was built, they started out of the wilderness of Africa, and went to live on the desert. The king of this little band, whose name was Jupeler, had a wise man whose name was Jupane, now Jupane was an ancestor of Jupeler, as the scientist is called, and that is why he knows this story of Jupiter."

"They had traveled in the desert until they got to the Sphinx, or the lion's body with a man's head, and decided to rest in the shade of the huge head. The band of Jupelanders, as they called themselves, climbed on the back of the monstrous body and sat down.

"The back gave way and let them fall into a room of gems and gold. They recognized it as a treasure room of a king. They took some gems and started down a huge passageway, they came to the end and nothing was there, except two huge plates of what seemed to be made of silver but so bright they could hardly look at them, they were fastened to the wall one on each side.

"As soon as they passed between them they began to grow smaller, and the marble began to sink, then, suddenly it shot upward, and threw them up into the air. And they knew no more until they regained

TRAILS

By Lewis Allen Browne.

"Snap out of it, Old Man," cried Ned. "We go back to camp today!" Ted leaped out of bed. They were staying on Uncle Ben's farm for a few days while they recovered from Ivy poison and now, being all well, planned to return that day to their beloved camp.

"If we go back, we swim," exclaimed Ted as he stood by the window rubbing the sleep out of his eyes. Ned rushed over and looked out. "It's raining cats and dogs," he said, with disappointment. "Then we'll get scratched and bitten as well as wet," laughed good-natured Ted. "I'll tell you what we'll do," he said as they were dressing—

"Poke round the old house all day," bemoaned Ned.

"No, we'll scout around and see what we can do for Aunt Mary."

"Great!" was Ned's comment and after breakfast Ted whispered, "Come out to the shed and get some white paint." Mystified, Ned followed him. They found white paint and sneaked into the cellar where Ted proceeded to paint the bottom step and lift of the cellar stairs, as shown in Figure 1. Then he stopped.

"Finish them," said Ned. "I have," laughed Ted and he explained that with just the bottom step painted white Aunt Mary could always see it in the dim light, either coming down or going up, and she wouldn't trip or get that awful sensation of trying to step down another step when there wasn't any there. Aunt Mary was delighted when they explained it and Uncle Ben said that Ted was a regular inventor.

Up in the pantry Aunt Mary was on the stepladder trying to reach something on the high top shelf. The stepladder "skidded" and threatened to fall as Ted grabbed it.

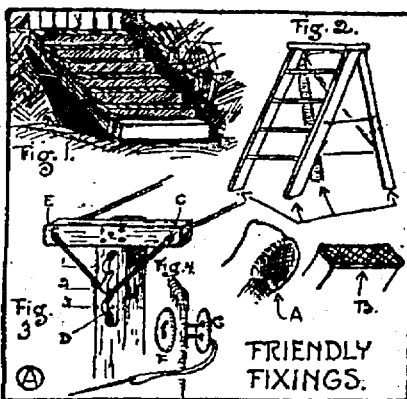

"That pesky ladder will throw me some day," laughed Aunt Mary. "I can fix it," declared Ned, who was bound to "invent" something as well as Ted, and he went to the shed again and dug up some old, worn-out rubbers.

From the corrugated heel as shown at A in Figure 2 he cut a strip (B) that just fitted the bottom of one of the legs of the ladder. He cut out three more and fastened them on as the arrows indicate and after that the stepladder never skidded.

"I declare, you boys are full of bright ideas," said Aunt Mary as she filled their pockets with sugar cookies.

The rain had stopped somewhat and the boys saw Aunt Mary go out in the yard and try to tighten up her clothesline which had sagged away down.

"We can fix that, too," said Ned.

Aunt Mary was doubtful and explained that heavy wet clothes stretched it and dry weather tightened it until she never knew "where she was at." The boys examined the poles and saw that the lines were put through holes on a top arm. The nthey went to the old shed once more and with a key-hole saw made a wooden strip as shown in Figure 3 at 1, 2 and 3. When they fastened this on as shown in the picture it was easy to draw the rope through the holes at E and C and hook it down at D.

"Marvelous!" laughed Uncle Ben. "Splendid," said Aunt Mary. "I can adjust it now in any weather and with any weight on the lines."

"And the sun is out now so we can hike back to camp," cried Ted.

"Wait until I fix up a snack for you," begged Aunt Mary, and the "snack" she packed up filled two large baskets. Meanwhile Ted tried to sew a button on his sweater jacket.

"Somehow," he complained, "buttons never hold in these knitted things."

"It's my turn to show you a trick," laughed Aunt Mary, and she took the sweater jacket from him, found another button and started to work.

"I've saved the button—" began Ted.

"But we need two," said his aunt. "See, if you sew two on together, they just can't pull out."

"Why didn't I think of that," said Ted as his aunt sewed the buttons as shown in Figure 4, the buttons at F and G showing how it was done.

And then the boys started to hike for camp with their baskets of goodies.

"They're just the smartest boys ever," said Aunt Mary, as she watched them trudge down the road.

"They'll do," grinned Uncle Ben, which was his way of agreeing.

(Copyright 1922.)

their senses, and then found out they were on a different world.

The mysterious red spot is a new satellite of Jupiter in formation. Red hot masses are shooting out into space from a big hole, twice the area of the earth. They have planned to call this satellite 'Jumoon.' They also have a mysterious substance, that is green, and is called 'Juradiot,' it is the third decay of radium, first is yellow, and is called 'Juradium,' second is blue, and is called 'Juradon,' the third I have mentioned.

They can use it to run any motor or device, also for heating and lighting purposes. It can be used for anything, even to move a house with, or to work magic.

'Juperior is going to go back to the earth with us, so are some other scientists who want to live on our earth.

'One reason Juperior is going back is to solve the mystery of the Sphinx, another is, that he is going to trace his ancestors and their deserted cities. When he goes he is going to take a rocket full of minerals mostly of 'Juradiot,' 'Juradium' and 'Juradon.' Also another rocket full of all sorts of curious articles also plans of the different machinery. Another one full of scientists and professors. All of these three will be bound to ours with steel. They will work with 'Juradiot,' and telephone to communicate with other rockets.'

The final day came, and crowds of people encircled the rockets. After Juperior gave his farewell speech, the voyagers climbed into the rockets. All the rockets were controlled in Prof. Andersen's rocket, so Prof. Andersen pulled the lever.

Once more they were in everlasting space. While they were traveling, Juperior taught his countrymen how to read and write American language. Nothing happened, except that a gas meteorite hit the rockets but it instantly shattered.

Prof. Andersen went into a separate room and turned knobs, dials and wheels, which caused the rockets to swerve to one side. He explained that he had done that to land in his shed in New Jersey. He had made all this machinery separate for a surprise.

After two weeks' travel they landed with their treasure. He took all the people and some of the valuables and put them into a great airplane, and flew to the roof of the scientist headquarters in New York.

The scientists were surprised, and they set to work to experiment on them and also the Juradiot. The news was spread and thousands of people came to see them. The Juradiot and the plans helped this world a great deal. If you live to the year two thousand, you'll see this.

AN ADVENTURE.

One day about forty years ago there were some people who ventured into Brazil. There were no hotels so they were mighty glad they took tents with them.

They got settled in a little place,

CONTEST CORNER

No story will be awarded a prize unless the writer is willing to have his or her correct name and address published when the story is printed. You may use mystery names if you wish, but your story cannot be a prize winner unless you are willing to have your real name published also.

There is no Special Contest now, but if you can write a story there's always a chance for a prize. There are no sticky old rules and you can make all the blots you want. Only the story MUST be original and you must write at the top—"I honestly made this all up myself." Then give your full name and address and age. You can sign a mystery name also if you wish, but Aunt Elsie must know your real name so she can send the prize if you win one. Send your stories to "Aunt Elsie, Oakland Tribune, Oakland, Calif."

ANYONE MAY WRITE STORIES—whether he or she belongs to the Aunt Elsie Club or not. You're all Aunt Elsie's pals.

but were teased very much by the monkeys, chimpanzees, throwing brazil nuts and coconuts at them.

One night everything was going fine, everybody except the watchman went to see if they could capture a baby monkey. The watchman sat down in his tent and was reading when a big monkey fell through the top of his tent and before the watchman could get his pistol ready to shoot him he got up and choked the man to death.

When the people returned and found him dead nearly all the women fainted and excitement was aroused very much. There were not any more people that would be watchmen. They stayed there about two weeks more and had many dreading adventures.

On their return trip they took with them several young monkeys, many Brazil nuts and coconuts, little gold and silver and many other things that didn't amount to much.

THE ADVENTURES OF JOHN AND JOE.

One day in the big city of Boston there lived two brothers. Their names were John and Joe; they were 15 and 16 years old. They were trying to invent a new kind of ship. This ship when on the ocean could sink at any moment and go down like a submarine. At last it was done. They were going to sell it to the government, but the day before the agent came to buy it Joe saw a big headline in the paper, it read, "Great Ship Pinta Sinks; Five Millions of Gold Lost."

Joe ran to John and said, "I've got an idea." "What is it?" cried

ADVENTURE TRAILS

BLAZED FOR YOU

By Lewis Allen Browne.

"How'd they come out?" shouted Ted to his cousin Ned as he returned from the village where he had gone to mail some letters and get some snapshots he had left to be developed and printed.

"Awful!" scowled Ned.

Ted looked at them. "Wish I had been with you when you took them," he commented.

"I suppose you invented cameras," laughed Ned, a trifle sarcastically.

"Wish I had. But a man told me how to use a snapshot camera. What's that awful thing?" and he pointed at a landscape that looked more like a bank of snow than a lake and hills and trees.

"I tried to get the reflection of the sun on the water," said Ned.

"You got the sun in your finder," was Ted's terse comment. Ned didn't understand. "Here," continued Ted, "I'll draw you a diagram and explain." First he took the camera and showed Ned how to point it at the sun, but so far beneath the sun itself was not reflected in the finder, and then he made the sketch, Figure 1.

"The sun is at C," said Ted. "The beautiful reflection on the water is at D. Your camera is at X. Now to get the reflection and not the halation of the sun—"

"The which?" demanded Ned.

"Halation—a word photographers use which means the reflection of the sun in the lens which makes a big white blur in your picture," Ted explained patiently. "To avoid that trouble, see that your finder takes in only what is below the dotted line A to B and you'll have no trouble at all."

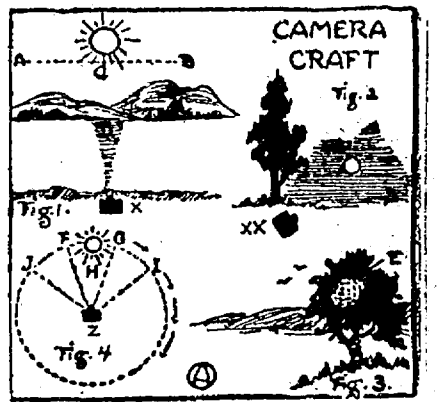

"Who is that freak?" demanded Ted, looking at another print.

Ned had to laugh at this. "It's you," he cried. "I snapped you when you weren't looking. I don't understand why that wasn't good. I was in a fine strong light and so were you."

"Too much light—ruined it. See that black streak, it's a shadow from my nose, and those black spots where my eyes ought to be are shadows from my eyebrows and the white spots are my cheekbones—the strong sunlight did it—"

"I can see it's all wrong—just tell me how to make it right," interrupted Ned. Again Ted drew a little diagram as in Figure 2.

"When the sunlight is strong and you want to take a picture of some person, stand them in the shade," he said; "not a deep shade as in a heavy forest, but in the shade of a small tree. You may stand in the sun, but don't face it. Your camera is at XX and the person you are photographing is at O or the white spot in the shadow. Then the light is even on the face and you get a

real likeness, not a Hobgoblin effect."

"Sure! Now I understand—but look at this," and Ned showed another print that was mostly dead white spots caused by the sun. "It was such a pretty scene, too," he added, "right there by the bank," and he pointed to the spot.

Ted's ready pencil was at it again. He sketched something like Figure 3. "See, the sun was shining right straight into your lens and the glass caused—er—" Ted hesitated.

"Reflection?" suggested Ned.

"No, refraction is the word. The rays of light were changed or shifted and prevented the image or scene from being clear. Now if you had stepped around so that the sun had been behind that tree, as at E, you would have avoided that and secured a fine picture with your camera at XXX."

"That sounds reasonable," said Ned, smiling. "The sun is rather tricky, isn't it?"

"Not when you understand it," said Ted. "Here, let me show you," and he picked up Ned's camera and pointed it at the sun. "Look in the finder. See the sun? Now move the camera to the right until the sun is not to be seen in the finder, but is just beyond the edge. This is a safe position and you have all the world to shoot in a circle until you get back to the sun again."

"Plain as mud," complained Ned.

"Look," said Ted, drawing a diagram as in Figure 4. "Your camera is at Z. H is the sun, the angle of your lens is from F to G. So long as your camera takes in the sun, the picture is spoiled—but swing it around in the direction of the arrows so that it takes in G to I, and you are safe. You can swing it on around and around in the direction of the arrows until the range is from J to F and you will get good pictures. Understand?"

"Think I do," said Ned. And his next pictures were all good, thanks to Ted's little lesson about handling a camera in the sun.

(Copyright, 1922.)

John. "Let's not sell our ship, and try for this gold." "All right," John said.

So next week they started out for the gold. When they got about fifty miles away from what they thought was the gold they saw a pirate ship. The pirate ship also saw them. Both came within cannon distance. Joe found out that they had four cannons while they only had one. Then John thought of an idea. "Let's shoot at them and they will shoot back at us and we will make believe that they have sunk us and sent our ship down," said John.

So they did, and went down. But they saw a large whale coming at them, so they shot and killed it. They landed about fifty feet from a huge black thing.

John put on his diving suit that he invented, which didn't have to have tubes, but had a little box which fastened on his back, for air. He went over to the black thing and found it to be the Pinta. He got John and they got on board. They looked in the safe and there was nothing there. Joe got mad and kicked the wall, which fell apart, and there was the gold! They put it in their ship and went home.

LOUIS BIASOTTI,

THE HAUNTED HOUSE.

In a small town there was said to be a haunted house. One day two strangers came to the town and asked if there was any empty houses to sleep in. The people said there was a haunted house in which they could sleep. The strangers said they were not afraid of a ghost. So they showed them the house, which was in the woods.

That night they went to sleep with their guns in bed. At midnight they heard footsteps outside their room. They took their guns and opened the door, and what do you think they saw? They saw men carrying opium in the house! They waited till all was quiet, then

they went out of the room in which they had been sleeping, and went to another room, and it was full of bones. They went to the next room, and it was full of opium. They went to the third room, and there they saw the opium smugglers sleeping. They took their guns and held them up and took them to the police station, where they were given a life sentence, and the strangers received a reward of \$2000 each.

LOUIS BIASOTTI.

Here's the way to draw a picture for your page, and the ONLY way: NO PICTURES WILL BE ACCEPTED UNLESS THEY FOLLOW THESE DIRECTIONS:

NEVER USE A COLORED PAPER.

Draw on white, smooth, firm paper which will hold ink well.

The picture must be either 4x4 inches or 6x6 inches.

Odd sizes will not be accepted. MEASURE CAREFULLY.

USE EITHER SIMPLE PENCIL OUTLINE, WITHOUT ANY SHADING, OR DRAW YOUR PICTURE WITH HIGGINS BLACK DRAWING INK. DO NOT USE ANY OTHER KIND OF INK, AS WE CANNOT PRINT FROM IT.

Do not use any colored crayons or colored inks.

ALL DRAWINGS MUST BE ORIGINAL. NO COPIES OR TRACED DRAWINGS WILL BE ACCEPTED.

Aunt Elsie cannot promise to print all drawings—as all kiddies cannot draw well. But she will print the best ones.

THE BEE FESTIVAL.

The Queen Bee had planned a wonderful festival which was to be held at the daisy field. All the bees were invited to come. The Fairies were also coming. It was the day before the festival and everyone was very busy getting ready.

At last the day came and everyone was there. There were two chairs made of gold for the Queen Bee and the Fairy Queen. The Fairy Queen came in her gold and silver carriage. Finally it was time to begin. The fairies and bees danced and other bees played the music. Afterward they had dew and mist cakes and then the fairies were ready to go home. The Fairy Queen thanked the Queen Bee and then they flew off.

JANET AND ROBERT.

Once upon a time there lived two children. Their names were Janet and Robert. Janet was 8 and Robert was 9. They were going on a voyage with their father, for his health was giving out.

That night when they were in the staterooms in bed there was a terrible storm. Janet could not sleep, the ship rocked so much. About the middle of the night there was a wreck. Janet awoke Robert and their father and he took the children and rushed toward the smallest lifeboat, for he did not wish to go with so many other people. The lifeboat was rocking terribly. They drifted along till daylight when they saw an island. Robert said, "Let's land on the island. Maybe we will find a treasure."

"Oh, I know," cried Janet, "our teacher at school used to tell us about this island. There is a treasure in these woods somewhere."

They soon found a treasure cave and found a cave of gold and sil-

ver. Then they returned home on a passing ship.

THE "MISTERY" OF PRINCESS BEATIE.

(PRIZE STORY.)

There was once a king and queen who had an only daughter, Beatie. She was about seventeen when it was heard all through the city that a band of robbers had sneaked through the gates of the city. They had been there about a month when Beatie was missing.

The king and queen were very much troubled about their only daughter, for they loved her dearly. Very soon after that the queen fell ill and said she couldn't live if she did not see her daughter again. During this time Beatie was with the bandits. One day when the robbers were out Beatie ran away into the forest. She wandered for three days and at last she came to her city.

Her mother had died and her father was still king. Beatie however was with her father about eight years when she fell in love with a prince. But I haven't told you about how pretty she was. Her hair was golden, her eyes sparkled like the sunlight, her lips were as red as roses, her cheeks were pale pink. However she asked her father if she could marry him. The king said yes and Beatie was married and the two went to another kingdom where they wanted a king and queen.

So Beatie had a beautiful crown upon her head and so did the king. They lived happy ever after.

3852 West St., Oakland.
THE KIDNAPPER.

Once upon a time there was a girl whose name was Alice. She was about thirteen years old. She lived in a cottage with her father. One fine day when she was walking with her father there were two men hiding behind a large oak tree which they were walking by. The men came out and put a bag over him. Alice could do nothing, for they disappeared very quickly. Alice sat down upon a bush and began to cry.

After a while two boys came up to her and asked her why she was crying. Their names were Frank and Roy. Alice told them. She showed them the oak tree. Frank said, "That oak tree looks rather big to me."

"Yes," said Roy, "let's investigate."

Then they did. Pretty soon they came to a little door. They opened it and they came to another door and there was a lot of men smoking and playing cards. And Alice's father was tied up. Roy took a gun out of his pocket and shot many of them while Frank was fighting the rest. Then they untied the father and set him free. And Frank and Roy got \$10,000 reward.

THE LOST PEARL.

Once a man who had nearly spent all his life in juggling at shows thought that out of all his wages he would buy a great pearl and go to India. There he thought he would sell his pearl and buy some land.

After he had bought the pearl he bought a tiny box and put the pearl into it and then he put it in a bigger box and so forth until he had a box as big as a trunk. Then he boarded a ship that was sailing for India. When he was on the ship a boy came along with some apples. The man took a few and began to juggle them. The people began to crowd around him. He got vain and said to himself, "I'll show them something that will make them stare and he brought

the pearl out and began to juggle it. He leaned over the edge of the ship and juggled the pearl. All of a sudden the ship turned quick and the pearl fell into the ocean. He was so angry that he jumped into the ocean and was drowned.

CHEERY AND THE CHUM.

Once there was a girl and boy whose names were Cheery and The Chum. Every summer they would go to their grandmother's, who lived in the country they loved to explore, to see changes from one year to the other.

Some times the pigs have cute piggies, sometimes the cows have calves. Last year old Bossy had twins. This summer Cheery noticed a nice hammock swing, nice and low, so she and the Chum could swing together under the big apple trees whose blossoms smelled so nice. Cheery was sitting out on the porch steps dreadfully lonesome because the Chum hadn't come yet and she had promised him not to explore the farm until he too could go with her. He would join her now very soon.

Her aunt Sylvia called out to Cheery for her to come to see what she had and Cheery saw two tiny white mice in a cute little cage, eating cheese crumbs. Cheery was surprised to see mice white. She thought all mice were gray.

THE POOR BOY.

In New York there lived a newspaper boy who had a sick mother and a little sister who was three years old. One night when he came home he had two dollars and he was going to give his mother a nice supper. When he went into the room his mother was dead. He cried and cried. Then he went to the landlady and asked where his little sister was. She said she had not seen her that morning.

He searched ten years but could not find her. One day as he was walking down the street he saw a very pretty young girl. She was very rich. Just as she was going across the street an auto was coming. Jack, as this was the boy's name, grabbed her out of the way just in time. When he woke up he was in a white bed and he knew no more. When he woke up the second time he was in a very pretty room with the pretty girl by his side. Her name was Baby. She said, "Who are you?"

He said "I am Jack Willan." He said he was looking for his little sister whose name was Dolly. And once more he went to sleep. When he woke there Jack saw a mole on her right hand and knew it was his long lost sister, which he had been looking for. Mr. and Mrs. Lowe said that Jack and Baby could be their children and they lived happy ever after.

MAIDA
HARRIES.

25 Years Is the Deadline For Girls in Pictures

WOMEN who besiege motion picture companies looking for an opportunity to win fame before the camera insist upon overlooking a fundamental fact. That is, a twenty-fifth birthday is the deadline so far as "new faces" are concerned.

A woman of thirty may be extremely beautiful. She may have poise, personality and intelligence. But the halo of youth is not hers. And that is necessary. The public demands romance on the silver sheet, and doesn't want it served by anything except real youth. Love affairs of youth predominate on the screen, as they do on the stage and in fiction. Heroines of them must be as young as the parts call for. This doesn't mean, of course, that women older than twenty-five have no chance before the camera. Such a statement would be ridiculous. It does mean, however, that there is only one chance out of 1000 or so that a neophyte who is past that age will ever be able to do anything worth while in the silent drama.

Here is the point. Motion picture companies, in the ordinary routine, cast their productions from up-to-date catalogues of known actors and actresses. Robert B. McIntyre, casting director for Goldwyn, for instance, knows personally, or by screen views, most, if not all of the proved dramatic talent in the United States. That is equally true of other casting directors.

When McIntyre is casting a production, he first visualizes different actors and actresses in the different roles. Some of them, perhaps, are drawn from the great reservoir of free lance talent which lives and works near the studio.

Average character parts and "bits," however, are filled right at the studio. And this is most important for women who are trying to enter upon motion picture careers to keep in mind.

When McIntyre was in New York recently he told several well known actors and actresses that if they were out on the coast they would have no difficulty in finding work at the studios. But there was no earthly reason why they should be signed on contracts and their fares paid to and from the coast. There were more than ordinarily comely women among these experienced actresses, too.

When the phrase "new faces" or "new screen personalities" is used, then, it applies specifically to young men or young women possessing out of the ordinary qualifications for appearing before a camera, who it is reasonable to believe after all possible tests, may be developed into the stars of tomorrow. "Stars of tomorrow" might, indeed, be considered synonymous with "new faces" and "new screen personalities."

If the "stars of tomorrow" were growing on every bush, high priced experts wouldn't be spending their time looking for them.

That is obvious.

From the Studio Lot

Justice Robert McMarsh has reserved decision on the application of Mrs. Florence Harlan for \$200 a week temporary alimony and \$3000 counsel fees pending the trial of the suit for divorce which she has started against Kenneth D. Harlan, motion picture actor.

Margaret Loomis, who has one of the prominent roles in "Money, Money," in which Katherine MacDonald is the star, first achieved prominence as the protégée and chief understudy for Ruth St. Denis.

Bessie Love's name is Juanita Horton.

Spiders as interior decorators! A swarm of these creepy members of the arachnid family were "run in" by enterprising property men at the Paramount Studio at Hollywood and made to help out in the atmospheric decoration of the big gloomy interior of the old Spanish castle of Aragon, built for scenes in "The Ghost Breaker," a picturization of the famous play, starring Wallace Reid.

Edward M. Kimball, father of Clara Kimball Young, is a recent addition to the cast of "Omar, the Tentmaker," romantic love-play of old Persia. Kimball will play the brief but vivid role of the Inn-keeper in whose tavern Omar Khayyam so often seeks the inspiration for his immortal quatrains.

Douglas Fairbanks was once a salesman in a Denver hardware store.

Los Angeles dealers recently reported a shortage in red, green, yellow, pink, purple, heliotrope, striped and checked bandanas. Some 500 were purchased in one lot to provide colorful headgear for the pirates working aboard a pirate ship in "To Have and To Hold," which presents Betty Compson and Bert Lytell in the leads.

"My sister talks seriously of a man with a future," says Bradley King, who is entirely too good looking to be writing photoplays for a living. "My cousin prefers a man with a past—so romantic and intriguing," she says. But I simply can't resist a man with a present." Lines of gentlemen, gift-laden, form to the left of the Thomas H. Ince Studio gate.

Harold Lloyd never has any glasses in those horn-rimmed spectacles.

Overalls for Dorothy Dalton. That was the first item on the star's wardrobe list for her featured role in Irvin V. Willat's production "On the High Seas." Consequently Miss Dalton didn't have to spend much time having gowns fitted for the picture.

Max Linder, who has just completed a new studio at Nice, France, announces he is planning on erecting a similar institution for himself in Hollywood next year. He indicates he will engage in the producing business on an extensive scale.

Cousin Maida Is Ambitious To Play Leads

From being the first leading lady to play opposite Richard Barthelmess to a minor part in his forthcoming production which is being filmed under the tentative title of "The Bondboy" is the fate of Miss Maida Harries. However, she is proud, she says, to be in his company, because this is her first appearance on the screen and she says that her ambition is again to be the leading lady for the handsome Dick. Miss Harries is the young screen star's cousin.

"I don't know why I shouldn't some day arrive at that stage," declares Miss Harries. "At least, that is my ambition. You know I appeared in many, many plays with Dick and he always felt that unless I was in the play it would not be a success. Often I did temperamental stunts, and the future great-screen star had to placate my feelings before the performance could be given."

"To be sure, that was when we were children. Dick lived with us, and although his mother and my father had other things in view for him, from the time that he was about twelve years old he had a penchant for the stage. Many were the productions that were put on by us in our barn at Biberon, N. J., when he came home to spend the summer vacation after the military academy had closed.

"Why, he was so gifted that he not only wrote the plays, but staged them and acted them. In numerous plays, between acts he would appear before the curtain and explain what would take place in the next act. You see we didn't print the program and the audience had to be informed of what they were to see."

"Perhaps, like everyone else, my cousin did not want me to go on the stage, so my appearance here was as much a surprise to him as I am surprised to be here. I merely applied for a position and I had to take a test and was told that I was the type that was wanted for this part."

"You should have seen how astonished my great cousin was when I appeared in make-up. Now he is glad I am with him. I can tell you, that we are proud to have him in our family."

BILLY DOVE and brother CHARLES.

IT'S a genuine job Connie Talmadge is undertaking to learn how to eat with chopsticks. Billie Dove is the new Metro star, photographer with her brother, who has just joined her in Hollywood. Miss Harries is the cousin of Richard Barthelmess and is making good in pictures with him. This is Miss McAvoy's latest Paramount studio photo.

No Easy Job To New 'Discovery' Pick Out Perfect Players Is Making Good

It is said that finding a pin in the center of a haystack would be a "cinch" compared with the problems which sometimes arise in connection with the making of a modern motion picture.

"I want so and so," says a director.

"He's out of town," answers the casting department.

"Find him," returns the director, "no one else will do."

"And we have to find him," relates Lou M. Goodstadt, casting chief at the Paramount Studio at Hollywood. "You can substitute one brand of molasses for another and no one will know the difference, but actors are picked for their individual personalities fit the requirements of a screen characterization. And 'some-just as good' won't do."

Wallace Worsley will direct Clara Kimball Young in "Enter Madame," her new starring picture, upon which production started this week at the Garson studios for Metro release.

Connie Learn to Catch 'Em Chopsticks for New Picture

"CHOPSTICK" CHARLIE went up the front steps of a Hollywood home posted about each august house, advising persons with baskets to proceed to the rear, but not at this one. The front door was wide open and welcoming. His saffron face had been pressed with the ruffling iron of time into thousands of tiny wrinkles. As he approached the door, he removed a towel from the basket, revealing neat piles of betel nuts and flat pieces of coconut, heavily sugared.

He waited, expecting to see the glowing face of Miss Connie. Instead a slender hand reached out and drew him into the house, a hand distinctly Chinese as to nails and wrist-edges embroidered of heavy silk. Charlie's eyes grew wider, if possible, as he stared at the girl before him in veritable Celestial costume.

"You China girl now, Miss Connie?"

She nodded glumly. "I may look Chinese, but I can't eat Chinese," she admitted. "I have enough chopsticks to start a Chinese city with, but I don't know how to use the tricky little things. So you have got to teach me this morning, before my director, Sidney Franklin, gets after me again for holding up the picture."

"Chopstick" Charlie showed you," the old Chinaman replied, following her into the dining room. A half hour later Constance Talmadge rose from the table.

"You're hired for the day," she said. "You make those elusive little chopsticks behave all right, but I wouldn't trust them out of your sight. So come along."

The old Chinaman picked up his basket. "You catch 'em chopsticks," Charlie knew. Miss Connie not forget." He went out the wide and welcoming front door, smiling widely, his saffron face pressed with the ruffling iron of time into a thousand wrinkles.

And so, in "East is West," the famous story of the Orient and Occident which Constance Talmadge is producing at the United Studios, the star will demonstrate her ability to eat with chopsticks, just as perfectly as any Chinese girl.

Hollywood Hears

Hope Hampton, star of "Star Dust," and "The Light in the Dark," makes a decided hobby of amateur photography. Unlike most amateurs who also develop her own film and plates. She insists on beautiful printing of all her feature subjects, and gets it, too, possessing the technical knowledge to demand and secure results from the laboratory.

Wyndham Standing is one of six men in a family, all of whom are actors.

Constance Talmadge is up in arms, and she doesn't care who knows it. She is just sick and tired of being called "Connie," and she herself gives notice to all editors, theater managers, press agents and "fan" friends, who want her good will, that there is no love in her heart for anyone who calls her "Connie!"

The dog team which carried Alma Rubens, actress, through the reels of "The Valley of the Silent Men," is an actual service team procured from the Hudson Bay Post at Athabasca Landing, Canada. For years the dog team has been used by Jim McIntosh, fur trader. When the Comopolitan Company went north to film the Curlew picture Miss Ruben drove the team for miles over the snow.

Malcolm McGregor was the intercollegiate high diving champion while he was a student at Yale University.

Persistent rumors springing from unauthorized reports that Thomas H. Ince studios had been closed, leased or sold have brought from the veteran producer one of the first public announcements issued during the

fourteen years in which he has been one of the leaders in the picture industry.

Andree Tournour is the niece of Sir Alfred Tournour of England.

"Did you ever hear an Indian sing—and would you call it music?" That's what Werner Jensen wants to know these days that he is spending in a projection room in New York preparing a score for "The Half Breed."

An old stage coach, imported from England three-quarters of a century ago, a genuine old "one horse shay," a carryall that was the proud equipment of a great whaling captain a hundred years ago, and an old-fashioned "box wagon" typical conveyance of Nantucket and New Bedford waters, around 1850, are some of the valued props being used in the Elmer Clifton production, "Down to the Sea in Ships."

Callen Landis' special hobby is collecting autographed photographs of prize fighters.

Some of the finest blue ribbon winners of this season's Southern California horse show are pictured in "Rich Men's Wives," which has House Peters and Claire Windsor for its chief actors.

Elaine Hammerstein is just completing at the Selznick studios in Hollywood, the screening of "Under Oath," from Edward Montaigne's story. George Archibald, the noted French director, supervised the work and Niles Welch, with Mahlon Hamilton, heads the supporting company.

Mary Pickford To Enter Trade As Doll Maker

MARY PICKFORD has gone into partnership with Santa Claus, and expects to establish a large factory for the making of doll-miniatures of herself, according to an announcement issued from her studio yesterday.

America's Sweetheart has already applied for patent and copyright on her new product, which is to be called "The Mary Pickford Doll," and every effort is being put forth to get this article on the market in time for the Christmas trade.

Christian von Schneidau, the most famous Scandinavian artist and sculptor in America, is credited with making the life-size bust of Miss Pickford from which the dolls are to be reproduced. Through a process of reduction this representation of Little Mary will be brought down to a head suitable in size for a doll, in which it is said the likeness will be perfect.

Since work first began on this project, eight internationally famous artists have attempted to sculpture a satisfactory bust of Miss Pickford, and all told sixty different models have been made. In addition to these, one life mask of the star which almost eventuated in being a death mask was taken.

During the process of pouring this mould, Miss Pickford nearly suffocated and her face was so badly bruised that it was impossible for her to appear before the camera for several days.

This venture represents Mary Pickford's first plunge into commercial field not connected with motion pictures. It is occasioned by the insistent demands of the world's juvenile population, which has persisted over a period of many years for a doll replica of this famous photoplay celebrity.

Has Them Guessing

Bradley King, the dashing young bobbed-haired writer who hangs up her new straw bonnet in "Thomas H. Ince's scenario shop," has all the chaps around the studios guessing Good looking enough to be a star herself instead of writing plays for others, with big blue eyes and an inherited Italian charm, Bradley doesn't see much in this idea of running around with a lot of men. But hasn't Bradley a "steady," a young lady-chap? Oh, but that's different!

Mabel Catches Boat

The New York Sun, speaking of Mabel Normand's departure for Europe, says:

"Mabel Normand was among the passengers, accompanied by a woman secretary. She arrived at the last moment before the ship left the pier. She said she was going for a greatly needed rest, and would visit London, Paris and Milan. She pretends when asked about the case, saying she did not think fair to bring it up again."

Color Scheme in Bogus Actresses Curse of Movies Flapper Is Clean

Clothes Affects Acting

Bille Dove, Metro's newest star, who recently abandoned the speaking stage to join Hollywood's picture colony, has advanced ideas concerning the relation of color schemes in a star's clothes to her acting on the screen. Miss Dove formerly was a member of the Ziegfeld Follies and was noted for her pulchritude and smart clothes.

"It is my theory that as careful a study of harmony in colors should be made for an appearance before the camera as one would use for any other occasion," said Miss Dove. "Of course, there are some colors one cannot wear for screen purposes, because of their photographic qualities. But with these few exceptions, always hold to the belief that one should wear the same colors for a scene before the camera that would be worn on a similar occasion in real life.

"For instance, if the scene is a garden party, afternoon tea or some other affair where I would ordinarily wear some light colored frock, I wear the same thing for the moving picture version. I believe that colors do show on the screen—that they can be felt. I am sure that feminine picture fans get the effect of the colors on the screen just as much as if color photography were used.

"I always feel the effect of colors in my gowns. I select them with the same care and precision in regard to color as if they were to be reproduced on the screen in their natural hues. If I want a pink frock, I wear it, knowing that it will photograph white, yet the effect of the pink color will help me whereas a white costume which in reality photographs the same as the pink would not have the same effect on me. The same is true with darker colors. I do not wear black, because it always depresses me. I wear red instead, which has the same photographic qualities as black, and the color inspires me in a way that black would not.

"I think that if motion picture people feel colors, that they can convey that idea to the audience also. Even if the picture fan does not get the effect of the colors, it is a great incentive to me in my work to know that I am wearing just the shade I prefer."

Miss Dove brought a complete wardrobe from New York with her, which she will wear in her Metro starring picture, "Country Love."

Real Vampires Plague Hollywood Girls Trail Haunts of Millionaires

Bogus movie actresses prey on Hollywood, the Empire of the Films, and these women operate to the detriment of the real workers of the films, says a writer in a motion picture organ. "Goldiggers of Hollywood," is the subject.

"A vaudeville song bird came to California to recuperate from an abundant harvest of money. In the course of publicity she announced that she was going into pictures. To maintain the style of living to which she was accustomed, she accepted the attentions of a refined mid-western banker. He was a user of drugs. When he was found dead in her home one morning, the space writers headlined her as a film vampire, though she had never seen the inside of a studio.

"A tight rope walker from a circus wintering in California broke up the home of a Beverly Hills millionaire. In the divorce allegations his wife called her a film vampire. The papers went to the wife one better and styled the co-respondent star of the silent drama.

GOLDDIGGERS DESPISE WORK.

"The goldigger has been an abomination throughout all history. In every age she has reached among civilized people conning and cajoling for the soft luxuries of life. Each century of time has suffered from its Cleopatras, its Madams Pompadours and its Tereyas. Long before the era of moving pictures, and today every Main street has its goldiggers.

"In California this same type of woman exists here in a motion picture actress. The studio is her mantle of decency. The movies are merely the apt instrument of her parasitic profession. She never expects to make good before the camera, because the desire to work isn't one of her assets. The road to success is too distant. She wants clothes, diamonds, motors and a good time. She scorns the role of a picture girl—the work is hard and the pay is small. Instead she sets herself up in an apartment or a hotel and styles herself as a movie actress. Once an actress always an actress. But she never works twice for the same company.

FINE FEATHERS WANTED.

"California is the playground of millionaires, some of them spendthrifts of no mean ability. Their sons are seldom anywhere else. Here Miss Goldigger finds an abundant harvest waiting to be reaped. She has but to crawl into the lap of luxury, for millionaires, you know, have a weakness for the smiles of moving picture actresses. Inasmuch as the famous ones are all safely married, or live with their mothers, these bogus actresses find little competition and less difficulty in conquering the fancy of the most fastidious connoisseurs of the softer sex.

"Hollywood and the picture industry suffer from acts and vice of most of the people who visit or live in California. Real actresses of the films are of necessity hard workers, as this is essential for their success.

"Of course the inquiry of Hollywood has often been charged, but it has always been denied. The policy has been to admit nothing, though common sense tells the public that where there is so much smoke there must be fire. Because Hollywood is the Empire of the Films and stands out publicly for that reason, only

At Heart, Says Patsy Ruth

"The flapper as she is portrayed in newspapers and fiction, is but a caricature of the real American girl," claims Patsy Ruth Miller, the charming little actress, who is something of a flapper. "In fact, she is a 'dancer' dancing and tennis and short skirts and would bob her hair if her family would let her.

"The flapper is woefully misnamed. She is wholesome and clean at heart and all of this jazz the reformers are objecting to is but an untoward aspect, the effervescence of her kid spirits."

FULTON

"Thanks to You," a delightful drama, charming in theme and with a happy climax, is the offering at the Fulton theater, commencing this afternoon.

Crane Wilbur, who will appear in the lead opposite Mlle. Coogan, does not misnomer to the doctor's attention, remaining devoted to the memory of the husband she lost. At last she is recalled upon by the ardent surgeon to marry him because of financial aid extended and her belief she should show appreciation of his kindness.

Then comes the odd twist to the story—the entrance of another man, when a close pal of the physician meets the unresponsive wife. It is the unravelling of the tangle that ensues which provides a vivid and graphic story with a "finis" most surprising.

Vaughan Morgan will be the young clubman against whose will the doctor's persistence leads him to himself the woman he admires, the battle furnishing not only a happy dénouement, but a full measure of comedy besides.

STATE

Viola Dana comes to the State theater today in "Glass Houses," the first of her pictures to be released since her return to the stage in this city last January.

In this new story Miss Dana has to portray the role of Joy Duval, who, her husband, Billy Norton, believes her to be a notorious crook. He tries to persuade her to give up her life of crime, but she thinks that he has gone mad and tries to soothe him.

Texas Guinan, known as "The Female Bill Hart" of Vaudeville, is on the same program. This dramatic story of the movies appears in a dramatic episode called "The Split Fire." Five others appear with Miss Guinan in the cast of this rapid-fire comedy. Dan Bender and Harry Armstrong are billed as "Just a Couple of Good Men Gone Wrong." Pat Downey and Charlotte Whiting will be photographed in a comedy called "Just Kids." Leach La Quinlan appears in a series of balancing feats.

Edwin A. Morris, manager of the State theater, has announced that every child attending the Saturday matinee will be given a balloon as a favor.

NEW BROADWAY

"The Right That Failed," Bert Lytell's most pretentious starring vehicle and a Bayard Veiller production, heads a big program of screen attractions at the New Broadway theater today and tomorrow.

"The Right That Failed" is the story of a high brow fighter, who, ashamed of his profession, courts the daughter of a prominent lawyer. He had rescued her from insult in the hands of a ruffian and when she assumed that he was a member of her own caste he did not want to disillusion.

Lytell plays the star role with a

debonair charm that is inimitable.

Virginia Valli brings beauty and distinction to the role of the society girl engaged in the unconventional courtship.

The program has many other features.

Jackie Coogan's best comedy, "Trouble," follows next Tuesday and Wednesday. "Fascination," with Mae Murray as the star, and "Head Over Heels," bringing Mabel Normand, are announced for early presentation at the New Broadway.

PANTAGES

Fifteen boys and girls, each an artist, will appear on the Pantages theater program commencing this afternoon when Hal Weber of Portland presents his famous juvenile orchestra as the leading attraction. Short comedy and news features will also form a part of this week's entertainment.

A special and particularly elaborate set of costumes have been designed by Miss Maude Amber for the new musical comedy revue. The Century theater beauty chom will be heard in several novelty song and dance numbers on the illuminated crystal runway.

Several new faces have been added to the Russell Company, among which are the Lamb Sisters, who are well known to Oakland audiences.

NEW CHIMES

Jackie Coogan, the marvelous child actor, comes to the New Chimes theater for an engagement of three days starting today. In his latest role he is in his greatest photograph, "Trouble."

The clever star is seen in the role of Danny, an orphan, who has been adopted by a doctor and his pet dog Quenie. The two spent the night sheltered by a shepherd from the orphanage and morning they are picked up by the cop on the beat and returned to the orphanage.

Later the orphanage is pressed very hard financially and is forced to start a campaign through the kindness of the newspaper to raise money. The little city turns out in mass to adopt the young stars, and much to Jackie's misfortune, he is adopted by a very ill-tempered plumber and his kind wife.

The supporting cast includes Gloria Linn, Wallace Beery and a host of others.

AUDITORIUM

Rarely has there been so many instant demands for a new production of "The Geisha" by Ferris Hartman and Paul Steindorff and their associates at the Auditorium theater. Such numbers as "The Jewel of Asia," sung by Lillian Glaser, held up the show for three or four minutes every performance.

Tomorrow evening will mark the revival of America's best loved comic opera, "The Toy Maker." It was in this piece that Ferris Hartman scored such a national success. The play is a comedy of the highest type. In the old Toy Maker, Hartman has a character that has lingered for years in the memory of those who have seen him. In the voting contest, from which the various operas are selected, "The Toy Maker" has been exceedingly popular.

The production will be one of the cleverest that Hartman and Steindorff and their associates have yet made. It calls for four different sets of scenery and some particularly beautiful effects are promised in the monastery and the toy shop. On Saturday afternoon free tickets will be given to every child in attendance.

All of the strength of the Hartman-Steindorff organization will be utilized in the cast. Louis Elie, Roy Edna Malone, Lillian Glaser, Hazel Van Halton, Nona Campbell, Robert Carlton and John Vann will have important parts.

CENTURY

Pretty girls beautifully gowned, catchy songs, and many hearty laughs is the promise of Jack Russell Company for their new re-

picture and with Harrison Ford as the wild-man lover and Kenneth Harlan as the wouter caveman.

The comedy plot arises from the boast that it is impossible to tell the absolute, unadulterated truth for one hour. A bet is made and if you think it is easy to speak the truth for sixty minutes see Jack Russell and the kettle of funny trouble that it gets him into.

Several new faces have been added to the Russell Company, among which are the Lamb Sisters, who are well known to Oakland audiences.

AMERICAN

"The Woman Who Walked Alone," Dorothy Dalton's latest drama, which swings from the drawing rooms of London to the wilds of South Africa, heads the bill which opened at the American theater yesterday.

The picture is conspicuous by the excellence of scenic effects both in the portrayal of lavish London social settings as well as those of the fascinating African country. The plot is based upon a series of unusual events leading out of a "marriage of convenience." Although possessing every material want in the world, the Hon. Iris Champneys, portrayed by Dorothy Dalton, finds the world a cruel place because she lacks the love of the young American student at Oxford, who dropped from her life when she married.

Her friends grew to know her as the "woman who walked alone." But after she goes to Africa and saves her lover from a murder charge she no longer walked alone.

Miss Dalton is supported by a cast including William H. Barry, Milton Sills, John Davidson and Charles Ogle.

On the same bill is a new picture featuring Baby Peggy, the screen's tiniest and most talked-of prodigy. Other film features and a concert by the "Promis Me" orchestra round out the program.

NEPTUNE BEACH

Tank events, canoe sports, high diving, a band concert, and acrobatics.

T. & D.

Constance Talmadge in her latest comedy drama, "The Primitive Lover," goes the average star one better as she has provided herself with two leading men in place of the prosaic one individual. Harrison Ford and Kenneth Harlan are the two actors who are kept busy as the vivacious comedienne on the screen of the T. & D. this week. There is plenty to laugh at in this

Horsemen Not Opposed

Contradicting assertions of the Parisian press, reported in American newspapers, that French audiences are offended by the prominence given in "The Four Horsemen of the Apocalypse," a Rex Ingram production for Metro, to the importance of the American contribution of troops in the war, the motion picture company this week quotes part of a letter recently received from Mrs. Arthur Ellis Hamm, vice-president of the American Committee for Devastated France.

Before the first exhibition of "The Four Horsemen" could be made, Premier Poincaré had to step in as champion of the picture. The Society of Authors had protested against the admission of a movie to the Vaudeville, and the Gallie Literary and Ambassador Meyer of Germany had called for its suppression on the score that its presentation of the Prussian system would reopen the wounds of war hatred,

Niblo Has Own Company

Fred Niblo, former stage star and internationally famous lecturer, now has a company of his own under the Louis B. Mayer banner, producing all-star specials for Metro release. His first picture, the story for which is now being selected, is scheduled to get under way within the next month. Among Mr. Niblo's latest successes are: "The Three Musketeers," "The Woman He Married," "The Mark of Zorro," and "Blood and Sand."

Direct Carroll Series

William A. Selter, whose name is a familiar one to picture theater goers, will direct the first of the new series of Ray Carroll Productions about to be screened by the girl producer.

Through an arrangement just completed by Miss Carroll, her first special production, "Love's Coming of Age," will be photographed, edited and cut by the organization of experts associated with Mr. Selter in all of his recent screen successes. The strong cast of players, headed by Helen Jerome Eddy, will have an equally skilled technical organization for the work that must be carried on beyond the eye of the camera.

Syria and India To Live On California Soil

By Walter Anthony

LOS ANGELES, July 15.—Perhaps it may interest the addicted fan to put his imagination to work on some of the problems a picture director faces when he undertakes the visualization of a big story.

Frank Lloyd has just begun work on the Joseph M. Schenck production of "The Voice of the Minaret" and its locale covers the face of the earth. Director Lloyd will have to take his company to Imperial Valley, the hottest place that ever warmed at noon for night and there make believe he and his cast are in the desert, "neath far off Syrian skies." All the camels that are to be found in Southern California will be there, too, for there must be a caravan to wind its tenuous length across the yellow sands.

It is said, but I don't believe it, that Norma Talmadge, the star, is in training for ordeal of camel-traveling and that she makes daily visits to Venice or Long Beach, there to subject her system to all the racking, burning, bucking and gyrating apparatus in or on which the tourist is wont to be regaled on summer Sundays. Even so, Miss Talmadge is assured to be when she climbs to its highest peak, will give new revelations in modes of motion and prove himself notable for other qualities than those that gave Volstead an idea.

From the Assyrian desert the company will go to Bombay, which locality presents perhaps the greatest difficulties for, according to the terms of the Hitchcock story, an elaborate garden fete is staged at Bombay, and is the "swell" annual event of the "All Nations' Club" of expatriate white folk. To find a "location" that fits the purposes of the plot and matches the description has taken the reconnaissance squad of the Schenck forces all over this section of the state from San Diego to Riverside, but Director Lloyd, who knows Bombay when he sees it again, says that they haven't found it yet.

A drove of fifty automobiles is required for the turf meet, also supposed to be near Bombay; they must be foreign-made cars because not many American automobiles are to be found in India, except, of course, the ubiquitous Ford, which is out of the picture since only the aristocracy is supposed to be there and there is proverbially more "go" than "show" in the rattling good cars that Harry makes.

There is a great polo match at this club meet; but gentlemen playing polo in Bombay, for some inscrutable reason, wear evening clothes and don't look at all like polo players. It is a pity. How to get "extras" that look like gentlemen accustomed to Burlingame, Fifth avenue and Wilshire boulevard is regarded as a problem for any production, but to get "extras" that look that way and can play polo besides multiplying the improbabilities of success which finally become an impossibility if the "extras" miraculously found can play polo in dress clothes.

These difficulties directed Lloyd to San Francisco and to Santa Barbara.

And these geographical stretches are not all there is of evidence to prove the prevailing character of the Hitchcock story, for it goes from the Assyrian desert and from Bombay to rural England; a cathedral near the latter metropolis is now being "shot." Every time the director goes down the aisle towards the altar and the purple-robed choir boys, he takes off his straw hat. Instinctively you find yourself whispering under the stained glass windows and you yumble in your pocket for the right and economically sized coin against the appearance of quietly stopping gentlemen who hold forth the contribution boxes and the opportunity for you to prove whether it is really better to give than to receive. It comes as a shock that the quiet is broken by a voice announcing "concessions." Instead of an ensemble of celestial voices chanting "Jerusalem the Golden," or "Come, All Ye Faithful!"

Damasus is visited in the story and the three wise men that are making their way towards it in the present circumstances are Mr. Lloyd, the director; Mr. Schenck, the producer; and Mr. Harry Brand, who is the publicity chief and who would have given you a much better story—and longer—if I hadn't been under the ethical obligation of writing this myself.

"Wolf Law" is now in production at Universal City and provides Frank Mayo with what is probably the most intensely dramatic vehicle of his career. "Wolf Law" was Hugh Pendexter's story in a popular magazine which attracted more than a little bit of comment. Charles Saravie prepared it in scenario form.

On Stage at Four

Beryl Mercer

Beryl Mercer, who was brought all the way from Indianapolis to play a character comedy part in "Broken Chains," the \$10,000 prize story, at the Goldwyn studio, is practically a stranger to motion picture audiences. She has been in only three films, all of which were made in London. One of these was "The Shulamite," made by the late George Loane Tucker, maker of "The Miracle Man." She does not know the release title of the other two.

Miss Mercer has been on the stage since she was 4 years old, first in London and later in New York. She was in the all-star cast of "Out There," which toured the country for the Red Cross. She got a medal for entertaining British troops during the war.

She was born in Seville, Spain, the daughter of Sherrill Mercer, a diplomat, and Beryl Montague, an English concert singer.

Mary O'Hara Selected

Mary O'Hara has started work on the continuity for Metro's production of "Peg o' My Heart," in which Laurette Taylor will star. Miss O'Hara's success as a writer has been most sensational. She came to Metro studios two years ago with practically no motion picture experience. By hard work and constant study of every angle of production, she soon was given an opportunity to write and make good.

As a result, when Rex Ingram was preparing to do "Turn to the Right," he selected her to prepare the scenario. Later she wrote the scenario for Mr. Ingram's production of "The Prisoner of Zenda" for Metro. When the screen rights to "Peg o' My Heart" were secured by Metro, Miss O'Hara immediately was selected to prepare the continuity. King Vidor will direct this production.

Beauty Engaged

With the selection of Ruth Clifford for one of the principal roles in "The Dangerous Age," John M. Stahl added another star to the list of celebrities being assembled for his new Louis B. Mayer-Crest National attraction, Lewis Stone has already been engaged for one of the leading parts, and contracts for several other screen favorites are now being drawn up. Although at least a week more will be consumed in the completing of the cast, Mr. Stahl is now shooting on "The Dangerous Age," filming location scenes.

Star Speaks of Fashions

The fashion field is divided into "political fashions," says Priscilla Dean. Just after completing "Under Two Flags," Miss Dean was requested by three magazines almost simultaneously to furnish them with some of her ideas on clothes and women's finery, with pictures to accompany them. She declined on novel grounds. "There are too many influences governing fashions today," she declared. "Paris is losing some of its hold. London is gaining. New York is increasing its power and Los Angeles modistes are setting a new pace right along." "There are independent authorities here and there who are attempting to sway popular dictates. For one person to stand forth as an authority or to try to say what is in best favor, is rather useless."

Some Things to Dislike a Man? Avoid in Writing Scripts Then Don't Act Love Scene

Bradley King, of the Ince scenario staff, believes that, inasmuch as there are so few people in this great commonwealth trying to write for the screen, she ought to give a few suggestions which might tend to stir up jaggard ambition and produce a few scripts for the lazy scenario editors to read, there being no reason why they should continue to spend their days playing golf.

1.—Don't use that new situation of an unhappy wife striving to imitate the vamp who has stolen her husband. Let her kill him off and be acquitted by a jury. Have realism at all costs. Besides, a court-room scene would be a novelty.

2.—Why not write a desert story? Something about a romantic fellow who steals young English girls and barbarizes them so that they discard their silk stockings and let their bobbed hair grow out. Always have the fellow prove to be an Englishman in disguise. This has never been done before.

3.—Don't write about these eternal triangles. Nobody cares to see them—except the audience. And you must never please the audience, if you want to be a successful writer. If the audience had nothing to kick about, they would quit going to the movies.

4.—Have plenty of titles in your story. It means less work for the actors and gives the audience something to do—reading "em about.

5.—Have very little action in your story. Remember that nine-tenths of the people go to the movies to sleep.

Vera Gordon will leave the silent drama to appear on the legitimate stage next season. She became known to the public for her splendid work in "Humoresque."

"Can you play a love scene with some one you dislike very much?"

This question is often asked of actors on stage and screen. The answer is, of course, yes. But there are several very interesting phases of this question of the personal feelings of the actors and actresses in intimate scenes.

For example, Wanda Hawley and Jacqueline Logan played a very emotional scene in George Melford's production of "Burning Sands," in which Jacqueline dies, having saved the life of the man whom Wanda loves in the story. It is a beautiful and affecting scene, of a young life passing, and the genuine sorrow and sympathy of another girl. So true and sincere was the work of the two girls that hardened stage hands surrendered themselves to illusion, and wiped away tears from their eyes.

What is the answer? These two girls are "pals"; they love each other dearly, and Wanda had only to make herself believe that the stain on "Jackie's" hand was blood, and that her gasping breath and staring eyes really meant that life was passing. The tears came of themselves—freely, and from the heart. If there had been enmities, they could have played the scene, of course, but not so perfectly, perhaps.

On the other hand, Bebe Daniels, Paramount star now appearing in Penryn Stuyvesant's production of "Pink Gods," says that her personal feeling toward the actor opposite her in a scene doesn't make any difference. "Unless," she adds significantly, "I dislike him. In that case, a scene in which I must show affection is harder to do." Despite statements to the contrary, the personal feelings of the actors do have an effect on their work, which may be helped or hindered by friendship or friction.

Camera Chatter

Harold Lloyd was born in 1893.

King Baggot has been a director as well as an actor. He says that he will return to directing some day.

"The Fatal Marriage" is the new name given to the old story, "Enoch Arden." Wallace Reid and Lillian Gish play the leading roles.

Joseph de Grasse, the director, became an actor because of his strong resemblance to Edwin Booth.

Monty Blue played Danton in "Orphans of the Storm." He is at present under contract with Pyramid Pictures and is playing in "My Old Kentucky Home."

Pauline Frederick is to return to the stage. She has signed a contract for five years with A. H. Woods. However, she says that in between plays she will make a picture now and again.

Tom Mix has a medal given him by the Tennessee legislature for his work in cleaning out moonshiners.

Some idea of the chaotic condition of political affairs in the interior of China may be gathered from the fact that Gloria Hope, the popular screen ingenue now supporting Mary Pickford in her new Toss of the Storm Country, has just received a wedding present mailed to her in Cheung Tsu, China, one year ago.

Mary Anderson has very recently secured a divorce from her husband. She is one of the leading characters in "The Half Breed." At present she is working on a picture entitled "Wild Youth."

PICTURE QUESTIONS ANSWERED

ANGELFACE — Hello, Angel! glad to hear from you again. Ethel Clayton, Lasky Studios, Hollywood, Cal.; Wesley Barry, 4634 Santa Monica Boulevard, Los Angeles; Conrad Nagel, 1846 Cherokee avenue, Los Angeles; Billie Dove, Metro Pictures Corp., Hollywood, Cal.; Crane Wilbur, 34 years old. I do not know if he is married. Owen Moore is married Kathryn Perry.

Alice Joyce is not in pictures at the present time.

Wittford Lytell plays the role of Joe Weatherby in the successful stage play starring Marjorie Rambeau. He closely resembles his brother Bert.

The name of the doctor who married Pauline Frederick is C. A. Rutherford of Seattle.

Louise Fazenda is to have the part of Mandy Skinner, "the Sautest girl in Mason's Corner," in the production of "Quincy Adams Sawyer" for Metro. Fazenda has recently returned to Hollywood from a tour of personal appearances throughout the country.

Gloria Swanson has one child, a daughter about one year old.

J. Hartley Manners, author of "Peg o' My Heart," and creator of Laurette Taylor, who created the title role in the stage production of this famous play, will accompany his talented wife on her trip to Hollywood, where she is to start work in the Metro screen version of the story the first of next month.

"Cap'n Kid" is the name of the new serial in which Eddie Pola is being starred. Pola is heading his own producing unit in the making of the serial. Eddie has one daughter who is quite well known in pictures. She is only 14.

Maie MacDovey is five feet two inches in height. It often happens that a busy actor or actress selects a double. If the double closely resembles the star and does creditable work, she is almost certain to rise to an enviable position in the motion picture world. Louise Dresser came into prominence through her resemblance to Mary Pickford. She is now starring in "The Proof of Innocence."

Shannon Day was one of the dancers in the picture "After the Show." She has an important role in "Good Night and 'One Clear Call.'" She will be remembered as the vamp in "Man, Woman, Marriage."

There are two Jack Holts in the pictures, one being a cowboy actor. Dorothy Phillips and her husband, Allen Holubar, are one of the happiest couples in Hollywood.

FILM PROFESSIONIONS

by Constance Talmadge

LOCATION FINDER

Of infinite variety are the duties of the "location finder." As a prospector tirelessly hunts for the elusive vein of rich ore, so does he or she explore far and near for a treasured spot, which will yield the proper atmosphere sought by the director of the enterprise for which he works.

It is easier to speak of the location finder as a man, for there are very few women engaged in this work, though it is work that is peculiarly fitted for them. After a story has been decided upon, the director turns the manuscript over to the research department and these experts look up localities which are similar to the ones described by the author. Whatever may be required—a volcano, a tropical scene, a business building, a stately mansion—it must be found and the photographs of the place submitted to the director.

Where interior scenes are required, these may be built at the studio or they may be "shot" in the beautiful homes of prominent society people who usually are quite willing to loan their houses and beautiful grounds for this purpose.

Miss Ruth Oelman, who is employed by our organization, is very successful along this line. She has a large acquaintance who own beautiful homes, and they are most charmingly cordial in putting them at our disposal. The sets in our most recent character pictures were of course made in the studio, but in all our pictures which required interiors of fashionable houses, these were authentic scenes. The reason that I emphasize this is that every now and then there drops into the critics' columns adverse remarks regarding the furnishing of such scenes, and I know that all the corporations take the greatest care to have the essential correctness of the interiors of fashionable houses, these were authentic scenes. The reason that I emphasize this is that every now and then there drops into the critics' columns adverse remarks regarding the furnishing of such scenes, and I know that all the corporations take the greatest care to have the essential correctness of the interiors of fashionable houses, these were authentic scenes.

The qualifications necessary for a location finder, my director, Sidney A. Franklin, informs me, are perseverance, tact, love of travel and perfect health.

Before finding just the bit of landscape which will form the ideal background for a certain bit of action described in the script, it is sometimes necessary to motor all over the country. However, where wild country is called for, the "finder" is usually a man. It is in persuading owners of valuable estates and homes that a woman's tact and femininity are invaluable and make her

Ruth Oelman

worth the large salary she commands.

So far as the means of entering this branch of the industry is concerned, it is a difficult thing for an outsider. Like so many of the other departments, this one is usually filled by some one already in the studio who hears of the vacancy and applies for the position.

Miss Oelman was an artist who did special work for our publicity department before she branched out as a "location finder."

"It is wonderfully interesting work," she tells me, "it brings you in contact with such a wide variety of people, and the satisfaction one feels when a location has been found, which will later help towards the success of some great picture, is unsurpassable."

Cinema Closeups

John Harron will appear with Viola Dana in "Page Tim O'Brien." He is also playing opposite the little star in "The Five Dollar Baby."

Harrison Ford has joined the strong supporting cast being organized for Helen Jerome Eddy's first starring picture, "Love's Coming of Age."

"The Shriek" will summon Ben Turpin and Kathryn McGuire to begin immediately with production of the next Mack Sennett-Ben Turpin two-reel comedy special under the direction of F. Richard Jones.

Montreal is to pay special tribute to Pauline Garon, whose work as leading lady to Richard Barthelmess in "Sonny," has won for her the distinction of being one of the "comers" in filmdom. Miss Garon is to be given a reception by her townspeople and given the recognition that accompanies fame. Miss Garon

was born in Montreal and is a graduate of the Sacred Heart convent of that city.

After a long and successful career as a director, Edward Sloman, who has presented the screen many notable plays, is to become director and producer of his own stories, arrangements for the forming of his company having been completed this week. For his first story, Sloman has selected "Blind Justice," a Frank R. Adams story that appeared in serial form in Munsey's Magazine.

Picking comedy stars is one game in which Hal Roach has excelled for many years, and now he believes he has another winning combination in "Paul" Parrott and Jobyna Ralston. Miss Ralston, probably the youngest leading woman in pictures, plays opposite Parrott. The little Tennessee girl is only eighteen years old, but already she has given much promise.

Father To Have "Sink or Swim" His Day In New Pictures Told By Mother

For years Dad has been neglected in the movies. Mother has occupied the limelight all by herself.

But things have changed, and before many more tears have been shed by the anxious screen mother waiting at home for her wandering boy, Father will become the fair-haired one in the eyes of the vast motion picture public, according to Marshall Neilan, one of the foremost directors and close student of the movie patrons' likes and dislikes.

"Rupert Hughes proved himself Mother's greatest press agent when he created that motion picture epic, 'The Old Nest'—it must be found and the photographs of the place submitted to the director."

"Give them Mother pictures," they cried. As fast as the cameras could crank them out, mother pictures were "eaten up" by the screen public of the country. Father impersonated the zero mark as far as his importance to the motion picture plot was concerned.

"The appetite of the movie fan however, is after all, normal. It will 'eat up' a certain diet for a certain length of time—but no more. I personally have mounted on Mother pictures, and by a strange turn of fate, Father is unanimously elected to come forward and 'do his stuff'."

A survey of the recent trend of producers indicates that during the coming season Dad will appear more and more as the big sympathetic character in the story. I personally have mounted the band wagon and as a result of investigations, other producers are doing likewise.

"In 'Fools First,' Claude Gillingwater, as the old banker and criminologist, is given one of the most important parts in the plot. In my new production to be released by Goldwyn, 'The Stranger,' Barnum is again cast as Gillingwater for a similar part.

"In 'Minnie,' the big sympathetic part is portrayed by George Barnum, veteran of the stage. He has been picked and sacrificed old husband of the boarding house keeper, Barnum is bound to win public favor.

Rupert Hughes will soon come along with 'Remembrance,' which, according to all reports, will be as great a Father picture as his 'Old Nest' was a Mother picture. Many other producers are now playing up Father's importance to the screen plot as a result of the trend of public desire.

Variety of Costumes

"Island Wives," one of Corinne Griffith's current Vitagraph productions, affords the star an opportunity to wear an astonishing diversity of costume. On the South Sea Isle, she is dressed in the cool native skirt and waist; on the millionaire's yacht she wears gorgeous succession of brocade Chinese costumes, and in America she appears in the latest and best that Paris and Fifth avenue have to offer.

Katherine's Latest

Katherine McDonald's next starring vehicle is to be "The Lonely Road," an original story from the pen of Charles A. Logue, who has written two other recent MacDonald film stories.

The picture will be directed by Tom Forman, who was responsible for the direction of "The Woman Conquers" and who is now directing Miss MacDonald in "White Shoulders," an adaptation of a Saturday Evening Post story by George Kibbe Turner.

In "White Shoulders" Forman is not only directing, but is playing principal part—that of a screen brother of the heroine.

BOOK REVIEWS AND LITERARY NOTES

"Our Navy at War"

Former Secretary of the Navy Has Written a Book of Interest to Every American and One That Adds to the Glory of This Nation's Achievement During the World War.

Five minutes after President Wilson signed the war resolution passed by Congress April 8, 1917, the navy's radio flashed the message to every ship and station, a message that had been prepared hours before. The naval aide of the Secretary of the Navy was waiting in the executive office of the White House. Lieutenant Commander Royal Ingersoll was stationed at the Navy Department across the street, watching for the signal.

Former Secretary of the Navy Joseph Daniels has written a very readable and historically interesting work entitled "Our Navy at War," in which he gives many inside facts concerning the activities of this arm of our national defense during the World War.

Four days after war was declared a historic conference was held at Fort Monroe, attended by admirals of the United States, Great Britain and France. Hampton Roads had been the scene of another historic conference between Abraham Lincoln and Alexander H. Stephens and others in 1865 when an unsuccessful effort was made to bring the war between the states to an end. The understanding arrived at between the foreign admirals at Fort Monroe was the first agreement the United States Navy ever made with foreign naval officers to wage war together.

The greatest thing America did in the World War, according to the author, "was the raising and training of an army of 4,000,000 men, a navy of over 600,000 and the safe transportation of more than two million troops to Europe."

That Americans have inventive minds was demonstrated when 100,000 suggestions and inventions were offered the navy for winning the war. Four of them were designed to down the submarine. The most successful was a listening device to detect submarines through sound.

So effective was our radio equipment that our means of communication would have been but little impaired if the Germans had cut every cable. America would have still been able to keep in touch with Pershing and the army in France, with Sims in London, Rodman and Strauss in the North Sea, Wilson at Brest, Niblack at Gibraltar, Dunn in the Azores, with all our forces and allies. Vessels at sea could be reached almost as easily as if they had been at their docks.

According to the former Cabinet officer, the death rate in the navy by disease in 1917-18 was the lowest in the history of wars. Sickened until the influenza epidemic, was less than in peace time. "The first battle of the war, that against disease, was won by the medical department of the navy," was reported by the House Naval Affairs Committee.

A recapitulation of the activities of the American Navy during the World War is furnished by the former Secretary:

"With more than two thousand vessels in service and 533,000 officers and men, the largest personnel ever possessed by any navy, our naval operations in the World War literally belted the globe. Operat-

ing with the Allies from the Arctic to the Adriatic, from Corfu to the Azores, we manned and operated the vast fleet of American transports carrying troops, munitions and supplies across the Atlantic, and furnished man-of-war escort to protect them.

"Patrolling our own coasts and the Western Atlantic, the Gulf of Mexico and the Caribbean Sea, our vessels also kept watch in South American waters and guarded the approaches to the Panama Canal. Our ships in South American waters, commanded by Admiral W. B. Caperton, co-operated with the naval forces of our sister republics and gave insurance against possible raiders and submarines. Ships under Caperton, the squadron under Anderson in the Caribbean and the Gulf of Mexico, and Mayo's ships farther north maintained the patrol throughout the war on this side of the Atlantic.

"Guarding against raiders and German activities in the Pacific, our operations extended from our west coast to Hawaii, Guam and the Philippines, and our vessels in the Orient co-operated with the Japanese and other Allied naval forces from Manila to Vladivostok. The destroyers sent from Cavite, which voyaged twelve thousand miles through the Straits, the Indian Ocean, the Red Sea and the Mediterranean, met at Gibraltar the forces from the other side of the world.

"Eight hundred and thirty-four vessels and two hundred thousand men of the United States Navy were either serving in European waters or engaged in transporting troops and supplies to Europe, before hostilities ended. This was more than twice as many ships and nearly three times as many officers and men as were in naval service before the war.

"Four hundred vessels were assigned to the Naval Forces Operating in European Waters, 373 being present at the time of the armistice—70 destroyers, 5 gunboats, 5 coast guard cutters, 12 submarines, 13 mine sweepers, 10 mine planters, 8 battleships, 3 cruisers, 15 tugs, 4 cross-channel transports, 15 vessels carrying coal for the army, 18 tenders and repair ships, and 7 vessels of miscellaneous types. In addition three Russian destroyers were manned by United States naval personnel. Eighty-one thousand officers and men of the Navy were in service in Europe. Thirty thousand Marines were sent overseas with the Army and 1600 for naval duty ashore."

"As a member of President Wilson's cabinet, the author is loyal to his chief and throughout the book misses no opportunity to praise and accord credit to the Commander-in-Chief of the forces engaged in the great struggle. With access to all government records, and possessing the fullest information concerning every activity of a Navy, the former Naval head has written a book that is of interest to every American and one that adds to the glory of our accomplishments during the World War."

"Our Navy at War," by Joseph Daniels, New York, George H. Doran Co., price \$3.

That Portrait of Edith Dale

By EMILY GRANT HUTCHINGS.

I had read "Peter Whiffle," and I know that Edith Dale was, but I did not know that Andrew Dasburg's much-discussed painting of her was on exhibition in Terence Holliday's Bookshop in Forty-seventh street until I looked up from a pile of books and saw what appeared to be an anatomical design of red muscles, blue veins and yellow patches of diseased tissue. This was the famous "The Absence of Edith Dale."

We in the Middle-West have seen enough of Futurism to have attained the reaction to the Sane and Normal, and after regaining my faculties I might have passed on—but for the arrival of two other female persons, obviously from my own part of the country. They were mother and daughter. They were not just the types one sees in a bookstore; evidently they had come to look at the picture.

The mother was nervous, the daughter eager. I had made up my own mind about Dasburg's composition, but I was still open to impressions. And then I forgot Peter Whiffle's friend, Edith Dale, who was never present at her own receptions. I forgot everything, as I stole furtive glances at the two faces.

"I—well, I think it's shocking," the elder woman snapped, clutching at the daughter's arm as if to drag her away from contamination. "Shocking? What is?" Blue eyes were wide with protest.

"That nude figure, there in the middle of that smear of red and yellow." And then, after a moment's indignant silence, "It's positively . . . voluptuous!"

"I don't see any figure at all—only rhythmic lines and harmonious successions of color masses," Young Innocence retorted.

"If the artist didn't mean that ugly mass in the center for a fat female, what did he mean it for?" "Mother, darling, don't speak loud. They'll think you are from Peoria."

"Well, I am, and I don't care who knows it. We discussed all

"Nutrition and Specific Therapy," Dorothy Lane

Dorothy E. Lane has long been known for her lectures on nutrition. A demand for her work in book form has resulted in the publication of "Nutrition and Specific Therapy," a volume to be recommended for its concise and practical form. Effects and methods of cooking, nitrogen equilibrium, meat and vegetable diets, bacteriology of the digestive tracts, diets in disease, infants' and children's diets, vitamins and other important subjects are discussed, tables are included and authorities quoted. In its field the work is a valuable addition.

"Nutrition and Specific Therapy," by Dorothy E. Lane, New York, The Macmillan Company, \$1.50.

The drawing at the right is that of JOHN GALSWORTHY, a sketch of whose life and work has been published for free distribution by Scribners. ROBERT W. CHAMBERS, writer of best sellers, is on the left. CYRIL ALINGTON, center, is author of "Through the Shadows."

John Galsworthy

British Novelist and Dramatist Is Made Subject of Booklet Distributed by Publishers; First Won Fame in America with "Strife"; "The Patrician" Is Fruit of Experience and Long Training.

(From "John Galsworthy," a sketch of his life and work, distributed free by Scribner's, New York.)

Beginning to write at twenty-eight, John Galsworthy attained real fame in the first ten years of his work; in fifteen years—a period culminating with "The Patrician"—he had gained a place in English literature which, steadily maintained, has become permanent.

"The Patrician" marks the end of a stage in his career; a stage in which he established the basis for much of his future work. During it he surveyed the "spirit and limitations of the four main sections of English upper-class society": the professional or conservative business element of unostentatious ancestry but symbolic of British respectability, in "A Man of Property"; the aristocracy in "The Country House"; the cultured group, conscious and appreciative of the arts but limited by the social conventions in "Fraternity"; and the aristocracy in "The Patrician."

It was "Strife"—the strife between Capital and Labor, presented in a most dramatic play—that first, in a large sense, brought the name "John Galsworthy" to America; and it was through "Strife" that Galsworthy came first to be recognized as a writer of the world.

"Strife" produced in 1910, "an effort," as Galsworthy describes it, "to present a picture of the general blindness of justice, and to elucidate the true proportions of the problem of Society face to face with an erring individual," so stirred the British public and, in fact, many officers of the government, by its presentation of the horror of prison life, that instant reforms were begun which resulted in changing the British system.

Before either of these, "The Silver Box" was produced, and after them "The Little Dream" in 1911, "The Pigeon" and "The Eldest Son" in 1912, "The Fugitive" in 1913, and "The Mob" in 1914. "The Pigeon" has been produced many

Magazine of World Fiction is Launched

Herbert S. Houston, president of the Houston Publishing Company, publishers of "Our World," has just launched another magazine, "World Fiction," the object of which is to present in English a translation of the best short stories, novels, poems and brief plays by contemporary writers of the world. The first number contains stories from France, Ireland, Spain, England, Russia, the United States, Poland, Denmark, Rumania, Peru, Holland, Sweden and Italy. There are poems from the Yiddish and the Russian.

Publication of "The Moles," (Les Nocturnes), one of the most popular novels published in France last year, and one of the three final contestants for the Goncourt prize, begins in this first number. It depicts the machinations of international intrigue in Geneva during the war, and the plotting and combination of interests which culminated in the Bolshevik revolution.

Other interesting features are "Kerkeby," a dramatic story of life in a harem, by a woman who has lived in one; "The Knight of Death," a story of the modern descendants of the Incas; "The Luckiest Man in the World," by Leonid Andreyev, and "A Conversion," by Lucas Malet.

CONCERNING WRITERS. The usual writer tells how something might possibly come to pass. The good writer makes it occur before our eyes as though actually present. The master tells something as though it had happened long ago and is happening again. Hugo von Hofmannsthal in "The Dial."

Should Authors Write Their Own Scenarios?

Alfred Ollivant, whose latest novel, "One Woman," has just been published in this country by Doubleday, Page & Company, has just seen the first showing of the motion picture version of "Boy Woodburn," his famous story of a racing horse. Ollivant, like many American authors, believes that the theater industry will not produce pictures of the highest artistic merit until authors cooperate in preparing their own scenarios.

"In my view, stories by living novelists can never be perfectly expressed on the film until the man who created the story, the characters, the atmosphere, is commissioned by the producing company to write what I may call the basic scenario. The ordinary novelist has not, I admit, the expert knowledge to write a technically perfect scenario, but he could and should write a basic scenario. When the producing company calls in the author to help in this matter, then we shall get films of an artistic and literary merit undreamed of heretofore."

ARTHUR HERVEY DEAD.

Only a week or two before the publication of the book devoted to his life and work, the great composer, Camille Saint-Saens, died. Now comes the news of the death of Arthur Hervey, the author of the volume, "Mr. Hervey was Irish by blood, Parisian by birth and combined the double office of musical composer and musical critic, and added occasional authorship. His was the first book in the English language entirely devoted to Saint-Saens."

Chambers

Writer of Best Sellers Does the Unusual in Latest Story, "The Flaming Jewel." Woods, Jewels and Romance are Mixed in Story of Exciting Moments.

Readers of light literature have been treated to novels with a hero and heroine, novels with a hero and no heroine, and vice versa and novels without either of these essentials to happy endings, but it remained for Robert W. Chambers, America's most prolific novelist, to produce a novel in which the hero does not marry the heroine, and yet brings the book to a satisfactory conclusion.

It is quite logical too, for, after the first encounter with Eve, the daughter of the plutocrat Mike Clinch, and James Darragh, millionaire Secret Service operative, it is obvious that their marriage would not be a happy one. Chambers believes religiously, in happy endings, but he does not think that a millionaire can wed an uncultured, if beautiful, damsel. So he proceeds to fly in the face of novelistic convention and change things a bit.

"The Flaming Jewel" is a mystery romance. It is rife with adventure and in true Zane Grey style, Chambers manages to kill all of the villains before his reader has reached the last page. His final killing is a little delayed, it is true, but once the job is done it is done well. Throughout the novel is romance and adventure revolving about stolen jewels, the north woods of New York, bandits and other essentials of mystery literature.

In "The Flaming Jewel" Chambers has produced a piece of writing that will please his most exacting friends and prove entertaining to the nth degree to those who want a well-written vacation novel. It is announced as a "tale for complete relaxation, full of adventurous and exciting incidents. No worries, no glooms, no (disappointing) deaths." It is all of that and more.

"The Flaming Jewel," by Robert W. Chambers, New York, George H. Doran company, \$1.75.

Jay William Hudson Is Dreamer and Jester

In personal appearance he is short in stature, with dark hair, brown eyes that seem to be ever dreaming, except when they light up, as they often do, with a merry gleam at some ready jest. His face is as smooth as a boy's, he is quick and alert in his movements, so that people are much baffled concerning his age, guessing it all the way from 30 to 45. Mr. Hudson isn't the old-fashioned bespectacled professor that we used to picture as holding down the chair of philosophy in a college and talking of Plato and the ancient Greeks. He's a modern, all right, but he's a modern eye-glass.

He smokes a good cigar with a relish, he wears fashionable clothes, and he talks like a business man making a deal. Yet, with all—call it contradiction if you will—his whole appearance stamps him as possessing an artistic temperament.

Although a professor of philosophy, and author of a number of technical treatises and articles that have gained wide recognition, Mr. Hudson's first interest, strange to say, is literature. At college, he was class poet; indeed it is said by his close friends that he has written a substantial volume of poems, which, however, he cannot be persuaded to publish. He says he writes poetry only to keep himself constantly in tune with the beauty of things. When he lived in California, he was a warm and intimate friend of Edwin Markham and Joaquin Miller, both of whom vainly urged him to publish some of his verse. When asked recently why he did not teach English literature instead of philosophy, Mr. Hudson said: "Literature is indeed my vocation and philosophy only my avocation; but I have a theory that if one's vocation is an art, he had better not earn his bread and butter by it—the commercial poet should never write. One's artistic motives when we conform art to some utility, we lower it. It is all sufficient in itself. Every art is the creation of some new expression of the ideal; therefore, it is forever its own excuse or end."

Mr. Hudson does all his writing in the morning, on an old home-made desk, in a little simple room, his walls covered with the scenes he is writing about. His favorite novelist is Thomas Hardy. He reads detective stories for relaxation; recently Will Irwin remarked that one of his most vivid recollections of a visit to the University of Missouri was Jay William Hudson and his intense interest in detective stories.

It might be thought that a man who devotes his time to literature is likely to be a recluse. But Mr. Hudson is very much a man of affairs. He is an enthusiastic Rotarian, a member of the Chamber of Commerce of his home city, and an active member of the national secret music fraternity, Phi Mu Alpha, and is so much an authority on international matters that he has been often asked to speak upon them before noteworthy gatherings, among them, the Fourth American Peace Congress, to which the late Andrew Carnegie introduced him. However, one of Mr. Hudson's pet aversions is public speaking, spite of the fact that it is said that he is the one man

The Shadow

Here's a dell that's sunny enough for laughing joy; Robins whistling clear enough From mossy woodpile near enough, But where's my joy?

Blithe in truth looks frost's blue eye, And lovely blue the brook flows by, Red-faced sun and jeweled slits by, And jest of old crow answering crow. Would all wake joy;

—Edmund Blunder, in July Yale Review.

The Mystery of Emotion: Cannon

In an article in the July Harper's on "What Strong Emotions Do to Us," Prof. Walter B. Cannon of the Department of Physiology at Harvard writes:

"An element of surprise and mystery accompanies a strong emotional outburst. In times of terror or of intense anger, for example, there is a surging up within us of forces of which in days of calm and comfortable living we have been quite unaware. So powerful may these forces be that their dominance, even though temporary, may be terrifying. They may lead us to acts which we remember with a thrill of self-satisfaction or, on the contrary, with pain and chagrin. Anyone who has been in the grip of great emotional excitement can readily understand deeds of desperate violence, whether good or bad, which may be the natural consequence of such an experience."

"The mystery of the origin of our strong emotions has long interested philosophers and naturalists. It was early recognized that they are states which we have in common with sub-human beings. Significantly, Darwin entitled his classic study, 'The Expression of the Emotions in Man and Animals.' And he was able to collect a remarkable array of evidence showing that among widely diverse races of mankind, as well as among the higher vertebrates, the same modes of expression were manifested. Baring the teeth, dilation of the pupils, erection of the hair, growling or snarling, and a menacing approach are so generally the signs of rage and aggressive feeling that they form a common language which animals of very different types clearly understand. Indeed, it is thus that we often interpret the attitude of the strange dog toward us and thus that he in turn interprets our disposition toward him."

The Magazines

POETRY. With modesty not always expected of the poet Harriet Monroe has etched her contributions to Poetry for July by giving them no prominence of position or cover mention. "Notes of Travel" are interesting sketches in which there is no straining for effect and none of that heavy pretence which one may find, for instance, in many of the poems of Alfred Kreyenborg. Kreyenborg has an odd conceit, a nodding conversation of two old men, which, read with the Kreyenborg setting, should prove effective. Lola Ridge, Anna Wickham and Louis Golding are among the other poets represented.

THE WORLD'S WORK. From hunting gorillas to sauntering along the roads of Palestine and talking at the crossroads of three continents, the reader of World's Work for July may turn for amusement, excitement and information. Thomas L. Masson points out "New Roads to Happiness"; Mark Sullivan discusses politics, and Elizabeth Tilton writes what she says is an unbiased record on what prohibition has done. Her figures come from the charitable institutions and police courts and are of kind to reinforce the arguments of the dregs. Burton Hendrick, Bernard Baruch, Floyd Parsons, P. W. Wilson and Franklin Lane are others whose words are included in the number.

THE NAUTILUS.

Readers of The Nautilus look always for the editorials of Elizabeth Towne. The magazine serves regularly the inspirational food demanded by its supporters. There is in the July number an article on the elimination of fear and worry which represents Orison Sweet Marston in his best philosophic manner. Helen Cain attacks an old problem in a new way with "Dishwashing as a Training School," and William E. Towne conducts his department of Views and Reviews.

who can fill the large auditorium of his own university.

When the French philosopher, Bergson, was touring this country, a "mot" of Mr. Hudson was quoted widely in the journals of France and America, including Life. Some woman had asked him to state the philosophy of Bergson in a nutshell; he replied that perhaps Bergson's creative evolution could be best summed in the line of the song: "I don't know where I'm going, but I'm on my way."

When recently asked how he would express his life-creed, Mr. Hudson answered in the words of his own "Abba Plena": "I would like to become the dream of my boyhood's heart which is the inner dream of the world."

Mark O'Dea

"Red Bud Women," Announced as Destined to Be Discussed by the Intelligence, Is Not the "Strong" or Profound Volume Indicated; Is Readable and Interesting.

One's suspicions are likely to be aroused by the publisher's announcement that "Red Bud Women" is "destined to be the most discussed book of the year among the intelligentsia." One is inclined to see in such a work a labored effort to produce "strong stuff," to obviously flout rule, regulation and tradition to shock and to prick the sensibilities.

"Red Bud Women" does none of these. It is no more a work for discussion of the intelligentsia than it is for comment of the great working and reading majority. Nor is it any the less. Instead it is a readable hundred-odd pages, an interesting thing, a book of enough depth to make it worth while, but not so profound as to wrinkle a brow in thought.

Mark O'Dea, its author, has written four plays, with characters taken out of the corn belt, village and farm. His theme is the feminine mind, the result of years of masculine oppression on that mind, of hardship, of dry-as-dust existence. He writes of the feminine mind and heart, in which romance has been pruned ere it had a chance at fruition.

Mary Sykes of "The Song of Solomon," has seen forty years of married life go by and with them the dreams and ambitions that are born in youth. To use the words of a strong-stuff author, she has been a success as a work-ox and a breeding-machine. O'Dea would have you believe that her lot is the common one of the farm woman. If that is true, he puts the case strongly and writes a story of the men folk of the soil, who put their time and money and wit into their farms and their barns and machinery and none of them into their life as husband and home-maker.

In "Shivaree," the second of the dramatic episodes, there is a woman of a different type—the overpowering Hulda who resolves to turn herself into something more than the women she sees around her. Hulda leaves her job and marries on the night of her bridal day after delivering herself of many adjectives and a rugged philosophy.

"Miss Myrtle Says 'Yes'" and "Not in the Lessons" take you into town and introduce a set of Main Street characters who, too, sacrifice and ache in the manner of their farm sisters.

O'Dea hits hard at the failure of one kind of man to see women as more than machines and less than the other sex. He has found a peasant class in these United States and has discovered that the men of this class count their women with the livestock. He should be answered by those who grind in the soil. The argument is strong enough to be two-sided.

The author's style is interesting, frank and not at all lurid. He writes as one who has set about to paint a picture and not to shock sensibilities. The book should arouse discussion, to be sure, but discussion among the army of book-lovers and not the so-called intelligentsia.

"Red Bud Women," by Mark O'Dea, Cincinnati, Stewart Kidd & Co., \$2.

"IMMORTAL ITALY" COMING

Edgar A. Mowrer, author of "Immortal Italy," just published by the Appletons, has lived for a number of years in Rome. He has been Italian correspondent for one of the largest papers in the United States and has been in close touch with all phases of the Italian situation. During the war he served as correspondent on the Italian front. Recently he has been at Genoa observing the work of the conference there. It is interesting that Edgar Mowrer, doing newspaper work in Italy, and writing this important and exceedingly informative volume upon the modern Italian nation, is a brother of Paul Scott Mowrer, newspaper correspondent in Paris, war correspondent on the western front, and well-known writer of such books as "Hours of France," "Balkanized Europe."

Among the new fiction on the full list of The Macmillan Company are novels by Alice Brown, Edgar Rice Burroughs, four more volumes of fiction by Philip Wylie, Warwick Deeping, Ernest Poole, and Amelia J. Burr, and a new volume of sea stories by Lincoln Colcord. There are new plays by St. John Ervine, Andreyev, and Wilfrid Wilson Gibson, and new poetry by Edwin Arlington Robinson and Padraic Colum. Included in the list of books of general interest are a new volume of history by James H. Burns, four more volumes of lectures given at the Williamson Institute of Politics, and Professor Charles Richet's new book, "Thirty Years of Psychological Research."

CALIFORNIA AUTOMOBILE SALES TAKE BIG JUMP IN 1922

California's Great Outdoors, Filled With Innumerable Scenic Objectives, Invites Her Motorists to Rest and Play. The glorious views you see below are within easy reach of any Eastbay motorist. Hundreds of other places, many equally beautiful, can be enjoyed to the fullest degree by the automobile fraternity of this state. How to reach them, what to see, how the roads are, can be answered by the TRIBUNE TOURING BUREAU. Visit them, be happy and free from dull care.

SCENE ON LAKE TAHOE

IN THE YOSEMITE VALLEY

MT. SHASTA

66,246 NEW CARS SOLD THIS YEAR

That prosperity is widespread in California automotive circles is very quickly learned from a survey of the July issue, Motor Registration News, published in Oakland, which sets forth in an illuminative set of tables statistics showing that there were 41 per cent more motor cars sold in this state during the first six months of 1922 than were disposed of in the same period of 1921. Since January 1, California citizens have bought 66,246 new automobiles, while from January 1, 1921, to July 1, 1921, they bought 46,725 motor cars, a figure in itself of some magnitude.

The 47 northern counties of the state have progressed in business even faster than they did in the initial quarter of the year. The Motor News statistics show that the north gained 21 per cent in the first three months and boosted this advance for the six months to 30 per cent. The southern part of the state finished the half year with a gain of 51 per cent over a similar period in 1921.

Southern California continues to buy more cars than the north. The figures are 36,486 new automobiles in the eleven southern counties and 29,760 in the 47 northern divisional sections.

8174 TRUCKS BOUGHT.

A total of 8174 trucks were bought from January 1 to July 1, and this branch of the industry fared as well, judged from a percentage standpoint, as did the passenger car trade, a fact which is exemplified in a comparison of June, 1921, and June, 1922, which brings to light the information that in June of last year 1010 trucks were purchased here contrasted to the sale of 1828 last month. The gain is approximately 80 per cent.

As has been true in former months of the present year, the increased purchases have been pretty well scattered among all standard makes and some have shown gains exceeding 200 per cent. In the high priced field one well known car shows an increase for the state of well over 100 per cent.

June maintained the speedy pace of preceding months by setting a sales mark that was the biggest the industry has ever experienced in this state. Passenger car and truck registrations totaled 16,003 against a corrected sales in May of 15,832. The truck business fell slightly behind its May totals, but passenger cars increased from May figure of 13,988 to 14,180 during last month. It is hardly to be expected that July will surpass June figures, for July is considered one of the off months in the trade. Nevertheless, registration records which are coming in to the Motor News office

U. S. Auto Chief Visits State Hoover Agent Talks Optimism

Gordon Lee, chief of the automotive department of the United States Department of Commerce, is an enthusiastic booster for California and the West. Lee has delivered addresses to several thousand automobile men and business men throughout the country in the last month, and is making a tour of the state in the interests of things automotive connected with the Department of Commerce, of which Herbert Hoover is secretary. Lee arrived in California last week and made his first address in San Diego. He was met there by Robert W. Martland, secretary-manager of the California Automobile Trade Association. Next he

addressed a large gathering in Los Angeles and then came to Oakland and San Francisco. Lee made a flying trip into Yosemite Valley by way of Wawona and came out the Big Oak Flat road. The Chandler-Cleveland Motor Car Company sent a Chandler to Merced to meet Lee and take him to the famous valley. He was accompanied by Martland and George Habershtein, president of the association. "The trip into the Yosemite Valley was one of the most wonderful runs I have ever made," says Lee. "We were met at the train in Merced early last Thursday morning and made the run from there to Camp

Curry and arrived there soon after noon. We did not want to hurry because I wanted a good look at the country. I have never been into Yosemite before and it was surely a revelation. There is nothing like it in the rest of the world.

Conditions in the automobile industry are better right now than ever before. There is a big demand for all sorts of products in this country and foreign demand is increasing. Exchange rates are reaching normal in some of the allied nations, and as they rise their money is worth more in dollars and they can buy.

"In my trip across the continent I found that there is greater demand in California than in most other states of the Union, although the demand is growing everywhere."

Precautions Will Prevent Disaster Rules For Approaching Crossings

Simple precautions would avert eyes and cars you have sized up the situation. All must agree that a little time spent in trying to protect life and limbs is a good investment. We use up some time hunting bargains in stores. Better plan to hold onto the life you possess. No bargain counter has another to offer you. When your end comes you will be a long time dead. Maybe, when you get near the railroad tracks, you see a train coming and the thought comes into your mind, "I can beat it across!" That thought is a mere whim. Your judgment is not speaking. In

such a case wait for your sober second thought. Remember that a fast train can run the quarter-mile from the whistling post to the crossing in fifteen seconds. Do you know just exactly how far you can make your car go in one-fourth of a minute? Most of us fail to do our best in an emergency. Do you admire a man who tries to beat a train over a crossing when he has his family or friends in the car with him, depending upon him for protection? If such a man were to run his business so carelessly as that we greatly fear that the balance would show up on the wrong side of his ledger. Most of us are very weary of reading newspaper accounts of death and destruction. Let's be rooters for safety at the crossing!

Stop when there is an accident, whether it is your fault or not, and render all the assistance possible.

DETROIT IS BOOMING IN AUTO TRADE

By F. ED. SPOONER.
Special Dispatch to the TRIBUNE. DETROIT, July 15.—The shortage of motor cars is becoming a serious problem. As an instance of what this means one maker sent a representative to the south. He established fourteen distributors, took orders with nearly \$20,000 in deposits, calling for over 1500 cars and returned to Detroit to find that not an order could be filled. The factory had planned a production of 125 cars daily and due to inability to secure motors was turning out but thirty-five cars daily. This is but one instance and there are others. The car makers turned out in May 256,302 automobiles and trucks and the output, had it have reached the 300,000 mark, would still have been too small. Indications are that final reports of June production will see the pace continued and several makers report unfilled orders for an aggregate of thousands of cars. One of them, for instance, turned out 1000 cars in June and went into July 900 cars behind required shipments on schedule and with an ordinary number of orders for the month which would require the turning out of 1900 cars to catch up. Many makers now have schedules ahead for several months in advance and orders for material are being given, with specifications to September and October and even later. Truck production is on the increase and the truck people are making about 10 per cent of the total and today working on a schedule of about 300,000 commercial vehicles for the year. Last year they made 154,500 as against 322,083 for 1920 and 316,364 for 1919. It must not be inferred that the commercial vehicle

MOTOR MEN RUSHED TO FILL ORDERS

(Continued from Page 1)

makers are at normal for the year, but they are steadily gaining and production figures promise to reach normalcy within a short time. The many makers in this field have gone out of business those remaining are benefitting greatly, and when normalcy is reached business of the remaining makers will be record breaking. Much of the credit for the increase in this field is given to building, but revival in business generally has had much to do with it. As the farmers enter the field as buyers, commercial vehicle makers will experience a real boom, for farmers must replace worn out vehicles, having been out of the market for two years.

The flow of trade will be steady is expected by well posted men of the trade and by makers of passenger cars and commercial cars, who have been making full investigations. One maker after another has sent men to the farming countries to look into the situation and parts and accessory manufacturers have had successful investigations, covering a longer period on every occasion where careful investigation has been made in the farming field.

July production will be absorbed largely by unmet orders. Some believe that August will show a seasonal falling off, but these prognosticators fail to take into account the certain entry of the farmer in August with a potential of perhaps 1,000,000 cars to replace worn out vehicles.

Demand today are said to run largely to closed cars, with a down has been a rarity for a long time and students of trade conditions have predicted that closed car business would not be greater than that for touring body business. Car owners now-a-days do not lower their tops, winter or summer, and ordinary cloth tops show weather wear and rapid decrease in value of a car. As a selling proposition a used car with a closed body is far superior to a touring car with worn out top or a weather worn top.

So insistent has been the demand for closed bodies that one maker has taken over a large plant to turn out nothing else, and his product there will be 400 cars daily, while several others have been forced to add factory buildings to look after this business. Body makers have been compelled to add factory space due to demand for closed bodies.

Conservatism will reign for the last six months of the year just as has been the case during the first six months. In spite of the record breaking demand, dealers and distributors are being asked to make careful investigation so that they may state about how many vehicles will be wanted for the rest of the year.

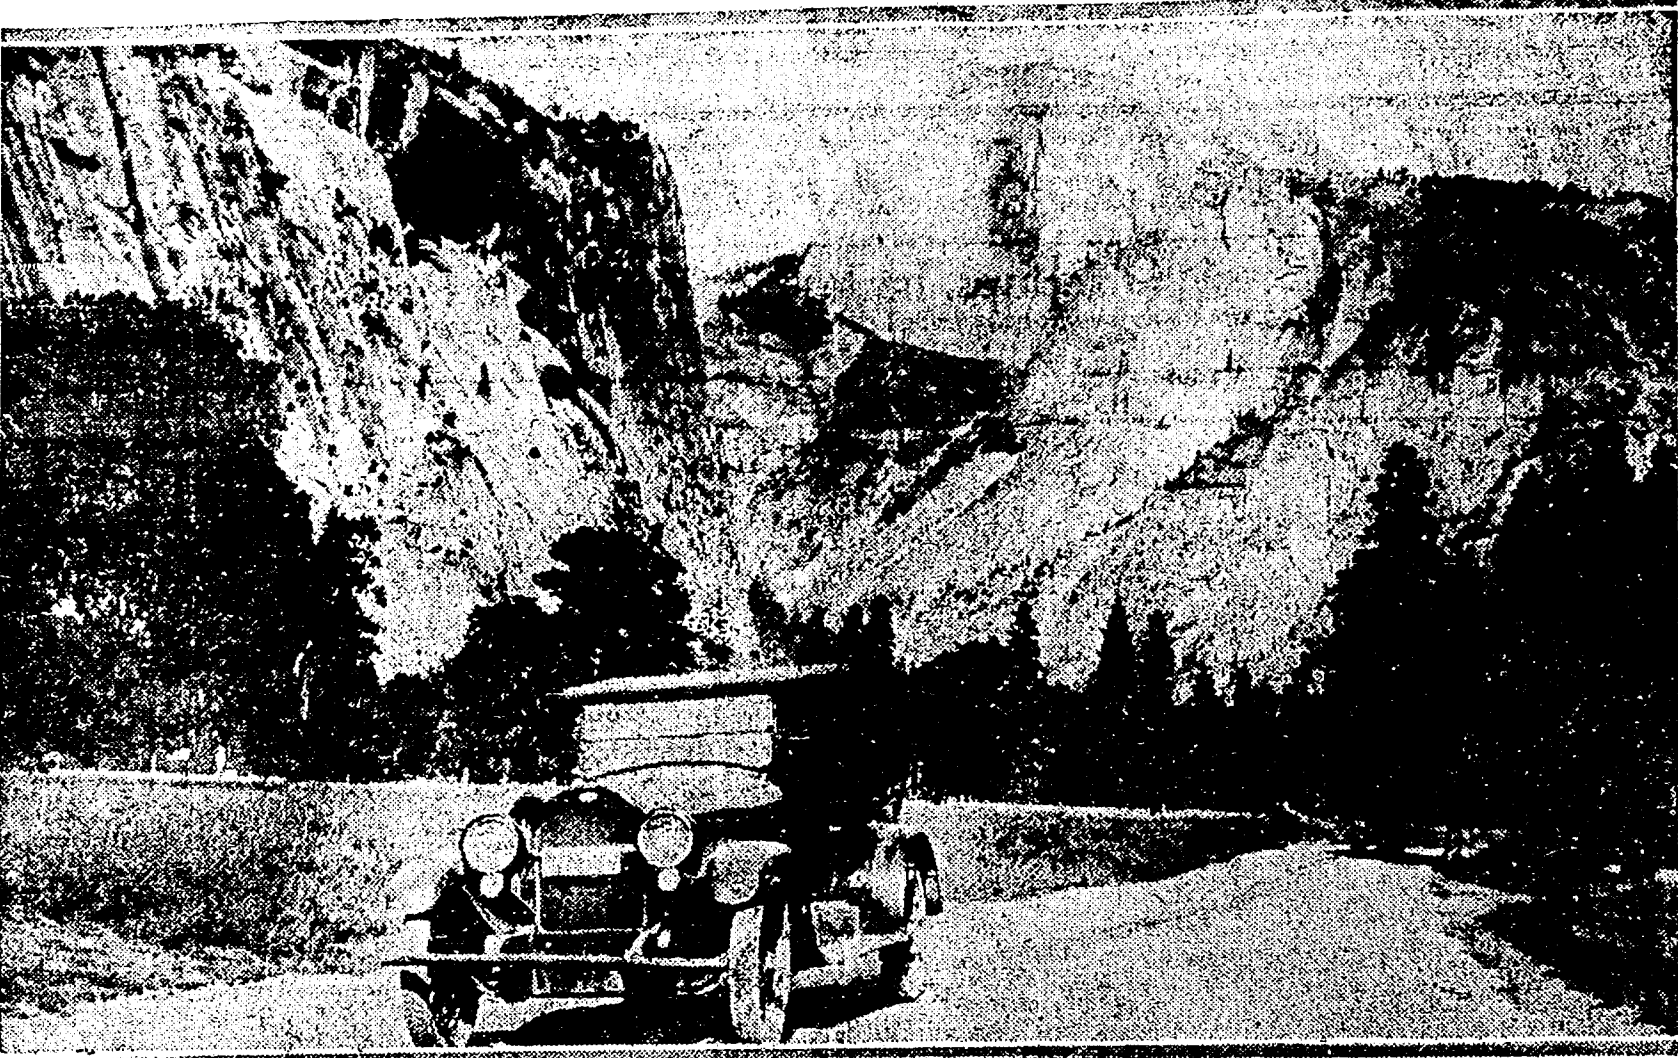

It is noticeable that every dealer and distributor has been asked to take in account the probable demand for closed cars in the fall, in view of the increase in demand for these in the summer months. The makers expect a seasonal slump in sales in cities, they state, but believe that the farmer business and closed car business will take up the slack in fact bring on a real boom far in advance of the situation as it exists at present.

Should such a demand arise, as has been looked for by many and being looked for by more every day, the car shortage will be very acute and the season may close with the greatest number of unfilled orders ever known.

Again it is being said that "business is spotty," yet, where the makers have sent real salesmen and not order takers into the field, the results have been found, all too often, in bad shape. The order taker, as so many salesmen really are, has difficulties under such conditions. The salesman goes in and finds men ready to enter the business, sells them, presides at the formation of companies and comes away with the order. It is salesmen naturally that are the sought today and they are said to be scarce.

Famous Valley in High Sierras Attracts Motorists

A Davis Phaeton in Yosemite Valley. Half Dome is in the background, and on the left is Washington Column. The great gorge is at its best, and there is plenty of water in the falls throughout the valley.

AUTO SALES GAIN 41% IN CALIF.

(Continued from Page 1)

Indicate for July a healthy gain over the same month in 1921. ANALYSIS BY COUNTIES. An analysis indicating how each county has fared this year over its automotive business in 1921. The county which maintains the greatest car sale increase as well as one of the largest county percentage gains, Los Angeles county bought 23,007 automobiles in the first half of 1922, an increase of 56 per cent over 1921.

San Francisco county purchased 7663 motor cars and its gain over last year amounts to 30 per cent. Alameda county is third in volume of purchases with a figure 5008, and its percentage increase equals 36 per cent.

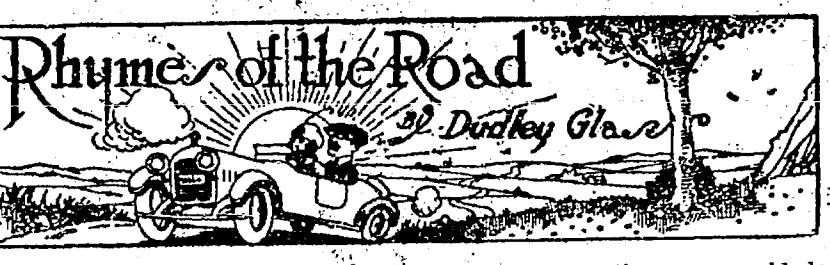

Fresno county is fourth in the state with purchases of 3166 cars and a gain of 53 per cent. San Diego county is next. This section bought 2321 cars and jumped its 1921 average 41 per cent.

Following in order of volume transacted are Kern, Orange, Santa Clara, the Imperial, San Joaquin, Colusa, Sonoma, Santa Barbara and Stanislaus counties, each one booking a big advance this year over last season's trade.

The few counties that did lose were very small buyers of motor cars, the total in the greatest being much less than 150 cars monthly. If the present average is maintained for the balance of the year it is believed by the publishers of Motor News that California will advance its position among the states of the Union to third, and possibly second, for while every state is showing an increase this year none are registering a total which ranks up with the California figures.

Rapidly Builds Real Opposition

It is being conceded now that W. C. Durant is rapidly building up opposition to his former corporation. Durant is now the owner of one of the greatest automobile manufacturing plants ever built, that of the Chrysler Motor Car Company at Elizabeth, and is reportedly also to have the Locomobile plant and to be enlarging all of his other plants.

Some day, they say, we're going to have broad highways through the land. They'll all be built of asphalt or concrete, I understand. And then we'll start by day or night, in sunshine, snow or rain. And know we'll always get there sure and come safe home again. It will be heaven on earth, I guess, for folks who love to speed. And those who want to go somewhere because of business need. I reckon it will help to keep the nation up and thriving. But it will take a lot of fun and pleasure out of driving.

I love a stretch of broad highway when I am in a hurry; I like to step upon the gas and let the speed cops worry. But more than that I love to drift through winding country lanes. Away from folks, away from work and away from trolley cars and trains. I love the narrow, twisting road, the unexpected curves, the trails which wind beside the cliffs and test a fellow's nerves.

The smooth-paved boulevard will be an avenue inviting. But motor tours on roads like that will hardly be exciting. It's great to hit the hills and feel your motor take the bit. Between her teeth and pull as though there was no word like "quit."

It's fine to coax her up the trail to mountain peaks which tower into the clouds, and put your faith in her unflinching power. It's fine to tool her through the sand upon the Southern route. And feel that when she takes you in she'll surely pull you out. The asphalt highway, smooth and straight, with scarcely any grade, causes a lot of touring fun to vanish, I'm afraid.

For, after all, the greatest fun is when we're back in town and get a chance to brag about "that little car's" renown. We tell the gang just how she climbed the Eastport hill on high. And how we passed a Royal Wight and didn't have to try. We tell them of that muddy streton and how we battled through it. The swollen stream we forded

when no other car would do it. We dwell upon those miles of sand, the gullies and the rocks. And boast about the way she stood that trying journey's shocks. Oh, yes, I hope those perfect roads will soon stretch near and far. But when I ride for speed and ease, I'll take a Pullman car.

It isn't much of a problem to pack all the things you need for a two weeks' camping trip into a five-passenger car. The only difficult detail is finding room for yourself and the family.

A guy we hate is Amos Vinning. He always keeps his bright lights shining. Couple of Norwegian enthusiasts are planning a trip to the North Pole and back. The trip ought to offer plenty of novelty and excitement and all that, but it strikes us somebody's likely to find it a long swim to the nearest filling station.

IN MEMORIAM. Here lies young Augustus J. Frye, Whom angels have taken on high. He, raced with a train. For the crossing; in vain! The best he could do was a tie.

UNCLE EB, HE SAYS— it's strange but true, Gwendoline, that no matter what car you own or what garage you approach, there's always a mechanic there who formerly was foreman in the factory that built it.

On bridges, embankments and narrow roads take a slow pace, keeping the car under instant control.

DAVIS CAR DOES 20 ON ONE GALLON

In an economy test conducted by a Milwaukee newspaper last week the new Davis Phaeton averaged 20.6 miles to the gallon of gasoline. A factory letter giving the details of the run has just been received by Davis Motor Car Agency, distributors of Davis cars. The car used in the run, according to the letter, was a brand new phaeton, without special preparation of any kind. It was rolled off the floor and turned over to an average driver, with instructions to take it out and see how far it would run on fifteen gallons of gasoline.

The driver of the car mapped out a course of 216 miles, which it was estimated would just about consume the fifteen gallons of gasoline. On the completion of the run, at an average speed of twenty-five miles an hour, the gas remaining in the tank was measured and it was found that of the fifteen gallons which had been put in at the start four and one-half gallons had not been used. The course over which the run was made, it is said, includes just the sort of conditions which the average driver may expect to encounter in the usual week-end drive.

Dealers Celebrate Car's Birthday

The first Liberty car was delivered July 4, 1916, and the sixth birthday was celebrated July 4 this year by dealers and distributors of this car all over America.

OVERLOADED CARS SPOIL TRIPS' FUN

There is no reason on earth why automobiles should be loaded to the guards by those who are going on camping trips. By this sort of loading, half the fun of the trip is lost, and such luggage carrying may mean danger to the car and occupants and to others on the road. The average car has a load capacity of 1,500 pounds, and it is a dangerous practice to load a car with more than this weight. The Davis Motor Car Agency, Davis and Case distributors here, says: "Driving down the highway over the Fourth of July was more or less of a trick. Practically every car that passed had baggage extending beyond the four-inch limit set by the law. The cars were loaded with stoves and tables and one or two had a mattress piled on the running boards on the left side. On narrow roads this practice is particularly objectionable. Some of the highways of the state are built narrow, and the mountain roads are nearly all narrow, and if baggage is sticking out the side of the car it is likely to be struck by a passing car. If you cannot load your car properly, it is better to leave it at home. There is a right and a wrong way to carry all baggage. You can load the right side of the car to the limit, and it will bother no one. It's just as easy to get in and out of the car through the left doors as the right, in fact it is easier, in some cases.

"If you have to load baggage on the car do it on the right hand running board, but the best place to carry it is in the rear. They are making trunks for the rear of the car now that are efficient, and also provide room for tents and beds and other stuff on top the trunk. If you are going camping, and want to get there with your load intact, be sure that you pack the left hand running board lightly, and put the bulk of the stuff in the rear. If you cannot buy a rear-end luggage carrier, build one of wood and lash it or bolt it to the car. Be sure that the left hand running board luggage does not protrude beyond the limit of safety."

There are any number of ways to go there, but the one that appeals to me most strongly is the run to Feather River and then along the backbone of the wonderful mountains to Truckee, then over the Lake to Lake Tahoe, around the Lake to Emerald Bay, then over the Tioga road to Yosemite. "If you take a couple of weeks to this trip you will see more mountain country than an Iowa resident can find in ten years. The road to the Feather river country is good. Drive to Sacramento, then to Roseville and then to Auburn. If you want you can go up the valley to Marysville in stages and then strike almost due east from there.

40 Per Cent of Car Buyers Found New

While it has been generally reported that 90 per cent of the car sales of the present year have been replacements, a note from the Willys-Overland Company states that nearly 40 per cent of sales for the \$550 light Overland car in May were made to new buyers. The percentage is so unusual as to be noteworthy and bears out the assertion that the saturation point in the automobile field has not been reached and never will be reached while the babies are growing up constantly. Willys-Overland also states that 75 per cent of sales in May were to former owners of Ford cars.

Danzig, Poland, with a population of 350,000, has 561 automobiles—a small number for an American city of 10,000.

High Sierra Luring Autoists Fine Roads, Good Fishing Call

There is no more alluring spot on earth right now than the high Sierra country. No matter where you reach it you find great jagged mountains, snow-covered, yet with fine roads, good fishing and good camping spots. "If you have never been into the Sierra before it is high time that you go there and see what there is to see, and there is plenty," urges Mrs. P. K. Webster, head of the P. K. Webster Company, Jordan dealer. "There are any number of ways to go there, but the one that appeals to me most strongly is the run to Feather river and then along the backbone of the wonderful mountains to Truckee, then over the Lake to Lake Tahoe, around the Lake to Emerald Bay, then over the Tioga road to Yosemite. "If you take a couple of weeks to this trip you will see more mountain country than an Iowa resident can find in ten years. The road to the Feather river country is good. Drive to Sacramento, then to Roseville and then to Auburn. If you want you can go up the valley to Marysville in stages and then strike almost due east from there.

"There is a detour between Auburn and Grass Valley, but it is not bad. From Grass Valley the road to Downsville is in wonderful shape. It was just completed last year and is in excellent condition all the way. The route from Downsville on over to good, too. We have a choice of two ways here—one by way of Gold Lake, and there are real fish in that lake, and the other over Yuba Pass. Both routes are in good shape now. "There are plenty of places to camp if you want to do that and there are plenty of resorts throughout the mountain country where you can get good accommodations without trouble and without breaking the bank. From Feather river you can follow the road via Sierraville to Truckee. You are on the east side of the mountains now, and there are many wonderful places. It is a high-gear trip from Feather river at Mohawk to Truckee. "The run from Truckee to the lake is interesting. The road follows the Truckee river. The road around the lake follows the snow line in places and then winds up to the mountains. At Emerald Bay the road is many hundreds of feet above the lake and the view is wonderful. "The road is good all the way to Myers and also from there on. Here you can go back by way of Hardscrabble, or you can go on over Tioga to the Yosemite country or to Stockton by way of the Kit Carson trail. "This gives you enough mountain riding to last you for a long time. "Of course, you can make any part of this trip and still find a deal of enjoyment."

Attention Should Be Given Loose Bolts

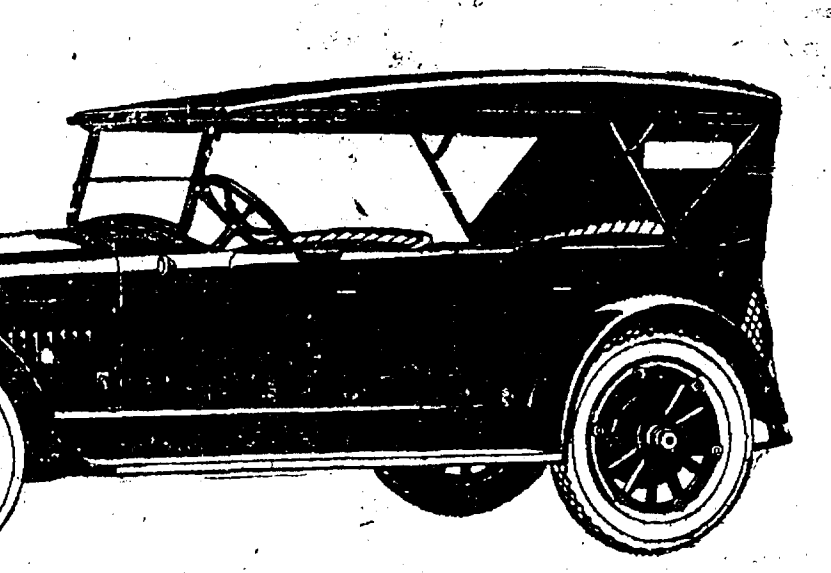

If a motor is subject to considerable vibration there is danger of the bolts coming loose at the base. A wrench should be applied occasionally to make sure that everything is tight. If this is not attended to, almost anything may happen.

Oldsmobile

Economy

ECONOMY consists of a great deal more than the mileage per gallon of gasoline. It means also that the mileage on tires, the cost of upkeep and the bills that totaled up at the end of a year's time show what the actual cost of operation of your car has been. It is especially pleasing to us that scores of owners every year tell us and their friends of the economy of the Oldsmobiles that they drive. The Oldsmobile, they say, gives complete motoring satisfaction at remarkably low operating costs. Consider these facts before you buy any car.

MARIN AVE. MARK AGAIN LOWERED

The steepness of Marin avenue held no terrors last Wednesday for a Paige 6-66 Special, which rambed up this sharp pitched slope last Wednesday in 1 minute 15 seconds. In rounding out this performance, the special Paige set a mark 34 seconds faster than the best stock car time which has been recorded on Berkeley's toughest grade.

The model employed in the test is one the Paige factory constructed especially for competing in hill climbs and its last public appearance of note was up Pikes Peak in Colorado with Ralph Mulford at the wheel.

Carl Christensen, head of the Victory Motor Sales Co. organization, piloted the 6-66 up the grade and his performance was observed and timed by Emil Reinhardt of the TRIBUNE automotive staff. These two were the only passengers carried on the run, which was made from a standing start and completed in high gear for the entire distance of 1.1 miles, the first time by the way, that any car, special or stock, negotiated the eleven different grades in high.

The accomplishment of this Paige model opens the way for tests of similar special models and it does not conflict with records that now exist for stock car competition among which is divided into four different classes, rather according to price.

Any automobile, regardless of its construction, has a task, by no means easy, to lower the time this special made. Motor car dealers who like to try out on the Marin hill know it to be one of the toughest in America. In fact, old timers in the racing fraternity like Glover Ruckstell declare it has no equal.

Were the condition of Marin better than it is Christensen could have lopped off about ten more seconds from his mark. The road surface in several places is so rough that constant traction is out of the question and the task of getting to the top requires clever driving if fast time is sought.

Christensen plans to conquer several other grades while he has the car in Oakland and he has been urged to set a mark on the Mount Diablo grade. The latter climb is eleven miles in extent and is even harder than the grind to the summit of Mt. Wilson, a favorite try-out ground for southern California drivers.

AUTOMOBILE NOTES

Don't forget, when signaled by a vehicle in your rear, to turn slightly to the right and allow such vehicle to pass you on your left.

Sound the horn when approaching a turn in the road or the brow of a hill, for another car may be coming toward you.

Don't forget the pedestrians. They, too, have rights on the streets and highways.

Don't forget that every motor vehicle must be registered in the name of the owner, effective February 1 of this year.

Don't forget to use extra precautions when you see a child crossing a highway.

Don't forget to slow down at street or road intersections. It may save a human life.

Don't forget to look to the right and the left before crossing a railroad crossing.

Don't ignore small cuts. A patch in time saves dollars.

There's nothing skimmed anywhere in the Durant Six. Plenty of power in the Ansted motor, plenty of room in front and in the tonneau, plenty of rugged strength throughout the entire chassis.

The Durant Four Reliability Car running between Los Angeles and San Francisco has covered to date 21,529 miles, and averaged 24 miles per gallon of gasoline and 1,660 miles per gallon of oil.

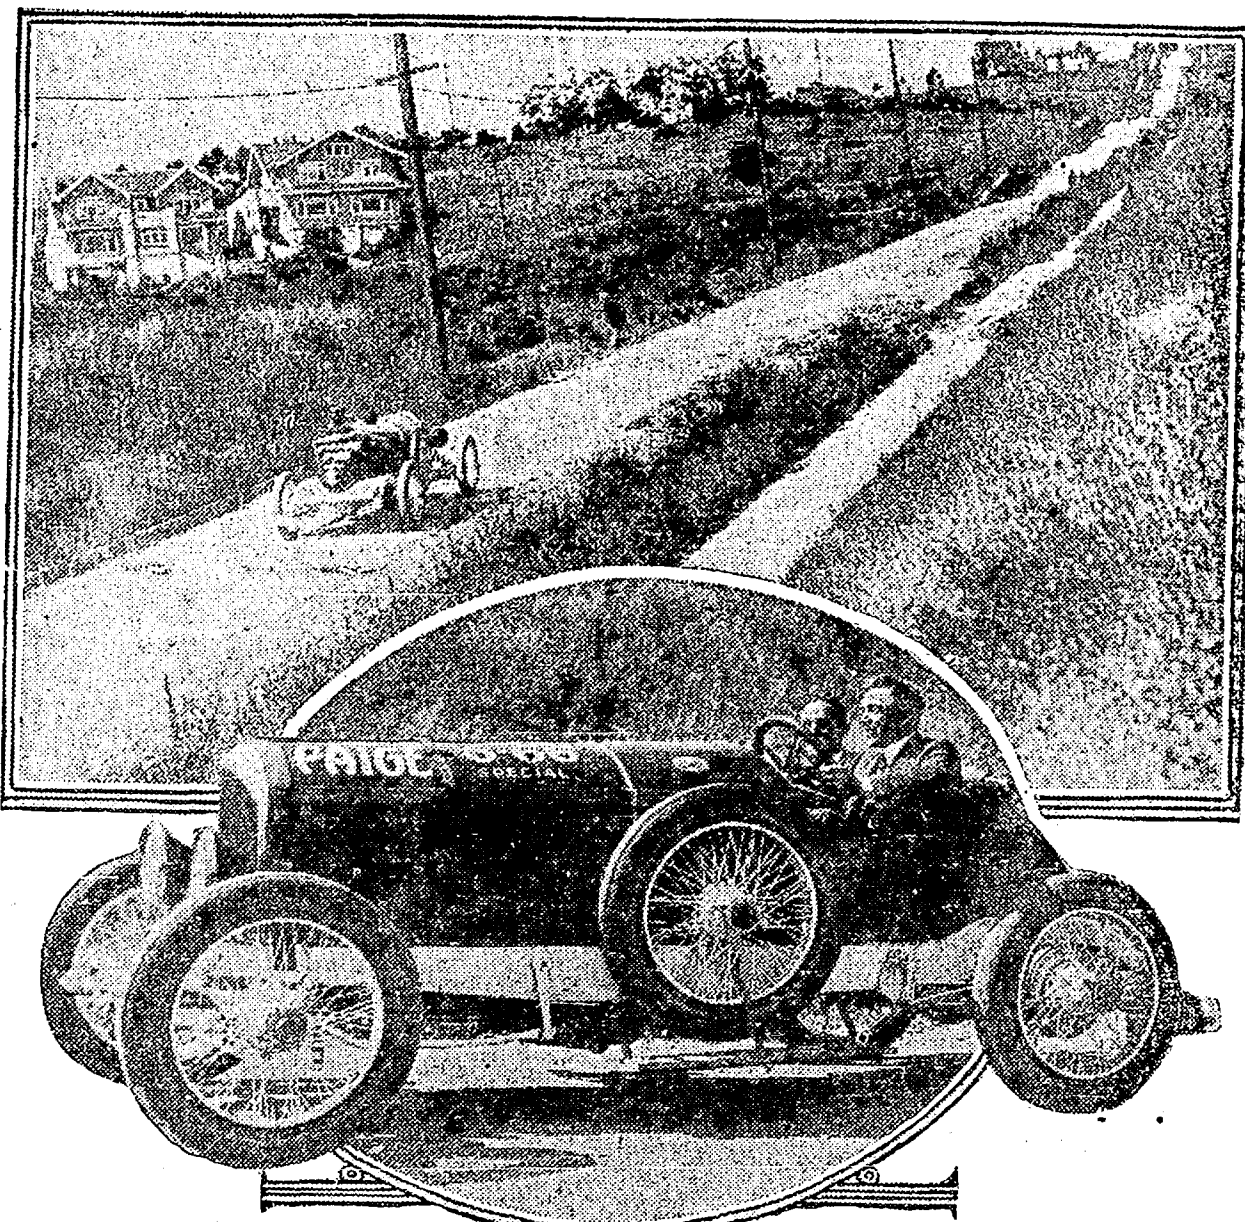

DURANT SIX

Carl C. Anthony, Inc.

Ansted motor, 70-horse power, 123½-in. wheel base, Timken axles front and rear.

Paige 6-66 Special Breaks Marin Avenue Record

A Paige 6-66 Special driven by CARL CHRISTENSEN, mounted the 1.1 mile climb up Marin Ave. last Wednesday in the remarkably fast time of 1 min., 15 sec. The model used is the same Paige Special which RALPH MULFORD drove up Pikes Peak last year in a sensational performance. Below is a close-up of the car showing CHRISTENSEN at the wheel and beside him EMIL REINHARDT of the TRIBUNE.

AUTO INDUSTRY IS SPEEDING UP

The automobile industry is building cars and trucks at the rate of 2,600,000 a year, according to information sent out by the National Automobile Chamber of Commerce.

This is one of the most remarkable things in the history of the business world of the United States. Here is an industry which was practically shut down last winter and now is going ahead at a greater rate than ever before in its history.

"Before the first six months of this year had come to a close the Paige-Detroit Motor Car Company, builders of Paige and Jewett cars, has built and sold more cars than it produced during the entire calendar year of 1921," announces Carl Christensen, manager of the Victory Motor Sales Company.

"Comparing the first six months of 1922 with the same period of 1921, the increase is approximately 225 per cent, according to figures from the factory."

"When the fact is taken into consideration that Paige was well up among the leaders in 1921, the phenomenal increase in 1922 means that demand is two and a half times as great this year as last."

"The factory did not carry a bit of high-priced inventory into the current year. They took all their losses last year, reduced everything to current replacement prices and entered the new year on a rock-bottom basis. Then production

was planned with utmost care and efficiency on a volume basis and the factory was able to offer a quality product at a volume price. "Demand has been increasing ever since the automobile shows of January and February, and the factory has been hard put to keep up with orders that are coming from all over the world."

Greatest Touring Year Is Reported

"This is the greatest touring year we have ever experienced," says Charles Van Damme, president of the Richmond-San Rafael ferry line. "When we started a two-boat 45-minute service on Sundays, holidays and during rush periods, we figured that the two boats would only be needed for a few hours, even on the busiest of days."

"Last year, in fact, travel, though heavy at times, was not sufficient to demand the fast service, but this year the opposite is true. Over the Fourth of July holiday week we ran the two boats almost continuously."

AVERAGE INCOME OF MOTORISTS \$349 A MONTH

Cleveland statistical hounds have figured it all out. The Cleveland bankers find that the average price paid for a car by Cleveland dealers up to May, 1922, was, in the 2500 instances taken into the accounting, \$1361. This does not include the Ford class, however, as it was sought to answer the question, "Who is the average motor vehicle buyer?" It was found that the average buyer outside the Ford class had an equity in real estate of \$4286.08, with a definite monthly income of \$349.70. It was also shown that in buying a car of an average price of \$1361 he paid down \$698.31 and agreed to pay the balance of \$662.69 at an average monthly payment of \$95.60. The report showed that the average buying age was 34 years, that 74 per cent of the buyers were married, 82 per cent have bank accounts and 69 per cent carry life insurance. The bankers state that

NO BUSINESS SLUMP FOR LAKE COUNTY

Business depressions, strikes, revolutions and various other troubles may depress the rest of the world, but up in Lake county things are always the "finest kind." That is, if you ask Bill Spiers, and nobody ought to know better than he, for he has lived in Lake county something more than fifty years. More than that, if Lake county had been able to keep all of the population that Bill Spiers has hauled into it for the last half century there would hardly be standing room in it today.

"For years almost past the memory of the oldest inhabitant Bill Spiers has been staging people into Lake county. Before the automobile came along Spiers had more than three hundred head of fine horses and his stages carried people to all of the Lake county resorts. When the automobile came along Spiers did not take to the new invention very quickly. You could hardly expect a Kentuckian and a lover of horses all his life to do that."

"More than once, in the days when automobiles were first appearing on the roads in Lake county I've had to pull a gun on some motorist that thought he owned the road just because he had a car," said Spiers last week. "It wasn't always an easy job to get a team of eight frightened horses past an automobile on one of those narrow mountain roads, especially when the motorist wasn't willing to give you a least part of the road."

"Back in 1912 I started to replace my horses with automobiles, and now, of course, all my stage equipment is motorized. The horse is entirely too slow these days."

One of Spiers' most recent purchases for his stage work was a big Packard Twin Six.

Magnetized Screw Driver Auto Aid

A magnetized screw driver is a great convenience for the man who works about his car. The magnetized tool will pick up screws, nuts, bolts or other metal objects that have dropped into inaccessible places.

Again, in setting screws, especially small ones, the magnetized screwdriver may be used by simply holding the screw until it is set in place, and this may be done by one hand if necessary. To magnetize a screw driver all that is necessary is to hold it up close to the dynamo for a few minutes until it is magnetized.

Flat Tire Driving Bad On Cobbles

When it is absolutely necessary to run on a flat tire keep the tire in soft dirt if possible. If the trouble occurs on city streets run on a trolley track rather than on cobblestones.

Notes arising out of the purchases of automobiles and light delivery trucks, in all instances, have proven entirely satisfactory.

TIOGA ROAD OFFERS LURE TO MOTORIST

One of the most scenic drives in the whole United States of America is now available for motorists and many have gone over it in the last few days. The Tioga road between Yosemite National Park and Tahoe points is open and in good shape. It was opened July 10 and is in far better condition now than it was then. The government road crews have removed all the bad places, but there is still considerable snow in the high places. The pass is over 9000 feet high at the summit.

"That the closed car is becoming the recognized unit for all sorts of touring and that many hundreds of this type of machine have made the trip over the roads to Tahoe and Yosemite and now over Tioga, is a well-known fact," says E. A. Hamlin of Hamlin & Wichman.

"My wife and daughter made a trip to Tahoe last week in a Hudson coach and had a fine outing. I went up there over the week-end and drove the car back home. Coming up the grade from Myers we hit a thunder shower, and it poured rain and snow alternately for about half an hour. We put up the windows and kept on going. Several open cars were on the grade and their occupants got a fine wetting."

"We are planning a trip over Tioga just as soon as possible, and will surely make the run before the snow starts in the fall."

"Several Hudson coach owners have come into our place and made the last few days, who have made the trip over the Tioga and all are enthusiastic. They praise the comfort of their closed cars, and say they had no trouble."

"My idea of a real mountain trip is to drive to Tahoe and then go over the Tioga road to Yosemite valley. There is a wealth of scenery there and plenty to be seen. There are several lakes nestling high in the Sierra along the Tioga road that have plenty of fish in them. In fact, in some of these snow-fed lakes the fish are voracious and will bite at anything. These lakes were stocked with trout many years ago, and since few fishermen ever get there and the season is only a few months long, they have been allowed to grow to large size."

"The road over the Sierra is good. It is better now than it was a year or two ago when more machines have gone over it and cut it up a bit."

"Be sure that your car is in good condition before you make this trip. It is easy enough if your car is right, but if it is old and full of carbon it will boil and you will lose power, so that you will not have enough left to pull up over the heavy grades."

"It is a simple job to have the motor cleaned out and the radiator hose connections clear."

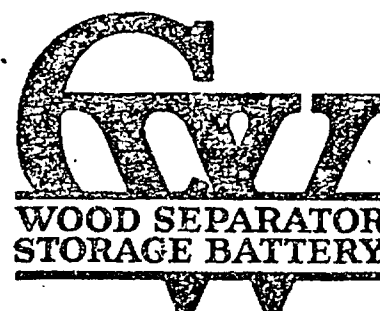

"The Tioga trip is one of the best in the West, and if you can you should certainly make it at the earliest possible moment this summer."

HELPFUL HINTS

After I shift into high with my car it takes a minute or more before the car picks up when I step on the accelerator. This is so on second or on first. I haven't been able to dope out the reason for it. Can you help me? G. H.

A connecting rod broke in my engine right in the middle and I claim I ought to get a replacement because of defective material. Can a rod break in the middle from any other cause? E. H. R.

While it is possible for defective metal to have been the cause, it is also quite likely that improper alignment of the rod caused the trouble. Or if the bearing was recently tightened and brought up too much this might induce excessive strain on the rod, which would break at its weakest point.

Tells Why He
Bought

Studebaker

Oakland, Calif.
June 25, 1922

Weaver-Wells Company,
Studebaker Distributors,
Oakland, Calif.

Gentlemen:
Replying to your recent enquiry as to why I bought a Studebaker:
The Studebaker Big Six I have just purchased is my third Studebaker and the best reason I know of for buying it is the service I got out of the other two. The abuse those two cars were forced to stand would have wrecked most automobiles. Neither of them have ever given me any mechanical trouble.
Incidentally, most of the members of my family are Studebaker owners and boosters.
Yours very truly,
Art Klein

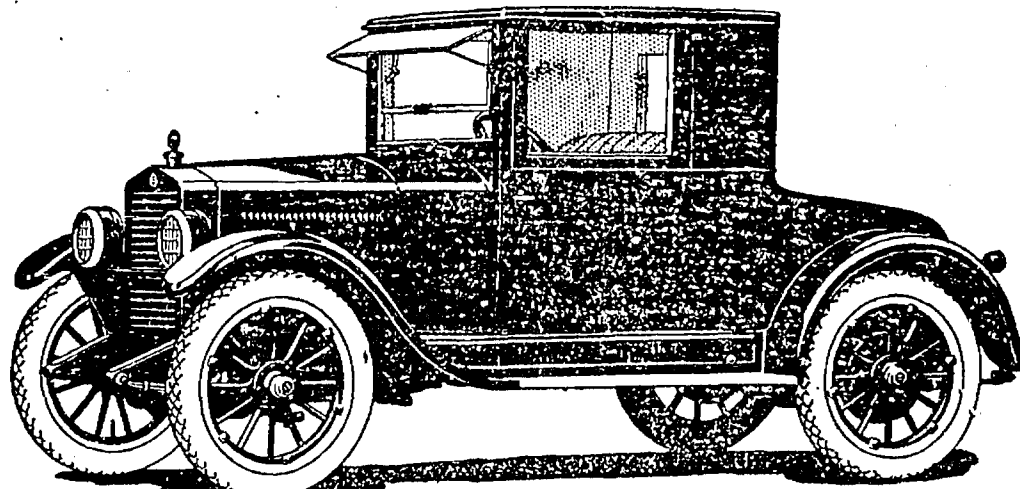

This Is a Studebaker Year!

Studebaker offers a wide choice in 3 chassis designs and 13 body styles.

The Cabriolet

\$1195

An Ideal Car for Individual Transportation

It is especially adapted to business and professional use. It means fast, dependable transportation, with comfort and economy.

This train-like regularity is an Essex standard that everyone knows.

The Cabriolet carries no useless weight. Though not large it is commodious. Ample seat and leg-room permits comfortable lounging. Also note the great carrying space provided for samples, parcels, cases, etc., in the big rear deck locker.

The Cabriolet is solidly built to keep free of squeaks and rattles. Doors are equipped to stay snug-fitting. Upholstery is of fine, long-wearing materials. Plate glass windows are operated by the latest crank-handle lifts. A thief-proof lock, reduces insurance cost 15% to 20%. Chassis lubrication is taken care of with an ordinary pump oil can. No messy grease cups.

Every line is smart, trim and graceful. Come see it. It offers the distinction and protection of a fine, closed car at but little more than open car cost.

NEW MODELS ARE EAGERLY LOOKED FOR

"Our first week in business has been rather a surprise to us as newcomers to Oakland," says O. C. Hinz, Liberty dealer here. "We announced our opening in last Sunday's TRIBUNE, and that day we had a great throng of people in here looking over the latest models. We took several orders before the day ended, and have been going at full speed all week long."

"The showings of new Liberty cars attracted a large crowd. The new cars have many features never before seen on any machine and are completely equipped."

"The Liberty plant in Detroit is modern in every way and completely equipped. The company is one of the younger outfits in the business, but it has done remarkably well in the past six years. Now the factory is working to capacity and building as many cars as possible in order to fill the demand which is coming in from all parts of the country."

"Our decision to handle the Liberty in this territory was made after a complete study of the merchandising methods of the factory and of the market here."

"Before coming West I was dealer for a well-known six-cylinder car in Lansing, Mich., and my closest friend was a Liberty dealer in Detroit. I had many opportunities to study the car at first hand, and when the opportunity presented itself out here I took the agency for the Eastbay cities."

"Our organization is now functioning and the rough spots are being eliminated. In the near future we will have a complete service department and shop in the rear of our present salesroom on Broadway near Twenty-ninth."

"We will carry a stock of parts so that Liberty owners on this side of the bay need never have any trouble in obtaining service at all times and under all conditions."

"We are certainly well pleased with the reception of the new Liberty models here, and have many prospects on hand."

"We have tested the car over all sorts of hills and have yet to find one hereabouts that we cannot master in high gear with the new Liberty."

"We are certainly glad that we chose Oakland for headquarters for the Liberty here."

GUARD AGAINST EMERY GETTING INTO CYLINDERS

When grinding valves, be careful not to let particles of emery get into the cylinders. The particles are harder than cast iron, and if some of the emery is caught between the cylinder walls and the piston they never stop grinding. When completing the job, carefully wipe all the emery from the valve and seat and finish with kerosene or gasoline on a cloth as an extra precaution.

Plant to Assemble 400 Closed Cars

Bulck Motor Car Company is preparing to occupy the former plant of the Scripps-Booth Motor Car Company at Springwells, Detroit, and will there assemble 400 closed cars per day. This move will relieve the Flint plants of much pressure. It places the Bulck closed car plant very near to its body supply, for the Fisher Body Company, a subsidiary of General Motors, manufactures these motors. From 7:00 to 10:00 men will be employed in the new plant. Originally this plant was built for the Saxon Motor Car Corporation.

1,563,000 Autos Produced in 1921

The total production of new cars in this country last year was approximately 1,563,000, as contrasted with 2,205,000 in 1920 and 1,876,000 in 1919. The estimated production for this year is 1,800,000 cars.

The State of New York will receive in the next three years approximately \$2,464,299 from the Federal Government as an aid in the construction of state and county highways.

"The Ring with the Spring"

The M. & H. Tension Piston Rings

will last the life of the automobile motor in which they are installed—that is guaranteed.

They will give satisfaction—that is guaranteed, too!

They will stop "piston-slap" nine times out of ten.

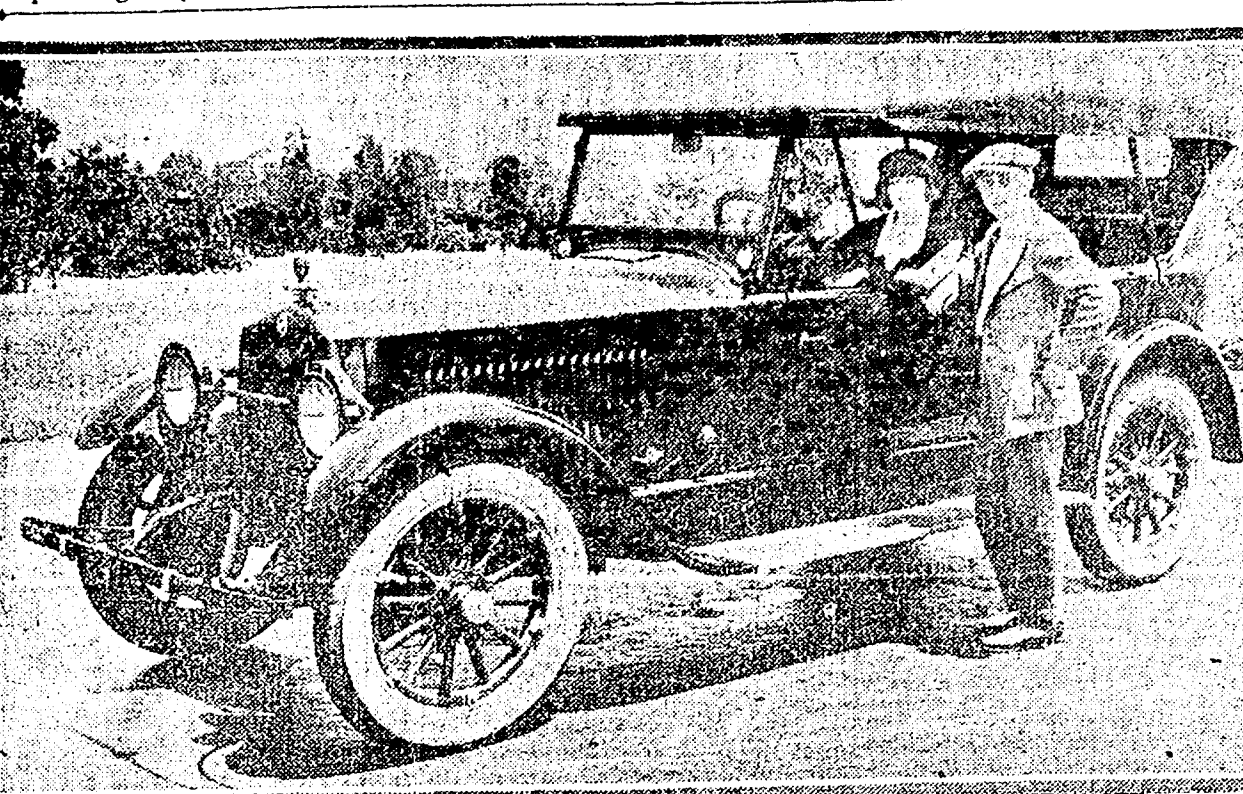

They will always reduce the consumption of oil and gasoline!

They discourage the formation of carbon!

Likes Big Fast Car for Highway, Too
ART KLEIN, speedway star, MRS. ART and the Big Six Studebaker they use when the racing champ "does his stuff" in plain touring fashion. ART declares he gets more thrills out on the open highway than he does when rambling around a fast track at 112 m. p. h.

GOOD BRAKES ARE ESSENTIAL, CLAIM

Without brakes on an automobile, what would happen? It wouldn't be a safe thing to even try to give an idea.

"Motor car owners are neglectful about their brakes and when some accidents happen the other fellow gets the blame," claims George W. Carr, vice-president and sales manager of the Pacific Coast Brake Service Inc. "We have over two hundred stations in California and know how to judge who neglects his brakes and who doesn't."

"An automobile should have good brakes just the same as it should have good oil or spark plugs. I think if one has good brakes, and the motor runs properly, safety is assured."

"Thrills usually come to the neglectful automobile owner while he is driving in the mountains, and when he gets back to the city where he can have a reliable put in he swears that he will never make another trip unless his brakes are right. This should be done before the trip and not after."

One-Armed Motorist Fined in New Jersey

In New Jersey a motorist was fined \$25 for violation of the state law which prohibits one-arm driving. According to the magistrate, it takes two arms to drive a car properly, and two arms to hold a girl properly.

The District of Columbia, with 40,625 motor vehicles, has 867 cars for each square mile of territory.

TIRE VETERAN IN BUSINESS FOR HIMSELF

H. A. Shaffer, a veteran in the tire business, having served in various capacities for some of the largest tire manufacturers, has opened in business for himself at 2256 Webster street.

He will act as distributor for India tires, which are manufactured in Akron, O.

Shaffer declares that there is a big future to the tire business and he thinks that by starting now he will have a better chance of growing as business conditions improve.

He is very well known about the bay by tire dealers.

From Washington To Oakland By Auto

Mr. and Mrs. C. M. Harter and family of Tacoma arrived in Oakland last week in their automobile, having driven from the Washington city to Oakland without trouble and in fast time.

They report the roads in good shape.

Harter is connected with a Tacoma firm selling automotive equipment and is well known in the north. They are guests here of Mr. and Mrs. W. H. Sinclair.

Auto Will Race Passenger Train

A race between an automobile and a passenger train is scheduled for July 18 between Garden City, Kan., and Littleton, Colo., a distance of 500 miles. Charles W. Bogart of Garden City will pilot the machine against the Santa Fe Flyer. Permission to exceed speed limits is being arranged.

BATTERY CHOICE IS IMPORTANT

"There's probably nothing that you can buy where you are as much at the mercy of the seller as in the case of a storage battery," said Tom Dooling of Dooling & Graham, Exide battery distributors.

"If you are contemplating the purchase of a used car you can see whether your wheels wobble, whether there's excessive play in the steering gear or whether the radiator leaks like a sieve. Furthermore, you can listen for loose bearing knocks or worn gears."

"But when you buy a battery you buy it on its record of past performance, the reputation of its maker and faith in the man who sells it."

"Motor car owners should be very careful about buying rebuilt batteries," points out Dooling.

"In many instances they are built of parts taken from discarded batteries, among which there may be found some plates that are not altogether worthless, but which at their best cannot give much more service. Likewise there are separators of which the same can be said."

"By using these parts, adding an occasional new plate and filling up the jars with new electrolyte, the makers of these rebuilt batteries can produce an article which on the outside looks equal to new."

"But after a few weeks' service trouble may commence and, once started, it's useless to try to stop it. For it isn't one plate or one separator that goes bad, but practically all of them at once."

"Do you wonder, then, that I am

RACE DRIVER TELLS FANS OF THRILLS

When does the racing driver get his greatest thrill? Is it on the fast speedway as he hits behind his racing motor and takes the lead in the race to the accompaniment of the cheering fans? No, it is not, according to Art Klein, winner of many a hard fought race in the speed bowls of the country.

The big thrill of the racing driver is when he escapes death at the hands of some novice passenger car driver on the highway or the crowded downtown streets at twenty or twenty-five miles an hour, according to Klein.

Klein just recently purchased his third Studebaker car, and in a letter to a member of the Weaver-Weiss Company, Studebaker distributors, he recites his adventures while driving the car from Oakland, his home, when not making the speedway circuit, to the recent races at Tacoma.

"I flirted with death a hundred times on the way to Tacoma," said Klein. "The Big Six, which I just bought, would creep up to fifty miles an hour before I knew it. Mrs. Klein, who was with me, tried several times to guess the speed while the speedometer was covered up, and when she guessed twenty-five miles an hour we would be going forty-five or fifty."

"If anyone tells you that the racing driver faces death every time he drives a lap in a race, just tell them from me to forget it. I have faced death more times on the highway trying to outguess the other fellow than I ever faced on the speedway."

Autos Kill 12,500 A Year in America

Automobile accidents caused the death of 12,500 persons in the United States last year—one death every 42 minutes, day and night—and more than 300,000 persons were injured.

very positive in my advice to leave them alone? It makes no difference what you pay for them, they're an extravagance that no motorist can afford."

Too Much Equipment Is Carried Campers Err in Overloading Cars

Motorists who go camping and take everything along but the family bathtub are making a great deal of trouble for themselves.

Next time you drive down the highway just note the cars that are loaded with camping material until the fenders almost touch the tires.

"It is not necessary to pack too much with you on a camping trip," says Howard B. Rector, manager of the Pacific Motor Company, Nash distributors here.

"You can have a great deal more fun if you select your equipment with the idea of light weight and necessities. Far too many of us take too much along. We have beds and tents strapped to the running boards, and the rear of the car filled with canned goods and eatables and suitcases and a hundred and one things."

"Don't forget that you can buy food in every town through which you pass, and if you are going into the mountains where you will be away from food supplies you had better buy them at the last place you pass. Then you will not be carrying a great quantity of stuff and cluttering up the car unnecessarily."

"If two people are going along it seems foolish to me to have a tent that will house four. Get a small tent and a small stove, gasoline preferred, because you always have fuel handy and in some places wood is hard to get."

"The secret of a good camping trip is a comfortable bed. If you can sleep well at night you can put up with a great many other inconveniences during the day. But you don't have to do that. You can have all the comforts of home, if you plan your equipment intelligently."

"There are good camping grounds in practically every city and town up and down the country. If there is not you can go until you find one. You have a mobile unit of transportation and can go as far as you like and when you like."

"Then, too, it is a good idea to stop at a hotel once in a while to get cleaned up and have a meal that you do not cook yourself. It tastes good now and then on a long camping tour."

"Another thing, if you load your car with five or six hundred pounds of stuff, don't think that you are going to have the motor pull as well as if you had only a hundred, and a camping outfit for four can be limited to a hundred pounds without trouble."

"Plan your trip and what you will take with you and you will have a lot more fun. You can find what you want if you have a few things and if you have a lot you spend time that should be given over to pleasure in hunting for things that you need."

Fly to Home of President Harding

Captain Eddie Rickensacker and his personal representative, Steve Hanigan, flew from Detroit to Marion, O., the home of President Harding, for the celebration July 4, where the captain was a guest of honor. The captain addressed a large gathering of the Ohio American Legion at the State Fair Grounds at Marion. The De Havilland Four plane in which Captain Rickensacker flew was loaned to him by Colonel Jesse G. Vincent.

First Rubber Tires Opposed By Police

When the first set of rubber tires were placed on a carriage in Boston, Mass., 70 years ago, the police objected to the use of the vehicle, because it was claimed that rubber-tired vehicles were a nuisance and a menace to the safety of pedestrians.

CONDITIONS BRIGHTER IN AUTO TRADE

"Conditions throughout the automobile industry in California are better right now than at any other time in the history of the state, and there seems to be no sign of a slackening in the pace of the motor car trade."

This is the opinion of Robert W. Martland, secretary-manager of the California Automobile Trade Association, who has just returned from a month's trip through California. He has addressed several thousand men in the trade and exchanged ideas with them.

"Southern California is booming ahead and the north is just as good or almost so," says Martland.

"On my trip north I was accompanied by Gordon Lee, chief of the automotive division of the United States Department of Commerce, and he told me that California was far in the lead in the matter of automotive business, and other business, too. Lee is making a tour of the country for Herbert Hoover, secretary of commerce."

"The best indication of the revival of trade is the condition in the farming centers. They are buying automobiles, trucks and tractors there, and paying for them without long terms."

"The farmers are the index of prosperity in any state, and California farmers find that they will be able to get fair prices for their products this year, and they also found that they could not get along without automotive equipment, and they are getting it right now."

"Conditions look brighter than ever before and the whole industry and practically everyone in it, is optimistic."

Oil Only Remedy For Car Squeaks

Oil is the only remedy for squeaks in the car. Friction between the body and the frame, mud guards, springs and spring clips, tire carrier, hood, radiator supports and many other places will cause noise. Squirt oil into all the likely places and most of the unlikely places and the annoying "birds" will be finally suppressed.

Autoists Need More Suits Than Others

Manufacturers of clothes are of the opinion that the motorist needs more suits than the average pedestrian. The reason for this is that the back of the coat and the trousers seat are constantly rubbing against the upholstery.

LIBERTY

A HIGH GRADE SIX at MODERATE COST

Our first week in Oakland as Liberty Six Distributors, has convinced us that residents of the East Bay Cities are interested in a high grade six cylinder automobile at a reasonable price.

We opened our new salesroom on Broadway last Sunday and since that time several hundred motor fans have looked over our complete display of Liberty Six models.

The Liberty is a well built car, priced right, and gives years of service at low cost.

Let us show you. Open evenings.

HENNESSY TOURS THE NORTHWEST

Spokane Wash.-July 9-1922.
Mister Jim Hoolley—
Auto Editor-TRIBUNE paper of U

at Oakland by the Lake.

dear Jim—

It being that I have come to Spokane strictly on business for the most part it should be up to me to tell you all about the chamber of commerce and the Rotary club and the B. P. O. E. (meaning Elks) of the place but Jim since I only got in the town last P. M. by automobile (JUST A REAL GOOD CAR) and I have not yet got an introduction to the mare and the rest of the offshoots of the city and all I know is what I have seen in the lobby of the Davenport Hotel. I guess you know all about the hotel above mentioned. It has a lot of nice seats in it which are like beds and they have named them Davenports and you can buy one at Jackson's Furniture store or at Bruenners and perhaps also at Mr. Capwells establishment which is on the corner of the city of Oakland and which you might of read about in an advertisement in the TRIBUNE paper if you are one of the subscribers of that mighty journal of the news etc. of the West Bay District.

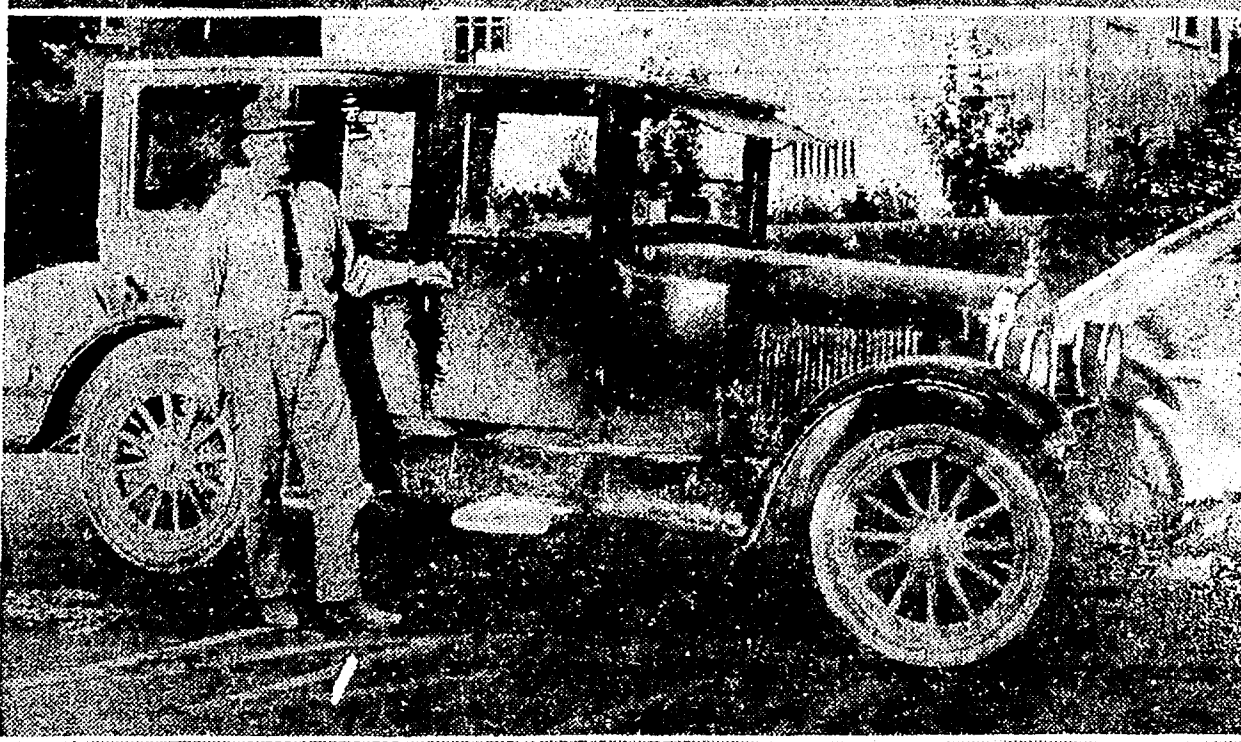

Now Jim I have told you most everything about Spokane but I have not told you yet about Portland which is a town in Oregon situated enroute to Seattle if you are headed in the direction of Alaska from Oakland. Portland is a city of a town and the mare which is Hon. Mister George Baker is a pal of mine already but not yet a buzz pal although he will be after we get organized with a bottle of cough drops or perhaps Scotch liquid. The mare was out to meet me when I first came to the town which he mares and they were also Cecil Smith which used to be the best publicity man on the Moreland Motor Truck Co. pay roll. Smith welcomed me with a bottle of his own brand and we got organized right away and called on the phone a lot of sweet potatoes which was all too busy to give us some attention so they were nothing to do but go over to the place where we were to have a talk to Chas. Dunham and Doc Cook. I says to Doc Cook I had the rupudupus and he said that was one of the worst things a fishman could have and he gave me a prescription and permission to dance 5 times with his Mrs. After I got the perscription I never wanted to dance with nobody because I could have a lot of fun dancing with a mail box and a garbage can on the main street which is called Broadway like in Oakland.

NOT RELATED TO PEGGY.
This is a bird in Portland which is mister Gilbert Joyce and his business is just like the Venus in Oakland and it is called the Hazelwood. I went down to see Gilbert and said where was Peggy and he said he never heard of her which goes to show all is not gold on a gold mine and what is the use of having your name in the papers when nobody reads about it? If you go over to West Oakland to the St. Francis (The Powell St. Shack) you tell Peggy that they are a brother or cousin of something up here which never heard of her and maybe she can sometime get a job in the Hazelwood and wear a white and pink uniform like a nurse or something.

This A. M. I seen a friend of Cliff Durant which is Dr. J. J. Rosenberg and he says to me tell you to tell Cliff everything is O. K. with him and hopes Cliff is the same. When you see Frank Herman you tell him I seen his friend Claude McGee of the Howard Automobile Co. which you may know handles the Buick auto. Claude is still driving a Buick which shows he is satisfied with his job. I ast Claude if he was breaking any records now and he says yes he is staying home five nights a week which is a record for any automobile man. This lunch time I seen Frank C. Riggs of the Overland Pacific Co. up at the Multanmah Athletic

Oakland Motorists Make Long Tour to Yellowstone

GEORGE A. BROWN and the Cleveland Six Sedan in which he toured to Yellowstone National Park. The car made a perfect score and Brown enjoyed the trip to the great park.

Club and he said did I know how was the Athens Ath. Club. I said for him to right to President Norman De Vaux and he said he did already and I said he was the 80th bird in Portland which had role for a Star auto contract.

I never meet Mose Cohen had a brother up hear and I was surprised when I seen he had two brothers. One is Ed and the other is Arnold. The brothers Cohen are the Oldsmobile Co. of Oregon and the car which they sell is the Oldsmobile, the same which J. W. Leavitt sells in S. P. and that other super of Oakland, Los Angeles.

FAIRY SHOULD KNOW BETTER.
In the TRIBUNE paper I seen that Capt. John H. Fahy got his arm broke by trying to crank a motor racing car. That only goes to show that a military man should keep to his own profession and if Capt. Fahy had of kept pushing on the reins of his horse "Blanche" instead of trying to wind up an automobile he would of never have busted his lunch hook. And Col. R. J. Faneuf also joins me in the above mentioned sentiments. For your information Col. Faneuf used to live in Oakland and in the recently advertised war which made a general out of mister Thornwell and a near colonel out of Rhiney. Rhinehart's pal, Elmer Cox, Faneuf was col. of the reg. that Fahy was capt. of and Mary Pitchfork was godmother of.

Right now Col. Faneuf is up in the big town of Wauwona to be there for a week and he is no longer a colonel in the U. S. A. but a member of the Durant Motor Co. Cal. army and he has a better job than in the army and he is a lucky bird because Gen. Strong can never bust him cold for having a drink or maybe two or three which ever the case may be. Ast C. M. Steves if he is getting his paper from Seattle is regular every week. Steves subscribed to the Katsudura Shimbun Jappo which is the Tribune paper of the Japanese republican party of Oregon and Wash. Ever since Mr. Steves has came up here the Japanese boys all has been cuckoo about him because he thinks they are O. K. and out to the Tacoma reg. they was about 5 thousand Japs all rooting for Cliff Durant because they know he was Cliff Steves boss and by the way they is about 6 hundred Japs driving Durant's cars in Seattle. That only goes to show you Jim that Makado's little playmate is strong for Steves. Since H. Timmer McNight has went back to Oakland I have not never heard nothing from him but I guess he is O. K. and basking in the sunshine of Cal. instead of enjoying the cool fog of this land of cows, chickens and overgrown hedgers.

ONE FOR BRICK MULLER.
When I was over to Seattle I was out to the University of Wash. and I had dinner in the Signal Club house which is a club they called a Frat for short. I ast some of the rents of the Signal Club was Wash and he beat Cal next fall in the annual game which is played every year and they says to me yes. And I said they was April phool and

SPIKE HAS RUN IN WITH SPEED COPS

wanted to bet some soda crackers they was cuckoo so if you see Brick Muller you tell him these birds is going to try to beat Cal. if they get a chance to play.

These birds of Washington is all swelled up on their thirst because they purty near beat the NAVY in the rowing race and I said they should of seen my crew race on Lake Merritt and they had to admit that with Bill Webber, Chas. Hebrank, Bill Singer, Bill Brown, Bill Moyle, Bill Jones, Bill Bailey and Bill Potenger I had a crew which was all to the class for anything from row boats to making moonshine or even drinking it for pleasure or profit.

You remember Major Reed M. Chambers which used to be a resident of Oakland? He is now in Seattle and his job is a employee of the Durant Motor Co. and he went in a boat race with Bill Dullmage on Bill's yacht and the old turn won the Brentwood cup over in Canada. I seen Reed and he says I was to tell you hello for him and also tell the same thing to A. L. Warrington. I will tell you and all you have to do is to tell Warrington.

This bird Benson which has the Stephens sally-ant Six has a hotel in Portland and when I was in that town I stopped on the top floor of his place which has his name on it like Mr. St. Mark has his name on his hotel; the one across from the TRIBUNE paper and incidentally the he brummet hotel of Oakland.

NEW BRAND OF COPS.
Down in Cal. we think the speed cops is the Puruvian but when you get up in Wash and Oregon you find it is really the bunk and Cal. is O. K. These birds only allows you 20 M. P. H. on their highways and in Oregon the Secretary of State mister Sam Koser has a law which is the bunker hill for fair as it don't never allow no dealers license to be O. K. from Cal. and even the boys which is dealers in Oregon can't never take their cars on the highway no place except to make a demonstration. How is that for a rotten deal and it is almost as bad as British Columbia where you can't never take no car with a sign on it or a dealers license or a tire cover. That is sure the hard luck for the boys which sells autos. And Jim out on the road in the middle of the desert they is a sign which says BOUNDARY OF PORTLAND SPEED LIMIT OF 20 MILES PER HOUR.

That sure is the limit and about a mile down the road they is a sign reading nine miles to Portland and then they is a speed cop there on the job to see nobody don't never go fast enough to get his motor warm. And up in Chehalis, Wash they is a sign on the telephone pole in front of the St. Helens Hotel which says No Parking On This Street After 10 P. M. That is a kick Jim and you is supposed to be in bed or fall by 10 o'clock in the P. M. so the sheriff and his assistants can go home to bed.

They is a lot of ferry boats up here which is a kick. They goes down grade with the tide which usually flows down hill and that is about as fast as a trout can fly but when you want to go the other way it is the bunk O. K. because it can't never be made in less than a hour for about a 15 mile with a little tug boat pulling a barge which is the Oregon and Wash name for a raft.

After it is all said and done Jim Cal is the best place for a motorist auto driver which allows you 35 M. P. H. and has good paved roads. I am not never again going to kick if I get pinched for doing about 50 or 60 because if a man did that up here he would go to the pen for life or something.

Well Jim I have told you about all they is to tell except about the swell dancels I have met up with and if I tell you about them some bird may hear about it and come up and beat my time which will be a dirty trick. I leave it to you if it wont.

REGARDS TO CY ABBOTT, ETC.
Jim till I see you in person gives all my buzz pals my most regards including Rosey Rosenthal, Cy Abbott and tell Cy. also I have some fine new formulas for making new Crow, Bob Martland, Ralph Friedl, Dave Aronsen, Walter Branch, Les Manning, Lloyd Roberts, Abe Meier, Pete Peroni, Dan Shertle, Doc Newell, A. H. Baeus, Percy Walker and Jerry Collier which is Steves buzz pal. Also tell Jimmy Hatto I wont tell his Mrs. about him shooting some craps and taking part in the commencement exercises up to Shay's Select School for Manly Boys if he provides me with a bottle when I again get back to Oakland by the Lake.

Yours in Hock,
Spike HENNESSEY

P. S. Tell his honor the mare, John L. Davis that I and the mare of Portland is rivals for the affection of Mary Garden only he kissed her several times and I never got even started yet, but when I do Mary will get a thrill O. K. I leave it to you if she wont.

SPIKE.

OAKLANDERS END TOUR OF 4000 MILES

Traveling almost 4000 miles in the last month, including a run to Yellowstone National Park, Mr. and Mrs. George A. Brown and Mrs. H. Little have returned to Oakland in their Cleveland six, and are telling their friends of the wonderful trip they have just completed.

The party started June 16 and returned last week. They made the entire journey in their Cleveland six and had no trouble at any stage of the trip, although they encountered some rough roads.

They went north to Portland, Ore., out the Columbia River highway through Eastern Oregon, and Yellowstone Park. In this Eastern Oregon trip they encountered some rough roads. They had to fight their way over boulders and use detours around construction work.

They drove through the Yellowstone, camping along the way, had a fine time and covered 300 miles within the park boundary alone.

They then drove to Salt Lake City, Utah, and came back home over the Lincoln highway. They found the road under construction around 125 for about seventy miles. They then branched off the Lincoln road and went to Tonopah, Gardnerville and then around Lake Tahoe and then home.

The party traveled 3931 miles.

GOOD TIME FOR YOSEMITE TRIP

With the holiday travel over the Fourth of July breaking records into Camp Curry in Yosemite Valley, there is plenty of room there now for everybody, whether they want to camp or stay in the hotels and hotel camps, according to word received from Mrs. D. A. Curry, manager of Camp Curry.

There were more people here over the recent holiday than ever before in the history of the valley, says Mrs. Curry. "The government reports show that more people came in here over the end of June and the first part of July than ever before. They came by train and automobile."

Yosemite is a wonderful sight right now. I have been living in the valley for many years, and never before have the falls been so beautiful with so much water in them at this time of the year.

The Big Oak Flat road is the best road into the valley now, but Wawona is in good condition, too. Wawona was opened first this year and the travel over this route has been tremendous all season. The Oak Flat road has not been opened long enough for it to get cut up so far this season.

There is still plenty of time to see Yosemite. The season does not end until the last of September, and there will be an influx of travelers all season long.

"You can drive into the valley easily in eight hours now. The best way to make the trip is to go in by way of Wawona and out by Big Oak Flat, or the other way round. You see more country that way."

5530 Enrolled in Engineers' Society

The Society of Automotive Engineers has a membership of 5530 of all classes, of which 2765 are graded as active and 1575 classified as associate members. The remaining number of members are distributed in six other classes.

Bay Cities Need Camp Grounds Projects Are Good Publicity

There is one thing that Oakland, too, and a small fee is charged for each night's camping privileges.

There is no municipal automobile camp in either city and there should be. There are literally thousands of automobiles on the roads of the country now and many of them are headed west.

"By far the larger part of those who are making long trips this year are carrying camping equipment," says Charles Hebrank, manager of Hebrank-Hunter-Peacock Company, Hupmobile dealers.

"Several of the larger cities throughout the country have made large investments in camp grounds for motorists and have made the projects pay by increased business for their merchants and by a great amount of advertising which has come through this means."

"Notable among the cities which have made a feature of camp grounds and convenience for motorists is Denver, Colo. Denver has spent \$250,000 in equipping Overland Park with all sorts of things that the motorists want. The park contains a large clubhouse, which contains soda fountain, steam table, lunch room, free laundry and shower baths and a free dancing floor. Over 30,000 camps visited the place last year, which has facilities for 4000 machines. The place is self-supporting."

While the motor vehicle registrations in the United States in 1921 showed an increase of 17.6 per cent, there was only a 2 per cent increase in improved roads.

WIRE SOLDER IS EASY TO HANDLE ON REPAIR JOB

For any ordinary job wire solder is the easiest to handle and the most convenient. It can be placed right on the spot to be mended and it melts under comparatively slight heat. In soldering anything it should be rigorously cleaned before the actual work is begun. The temperature of the whole should be raised to the desired point, after which it is easy to run a whole seam with a single movement of the iron. In making a repair the spot desired to be treated should be brought to the proper temperature for melting the solder. It is best to have the job so placed that the molten solder will not run to the other parts of the mechanism, but will lie right in the spot where it is needed.

General Manager Of Truck Company

R. J. Goldie, for six years factory manager of the Columbia Axle Company and well known in the past through connections with the Chalmers, Oakland and Timken-Detroit Axle Company, has been appointed general manager of the Ruggles Motor Truck company, Saginaw, Mich. It is stated that Frank W. Ruggles will continue to hold the office of president and that the appointment of Mr. Goldie has been made to enable Mr. Ruggles to give more time to the wider interests of the business.

Six Cylinder CASE Model X

Economy of operation is an inherent quality of the Case Model X. In tests, 22 miles have been obtained on a gallon of fuel. 42-inch cord tires insure long, inexpensive mileage. Large bearing surfaces, provision for ample and positive lubrication, oversize gears, and brakes of unusual size contribute to the durability and economy of this car.

Exceptional performance, economy of operation and riding comfort make the Case Model X a superior car of medium size for owner drivers.

STATE ROAD DATA GIVEN IN BULLETIN

Appended is the Weekly Road Bulletin of the California Highway Commission. (This bulletin states the condition of roads only where work is under way or where the condition of the roads is abnormal.)

COAST ROUTE. (Open from San Diego to Eureka). Steam shovel at work from 6 to 8 miles south of Willits. Road open and in good condition, except careful driving required around shovel.

Just north of Willits detour of two miles on side roads and old county road on account of paving. Detour in good condition and plainly marked by signs. Also one mile detour around paving 10 miles south of Willits.

From Cummings to 4 miles north two steam shovels and team outfit at work. Caution required in passing this work.

Healdsburg to Cloverdale. State highway under contract construction. Through traffic is now being routed from Healdsburg via Grant Street, which is three blocks north of Plaza to Dry Creek Road; thence north on Dry Creek Road to the State highway junction, which is approximately three miles south of Cloverdale, thence over State highway to Cloverdale. County road is in good condition from Dry Creek road into Geyserville.

Traffic to Alexander Valley and Calistoga is turned off Dry Creek Road approximately three miles north of Healdsburg; thence east over county road via Lytton.

Santa Rosa to Belknap. State highway under contract construction at a point approximately two miles east. Through traffic to Sonoma Avenue and County Road to junction of State highway, approximately two miles east of Santa Rosa; thence over State highway to Sonoma.

Ignacio to Sonoma and Napa County Line. State highway under contract construction and closed from the junction of the Black Point Cut off with that of State highway, approximately 0.3 miles north of Ignacio, to one-half mile north of Ignacio. Through traffic to Sonoma and points east is now turned off State highway at Petaluma; thence over County road.

Morgan Hill to Gilroy. The construction of a new pavement from Morgan Hill to Gilroy is now under way. Traffic will be handled on the roadways as work progresses.

San Felipe to Merced County Line. State highway under contract and closed. No detours available.

San Lucas and Bradley, Monterey County. The gaps at San Ardo and north of Bradley are being paved with concrete. One-half mile road being utilized for traffic on the Bradley work. Detours are in good condition. From San Lucas, Colima Lateral, Monterey County. Grading work has been commenced at a point approximately ten miles easterly from San Lucas. Short detours are necessary where former County road is being graded as a portion of the new highway.

Las Cruces, Napa County. Highway, Santa Barbara County. Pavement has been opened to travel between Buellton and Las Cruces. State highway between Buellton and Buellton closed. Good well signed detour via the Oliver and Sonoma, Napa and Gaviota, Santa Barbara County. Concrete shoulders have been constructed and pavement is being surfaced for a distance of 5 miles near Napa. Workmen and trucks are employed throughout the entire length and at times the road is blocked for short intervals. Concrete shoulders are being constructed. Drivers should exercise caution between signs marking the limits of this work.

Fustin to Irvine. Construction work between Fustin and Irvine has necessitated a detour between Culvers Corner and Irvine, the travel proceeding easterly, straight ahead, for about 1 1/2 miles, then southerly about 1/2 mile to Irvine.

Factory Orders Oil By the Carload

A carload of Cyclo at the plant of the Associated Oil company in Alameda, which is going to the big Chevrolet plant here. This company uses Cyclo for all its motors, and they are building many every day.

over dirt road in fairly good condition.

RIDGE ROUTE. Caution should be exercised in passing construction work south of National Forest Inn where control is established to pass traffic by the paving work. Also between Quail Lake and the Los Angeles-Kern County line, cars should be taken on account of numerous white barricades protecting repair work.

INTERIOR OR VALLEY ROUTE. Gazette to Weed. State highway now complete from Gazette to Parks Creek; county road must be used between Parks Creek and Weed.

Slason to Dunsmuir. State highway closed between Slason and Shasta Springs on account of paving; follow county road which is in excellent condition and signed; between Slason Springs and Dunsmuir a distance of three miles, paving is under way, and detours are necessary for part of the distance; detours are well marked and in fair condition.

Hedding to Cottonwood. Paved highway now open for traffic except at detours at four points where bridge construction is under way.

Yuba City to Sutter City. Highway open. From Wadsworth Canal west under construction; drive carefully.

South of Marysville. State highway for one mile south of Marysville under construction; use detour roads in accordance with direction signs.

Through Sheridan. Highway through Sheridan under construction; closed to traffic for about 1000 feet, follow detour signs.

Auburn to Grass Valley. Take Colfax road to Clipping Gap; turn north at detour sign, thence follow county road over Bear River on Dog Bar Bridge, returning to highway 2 1/2 miles south of Grass Valley; direction signs at all turns and cross roads. Also use road via Colfax.

Activity Found in Southern Territory

Nelson Gotchell, the veteran, returned from the South some days ago after a most successful trip for the Columbia Motors Company. He established fourteen distributors in Southern territory, sent in \$17,000 in deposits and took orders for over 1400 Columbia sixes. He found dealers and distributors in bad shape as regards finances due to the serious depression of two years, and was compelled in many instances to secure backing for new entrants into the field and in doing so raised capital of over \$250,000. Gotchell says that real salesmanship in the South right now will "bring home the bacon" and that remark applies to any territory. Therefore the reason for careful investigation by all members of the salesmanship qualities of applicants.

Former Assistant Is Made Manager

J. G. Weiss has retired as general manager of the Hyatt Roller Bearing Company, Harrison, N. J., and H. J. Forsythe, former assistant general manager, has succeeded him. P. C. Koether, vice-president, adds to his duties those of assistant general manager.

SPARK PLUGS CLEANING TOLD

G. M. Haselink, local manager of the Western Auto Supply Company, tells the several methods for cleaning of spark plugs.

"Spark plugs may be divided into two distinct classes—the type which may be readily taken apart and the type which does not come apart.

"In the case of the two-piece plug, the porcelain core should be removed and the carbon deposit scraped off. The metal shells and points should be cleaned in a similar manner.

"Care should be taken in reassembling this type of plug that the points be adjusted to the proper gap, and the porcelain core undamaged.

"Contrary to popular opinion, emery cloth should never be used for cleaning spark plugs. There is danger of the emery dust being carried into the cylinders. Furthermore, emery removes the glaze from the porcelain core, greatly increasing carbon adhesion, thereby causing short circuits.

"The one-piece type of plug can best be cleaned by scraping the carbon with a sharp-pointed knife. Where the carbon is excessively hard the plug may be reconditioned by boiling in lye and water.

"If time permits, either type of plug may be cleaned by soaking overnight in kerosene—the carbon residue may then be quickly removed with a sharp knife.

"You will find that a spark plug is more readily removed if the threads are wiped with a good graphite when the plug is put in.

"From time to time it is a wise plan to test a spark plug for leakage—spray oil around the base and into the shell—the leaks will immediately show up by bubbles.

"A simple remedy for removing carbon from an oily plug is to fill the plug with gasoline, invert and light the fuel. The heat will dry the oil and permit you to remove all carbon by scraping or brushing with a wire brush.

"It is not necessary to take a plug apart every time to clean it. Many times the carbon deposit is not sufficient to do any damage. It is suggested that you brush the points with a stiff wire brush. Make sure to adjust the gaps after brushing.

"No one should think of starting out on a trip without taking some extra plugs along so they will be prepared for emergency in case plugs break, leak or short-circuit."

Now Making Good Salesman's Record

J. P. Hammill, formerly Cleveland and Chandler dealer in Waterville, since joining Hebrank-Hunter-Peacock as a salesman has been setting a good record.

Hammill claims that when a salesman is sold on the line he represents he should not have trouble selling the other fellow. "The new Chandlers and Cleverlands are proving up even better than the

last year's models and everyone who has bought them is satisfied," points out Hammill.

TIRE GUARANTEE THING OF PAST

"Did you ever reflect," said a Goodyear representative the other day, "that the motorist no longer asks for a guarantee on his tires?"

"And do you realize," he continued, "that this fact proves beyond a shadow of doubt that tire-making has passed the experimental stage?"

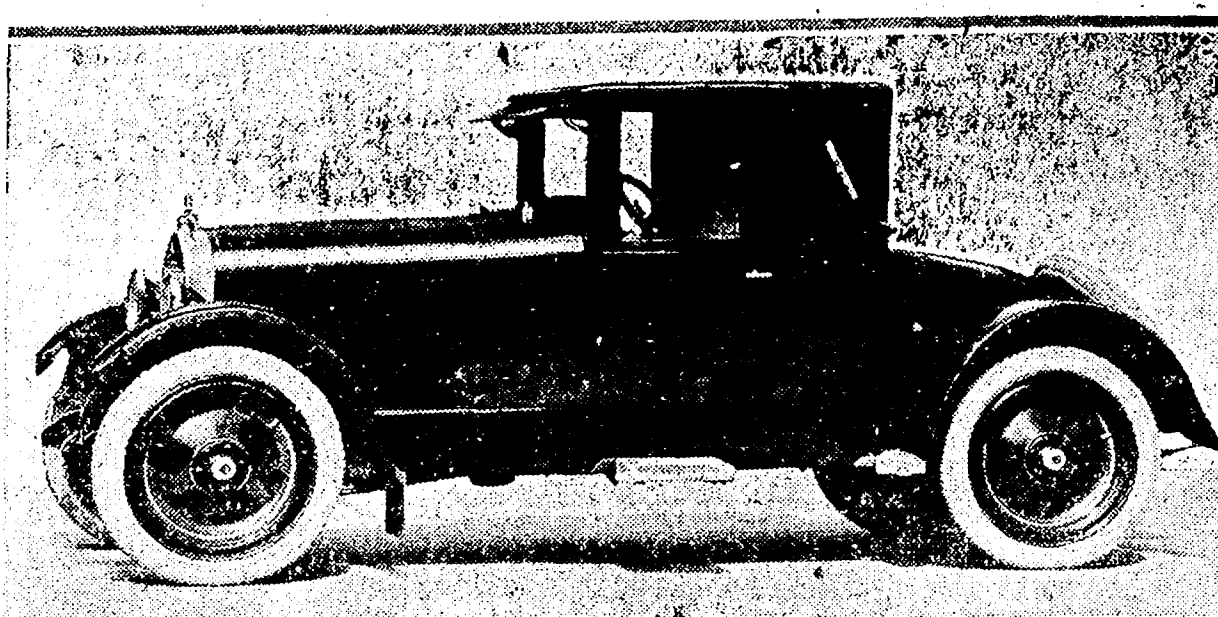

"In the old days (and not so long ago, either) we heard a great deal of talk about guarantee and adjustments, but now the buyer does not even think of these things when he buys a standard make of tire."

"I remember when car salesmen would lose sales to farmers because they had a blow-out while demonstrating the car. The farmer was off the car when he thought he might buy tire trouble with his car."

"But in the language of the cartoonist, 'them days is gone forever.' Motorists buy tires with confidence, assured they will get more miles than any guarantee figures. Eight, ten or even fifteen thousand miles are expected, whereas the old-time motorist was surprised if he exceeded 3500 or 5000 miles."

Did You Get the Bottom Price, After All?

The man who buys a "long discount" tire usually finds himself troubled by the above question.

Did he pay less for the tire than his neighbor might have paid, or actually did he pay more?

Did he get the bottom price, when all is said and done, or could he perhaps have driven a sharper bargain?

Was the net price really more than he might have had to pay for a tire of established reputation and value?

In the belief that the average motorist prefers a frank and open transaction, we built the new Goodyear Cross-Rib Tread Cord and discounted the "discount" in advance.

Instead of listing it at a high price, to enable the dealer to attract you with a so-called "long discount," we list it as low as we profitably can.

We build it of high-grade long-staple cotton, using the patented Goodyear method of group-ply construction, and sell it at a lower price than you are asked to pay for many "long discount" tires of unknown worth.

If you want a quality tire, and a reliable value, call today on any of the Goodyear Service Station Dealers listed here.

Compare these prices with NET prices you are asked to pay for "long discount" tires

30 x 3 1/2 Clincher.....	\$13.50	32 x 4 Straight Side..	\$25.45	33 x 4 1/2 Straight Side..	\$32.15

LEVEE ROAD SURPRISES MOTORISTS

Motorists who have never made the trip to Sacramento by way of the river levee road, or those who have not traveled that route since the days when it was one of the highway atrocities in Northern California, now have a delightful surprise in store for them, if they are willing to put up with the discomforts of an initial rough eleven miles, which cover the stretch between Antioch and Rio Vista. But the joys of riding over the paved highway that now links Rio Vista with the capital city, which embraces nearly fifty miles of the most picturesque country one can imagine, more than compensate for the annoyance of the bad going. The portion between Antioch and Rio Vista is practically the only break in a continuous paved highway from Oakland to Sacramento, by way of the marvelous Sacramento river levees. There are only two short gaps between Rio Vista and the capital and they are good, graveled roads. The two together do not total a full mile.

THREE FERRIES NECESSARY. According to a log of this trip, made by a party of local motorists, driving a Stephens Salient Six car last Sunday, which was furnished by the Benson & Beckett Co. for the purpose of inspecting the levee along the river route between Oakland and Sacramento there are three places where one must utilize river ferries. The first is near Antioch, which takes one across the San Joaquin river to Sherman Island; the next across the Sacramento river just below the big concrete levee bridge which connects Rio Vista with the river highway; the third ferry crosses the Sacramento river at Isleton.

Until one has looked out over the glorious acres of orchards and grain from the levee highway, only a partial idea of the significance of the fertility and wealth of the Sacramento Valley has been obtained. From its picturesque standpoint, those who have trailed the beautiful Sacramento river from the capital city to Sherman Island declare there is no more delightful motor route in any part of the state. Not only is a ride over the river highway a marvelous revelation of the productivity of the soil, but its wealth is revealed in scores of beautiful homes along the highway, in the air of prosperity of all of the towns along the route and in the unusual activity of all of the establishments that flank the river on both of its banks.

ATMOSPHERE OF PROSPERITY That atmosphere of prosperity is evidenced in another way, too. Producing the best of the land in the best way, the thousands who reside in the river country on its scores of islands and those who operate there have gone in for the best of everything. This is true in the homes as well as the various business establishments. Everything in furniture and equipment is strictly modern and up to the minute. Every enterprise, be it packing, picking or the production of power, is making visibly a big enterprise.

Everything is operated by machinery, in turn propelled by steam or electric energy. If Old Dobbin is coming back into his own, he is not doing so in the Sacramento river country. That trail of dust in the distant orchard or grain field is more likely kicked up by a powerful six, eight or twelve cylinder car than the humble flivver.

But with it all there is none of the snobocracy that one might be excused for looking for in such a region of wealth; the sunburned, rough-clad individual who just drove by in a big, handsome gasoline equipped car is more likely one of the hundreds of wealthy ranchers or orchardists than one of the hired hands sent on a hurried errand.

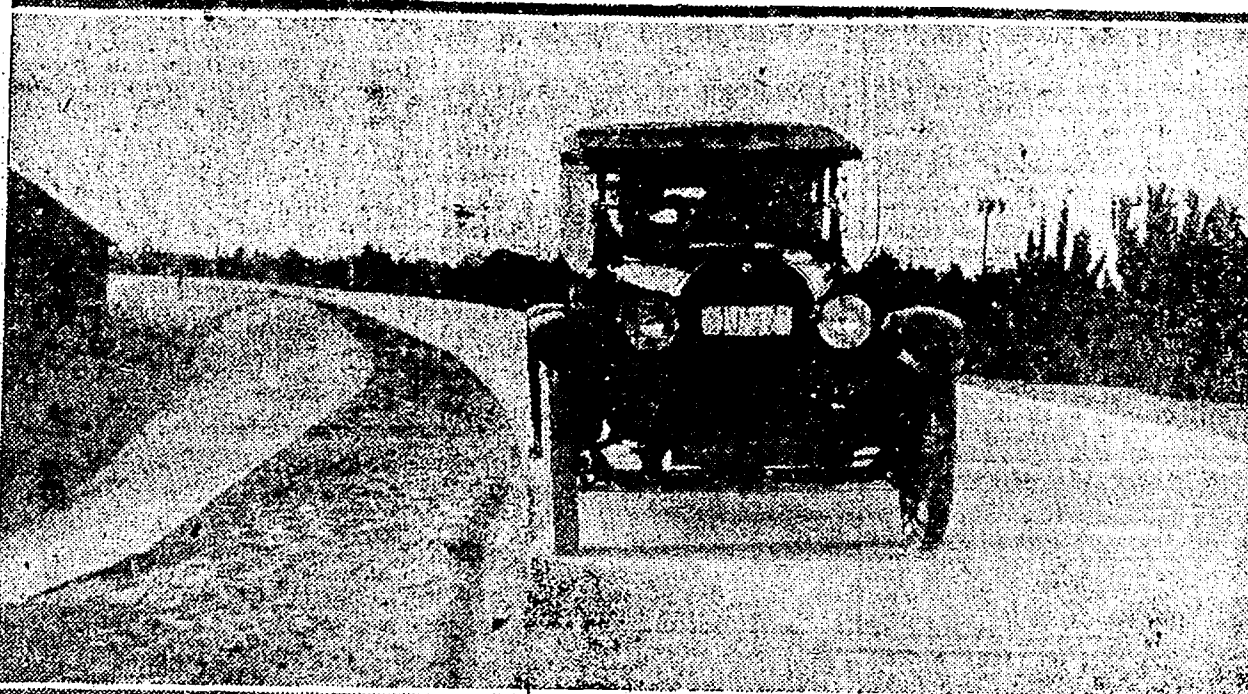

NO SNOBOCRACY. The gingham-gowned, hatless young women who rode by in another car of considerable h. p. and luxurious upholstery are not, as one might suppose, some poor urchins being taken for a ride, but the daughters of some of the best families of the islands.

The wealth and prosperity of the Sacramento river country are not things of sudden occurrence; they have developed by gradual stages covering a period of many years. This season's crops will be the biggest and finest of them all—bumper to overflowing.

To the casual visitor it seems fitting that such a land of prosperity

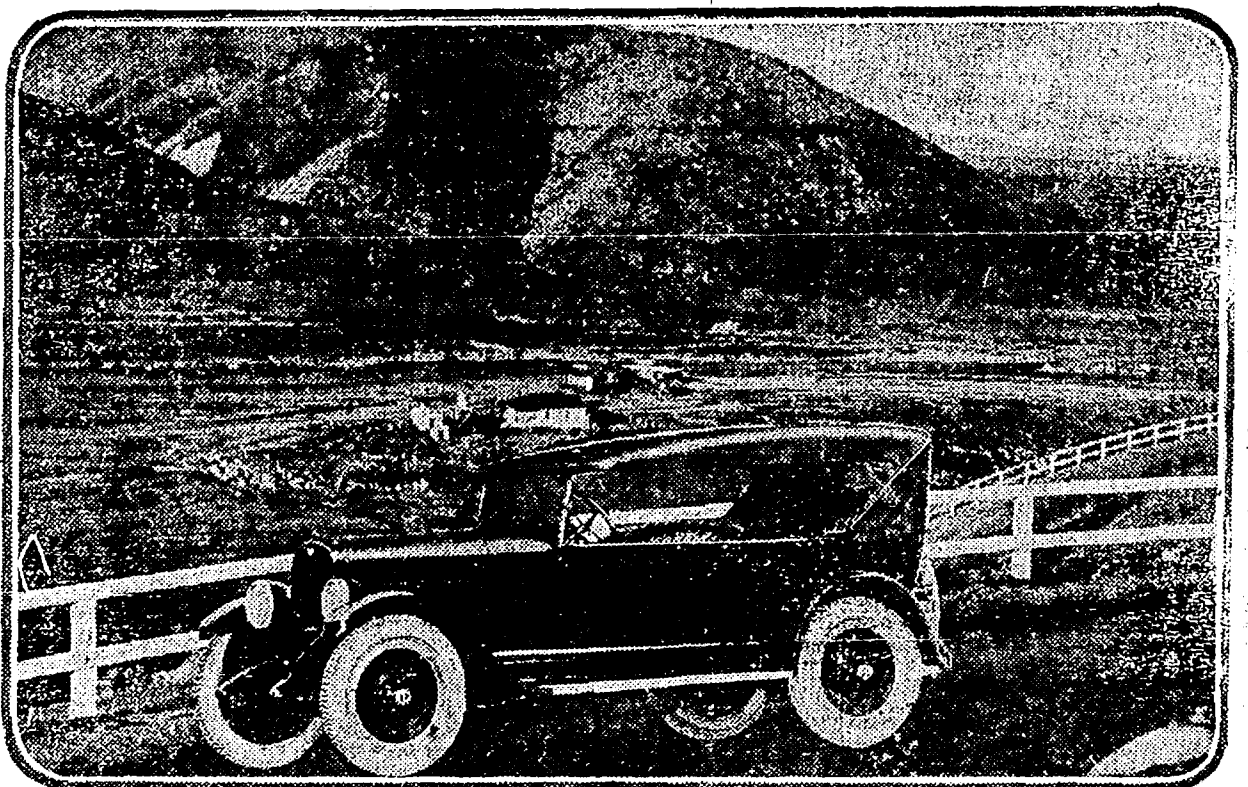

Motoring Along Sacramento River Highway

Scene along the levee road that trails the Sacramento river, now a concrete highway all the way from the Capital City to Rio Vista with the exception of two very short gaps of good graded dirt road. The region is one of unusual attractiveness for the Sunday motorist revealing a land of great fertility and wealth. The car is a Stephens Salient Six from the Benson & Beckett company of this city which carried a party of local motorists over that route on an expedition of exploration recently.

California Hills Lure Motorists to Highways

This view shows a late model Maxwell touring car overlooking one of the desert valleys of the south. The scene was taken from the highway in Southern California.

should be found in a region of unusual beauty. Now that this river country is tapped by a splendid paved highway which will soon be finished across Sherman Island, the sons of her soil feel they have come into their own.

Motorists of the bay region who have not seen that country should pay it a visit, but be prepared for those uncomfortable eleven miles, or wait until the highway is completed.

BLACK ENAMEL IS VERY GOOD TO PREVENT RUST

Metal parts beneath the hood and fenders are prevented from rusting by painting with black enamel. Clean the parts well with a wire brush and apply the enamel with a stiff varnish brush. Parts that may be enameled to advantage include steel fan blades, pulley arms, brackets and elbows, nuts that are not often disturbed, exposed pieces of shafting, pinion wheel centers, operating rods, collars, etc. Even a cylinder casting may be so treated, as a good enamel will stand heat without blistering.

Never rub in circles when cleaning the body of the car with a chamol. Always rub in straight lines.

When soldering the battery connections, always use pure lead, as tin compositions will corrode.

Now that the hot weather is here, there should be a S. P. C. A. (the "A" standing for automobiles) to prosecute drivers of cars denying their machines radiator water.

To make passenger automobiles more easily equipped, front-bumper brackets and crankcase drain-plugs are to be standardized, as proposed by the Society of Automotive Engineers.

A LIGHT SIX

with all the features of a costly car at low price

The Oakland has done a thing which no other motor-car manufacturer ever dared.

The factory guarantees every Oakland six against "oil pumping" for 15,000 miles.

This means that the company is so sure of its product that it will guarantee against one of the greatest evils in modern motor cars for 15,000 miles, more than a year's running.

Oakland cars are built by a unit of the General Motors Corporation, one of the largest automotive establishments on earth.

There was a reason for Oakland winning the Yosemite Sweepstakes this year. The reason is that the car is built right, to last a long time, at low cost to you.

PICKLE HILL CLIMBED BY MOTOR CAR

"Pickle Hill," on the way to Venice, Cal., the mound that is known far and near because of the immense figures "57," with which it is decorated, has finally been conquered by a motor car, which traveled from the base of the hill to the center of the figures on its own power and without aid whatsoever, according to O. C. Hinz Co., local distributor of the Liberty line, who just received word regarding the climb.

The car which turned the trick and which has been tried by many was a stock Liberty Six of the new series, distributed by the Thomson Motor Car Company of Southern California. Even the tires were not deflated. The driver was J. W. Quinlan of the Thomson organization sales force.

Fifteen attempts were made before this preposterous climb could be made. The driver claims that he received plenty of advice from spectators, some useful and some not as good. He found that chains were useless. The wheels spun around inside the chains and all that he accomplished was the chewing up of rubber. The turf was dry and hard and it was difficult to get traction. Frequent attempts were made to the side of the hill, and when nearing the goal the rear wheels would lose traction in the finely powdered dirt. One spectator suggested that the ruts be left and a try made on new turf.

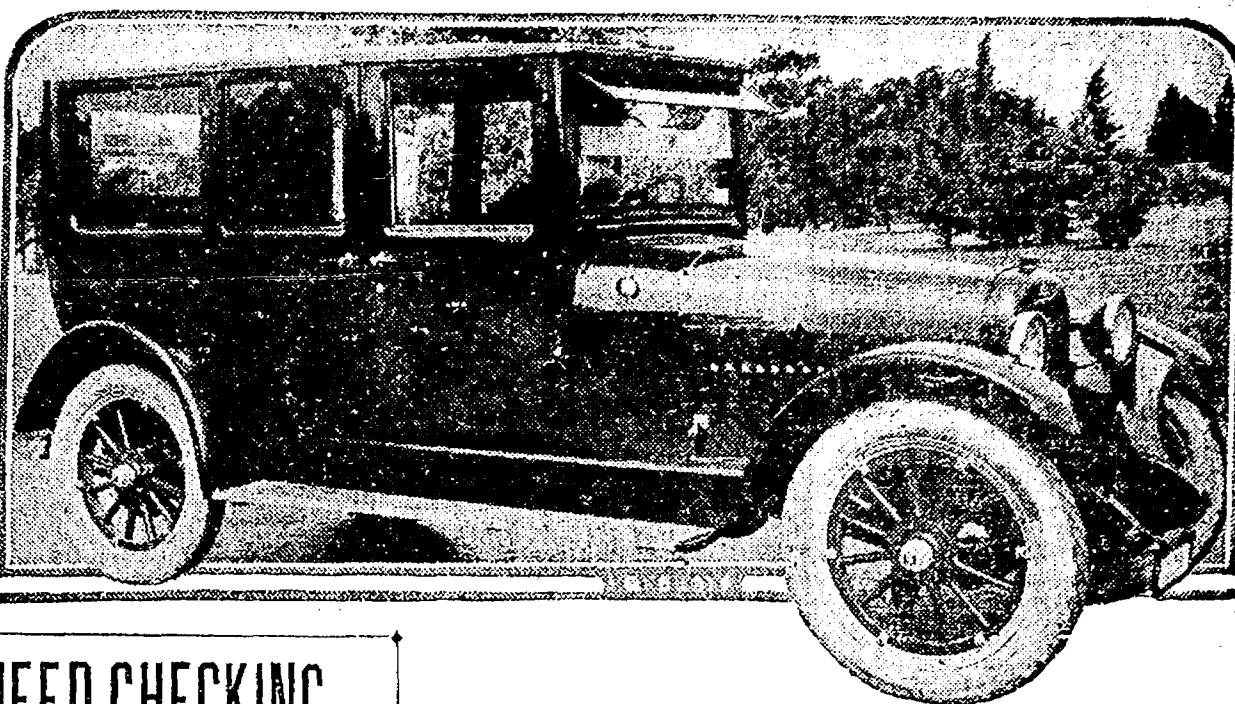

"Dropping back to the foot of the hill, this suggestion was followed. The climb was made this time without a single hitch. Quinlan said, "that he stopped midway between the giant letters and put on both foot and emergency brakes, while the boys blocked the wheels. Then he went to the nearest telephone, called up Thomson and told him to come down to 'Pickle Hill' and see what his Liberty had done."

"Backing down the hill was almost as hard a task as going up. When Quinlan released the emergency brake the car shot down the hill. On the first try he claims he was about ready to jump, but he got the car under control."

According to statisticians of the Firestone company, an average of 450 gallons of gas per year is consumed by each car in the United States.

New Nash Sedan Has Many Improvements

This is the latest of the Nash line to be received in this city. It is a Nash six cylinder sedan. It is now on display at the salesrooms of the Pacific Nash Motor Company, dealers here.

NEED CHECKING BEFORE TRIPS

Motorists will save themselves from troubles and loss of time on their vacation trips by having their batteries and electrical systems checked up thoroughly by an expert before leaving for their summer tour in the mountains or across country.

"Generally in the rush of preparing for the outing one overlooks many things about the car," claims Campbell Bowls of Oakland Garage, local Gill battery dealer. "Tires usually get the first consideration then oil and gas are checked into the old boat and its nose is turned toward vacation-land with the driver trusting to luck that the rest of the car will get through safely."

"If you want to be assured of perfect ignition, starting and lighting on your trip, and each one is absolutely necessary, come and have the battery inspected and the electrical system checked over from beginning to end. Loose connection will cause a lot of trouble and there are one hundred and one little items that might be wrong and result in annoyance and delay."

AUTO BRAKES ARE IMPORTANT PARTS OF GEAR

The running brakes of a car, otherwise known as the service brakes, are the brakes operated by a foot pedal. The hand brake lever controls the emergency brakes. Both are usually located at the rear wheels and also usually operate on the same brake drums, one set being the inner expanding and the other outer contracting.

Don't forget that in case of accident you must stop immediately and give your name, address and license number to the injured party or a police officer. If no police officer is in the vicinity of the place of injury or accident, report the same to the nearest police station or judicial officer.

In France, because of the increased strain on the highways caused by a larger use of motor traction, the French Minister of public works has outlined a program of road building on a large scale.

Ammonia may be used to clean corrosion from connections and battery terminals.

Cisco Auto Camp Listed for Tourists

Cisco, Calif., July 12, 1932. Editor TRIBUNE: I noticed a column in your paper, headed "Auto Camp Directory," or something to that effect, and would like to list our camp: Cisco Auto Camp, 5940 feet elevation. Located on south fork of Yuba river, along Lincoln highway. Hunting, fishing, hiking, swimming, saddle and pack animals; gasoline and oil; auto mechanics; ladies' rest room; 84 miles north-east of Sacramento, via Roseville, Auburn and Colfax, 84 miles south-west of Reno, via Truckee and Donner Lake. Chase & Matthews. Yours very truly, CHASE & MATTHEWS.

Many Things Driver Should Try to Avoid

There is no need to tell the old driver that railroad tracks should be crossed diagonally to ease the jolt, which is bad enough at best, but the new driver will save himself some shanking up by heeding this advice. Again, it will be found advantageous to drive up long, steep grades in the country, where traffic is light, in a series of zigzags, as teamsters do. This lightens the grade and helps the motor.

CADILLAC SALES

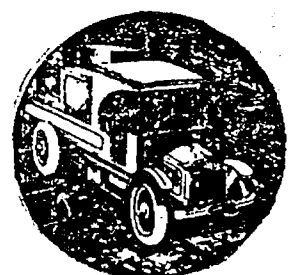

break all previous records

When it is considered that Don Lee has sold 1270 new model 61 Cadillacs in California since January first, it must be acknowledged that the Cadillac is today more firmly entrenched than ever before in its position of unquestioned leadership.

TIOGA ROAD TO YOSEMITE NOW IN USE

The last of the park road was opened to travel on July 10, when preliminary repair work was completed on the Tioga road. This road is now in better condition than at any time since it was taken over by the Federal Government in 1915. In spite of the extraordinary heavy snow the road came through the winter with less damage than ever before and it is believed it will be possible to maintain it in better shape than usual during the travel season.

The opening of this road makes the high Sierra country of the Park accessible by motor for the first time of the season and the indications are that more people than ever will avail themselves of the wonderful camping possibilities of Tuolumne Meadows and the hotel accommodations offered at the Tuolumne Soda Springs Lodge.

A number of services will be available at Tuolumne Meadows this year that have not been available in past years, including in addition to the Lodge accommodations, a saddle horse service and a camp equipment rental service, in connection with which all kinds of camping equipment may be purchased or rented, and saddle and pack animals may be secured either with or without guide service. A store operated near the Soda Springs Ranger Station will carry a general grocery supply, gas, oil, etc. A service car will also be stationed here with a mechanic for automobile repair work anywhere along the road east of White Wolf Meadows. Tuolumne Meadows will therefore offer in a small way this year practically all of the facilities obtainable in Yosemite Valley.

While other roads in the Park are showing the effects of the wear and tear of a very heavy travel, it is a fact that this condition is less marked than general at this date. Of the two roads leading into Yosemite Valley the Big Oak Flat road, having been opened to travel for a shorter period than the Wawona road, is probably in the better shape. Everything considered, it is believed motorists will find it advisable to come into the valley by one route and out the other. The ideal motor trip at this time is to those who wish to see as much of the park as possible, is to come in by way of the Wawona road, visiting the Mariposa Grove of Big Trees, Wawona, and Glacier Point, going out by the Big Oak Flat road, visiting Hetch Hetchy and thence across the Tioga road to Tuolumne Meadows, stopping there long enough to visit some, at least, of the many points of interest in that vicinity and then proceeding to the east over Tioga Pass, at an altitude of 9941 feet, and continuing on to Lake Tahoe. Such a tour not only offers the maximum of park scenery but provides a scenic trip which for variety and spectacular effects, is certainly not excelled in California.

CAR LUBRICATING BY NEW METHOD

Ever since man came on this earth he has been trying to build a perpetual motion machine, and the reason he has never attained that end is that friction steps in and stops the most carefully adjusted machine in time.

That is the reason engineers throughout the world have given so much of their time and brains to the discovery of new lubricants and new methods of lubrication.

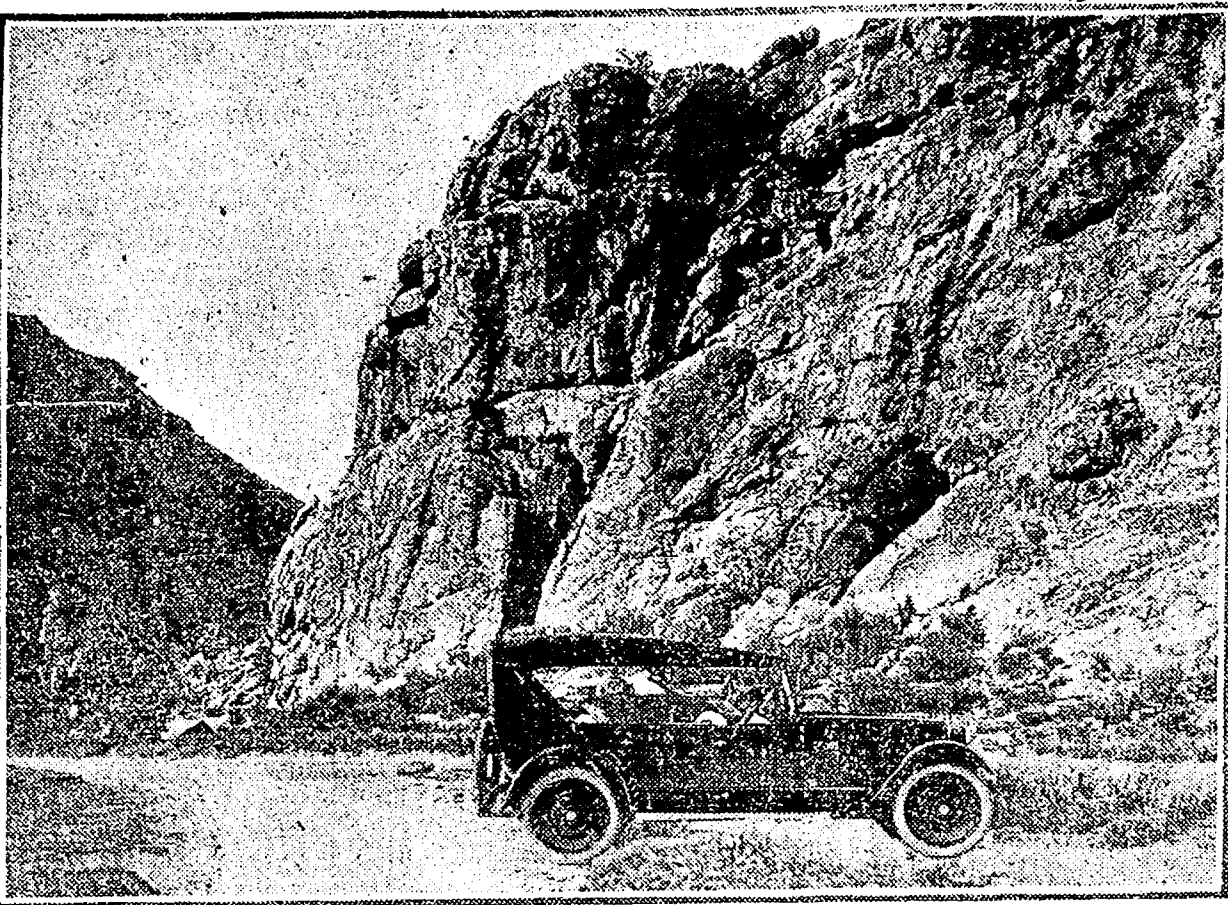

"Alenite engineers set out to find a way to grease an automobile without all the trouble and fuss of filling grease cups and fussing with the innards of the car," says R. W. Foyle, manager of the Alenite Lubricator Company.

"They developed a simple system that has proved so efficient that the most of the known manufacturers of automobiles now equip their cars with the Alenite system at the factory. Grease is forced into the place where it is most needed under pressure of 500 pounds. The old grease is forced out and the bearing is freshly lubricated every time the grease gun is used.

"Alenite fittings are made to fit easily into the place where grease cups or oil cups formerly fitted. In the past few months we have fitted Alenite for many cars, and many men who are planning vacations at this time are getting their cars greased.

"The whole car can be lubricated in a few minutes. It is a good idea to drain the oil in the crank case of your car before you start on a trip and grease it thoroughly. Then take the Alenite gun along and when you stop overnight, some place high in the mountains, grease the

A Columbia Six touring car on the Walker Canyon grade near Tioga Pass. This road is one of the most wonderfully scenic roads in the whole wide world. Thousands are now going the route.

Lake Tahoe Country Beautiful Touring Ground
A Gardner car in one of the beauty spots near Lake Tahoe. This country is famous for its scenery. The roads to the lake are all open now and in excellent condition.

PAGEANT MECCA FOR AUTO PARTIES

The pageant drama "Serra" to be produced at Carmel, Monterey county, next Friday, Saturday and Sunday nights is a magnet which already has turned the eyes of week-end automobile parties to the famous town where Father Junipero Serra lies buried. The Carmel colony is making arrangements for a large number of automobile visitors and special plans have been perfected for parking the machines as well as specially prepared camping grounds for the visitors.

The drive to Carmel is one of the noted scenic automobile trips of this part of the state. The combination of natural scenic beauties and dramatic art as portrayed by the capable company which is to produce the pageant dealing with the life of the historical Padre Father Serra affords automobile parties the wonders of this drive and a magnificent historically correct outdoor rendition of the life of the padre.

The pageant "Serra," written by Dan Tohero, famed as the author of "Wild Birds," which recently was the storm center of the censors, will be produced under the able direction of Garnet Holme, noted as one of the greatest pageant producers in this country. The part of the Padre Serra is being taken by Herbert Grimwood, a noted actor, who has come from New York for the part. The entire parts of the principals are being taken by professional actors and

car with the gun and you will find that it rides easier and that there are no annoying squeaks."

PRIOR SALE RECORD FOR CAR BROKEN

All records for Cadillac sales in California were shattered by Don Lee during the first six months of the year. From January 1 to July 1 there were 1270 model 61's sold in this state alone, which is more than 50 per cent increase over the previous six months during the eighteen years during which Don Lee has sold Cadillacs. The increase is more than 100 per cent over that of the same six months of last year. One outstanding feature of this phenomenal sales record is the fact that June was one of the best months of the six. Since the introduction of the model 61 in California last September, sales have totaled 1702. Southern California taking 894 and Northern California 808.

That California has been able to get this large number of cars has been due to the greatly increased manufacturing facilities since the factory took over its large new plant. But even with its large production the demand has been such in the east that on many models California has been constantly sailing close to the exhaustion point. The number of models on hand today is small and it requires constant shipping to keep the stock in shape that waits for certain models will not be too long.

One very striking feature to the wonderful sales of Cadillacs is the fact that more than fifty per cent of the cars have been sold to former owners who had learned the value of Cadillacs by actual use.

Don Lee has been making a tour of his branches. He has been in Southern California two weeks and will drive up the valley this week to the Fresno branch. The San Joaquin Valley has been going strong, Fresno having a record month in June.

Business throughout the entire state has been holding up in great shape. Of the dealers, Hollywood, Stockton, San Jose, San Diego and Long Beach are the leaders.

Do you know the make of the motor, its number, the model and year, the type, bad or good, identification marks? These questions are all asked when you report your car as stolen.

In order to help Chevrolet owners, Bacheller & Austin, operating an official Chevrolet service station in Oakland, are giving a small identification card which can be filed in with license number and other details about the car.

Few owners realize that they do not know the number of their car until it is stolen.

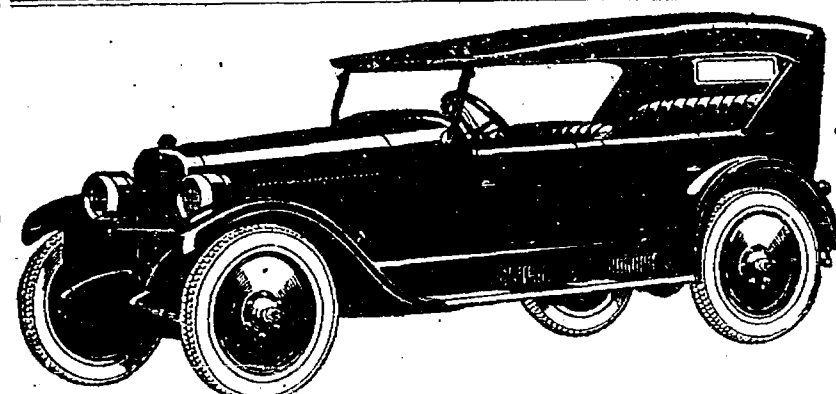

More than 300 standard parts are in actual use by automotive manufacturers in the United States.

NEW UNIT IN HIGHWAY COMPLETE

Completion of the highway between Cotati and Sebastopol adds another unit to the system of roads leading to the vacation country around the Russian river. This road was opened last week.

Motorists can now cross the bay at Richmond, go to San Rafael, then north to Cotati, which is half way between Petaluma and Santa Rosa and then turn toward Sebastopol, then to Occidental and Camp Meeker and on to the river. The road from Occidental is not the best in the world, but it is entirely passable.

"We made a trip to the Russian

Chalmers Six Beauty Stands Out

The Chalmers Six is an unusually beautiful car—in both design and finish.

On this score alone its position is very firm and sound.

But it also represents a remarkable degree of six-cylinder perfection, developing possibilities that must be experienced to be appreciated.

The
CHALMERS SIX

The World Is the Kingdom of the Man in the Automobile

The automobile makes men keen and alert; it makes them think quickly and clearly; it keeps them fit for their daily tasks.

The automobile makes women happier; it fakes them away from the enervating sameness of household duties; it broadens their horizon, quickens their pulses, and turns their lips upward in smiles of contentment.

The automobile makes for healthier, happier, more self-reliant children; it acquaints them with fresh air, sunshine, and waving fields; it turns frowns of discontent into shouts of joyous laughter.

The automobile makes the family a unit.

No one can afford not to have a car. And now, no one need to deny himself the very sort of a car which he has always been wanting. For used car prices are lower than ever before, and used car values are higher. The range of choice extends from extreme modesty to the realms of luxury.

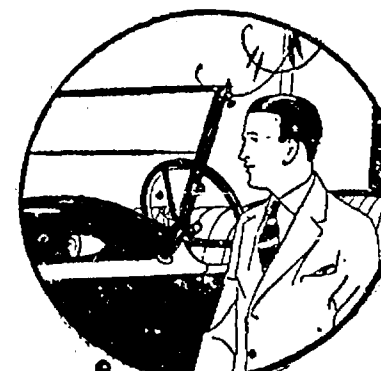

Among used car displays of Association dealers you will find, we believe, the very car you've been wanting. You will find the car which will not only bring new happiness to the family, but will pay its way as a business asset as well. You will find the car which will fit your needs and your purse comfortably and without the slightest feeling of uneasiness on your part.

Decide right now to investigate these used cars with their new car profit, health and happiness-bringing possibilities. You'll never regret it.

ROADS OPEN TO GLACIER POINT NOW

Thousands of motorists who tour to Yosemite Valley fall to travel over the road which leads from Chinquapin Summit to Glacier Point, inasmuch as the view obtained from Glacier Point is without doubt the most comprehensive in the entire Yosemite National Park region, and inasmuch as it is only a short run over the road, the Wawona road to Overhanging Rock and Glacier Point, tourists should plan to make this trip either going or coming from Yosemite Valley.

From Chinquapin summit, at an elevation of 8255 feet, to Glacier Point, elevation 7297 feet, the distance is 14.3 miles, and the road now is in perfect condition. This mountain road is open for but a few months each season. Superintendent W. B. Lewis declared the Glacier Point road open for travel on July 5, and the first three cars over it were Buicks.

FIRST CAR OVER.
"Gerry" Griffin, of the Howard Automobile Company, piloted the first Buick over the road. Griffin, in Yosemite Valley, to Glacier Point, Griffin drove over the floor of the valley and up the grade to Inspiration Point, and then followed the Wawona road as far as Chinquapin, where the road branches off and winds up to the Glacier Point hotel. Shortly after Griffin had arrived other Buicks were checked in, as Jim Soullihan, an Oakland newspaperman, and Harry Gaines, of the Oakland branch of the Howard Automobile Company, also decided to make this picturesque mountain road.

Barring the steep pitches and the steady ascent, this road is similar to all of the other Sierra highways, and, as a matter of fact, the road is in much better condition than it ever has been. The heavy snows of the past winter served to pack the roadbed so solidly that there are no soft stretches of road, and, right now motorists will find the trip to be comfortable riding, although later in the season, if the travel becomes heavy, the road is liable to become more or less rutted and rutty.

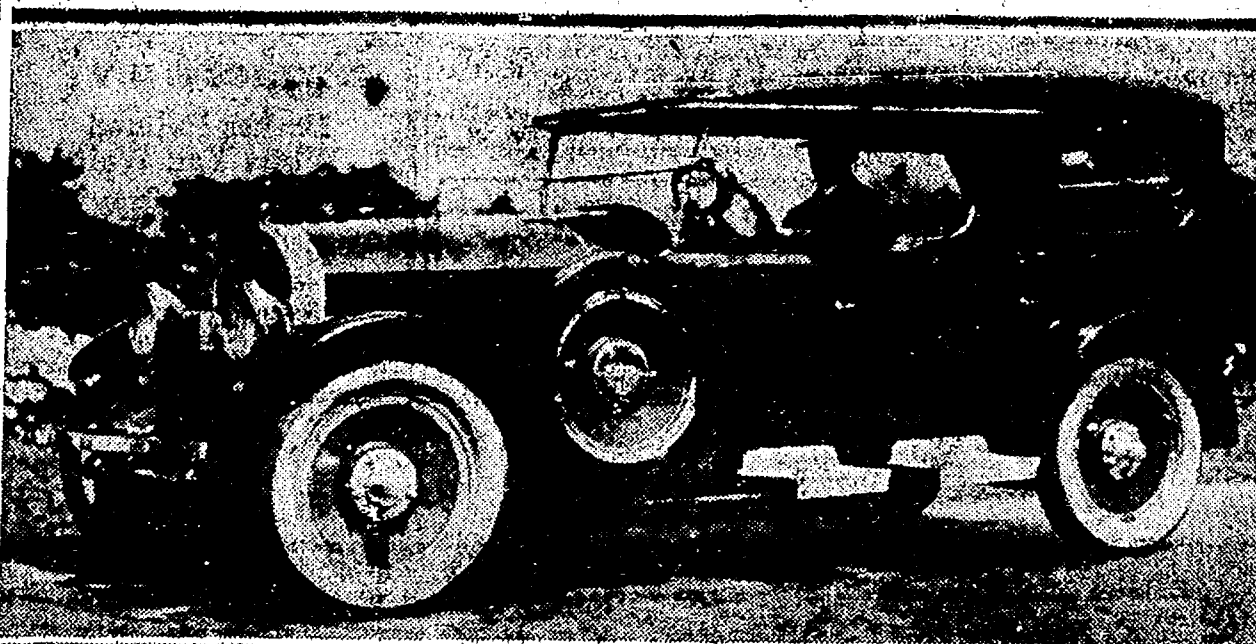

SINGLE DAY'S TRIP.
The trip can easily be made in a single day from the floor of Yosemite Valley, as it requires only a few hours in each direction and lunch can be had at Glacier Point while drinking in the panorama of mountain scenery which unfolds itself in all directions. From Glacier Point one can get a better idea of Yosemite grandeur than from any other point.

Yosemite, Nevada, Vernal, Illouette and many other waterfalls, the higher ranges of mountains in the distance, including the glacier formations on Mt. Lytle and the snow-capped peaks in that locality, together with a bird's-eye view of Yosemite Valley itself, make it well worth while for the tourist to spend the few extra hours in traveling to Glacier Point.

Griffin states that any sturdy automobile which is in good running order can negotiate the grades, despite the fact that several cars which attempted to go over the road on the day it was officially opened turned back because the drivers were afraid that the trip was too strenuous.

California Tops Now Nationally Recognized

A Cole Model 890, with disc wheels and a California top. This is one of the latest models to arrive here. The car is completely equipped and has nickel-plated radiator and hard ware throughout.

FUEL ECONOMY THOUGHT SOLVED

The Society of Automotive Engineers, which is the governing body of the engineering side of the automobile industry, held a meeting in White Sulphur Springs, W. Va., in June, and the main theme of the papers read there was the matter of economy in fuel and maintenance of motor cars.

The maintenance problem was approached through providing a means of reducing the running costs to the owner and a reduction in the amount of fuel used. "Franklin engineers have been working on the problem of reducing costs of operation for many years," claims Ben Hammond, manager of the Franklin Motor Car Company.

"They have approached the problem by building a light weight car, with high motor efficiency and air-cooling, which allows the motor to operate at higher temperatures than any water-cooled machine, thus giving greater efficiency to the fuel used."

"S. A. E. delegates at their convention looked at the problems from all angles. The solution of the problem of the use of low-grade fuel seems to be in getting the volatility as low as possible consistent with the means of properly vaporizing the fuel for complete and proper combustion. Hot spots and uneven designs, laboratory and practical tests of different kinds of fuel under different conditions and other phases of the problem were presented."

"Franklin has stuck to its original principles of engineering throughout the history of the company," continued Hammond, "and that it has proved successful is shown by the demand for cars. Production has been stepped up year by year and month by month, until now the company is hard pressed to build enough to fill orders."

TRUCK USED AS A DITCH DIGGER
A California man has found a brand new job for a White truck, and those who have watched the motor truck field broaden and expand year after year would even be surprised if they saw A. H. Borwick's new-style ditch-digger that is digging 3000 feet of ditch a day for the Miller & Lux interests at Mendota, Cal.

Borwick's idea came when he was working on a contract for digging irrigation ditches in the Santa Clara Valley—and with an old White good roads truck that was being used in the happy hunting grounds he started. The result was a ditch-digger that is propelled by the original White truck motor and capable of digging a "ditch" three feet wide and four and a half feet deep, having vertical sides that meet the flat bottom at right angles.

Borwick states that his machine works to better work than a skilled workman and will average 3000 feet a day even when considerable hardpan is encountered.

First Auto Repeats Its Original Run
The first successfully operated automobile in the United States, listed as one of the famous inventions in the Smithsonian Institution, Washington, D. C., was recently taken from the museum and sent to Kokomo, Ind., where it repeated its original run, made on July 4, 1894.

SKIDDING IS GRAVE MENACE TO MOTORISTS

Whenever a motor accident occurs we are pretty sure to see in the papers that it was caused by the failure of the steering gear or by the bursting of a tire or some similar stock reason. In most cases this given reason is really wide of the mark. There are many accident causes in which failure of the mechanism does not enter at all.

One of the most dangerous mishaps that the motorist meets is a front wheel skid, when the car gets completely out of control and, probably brings up against the curb or a telegraph pole. The reporter finds the car badly smashed up, the steering gear particularly so, and assigns failure of that unit as the cause of the trouble. We mention this to impress the motorist with the fact that it is not so much mechanical failure that he has to fear as carelessness on his own part. Drive carefully, slowly rather than fast, never speed except under the impulse of necessity and there is little danger of accident in the modern motor car.

USE BRUSH IN CLEANING GEARS, DIFFERENTIALS

While cleaning the gear set or differential, a long-handled paint brush will be found useful for reaching grease and dirt which have stuck to the sides of the case and are not reached by the kerosene. Get what the painters call a sash tool. It can also be used in cleaning dust and dirt out of corners, around the springs and other places.

The highways of this nation total more miles than nearly all the rest of the world's put together—2,500,000.

MANY DEVICES COME FROM SOUTH

Southern California, that hotbed of automotive inventions of quality, is receiving much attention from manufacturers of automotive equipment today. So many noteworthy articles now on the market have come from that section that manufacturers have been constrained to send representatives out there on a quiet hunt. The plate glass windows for tops, windshield wipers and swing-spout oiler came from there and quite recently a man appeared in the East with an invention which will have ready sale. This is a diaphragm arrangement with a ball socket valve which is attached to the vacuum tank. When the oil in the engine base reaches a certain low point it releases the ball and all gasoline in the vacuum tank is let out, stopping the car.

Today drivers of cars would never fill with gasoline if the car would run without gas and many operate their motor without oil to that point where trouble comes. The invention of the Southern California man will aid in doing away with that sort of trouble. Many other articles of merit are to be found under manufacture on a small scale in Los Angeles, where there are almost 600 manufacturers whose product, in many instances, will soon be of national interest.

Causes of Traffic Accidents Listed

Among the causes of traffic accidents are careless driving, poor parking accommodations, insufficient playgrounds, bad street lighting, lack of signs, narrow street limits, inadequate police force and unintelligent traffic regulations.

MODERN CAR MACHINE OF RARE POWER

The average man nowadays wants an automobile that will run and that will last a long time without his constantly fussing with it. In the older days, when the Army strong starter was the only kind known and a woman driver was practically unknown, men looked upon automobiles as expensive toys. Only the wealthy man bought them and if they ran a while they lorded over their less fortunate rivals and had a lot of fun while the machine ran.

When it ceased to run they had it towed to some blacksmith shop and let the alleged mechanic tinker with it there until he got it to run. Sometimes the car would not run and an "expert" had to go out from the city and get it to run with a carload of spare parts.

"You need not laugh at this, because it was not so many years ago," says Mrs. P. K. Webster of the P. K. Webster Company Inc., Jordan distributors here. "Ten years ago cars with electric starters and electric lights were unknown. They were still cranking them by hand for the most part. One manufacturer had an air starter and several of them were making experiments with electrical devices."

"Compare them now with the cars of today. With everything for comfort and enjoyment, these cars start with a touch of the foot and run many thousands of miles without attention except for gasoline and oil, and not too much of that."

The spark advanced too far for the rate of speed at which the engine is running causes knocking of the engine and connecting rods to break. It will also cause overheating of the engine.

France, Italy and England will be represented at the French Grand Prix near Strasbourg, July 15.

SALES FOR YEAR EXPECTED TO SET HIGH RECORD

H. I. Toland, former wholesale manager at the New York City branch of Mitchell Motors Company, has been appointed Pacific coast representative of that company and will have his headquarters at Los Angeles. It is the intention of Mitchell to make a strong bid for the coast business which is at a record-breaking point this year. The first five months of the year surpassed the first five months of last year by over 21,000 new car sales in California alone, or a gain for the state of over 37 per cent.

Fender Sets Brakes When Person Is Hit

A new automobile fender has been designed and successfully demonstrated in San Francisco. A bumper is so arranged that the ignition is shut off and the brakes applied immediately when the machine hits a person. In the test a car going 15 miles an hour was stopped within two feet.

Keep Rivets in Your Car Tight

Few owners examine the frame for loose rivets, yet these often shake loose and fall out. A car owner recently found that two rivets which had held a cross member of the frame in place had slipped out and the side rail had cracked a little as a result.

It's a good idea to paint the rim occasionally to prevent rust.

BEST ROUTE OPENED TO YOSEMITE

The Big Oak Flat road is the best route into Yosemite Valley according to those who have made the run into the wilderness of the Sierra in the last week or so.

"This route was opened only a short time ago and is now dry and smooth all the way into the famous valley," says C. L. Butler, of Butler-Veitch, Inc., Marmon, Dorr and Fagel truck distributors here.

"We made the trip into the valley last week in a Marmon and had no trouble at all. There is one detour on the Oak Flat road near Knight's Ferry that is sixteen miles long. They are building the new concrete highway there and the detour is provided around the construction work. The detour is rather rough, but need not deter any one from making the trip.

"The road winds through the historic country made famous by Bret Harte and Mark Twain, and if you have time it is a good idea to stop in the famous old places and look over the ruins. There is much to be learned about early California history.

"The government crews have done a great deal of work inside the Yosemite National Park boundary and much work has been done on the road outside. It is smooth and easily traveled.

"The Wawona road has been opened since the middle of May and travel has been heavy over it. There have been a few rain and thunder showers earlier in the season and motor cars have cut ruts in the soft dirt. These have not been smoothed, but the valley itself is a wonderful sight now. The deep snows of the winter were slow in melting this year, on account of the cold spring weather, and there is more water in the famous falls than ever before at this time of the year.

"In the spring there are a hundred and one falls that drop from the sheer sides of the valley. Then as the sun warms, and the water which feeds them dries up and the falls cease. This year many of these unnamed falls have remained longer than usual.

"The roads to Glacier Point from the floor of the gorge are now and may have made the trip.

"Yosemite is at its best right now. Don't fail to see it this year."

PALOMARE GRADE TESTS CLIMBERS

The Palomare Mountain grade is becoming the favorite course in Southern California for displaying the mountain-climbing superiority of motor cars. Three times within the last two weeks the record has been smashed, twice by a Willis-Sainte Claire.

The hill is one of the hardest and most trying tests to which a motor car could be subjected. The length is 1.25 miles and during that distance the twisting, winding roadway rises to an altitude of 5800 feet. Not only is the climb severe, but there are in all 181.5 sharp hairpin turns in addition to other minor twists. This not only makes it necessary for a car to stick to the road at high speed, but it is very essential that a motor car have the fastest kind of clutch when the driver slides around a hairpin turn he must have a motor that will take the gas easily and quickly when the car is once around and the foot goes down on the throttle.

William H. Youhill in a stock Willis-Sainte Claire roadster, officially timed by members of the San Diego press and an A. A. A. official, made the climb in 21.5 minutes, breaking the former record held by a specially geared car by 44.2-5 seconds. A couple of days later another car cut 2-5 of a second from this mark and Youhill made it too his Willis to the long hill and this time went up in 23 minutes 59.3 seconds, cutting 15.2-5 seconds off his previous record.

These runs attract much attention to the Willis-Sainte Claire in the southern end of the state. This car has distinguished itself in many such climbs this spring and a year ago started the year by its record-breaking performance of going from Oakland to the floor of the Yosemite Valley and return in 12 hours and 59 minutes. This is one of the greatest runs of any kind ever made in the state. The car was driven over the Big Oak Flat road at a season when the road was in none too good shape.

The gasoline level in the carburetor varies from an eighth to a sixteenth of an inch below the top level of the spray nozzle.

Avoid letting an automobile stand in the sun in hot weather because of the tires. Choose a shaded spot if possible.

CLOVERDALE-ASTI ROAD OPEN AUG. 14

The highway between Healdsburg and Cloverdale will be open as far as Asti by August 14. This is the word sent out by road officials, and it means a lot to tourists all over the state. This road has been under construction for many months.

It is expected that the rest of the new highway from Asti through Ukiah and Willits will be open soon. There is much work to be done there, however, and the highway grade is being straightened. When this highway work is completed it will be the last that will be necessary to have a concrete strip from Sausalito to Willits, and there will then be a good road from Sausalito clear to Eureka, because the road from Willits north is in good shape.

There is a wonderful country up there. The trip from Oakland to Eureka can be made in two days by easy driving. The first night's stop should be at Willits or some of the resorts north of there.

The road from Willits north is called the Redwood highway because it winds through virgin redwood forests for miles between Willits and Eureka.

ROAD TO BIG BASIN IS GOOD

The Santa Rosa Congress Springs road to the Big Basin is in very good shape for motor car travel, according to W. A. Reanier, manager of the Associated Oil branch in Oakland.

Reanier made the trip over it on the fourth of July in his Dodge Brothers' roadster and says that he has never before known the road to be in better shape.

Every night the road is sprinkled and this settles the dust after a day of heavy travel and makes the road free from dust for the next day's travel.

Reanier's father manages the Redwood Inn down in the basin and the hotel man claims that never before have they accommodated so many tourists from all parts of the country. The visitors, too, are staying longer than during previous years.

"Another nice feature about the trip," points out Reanier, "is the fact that the curves have been widened, making driving just as safe as on the straightaway."

"Anybody can make the trip and with the greatest of ease."

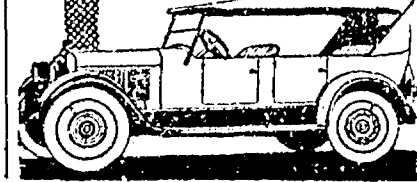

Why Pay More?

THE Columbia gives reliability, economy, power and speed.

Its performance is the most convincing argument for its purchase. Its quality of construction extends to the smallest details. Ride in it!

Here Are Times When You Should Blow Your Horn

WHEN backing the car.

Just before reaching the top of a hill.

Before taking dangerous curves in the road.

Before crossing a road and before coming to a crossroad.

When desiring to pass another car going in the same direction.

SANTA CRUZ TRIP DECLARED IDEAL

Have you been down to Santa Cruz and around there the last few weeks?

There is a great deal to see and a lot of fun to be had. There is a concrete highway every foot of the way from San Francisco, through some of the most scenic country in the West.

"It makes an ideal short trip, and you can make it in a day and have a lot of time for a swim on the beach," say officials of Hagler & Yokoun, Gardner distributors here.

"The road is easily followed. Drive down the peninsula and turn left near Sunnyvale and into Los Gatos, then over the hill into the Santa Cruz country. This is the wonderful concrete and steel road over the mountains through the redwoods. The road is not so wide, but there is plenty of room if everyone drives sensibly. There is a line down the middle of the road, so that minimizes the intention of those who try to swing wide on curves.

The distance is only about ninety miles, and you can make it in a little over three hours and a half. There are a hundred and one places to stay in the mountains down there, and plenty to do.

"All the resorts in Santa Cruz are open now and there are enough along the beach between Santa Cruz and Del Monte to make life well worth while if you care to go, down there."

"There are plenty of mountains to climb, too. There is the Empire grade that runs right out of the

GUNS MOUNTED ON AUTO TRUCKS

"Wanted—Homes for good army mules." This will be the order if the program that has been started at Fort Winfield Scott, San Francisco, is carried through and should Uncle Sam motorize the entire army as he has the Sixty-third Artillery Battalion (anti-aircraft). At present, Fort Winfield Scott boasts of one of the three anti-aircraft batteries in the United States Army—a battery unit has the best work in transportation equipment, that is completely motorized from its anti-aircraft gun carriers, its powerful searchlights, its kitchens, water tanks and trailers for its cargoes.

The anti-aircraft guns are mounted on two-ton White trucks which are the class A standard of the army. There were over 18,000 White trucks of this type serving the armies of the United States and Allied nations during the war.

In March, 1937, in the New York Journal, a writer described his first motor car ride as follows: "In search of a new sensation I went yesterday and rode in a

Chamber of Commerce Dinner Sets Precedent for Team Work

BY SUZETTE

When the Oakland Chamber of Commerce opened its doors to women last spring, it was a manifestation of the New Spirit that revealed itself at the Chamber dinner at the Hotel Oakland on Monday night, when four hundred, and more, men and women of affairs sat down together to talk over the galvanizing of the growing spirit of the New Town—a part of the big "For Northern California" movement that is—thank God—offering something to talk about over the tentable. Nothing since the war has stirred the imaginations of the leisure women who keep in step so much as this movement—not even the political game that is waxing warm as the primaries draw near.

The dinner, whereat the younger men of Oakland were the moving spirits, was the opening gun for the Chamber of Commerce membership campaign that waxed warm on the morrow.

Such amazing luncheons at the Hotel Oakland on the four work-days! After singing and playing together as only men know how to do in large groups, the captains made their reports. And the enthusiasm of their fellows was infectious. Joseph King, president of the Chamber, sped the speeches along in quick tempo; nothing lagged, everybody was on his toes for New Oakland. And at the end of the campaign—to which many leisure women gave of their time and financial help, it was quietly agreed as soon as vacation is over, and the effective women of the town are back, they will be drafted into the service of their city. And conscious that happiness is obtainable only through

service, they'll rally to the colors, and make a good game out of it. That's the way men do it. Why not women?

WEDDED

The testables where the Main Line set assemble were agog over the news from New York of Mrs. Burton Elkins' marriage a few days ago to James Creston Parrish, Jr.

The bride, formerly the wife of Felton Elkins, is the daughter of Mr. and Mrs. J. C. Breckenridge Oliver of Kentucky, the latter making his home in Santa Barbara. Mr. Parrish was graduated from Harvard with the class of 1907. He is the grand nephew of Commodore Cornelius Vanderbilt, a member of the Knickerbocker, Racquet and the Bar Association of New York.

He is known as a clever golfer, with membership in the Country Clubs around New York.

"WILD BIRDS"

Nothing under heaven could have given Dan Toheroh's "Wild Birds" a bigger momentum than the attempted banishment of it from the stage of the Little Theatre as an "immoral" play—one of the corporals of the police department the critic who passed judgment. And the word having gone forth, of course, "The Department" couldn't back down. So to save the situation—which promised to come to grips as the day of condemnation grew on—the art critics under Chief of the Police determined the show could go on.

(Continued on page 2, col. 1.)

Portraits

SYDNEY V. WEBB

Mrs. William Marcus Hamilton and the members of her bridal party. The wedding of Miss Mary Davies Gaines, a member of the Alpha Chi Omega Sorority, at the University of California, and Mr. Hamilton June 21 was a notable event in All Souls' Episcopal Church. At the left of the young bride are Miss Gladys Windham, Miss Ruth Lange, Miss Pauline Gaines, bridesmaids; at her right, Miss Ruth Gaines, maid of honor, and Miss Claire McClure, who was at the organ.—Sydney V. Webb Photo.

Mrs. Donald Lawton, who was Miss May Spaulding, whose marriage took place July 6 at the home of Mr. and Mrs. Roy L. Shurtliff. The hostess is a sister of the groom. The ceremony was one of the beautiful home services of a month of nuptials.

Dionysos Players Typify New Spirit of Oakland; New Season

The Dionysos Players is another forward-looking movement. The patronesses are the Mes-

To simplify, it is the Little Theatre of Oakland that struggled to its feet last winter with but little help outside of its own ambitious and art-hungry group. But it got there. It did the things it set out to do. It put on a group of plays each month, or thereabouts, and put them on with credit to the directors, Miss Hedrika Felcher, and to the hard-working members who put the project over.

"If," say the promoters of this newest evidence of an outcropping of art in Oakland, "there is to be a real personality in New Oakland, art in any of its forms cannot be ignored; and as dramatic art employs all the other arts, it is incumbent upon good citizens to encourage the club that sponsors only the best."

A drive is on at the moment for memberships.

If you like to hear a good play that, though not promising to mature from the box office standpoint, but is stamped with esthetic worth and interest, then join the club. It is, by the way, underwritten by a number of prominent Eastbay persons that support all

HOME AGAIN

The William Bryans are quite settled in their home, added to and developed before the wedding of the young clubman and the beautiful little widow. After a honeymoon south, the newlyweds spent some time in the Bryan's bachelor bungalow—ambiguous, this—the bungalow was Mr. Bryan's when he was a bachelor.

Miss Mary Elizabeth Easton, the sub-debutante sister of the bride—that, though as pretty—is on a motor tour in Northern California with her father, Giles Nelson Easton.

Both are granddaughters of the distinguished gallant, John Phillips, who in his late eighties, is one of the institutions of Oakland.

HAPPENINGS IN EAST BAY SOCIETY

"Wild Birds" Is Swinging Into Its Own

(Continued from Page 1)

If Irving Pichel would eliminate certain objectionable words. Evidently the old corporal hadn't read "Huckleberry Finn," and his sensibilities were shocked because the untaught little orphan girl is natural enough to admit certain elemental human facts. "Things like that," meaning the coming into life of a little new soul—"said the censor, oughtn't to be talked about. They're family matters."

And the while, some of the rawest things ever put over in crudeness and coarseness were going on without a help from the literary circle of "the department."

But the controversy was the finest thing that could have happened to the young Californian's play, because everybody wanted to read it or hear it. And the sales jumped up, and when it was announced that the play was to be produced at Wheeler hall on the U. C. campus, Friday night, the clans turned out.

The play was put on by the same cast that produced its premiere at U. C. Irving Pichel and his wife, Violet Wilson in the leads, Mary Morris as Cory Slag, the brutal farmer's daughter, and Dorothy Luck as Edith Elwyn Rafferty, and Lloyd Corrigan added interest to the cast.

"Wild Birds," it will be remembered, won the first prize—\$300—in a play-contest managed by the Greek theater management, most of the California playwrights contesting.

"The Great Adventure" by Arnold Bennett was repeated by the players on Wednesday evening to a full house.

The summer session addicts are ardent supporters of all the arts.

Now comes the betrothal of Miss Dorothy Elizabeth Hall, daughter of Attorney and Mrs. Gilbert P. Hall and James F. McCone, both of Petaluma. The bride-to-be is a graduate of the Dominican Convent in San Rafael and of the University of California, class of '21. She is a member of the Alpha Phi sorority.

Her fiancé was graduated from the State University and last year was track manager. He is affiliated with the Phi Kappa Sigma fraternity, the Big C, Golden Bear, Winged Helmet and other honor societies. Miss Mary Louise McCone and Miss Margaret McCone, his sisters, are both students at the University of California and members of the Kappa Alpha Theta sorority.

Mr. McCone is associated with a large concern in Modesto. No date for the wedding has been set.

Pink and white garden flowers were the background for the marriage of Miss William B. Davis, daughter of Mr. and Mrs. Frederick B. Davis of Grove street and Irvine Norton, Tuesday evening, at the home of Mr. and Mrs. W. A. Ellis. Close friends of the family were present, the ceremony having been read by Rev. E. P. Dennett, of Trinity Methodist Episcopal church in the college city.

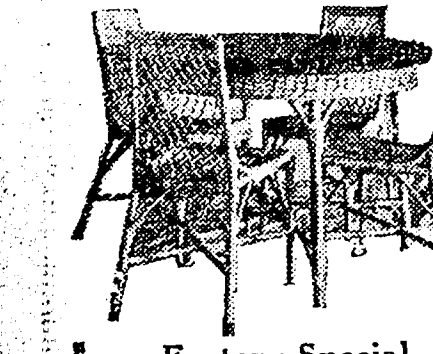

Attendants upon the bride were Miss Alice Ellis, her maid of honor, and the Misses Bernice Cooper, Edith Dennett, Mildred Stevens and Dorothy Davis, as bridesmaids. Mr. Rutledge was best man. Mr. Norton is a son of Mrs. I. Norton of Berkeley.

PIEDMONT AGAIN

Mrs. Walter Leimert and her little lad returned from New York a few days ago where the little artist had first won laurels.

The Leimerts are planning a trip to the Sierras—An Isaac Walton excursion that is a part of each perfect summer.

Oakland residents at Wilderness Lodge in Mendocino county and among the arrivals for the holidays were Mr. and Mrs. J. S. Ingram, Mrs. M. D. Winter, Mr. and Mrs. A. M. McCarthy and their children, Mr. and Mrs. William Nettle and son, Mr. and Mrs. R. Sanborn, Mrs. Sam Brock and Lloyd Brock, Mr. and Mrs. W. M. Boggs, Miss Amy Carollan, Mrs. G. Williams, Miss Marion Browning, Mrs. K. Spencer and J. Sherwood.

Mrs. William Stafford Gibbs is entertaining a charming kinswoman from the East—Miss Fox, for whom the hostess will entertain informally from time to time during the summer.

Spreckels Farm Scene of Gay Week-end Meets

Mrs. Herbert G. Lengler of Berkeley was a guest at the Napa place of the A. B. Spreckels, where the father of the young Berkeley matron is manager.

Since the departure of Mrs. A. B. Spreckels for Paris, the week-ends of the family are spent at the ranch, where the children, Alma, Dorothy and Adolph, are quite the life of the countryside, friendships having been established with the Napa children when the little San Franciscans spent a summer at the discolored school.

The appointment of Mrs. Spreckels to the post of Immigration Inspector—Lillian Russell Moore's job—will enable the Californian to go through Germany and the North countries without the usual red tape that hampers one's progress since the war.

CHURCH SERVICE

The wedding of Miss Adelaide Erickson, daughter of Mr. and Mrs. A. M. Erickson of Woolsey street and Arthur C. Walters, was read yesterday at St. Clement's Episcopal church, seventy-five relatives and friends the guests. Rev. P. Augustus Martyr, rector, officiated.

Miss Zelma MacDonough was maid of honor and the bridesmaids the Misses Lorene Johnson and Lucille Smith.

Little Audrey Peterson was flower maid. Roy Erickson was best man for the groom.

Both bride and groom are graduates of the University of California, where both were prominent in campus affairs.

San Francisco is to be the future home of the couple.

AT SHASTA.

Mrs. William Thornton White and her young son, Master Billy White, are guests at Shasta Springs. Later they will visit Portland. Upon their return they will motor to Lake Tahoe, where they will be guests at the Tavern 'till the end of the season.

Mr. and Mrs. Clarence Monroe Harter of Tacoma, with their children, Nancy Jane and Jack Monroe Harter, are the guests of their relatives, Mr. and Mrs. W. H. Sinclair, who have planned a number of delightful motor trips for the travelers.

A flock of affairs have been given for the Oliver Edwin Seegleken (Marie de Benard) who are leaving for Los Angeles to make their home. Last week the Elmer Dyer's gave a dinner in their honor.

DAVIS-NORTON

A notable wedding whorled a hundred and more guests were assembled from about California, was the nuptial service that made Miss William B. Davis the bride of Irvine Norton.

The service was read at the home of Mr. and Mrs. W. R. Ellis in Grove street, by Dr. E. P. Dennett. A program preceded the ceremony by a group of artists, friends of the bride, including Mrs. Edward Hoffeld of San Francisco, violinist; Mrs. W. R. Ellis, vocalist; and Miss Eleanor Peterson, pianist. The bride, in a frock of white Canton crepe, was attended by Miss Alice Ellis, maid of honor, gowned in pink Canton crepe. The bridesmaids, the Misses Edith Dennett, Bernice Cooper, Mildred Stevens and Dorothy Davis, wore frocks of organdy in pastel shades with hats to match.

Mrs. Norton is a graduate of the Berkeley high school and a clever musician. She has been an instructor of music in the Vallejo school for two years, where she has hosts of friends.

Mr. Norton is the son of Mrs. I. Norton of Grant street, and is a former university man.

IN ALAMEDA

The marriage of Miss Nell Quill and Charles Bronson Seger Jr., at the home of the Daniel Quills in Alameda was a quiet affair, the guests having been confined to a few friends and the relatives of the young people.

The bride is a clever little artist, her appearance at one of the Montreal theaters in the spring the background for the romance whose denouement was recorded this week.

The groom is the son of Charles Bronson Seger of the Union Railway and head of a big rubber concern in the East. The parents of the benedict, coming out for the wedding, are at the Hotel Oakland for a brief stay.

The young persons will make their home in Passaic, New Jersey.

Mrs. J. A. Hoffman of Oakland is a guest at the Hotel Iroquois, Atlantic City.

TENNIS SHARK

Eagerly the Eastbay is attending upon the tennis successes of Helen Wills, the little Berkeley girl, in her tournaments of the East, where she is backing many of the regulars off the boards.

Two years ago her heady playing was recorded in the notebooks of the fans when she played (she was then sixteen) with the picked players of the "round-the-bay" schools. "She has the stroke," said John C. Rohls, tennis expert, before her game had won attention from the national galleries that follow after the heroes—or heroines—of the racket have won their way.

AT MIAMI.

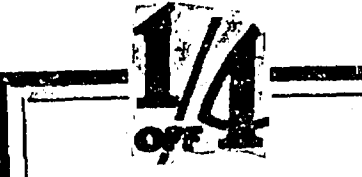

Mr. and Mrs. Charles Leonard Smith of the Peralta left Friday evening for a visit of several weeks at Miami Lodge. They will stop in the Yosemite before returning to their home. Mrs. Smith will go down to Carmel-by-the-Sea, where a host of Eastbay folk are domiciled for the summer, upon her return.

July Month Of Smart Nuptial Affairs

Miss Eleanor Stratton of Berkeley and Edward Russell Dewey of New York have set August 26 as the date for their wedding, the ceremony to be at the home of the parents of the bride-elect, Professor and Mrs. G. M. Stratton. Miss Stratton is being entertained informally by her close friends.

The betrothal was announced soon after the return of the bride-elect from New York, the annual banquet at the Delta Gamma house the occasion of the breaking of this news.

The Herbert Jones are entertaining guests at their country home at Brookside, one the most attractive in the Santa Cruz mountains. Since going down they have had for their house guests Mr. and Mrs. Lionel Browning (Ellis Jones).

Delta Delta Weds in the Crown City

At a charming home service, Miss Josephine Norris, daughter of Joseph Norris, became the bride of George C. Byrne of Santa Cruz in the midweek.

The ceremony was read at the Norris home in Hill lane before fifty friends, the Reverend James B. Orr of the Boulevard church the celebrant.

Mrs. Earl Almeda, sister of the bridegroom, was matron of honor, and Ralph Norris, brother of the bride, best man.

The bride wore a gown of white Canton crepe and veil with orange blossoms, carrying a shower bouquet of pale pink roses and lilies of the valley.

Her attendant was in Nile green and carried pink roses and lavender sweet peas.

Mr. Byrne is a graduate of the University of California and his bride received her diploma from the San Francisco State Normal school.

The newlyweds have gone on a motor trip to Crater Lake and on their return will go to Santa Cruz to make their home.

IN BERKELEY

The marriage of Miss Violet Grace Knowles and Revere Ulrich Hofstetter is set for Saturday, the 22nd, at the First Christian church, in Berkeley.

Miss Knowles will be attended by her sister, Miss Lillian Knowles, as maid of honor and the bridesmaids the Misses Vivian Hurst, Hazel Lund and Ruth Whiting.

Irving Graham is to be best man and the ushers Messrs. Melvin Stamper, Charles Savage and Willard Brunk.

Mrs. George L. Pettygrove and Mrs. E. M. Norton will sing the pre-nuptial offertory with Mr. Matthews at the organ.

Mr. Hofstetter and his bride will make their home in Berkeley.

Calvary Presbyterian church was the scene of the marriage of Miss Marjorie Childs and Sifton A. Miller July 8, more than a hundred guests witnessing the ceremony. A reception to the bridal party was held at the Childs home in Henry street.

The bride is the daughter of Mr. and Mrs. H. H. Childs of Oakland. Miss Doris Gibbs and Miss Irene Waitt attended the bride. Raymond Pilgrim was best man. Mr. Miller is from Fresno, where the couple will make their home.

AT DEL MONTE.

Polo is vying with golf at Del Monte and Pebble Beach. Three or four teams turn out on the polo fields over the week-ends and while the matches are the form of school-ing green ponies and developing new players, they provide much excitement for the spectators.

Major Max Fleischmann of Santa Barbara is among the players. He shipped up his string of ponies, and intends to spend the summer, Mrs. Fleischmann joining them.

The major sailed up from Santa Barbara in his yacht, "Haida," which is now anchored in Sausalito Cove at Pebble Beach.

Mr. Earl Almeda, sister of the bridegroom, was matron of honor, and Ralph Norris, brother of the bride, best man.

The bride wore a gown of white Canton crepe and veil with orange blossoms, carrying a shower bouquet of pale pink roses and lilies of the valley.

Her attendant was in Nile green and carried pink roses and lavender sweet peas.

Mr. Byrne is a graduate of the University of California and his bride received her diploma from the San Francisco State Normal school.

The newlyweds have gone on a motor trip to Crater Lake and on their return will go to Santa Cruz to make their home.

Mr. and Mrs. W. B. Bels of Pasadena and their daughter, Mrs. Carson Ricks of San Francisco are at Del Monte for an extended stay.

Mr. and Mrs. John F. Neylan and their young daughter are at the resort for a month's visit. They have been spending much of their time with Dr. and Mrs. Albert J. Houston of San Francisco, who have opened their rustic home at Pebble Beach.

Mr. and Mrs. S. F. B. Morse gave a dinner in the palm grill at the Hotel del Monte in honor of Mr. and Mrs. John E. Carbery, formerly of Ireland, but now making their home across the bay.

Mr. and Mrs. Louis de Cebrion of San Francisco have been at Del Monte for some time, having Mrs. Algernon Crofton, Mrs. Cebrion's mother, as their guest.

Mr. and Mrs. Wm. Hotelling are making a visit to Del Monte.

Among other San Francisco people at the popular Monterey resort are Mr. and Mrs. Clinton E. Worden, Mr. and Mrs. E. W. Prentice, Mr. and Mrs. H. W. Seale, Mr. and Mrs. Alfred S. Tubbs, and Mr. and Mrs. M. C. Cass.

Mr. and Mrs. Carl Sward and Mr. and Mrs. Bob Poppe motored to the hotel for the week-end.

Much interest is being taken on the Monterey peninsula in the Junipero Serra celebration which will take place in Carmel on July 21, 22 and 23. A monument in

WED SOUTH.

Mr. and Mrs. Harland Franklin Beardslee (Carol Seabury) are in Southern California on their honeymoon. Their wedding took place last Saturday at the residence of the bridegroom's father, F. S. Beardslee, in South Pasadena. Rev. E. R. Waldo officiated, in the presence of a recent bereavement in the Beardslee family the ceremony was simply appointed.

The bride wore a gown of pearl gray canton crepe in the draped mode, and carried a shower bouquet of lilies of the valley and orchids. Miss Edith Brown, a former classmate of the bride, was her maid of honor and Lynn Spencer best man for Beardslee.

In the fall the couple will return to Berkeley, when the bridegroom will finish his college work at Christmas. They will then make a three months' tour of the eastern states.

Mrs. Beardslee received her degree from the State University with the class of '22. She is a member of the Delta Delta Delta sorority. She is a sister of Mrs. Herbert Reed (Dorothy Seabury), whose marriage was a social event of this summer in the college city.

Mr. Beardslee is a Delta Kappa Epsilon fraternity man and a member of the Skull and Keys and Beta Beta honor societies. He is a member of representative family of the Crown City.

Mr. and Mrs. W. B. Bels of Pasadena and their daughter, Mrs. Carson Ricks of San Francisco are at Del Monte for an extended stay.

Mr. and Mrs. John F. Neylan and their young daughter are at the resort for a month's visit. They have been spending much of their time with Dr. and Mrs. Albert J. Houston of San Francisco, who have opened their rustic home at Pebble Beach.

Mr. and Mrs. S. F. B. Morse gave a dinner in the palm grill at the Hotel del Monte in honor of Mr. and Mrs. John E. Carbery, formerly of Ireland, but now making their home across the bay.

Mr. and Mrs. Louis de Cebrion of San Francisco have been at Del Monte for some time, having Mrs. Algernon Crofton, Mrs. Cebrion's mother, as their guest.

Mr. and Mrs. Wm. Hotelling are making a visit to Del Monte.

Among other San Francisco people at the popular Monterey resort are Mr. and Mrs. Clinton E. Worden, Mr. and Mrs. E. W. Prentice, Mr. and Mrs. H. W. Seale, Mr. and Mrs. Alfred S. Tubbs, and Mr. and Mrs. M. C. Cass.

Mr. and Mrs. Carl Sward and Mr. and Mrs. Bob Poppe motored to the hotel for the week-end.

Much interest is being taken on the Monterey peninsula in the Junipero Serra celebration which will take place in Carmel on July 21, 22 and 23. A monument in

Maude Fay's Wedding High Light of Year

It is only a ceremony of rare import that has the distinction of celebration in the archiepiscopal residence—the Fay-Symington nuptials standing quite alone in the halo that attaches to the play of ceremony and color and churchly dignity.

The distinction was, of course, the outgrowth of a long friendship between Mrs. Grace, Archbishop Hanna and the Fay family, the original intention having, been to hold the ceremony in the old Fay home in Grove street.

Of course, the beauty of the service was immeasurably augmented by the ecclesiastical robes of, amethyst, in opposition to the gold braid of the navy, and the garden-like arrangement of color in the gowns of the attendants and guests.

Attending the bride were, her sister, Mrs. Marshall Dill, and Mrs. George Cameron. Thomas Symington of New York was best man, with John Miller of Pasadena the best man. Little Martha Symington and Mollie Fay were the flower bearers, in pink chiffon frocks carrying pink and white baskets.

Philip Fay, who bears his father's name, gave his sister into the keeping of the groom. (How we do persist in following tradition in this "giving away" of the bride! How long will we continue the practice of the caveman?)

The bride—a lovely picture she was, quite as she might have been in her famous roles of Herr Wagner.

Both the episcopal drawing-room and the artist's home, where the postnuptial reception was held, were massed with flowers—many of them gifts, in the colors the bride loved most—purple, blue and pink.

The wedding assembled all the Fay clans, and a lot of interesting persons whose fathers, like the Fays, were builders of the community.

The newly-weds will make their home in the East, the artist seemingly having definitely given up her career for the conventional thing that promises the largest mead of happiness for the world.

Captain Powers Symington is commonly acknowledged one of the most popular officers of Uncle Samuel's navy. Numbers of his family came out for the wedding, one of the notable affairs of '22.

WOMEN and THEIR WORK

Recreation of Children Aided By Women

By EDNA B. KINARD.

Does one go back in history, it is not difficult to discover that the recreation department of this city is the realization of a dream of a small group of women. One summer down in Tompkins school grounds, the Oakland club tried a vacation experiment. It brought together the youngsters of the neighborhood for daily play and automatically kept them from the streets. The club financed the project for several seasons. The pioneering attracted a wide local attention, and finally there was crystallized a sentiment which demanded that the city take over the movement. The late Mrs. Cora E. Jones, an Oakland Club president, and Miss Ethel Moore, are the outstanding figures in the history of the recreation department. Mrs. Addie Mosher, member of the present board, has their pioneer spirit in the fight which she is making to establish a playground in that district in West Oakland yet untouched by this community service, but where the need is recognized as imperative.

The eyes of the world have been upon the system which has been evolved here and its program has been accepted not alone throughout this country, but has been duplicated in France, Italy and Belgium under the immediate supervision of Miss Ruth Findlay, for many years affiliated with the Oakland department.

Because its activities have touched so intimately the life of the entire community—the adults as well as the children, the men as well as the women—the Recreation Department has come to be taken for granted with little heed given its magnificent proportions.

But visit the Children's Theater on a Saturday afternoon—provided you go on the proper alternate Saturday, as the coming will be drop in at the Lattice Theater in Mosswood Park on the proper Thursday afternoon! Recall the pageantry of the annual Christmas festival with its cast of 2500; the duck festival on the shores of Lake Merritt; the traditional May Day celebrations; the Play Days with their 1000 participants; the field days; the tennis matches; the baseball games. Listen to those who have been guests at the Municipal Camp in the high Sierra where something like \$24 provides

MRS. KATE SMITH, former president of Alameda district, California Federation of Women's Clubs, who is the author of "A Little Leaven," one of the fiction publications of the season. Mrs. Smith is writing under the pen name of Katharine Grey. She has had flattering offers for the scenario rights of her books.

Municipal Camp in the high Sierra where something like \$24 provides

Pioneer Women To Be Guests On Honor Roll

Those whom the Pioneer Women of Oakland have chosen to compliment by naming to the honorary roll, will lend inspiration to the reception which the organization has announced for Friday afternoon in Wigwam Hall, Pacific Building. Summer, offering a chance to put away serious matters, save that involved in the proposed purchase of the Mountain Park by bond issue next month and to which these older residents are pledged, the women are taking the opportunity for play and for a more intimate contact with each other. Mrs. Sarah Furrell, president, Miss Lily Cole, Mrs. P. J. McPherson, vice president; Mrs. Emily Baker, secretary; Mrs. Cora Merritt, treasurer, and Mrs. Nellie Mayon will receive the members and special guests, dispensing the hospitality of the informal hour.

Seven women who have been outstanding figures in the development of Oakland and whose residence dates prior to 1876, have been particularly distinguished by their companion pioneers in being placed on the Honor Roll. They are: Mrs. J. B. McChesney, Mrs. Blake-Alverson, Mrs. Abbie Aldrich, Mrs. Henry Wetherbee, Mrs. C. N. Walters, Mrs. F. M. Benner and Mme. Caro Roma.

Plans for a new clubhouse—or at least an enlarged one—which will meet the requirements of the growing membership, will interest Park Boulevard Club-women when the season opens in September. The register is being divided into groups which will immediately set about devising means to increase the building fund before any definite plans are talked over. Mrs. C. E. Robinson has asked the privilege of entertaining at the first of a series of benefits in charge of her group, opening her home for a large card party sometime in September. Special events will follow each month.

An innovation will be introduced this year in separating the program from the regular business meetings, combining the last with a parliamentary law practice. This will give two meetings during each calendar month. Following the first business meeting of the season, an initiation fee will become effective. The membership committee is rolling up its record during the summer months. The names of 140 well-known women make up the roster of Park Boulevard Club.

Following a meeting of the board of directors last week, Mrs. A. E. Carter, president, announced the appointments of committee chairmen. They are: Membership, Mrs. R. T. Rinehart; tea, Mrs. H. W. Pershing; music, Mrs. E. W. Gilford; program, Mrs. George T. Gamble; decoration, Mrs. J. Seuberg; legislation, Mrs. C. C. Hughes; recreation, Mrs. Paul H. Miller; philanthropy, Mrs. R. Olcott; ways and means, Mrs. V. A. Curran.

properly introduce forgotten lines without cue. So it was that search was made for the two ladies who were necessary to the finale. It was a short performance. The dress was given her entrance. She lisped four brief lines of verse. Thundering applause met her effort. She was happy. So was everybody. It would have been a horrible thing to have left the blot of those unaided lines in that childish heart. And herein is the spirit of the movement. Humorous? Perhaps so. Human? Of course. But in justice to the leaders it must be said that there is being developed no group of stage-struck impossible prodigies. Democracy reigns, with fair play and justice the right of each, and whoever comes, is equally welcome.

What is being done in Chabot is being repeated on a less ambitious scale in Mosswood. A series of "Get Acquainted with Mosswood Park" days has been arranged for Thursdays through the summer for the purpose of calling attention of the public to that beautiful pleasure ground in Broadway. An out-of-door stage has been erected in a picturesque corner where the children from all parts of the city present programs of pageantry, music and dance. Here, again, is stressed the idea that the theater is conceived from the child's viewpoint rather than the adult's.

While august committees are sitting in solemn session debating what shall be done about the children, the movies and the playhouses, the youngsters themselves are finding the solution in building up their own standards, and having a perfectly wonderful time in playing the roles which appeal to their imaginations. For some love fairies and some love witches; some love languishing ladies and some Joan of Arc; some love kings, or knights or cowboys—and they may all be mixed without prejudice or offense on the stage of the Children's Theater. The public is always welcome—provided the adults will take the rear seats and not crowd the children out.

SMILES

The difference between a necessity and a luxury is that you can do without a necessity without losing the respect of the neighbors.

"Ignorance of the law is never excused," said the bright young lawyer.

"Then I'll be damned if you get any fee," replied the poor client.

Woman Active In Support of Farm Aid Bill

Mrs. Dow C. Golden during the past week has written a splendid record of achievement in the work which she has done in circulating the petition asking that the veterans' home and farm bill be submitted to the people of the state at the November election. Mrs. Golden has represented the Fruitvale Women's Club, of which Mrs. W. E. Gibson is president.

Clubwomen of the city have cooperated with the local post of the American Legion in its efforts to register a full quota of signatures to the initiative petition. Oakland War Mothers and leaders in the federated clubs made a canvass of the downtown business section, including the banks, department stores and office buildings.

The third Soroptimist Club to be organized in California will receive its charter and install its first board of directors on Wednesday night. With an enrollment of upward of 150, the Los Angeles Soroptimist Club has announced a banquet to mark the important occasion, in the Athletic Club. Governor William D. Stephens and Mrs. Stephens, Mayor Cryer and Mrs. Cryer, the presidents of the Los Angeles Rotary, the Oakland and San Francisco Soroptimists clubs, will be the guests of honor. Mrs. Oda Faulkner, chairman of the banquet committee.

By-laws will be adopted at the regular weekly luncheon of the club on Tuesday. Candidates for officers and the board of directors will also be considered. The club meets each week at Pauls. Membership is open to but one woman in each classification of the professions or business.

The Oakland is the "Mother" Soroptimist club. San Francisco women organized the second club, the movement being carried this summer into the south.

Several local women are planning trips to Los Angeles this week, the installation banquet of their fellows lending the chief attraction. Miss Violet Richardson, of the local organization, will be among the honored guests.

Landladies' Clubs Very Latest

"Landladies' Clubs" are the newest development in the realm of organization—one might say in the realm of organization devoted to welfare. The National Board of the Young Women's Christian Association is fostering these unique associations in its scheme for room registry departments looking out after the comfort and well-being of young women in relation to housing.

The "rented room," for economically independent girls and women, is going out of fashion. Not that they have ceased to seek living quarters. They are in greater numbers than ever. But the quarters must be truly livable and represent something more than a bed, a chair and a dresser in some otherwise "unwanted" family room. Women who have rooms to rent in various cities are organizing into "Landladies' Clubs," not for the purpose of making higher demands upon the young women to whom they cater or in any interfering scheme, but in a legitimate movement to talk over their patrons' problems and to help in the solution insofar as they are able. Regular meetings are held and routine business dispatched. Oakland has yet to form its first club of this nature.

However, housing for women in the Eastbay district is not overlooked. A rooms registry department is a regular activity in the Young Women's Christian Association. Available quarters, furnished and unfurnished, as well as apartments, all of which have been carefully investigated, are listed with the Webster street office for the use of the women of the city and for strangers. Information as to rates and accommodations are kept on file.

More than 5000 women were comfortably located in New York during the past year through the agency of a similar bureau.

The School Women's Club of Oakland has achieved a remarkable piece of work in housing which will be continued so long as teachers must seek living quarters. Prior to the opening of each school term the

club establishes an office where the professional man or woman may without suffering from that forlorn sensation of homelessness quickly be put in touch with convenient accommodations in the location most desired. The service is free both to the householder and to the school people. The department was created during the war, when shortage of suitable living quarters offered grave problems. Strangers affiliated for the first time with the local schools were given special attention. The war activity has been carried over into peace times and become a regular department of club work.

With an array of candidates seeking election to important public offices and with many questions of importance facing the local voters, Oakland Center, California Civic League of Women Voters, has announced that under its auspices two public programs will be presented next month in the Municipal Opera House. An effort will be made to introduce at the first of the series of Friday afternoon meetings the candidates who are seeking election to the state legislature from the districts which lie within this city. Candidates for county office and the municipal issues which will be brought before Oakland voters in August will inspire the second program. The meetings will be open to all voters, particularly the women. Mrs. C. E. Wilson, president, will preside as chairman. The dates have not yet been agreed upon.

Membership in Oakland Center will be built up this year by a large committee headed by Mrs. Luella Ketcham. The campaign will be launched at the August meetings which are preliminary to the opening of the official club season. Assisting Mrs. Ketcham in the work of enrollment will be: Mrs. Hannah G. Coates, Mrs. Roy E. Danford, Mrs. B. C. Eddy, Mrs. George Kleiberger, Mrs. Fred McDonald, Mrs. Harry Palmer, Mrs. George Preston, Mrs. C. E. Vance, Mrs. D. A. O'Brien, Mrs. Rose Woerner, Mrs. Olive Usatovage, Mrs. V. W. Parks.

Returning Red Cross Worker To Be Honored

Honor to a woman who has returned to the bay cities, Miss Findlay, Soroptimist Club tomorrow when the members make Ruth Findlay the inspiration for the weekly luncheon at Hotel Oakland. Miss Findlay returned a fortnight ago from overseas, where she was affiliated with the American Red Cross in recreation activities. For eighteen months she was head of the department which installed playgrounds in France, Italy and Belgium. That it was the Oakland system which was used as model cannot fail to be of interest to the bay cities. Moreover, that the young woman who had so large a part in developing the local system, won such wide recognition abroad, must be a matter of gratification to Oaklanders as well as to her more intimate friends. Miss Findlay has returned after an unusual experience to resume her place in the local recreation department. Her arrival was marked with a band and the presence of the entire staff of the municipal department at the station to greet her.

The story of those months, full of experience, which were spent abroad will contribute to the informal talk which Miss Findlay will give before the Soroptimist club-women tomorrow.

Directors of the club, of which Miss Violet Richardson is president, will meet for the regular business session in the afternoon.

An active part in the campaign for the purchase of the Mountain Park of 1500 acres, including the redwood area and Shepherd canyon, through a bond issue on which Oakland voters will ballot August 29, is being taken by this organization. Indorsement of the project was given several weeks ago. A delegation has been seated in the general campaign committee.

He—The fact is that you spend too much money. She—No, the fact is that you don't earn enough.

Household HINTS—

Potato Salad.

Boil seven medium-sized potatoes in slightly salted water until done, but not soft, drain them and let the get cold. When they are cold, dice them small. Peel, quarter and remove the seeds from a fresh cucumber, then halve the quarters and dice them. Pare a small onion and chop it with a half pepper as fine as possible. Wipe the inside of the salad bowl with a bud of garlic, then put in the ingredients, adding the heart of a head of lettuce shredded with kitchen scissors. Have ready a cold dressing that has been chilled, made of a half cupful each of water and vinegar, a quarter teaspoonful of salt, a little red pepper, a tablespoonful of sugar and a quarter cupful of butter. Mix well, then stir in a heaping teaspoonful of cornstarch that has been dissolved in a little water. When thickened slightly, pour onto the beaten yolk of an egg and stir until it is blended. Set the sauce to get cold before using. Just before serving add the finely chopped onion to the dressing, toss the salad in the bowl and garnish it with a hard-boiled egg.

Grapefruit and Nut Salad.

Remove the pulp of two grapefruits from the peeling and all of the white skin and set it to drain. Shell and chop fine, the meats of a half pound of freshly cracked walnuts and twelve salted almonds. Add a tablespoonful of sugar, and a half saltspoonful of cloves, and lastly, a little grated lemon peel to the finely-chopped nuts, then roll the grapefruit segments in the mixture and lay them on lettuce leaves, moisten with a little French dressing and put a tablespoonful of mayonnaise on each portion. Serve very cold.

Cantilever Shoe for Men

Hot Weather Shoes

Much of the discomfort of a hot day is the result of tight clothing and footwear. You may not realize it, but binding, stiff-soled shoes are often the "final straw" that brings about serious consequences when the heat has lowered your endurance. If the weather "blows you up" change to the Cantilever Shoe, recommended by physicians and specialists for comfort and health. It has a FLEXIBLE shank that bends with every step. The muscles move freely. The blood flows healthfully. The arches grow strong. The whole system relaxes in this new freedom with which you walk.

The heel is set to distribute weight properly. The natural inner sole line allows the toes to point ahead as they should for correct posture. The arch of the shoe fits the curve of the foot and affords easy support.

Operatic Production Sets New Mark in Southland

By CHARLOTTE CANTY.

LOS ANGELES, July 14.—"Carmen" drew an audience of 35,000 to the Bowl in Hollywood, on Saturday evening, and set a new mark comparable to nothing in the past annals of the Southland's artistic life. Starlight and moonlight had their moments of witchery between the acts, but the opera was given with all the panoply of advanced stage setting and lightning at command of the masters of stagecraft in charge of the event. Every seat was filled, and the overflow crowd, seated on the hills encircling the Bowl, missed not a note of the music nor a word of the text, so perfect were the acoustics of the great amphitheater.

Marguerite Sylva, as Carmen, was the star of the production. Edward Johnson, of the Chicago Grand Opera Company, was Don Jose. Henry Scott, Eileen Miller, Edna Leopold, Micaela, and others in the cast were Aristide Neri, Carl Gantvoort, Umberto Rovieri, Constance Reese, Georgina Strauss. The ballet, led by Ernest Belcher and Lena Basquette, numbered one hundred dancers; the orchestra, made up of picked musicians, was under the baton of Cav. Fulgenzio Guerrieri, and the entire production, the full cast including five hundred performers, was directed by Alessandro Bevanli.

Miss Katherine Banning, whose marriage to Francis Graves is set for July 19, has chosen as her bridal attendants, Mrs. John McFarland (Eleanor Banning), who is to be matron of honor; Mrs. William Phineas Banning (Evangeline Grier), a frequent visitor to Berkeley; Mrs. Louis Cass, Mrs. Alfred Wright, Miss Katherine Mellus and Miss Alice Morse of San Francisco.

An interesting engagement announced during the week is that of Miss Florence McGarry, daughter of Mr. and Mrs. M. J. McGarry, to Morris Barnes Miller, of Pasadena. Miss McGarry is a Marlborough girl, and her fiancé, a member of the Bachelors' Club, is a sophomore of Princeton. The announcement was made at a luncheon given by Miss Marion Kellogg, of Berkeley Square, at a luncheon, guests including Miss McGarry, the Misses Marion and Margaret Brackbridge, Camilla and Rowena Schneider, Anne Ayer, Katherine Wigmore, Dorothy Lillian Wellborn, Georgiana Sales and Mrs. Henry Cammann, Jr. Later in the day Mrs. Donald O'Melveny, sister of Mr. Miller, gave a garden tea in honor of the bride-elect and of Miss Corinne Eisenmayer, whose engagement to John O'Melveny was announced a week ago. A hundred guests enjoyed the affair. Assisting the hostess were Mrs. John Barnes Miller, Mrs. Edgar Gale Miller and Mrs. William Norris Bucklin.

Several pretty affairs are being given for Miss Lillian May Kahn, the lovely daughter of Mrs. John Kahn, who is shortly to leave with her mother for Paris, where she will study dancing and music. Miss Kahn is very talented and very popular in the younger set.

Katherine Hayes, a Mills College girl, is leaving for an eastern trip, which will include a stay of some weeks in Boston. Miss Hayes has entertained a number of parties of vacationing college friends and has been the recipient of many social compliments.

An interesting group assembled at the Hollywood Hotel in response to an invitation by Townsend Soper. The guests included Mrs. Ida May Gibson, Mr. and Mrs. Charles Modini-Wood, Mrs. Florence Wood Clark, Mrs. Emmett Sullivan, Miss Madeline Purdon and Miss Mona Wood, and the Messrs. Kenneth C. Beaton, Harmon Ryus, Perry Wood, Kenneth Gibson, Richard MacFarlang, J. L. Schenk and Joseph Kline.

Many out of town guests will attend the annual barbecue given by Dr. and Mrs. Ernest A. Bryant, formerly of the bay country, in their beautiful grounds on West

Adam street. Suzanne Bryant, home from Vassar, and Ernest Bryant, Jr., will assume part of the delightful responsibility attending this hospitable custom, and their young friends will add materially to a guest list already long.

Letters from abroad give charming accounts of the activities of local wanderers. The Henry W. O'Melveny is back in Paris, having enjoyed a motor trip through Holland and Belgium with Mrs. James Calhoun Drake, Captain and Mrs. Randolph Huntington Miner and Mrs. Mary Wilcox Longstreet. The William May Garlands have had several motor parties at Fontainebleau, a recent group including Mrs. Frederick W. Flint and her daughters and Mrs. Mary Banning Norris. Mr. Garland is a member of the American committee of the Olympic games. The Randolph Huntingtons, by the way, will probably reside abroad for some years.

Another delightful outdoor affair was the "Fiesta Mexicana," held in the grounds of the famous adobe, "The Outpost," by the Hollywood Art Association. The building is one of the oldest in the state, and at one time was the first stop between San Diego and Santa Barbara, where travelers might find rest and refreshment. Now in the heart of populous Hollywood, it still retains its old time charm, and the peep trees and willows, brought by the padres from Peru, are still vigorous, having been cared for by General Otis, who owned the property for years. The Art Association will preserve the building and use it for a center, the "Fiesta Mexicana," being the first effort to secure funds for the cause. Again Los Angeles is to have Maud Fulton in "The Humming Bird." Oliver Morosco is taking active interest in it, and it is possible that the work of this brilliant Oakland girl will make its way to New York.

Northern artists also claim much social attention at the moment. Mrs. Carroll Nicholson of Oakland and Mrs. Lillian Birmingham of San Francisco were the honor guests at a tea given on Sunday by the Cecil Frankels. A number of artists from all parts of the state were invited, for the Music Teachers' Association is in session, and the entire state is represented. Assisting the hosts were Misses Dean Mason, Roland Paul, Abbie Norton Jamison, Catherine Shank, William Howard, Philip Zobelein, Miss Julia Wolf and Miss Ethel Congdon.

Sunday teas are always a charming feature of Los Angeles social life. One hundred guests motored out to the home of the Joseph Zoellners on Windsor boulevard to meet Miss Esther Ripley, fiancée of Joseph Zoellner Jr., and her mother, Mrs. Esther Ripley, of Chicago. An informal program of music added interest to the affair.

THREE MINUTE JOURNALS

WHERE A GOAT TAKES PART IN A MARRIAGE CEREMONY.

Traveling in Central Asia is a dangerous undertaking at best, but to penetrate into Kafristan is really hazardous—but interesting. This mountainous country is a really beautiful place, and would be an ideal setting for a movie "thriller," with its dizzy paths around the ledges of the lofty mountains and its hair-ropes bridges spanning swift streams that are veritable plunging torrents. The people and the landscape are alike—wild and uncultivated. The very word Kafr means "unbeliever." The Kafrs have never been converted to the Islam religion which surrounds them. They have maintained their own religion, which is a remnant of the original Brahmin religion of India. Their rites and ceremonies are unique. If the traveler happens to witness a

wedding ceremony he isn't likely to forget it.

When a wedding occurs in Kafristan, the whole village congregates in a field early in the morning. It certainly is a fierce-looking wedding party that faces the bride and groom, for Kafrs are practi-

cally all bandits, and a race of real highwaymen, and they look and dress the part. All the men wear a black tunic with a bright red border, fastened tightly around the waist by a broad leather belt, through which is thrust a vicious-looking dagger.

The dagger is used very carelessly, and the mere shedding of human blood is nothing to a Kafr. Every woman wears a loose garment made of woven goats' hair, which is invariably black in color. The Kafr women have magnificent hair, and wear it hanging loosely

over the shoulders, forming a mantle of satiny black reaching below the waist. In the center of this picture group is a pure white goat, tied to a post. The bride, dressed in bright red, takes her position at the head of the goat, and the bridegroom, wearing a scarlet band across his chest, takes his stand behind the goat.

The Kafr priest approaches with the sacred horn, mutters a few holy words over the horn, and with it strikes the bride and then the groom on the forehead.

Then comes the village musician, who plays a wild tune on a flute right into the goat's ear! This is the end of the ceremony! The bridegroom lifts his bride on a camel, mount the beast himself, and they ride off to the cheers of the villagers.

NOW Clear

Final

To clear away all of our present season stocks during the remaining days of this week, we have regrouped and re-priced every garment—the FINAL REDUCTIONS of the season! A real clearance of 1200 Coats, Suits and Dresses; and just three days remain! Take advantage of this extraordinary opportunity!

My Marriage Problems

Clara Garrison's New Phase Of Revelations of a Wife

(Continued From Yesterday.)

WHAT ROBERT SAVARIN IN-
SISTED ON BEFORE HE
DROVE TO THE AUCTION
SALE.

Eleanor Rundle brought herself to an erect sitting posture, at Lillian's assuring words with a swift-sureness that reminded me of a rubber ball flattened against a wall, and springing back to full volume and resiliency when the pressure was removed. A moment before she could have inspired a canvas labeled "Despair." Now every line of her body spelled relief and hope, and her lustrous black eyes, lined with the fire which must have illumined them in the days of her long dead youth. "You always were a life saver, Lil," she said, and to my astonishment that was the only comment word of changes she gave for the lifetime which Lillian had thrown her. She was exactly like a hungry cat, I told myself indignantly, which has a saucer of cream set before it, laps it volup- tuously, and would scratch the hand that set the food before it, if the slightest opportunity were given.

READY SYMPATHY.

"Where can we get some coffee and sandwiches?" Lillian asked abruptly, and I knew that her compassionate brain was busy with that dramatic "I'm—I'm actually hungry, Lil," which Mrs. Rundle had uttered but a minute or two before.

"Never mind that now," Mrs. Rundle returned, busying herself before her tiny mirror, restoring her make-up, "I'm used to going without. But if I just can get recognition for my pictures, that will be better than any food or drink. I can get those later, but the crowd is at the auction this minute."

"As you like," Lillian acquiesced quietly, and I saw that she realized as I did that the woman had spoken only the truth. All her soul and the needs of her body had been fused into one all-absorbing desire by the fire of her ambition—a fire which had well-nigh consumed her without clearing any path to the success she craved.

"You wish me to drive back to the art gallery, Lillian?" Robert Savarin's voice was grave, deferential, but I detected a note of disapproval in it and knew that he resented for Lillian the snags care-

Goodbye Short Skirts, Edict of Paris Designers

Will these constitute the new dress for women this fall season? All below the knees! We wonder whether the women of America would object to these new Paris fashions. These five models were exhibited at the celebrated style show at the Prix des Drags, Paris, recently. Each dress was built along different lines, of different materials and colors. The one to the left is of lavender. Second, blue and white. Third, mauve. Fourth, black and white broadcloth with sunshade to match. Fifth, black dress with white waist.—Underwood photo.

less acceptance of her royal kind-
ness by this bizarre derelict.

"If you please, Robert, I—
must." There was a faltering in
her tone, a recognition of the just-
ness of his attitude, which made
him turn his face toward her with
one of his rare comprehending
smiles.

"Of course," he said, then bent
to the switch-key without further
delay.

Eleanor Rundle, her facial
make-up completed, fumbled in
her bag again and brought out a
small box.

"WE'LL WAIT TILL—" she
asked, flipping open the box of
cigarettes.

"Not now, thank you," Lillian
returned, and I shook my head in
a negative. The woman started at
Lillian impudently.

"Getting religion, Lil?" she
asked.

"Perhaps."

"You don't mind me having a
puff, do you? I've simply got to—
nerves all on the raised edge for
days. I don't want to go to piece
now."

Her emphasis on the adver-
bosity of her attitude, the opportunity
opened to her by Lillian's meant.
And the state of her nerves could
not better have been epitomized
than by her substitution of a smoke
for food and drink Lillian had
proffered.

"Go as far as you like," Lillian's
answer was prompt.

As quick wane Robert Savarin's
turn off of the switch-key he
had snapped on but a second
before.

"We'll wait till your friend—
finishes her smoke before we
start," he said in quiet explana-
tion, and I knew that he would
not drive back through the village
with Mrs. Rundle smoking in the
car.

The woman was shrewd enough
to suppress the biting comment
which I knew was upon her tongue,
but a half-moment's half-con-
templative cocking of her eyebrows
toward the celebrated artist's
shoulders told me her secret opin-
ion of his structure.

"There! I'm through," she said
a few seconds later, flipping the
half-smoked cigarette out of the
car. "Richard is himself again."

Robert Savarin drove rapidly
back to the corner, where a low
white building, inexpensively con-
structed, but of rare charm of line,
bore a modest sign "Art Gallery."
and underneath it a flaming poster,
"Auction sale of paintings today."

He parked the car in a row of
other motors, and with Mrs. Rundle
eagerly leading, we walked up the
paved pathway to the gallery.

I watched Robert Savarin closely
as he strobed between Lillian and
me, and the scrutiny told me that
the equal he was facing because
of Lillian's sympathies toward an
unfortunate fellow artist, was one
from which he shrunk.

(Continued tomorrow)

United Black Folks and Things

"SMILE AND LOOK PRETTY."

"There is no sex
in business," de-
clares Mrs. Ma-
nette Adams, bril-
liant and success-
ful lawyer of San
Francisco. "Leav-
your smiles and
your wiles at
home when you
go down to the
office."

"There is sex in
business," says
Miss Geneva
Shaffer, brilliant
and successful
real estate work-
an—also of the
same interesting
place. "Smile and
look pretty—it
will help busi-
ness."

"Shucks!" said
the Duchesse, who
has taken no part in the conversa-
tion. "What's it all about, any-
how—this discussion about sex in
business? A pretty woman is a
pretty woman, whether she's in
business or out of it."

She'll be a success in business if
she has a good business head—and
if she hasn't she won't—and that's
all there is to that.

Her dimples and her bright eyes
may bring her a client or two—
but those clients won't buy real
estate or legal advice very long for
any such reasons as that—not
clients who have any real money
to spend.

OF COURSE IT'S DONE.

To be sure, I heard a gentleman
known from one end of the country
to the other as a successful com-
mercy say the other night that he
had insured his life four times
when he didn't want to insure it
once—all because four different
pretty women, representing four
different companies, persuaded him
to sign on the dotted line. I sup-
pose the poor man thought he was
telling the truth—but all the same
I don't believe him.

No man could compose and pro-
duce over 20 successful comic
operas and stay as susceptible and
as impractical as that.

Dimples? Oh, yes, they're
charming things! But when it
comes to life insurance, I believe
the good policy in one of the good
companies is the policy that will be
sold, even if the seller of it is cross-
eyed and freckle-faced.

Personality is a wonderful asset
in business—there's no doubt of
that. But between brains and per-
sonality, between energy and per-
sonality, between determination
and personality—I'm afraid per-
sonality does not always win the prize.

"Smile and look pretty," says
Miss Shaffer. Excellent advice,
which should be followed by every
woman on earth, in business or out
of it.

But to use your smile and your
dimple and your pretty way of
speaking to sell a house or sign up
a new lease—but, my dear,
that is scarcely ethical! You don't
do it yourself, and you know you
don't.

What would any c. u. think of
a man who used his smile and his
personal attractions to get silly women
to sign contracts with him?

Done? Of course it's done, every
day in the year and every hour in
the year.

JUST PLAIN "SHUCKS!"

There are men who make a liv-
ing from the vanity and easy-going
folly of women with money to
spend. But nobody holds them
up as an example for other
and self-respecting men to follow.

A real woman is a real woman,
and she can't help it—and doesn't
want to help it. And it doesn't
make any difference whether she
sells real estate or teaches school
or mends clothes or takes dictation
for a living or not.

What she is is one thing—what
she does is quite another.

And it never will. But to use
that femininity cold bloodedly, just
as a screen actress uses her eyes
and her smile in her profession—
dear me, what an astonishing pic-
ture life would be—downtown!

Yes, I think the Duchesse has the
best of the argument.

"Shucks!"—that's the answer.
Just plain "shucks," and no non-
sense about it, either.

(Copyright, 1922.)

Beauty Talks

HOW TO GUARD YOUR BEAUTY
BY WATCHING YOUR
WEIGHT.

Do you watch your weight?
Do you know that your weight is
one of the most telling signs of
your health and
efficiency—not to
mention the
fact that it con-
trols your beauty?

You may be fat
or thin and still
be attractive, but
you can't be too
fat or too thin
and still retain
your full quota of
beauty.

Realize, then,
that your weight
is the key to your
good looks and general efficiency
and watch it carefully.

Suppose it is fat instead of thin-
ness. The reflection of your face
in the mirror may have told you
this. You may have noticed a fall-

ing off in the well-rounded con-
tour which has usually greeted you.
Perhaps your eyes appear to you a
little dull and tired-looking. Or a
ring which formerly fluted your
finger may have suddenly seemed
far too loose. Often, the first
signs of decreasing weight are no-
ticed in the increased slowness of
the fingers.

But before these signs become
too evident to the eye, you should
be weighed. You should be
weighed frequently to keep a good
general inventory on your state of
health. For health, as I have
said so many times before, directly
influences your beauty.

Suppose it is fat instead of thin-
ness which is marring your beauty.
Too much of this beauty-destroy-
ing flesh may creep on before you
become conscious of it if you wait
to be guided by sight alone. It
comes so gradually that the mirror
does not inform you until suddenly
you become aware that your belts
are uncomfortably tight.

Go to the nearest scales and find
out how much weight you have
taken on since your last inventory.

The more it is the better, per-
haps, for it will be warning enough
to frighten you properly and you
will not let this condition creep on
so unbeknownst to you again.

Whatever the agent which is
marring your beauty, whether it be
fatness or thinness, the first step is
the same. You should take an in-
ventory of your habits and decide
what it is that is bringing on the
existing condition.

If you are steadily becoming fur-
ther underweight, there is cause
for alarm, for this is a sign that
your mode of life is depleting your
vitality. Your looks cannot keep
their rightful freshness under this
condition. It may be that you
don't sleep and rest enough, or it
may be that you are not getting the
proper nourishing foods.

If one of these very evident con-
ditions is at the root of the trouble,
you can doubtless correct it your-
self, and when beauty and health
are at stake you should leave no
stone unturned to right the condi-
tion. If your efforts do not seem
to help, consult a physician.

Practically the same rules apply
to overweight, only this may be
more easily controlled. For though
you may not like to hear it, this

fault is nearly always due to over-
eating. You may answer that you
eat very moderately. Still I would
say, cut down on what you eat, and
especially on foods of the fattening
kind. It is no much easier to pro-
duce while the fattening process is
in its early stages, and you can
not be too fat and retain the full
share of good looks which is your
birthright.

The spectacle of a mountain dis-
integrating so fast that the de-
crease is discernable day by day
has been going on for nearly a year
near Vienna, Austria. The Ausse
Sandling, more than 5000 feet in
height, is collapsing. Great cones
and pinnacles of rock crash and
tumble. The forests lie flat or move
slowly downward, piling into the
valleys. Nearly four miles of ter-
ritory are involved in the move-
ment, which continues with in-
creasing acceleration.

Karlbad, Czecho-Slovakia, the
famous health resort, is built on a
crust, underneath which is a sub-
terranean lake of boiling water, and
all the hot sulphur springs have to
be ceaselessly watched and the
pressure kept down lest the town
be destroyed.

Kohler & Chase

Do You KNOW?

Charles Dickens insisted upon
having his bed placed north and
south, and it is said that he car-
ried a compass in his luggage to
ensure the correct degree.

Husband—Oh, don't remind me
of that escapade. I thought you
had forgotten and—forgotten.
Wife—Yes, but I don't want you
to forget that I'd forgiven and—
forgotten.

"Your state boasts some forty
candidates for governor, does it
not?" inquired the man from East
East.

"No," frankly replied the Kan-
sas. "We've got 'em; that's all."

Old Gentleman—Does your
mother allow you to smoke here?

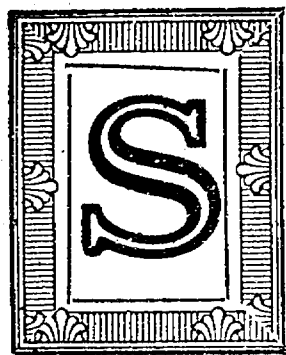

Son of the House—Oh, yes—good
for the moth.

Old Gentleman—Ah—suffer from
moth? So that's what's the mat-
ter with you.

Abe Martin

a job 't turn up that's one waitin'
for a job 't turn down. Miss Pearl
Monte got an estimate on some
bricks work 't day, but has decided
let it go till she gets married.

SAN FRANCISCO, July 15.—Perhaps no actor was ever so enthusiastically welcomed to this city, which first and last has welcomed them all of the modern era, as Frank McGlynn, who arrived Monday to begin an engagement at the Columbia theater in his great part, "Abraham Lincoln." It may have been in part that he is a Native Son; that he formed ties and associations here that are fondly remembered; that he is favorably remembered for his conscientious work on the stage before his present fame; but it is undoubtedly mainly due to his genial personality that is always manifest in whatever station he is met, and that has not lost its admirable quality in the great triumph that he has attained in portraying the greatest character in American history. McGlynn was always regarded as a conscientious and capable actor, but his stature rather militated against his greater success till opportunity came in a play requiring just such stature in its chief character. The general run of plays affords few opportunities for the actor of excessive height. But in portraying the great character of Lincoln that was necessary, and it was afforded in McGlynn, as well as a quality that led him to study the life and character of the Great Emancipator; and then a patriotic veneration that tinged his rendition with a quality that somehow distinguished it from mere play acting. San Francisco and California feel honored by this distinguished son, and that feeling was manifest in the enthusiasm with which he was received upon his return from great triumphs elsewhere.

Interesting Souvenir

The fac simile of the program that billed the play on the night of the great tragedy, April 14, 1865, distributed as an advertisement in the McGlynn engagement, is an interesting souvenir. One of its announcements is that "This evening the performance will be honored by the presence of President Lincoln." The play, "Our American Cousin," is by Tom Taylor, and it is declared to have been rendered by Laura Keane "upward of one thousand nights." In the cast the part of "Lord Dundreary" was assumed by E. M. Emerson. This actor was never heard of in fame's annals, but the name of E. A. Sothorn is conspicuously on the scroll. When the elder Sothorn assumed the character of "Lord Dundreary" some time afterwards he so developed it that it became the titular part. Formerly the leading character was "Florence Trenchard," assumed by Laura Keane. She is down on this program as "the distinguished manageress, authoress and actress." How considerable the character of "Lord Dundreary" was then considered is shown by the emphasis given to the announcement that "Miss Keane was supported by Mr. John Dwyot and Mr. Harry Hawk," actors in parts that were later entirely overlooked. A feature of the McGlynn engagement is the purchase of the entire house for the coming Monday night by the Lincoln School Association, whose membership consists of former pupils of the famous public school which has sent so many forth who have achieved importantly in so many walks of life. And such interest is taken in the forthcoming occasion that all tickets were taken a week in advance. It is expected that this performance will be characterized by some extra features, appropriate to the occasion.

George Bromley Recalled

The reference to George Bromley, revered Bohemian, recently by THE KNAVE, wherein an account was republished of the presentation of a watch to that celebrated character, then a conductor on California's first stretch of railroad, has inspired one of the readers of this page to send an account of a later function at which Bromley figured. It seems to have been a social occasion which was considerably attended by the railroad men of the day. Bromley, in a speech, told how, as conductor, when he came off his run, he would divide the fares in two equal parts, one for the company and one for himself; and the division was so scrupulously fair that he was never able to understand why the company could not pay dividends! He said this with such a grave and serious countenance that it caught his hearers as an excruciating bit of pleasantry. It is related that the elder Charles Crocker nearly fell in a paroxysm of laughter. It is certainly an illumination of the amiability of heads of railroads of that day if they were in the habit of regarding such financial elucidations as funny.

Cornelius Cole's Reception

That must have been an interesting occasion in the House of Representatives when business was suspended to pay honors to Cornelius Cole. The press despatches only hit the high points. Former Speaker Cannon was in a way master of ceremonies. He had the clerk read from the Biographical Congressional Directory, to the effect that Cornelius

Cole was born in Lodi, N. Y., September 17, 1822; graduated from Wesleyan University in 1848; went to California in 1849; was district attorney of Sacramento 1859-1862; member of Congress 1863-1865; member of United States Senate 1867-1873; moved to Colgrove, Los Angeles county, 1880. Representative Cannon, in a speech of that felicity for which he is so adept, called the attention of the House to the presence of the honored guest, and Representative Lineberger asked unanimous consent to a recess from the regular order of business that Senator Cole might address the body, which was readily agreed to. Thereupon the venerable visitor delivered an address not at all qualified as that of one who recalls the past as a period superior to the present, but which was full of enthusiasm for the country and hopeful in its outlook. The outstanding feature was that by reason of his age Representative Cannon was the acknowledged spokesman of the occasion, yet he was but a strippling when Cornelius Cole, in middle life, was a member of the body that honored him.

A Barrymore Story

I attended a film show recently in which Jack Barrymore starred, and I was reminded of the first occasion of his appearance here in the spoken drama. He took a subordinate part in a Willie Collier play. It was at the time of the great cataclysm. It had been a most prosperous season up to the time that the earth rocked. Then things happened that were different. Young Jack wrote about it to Uncle John Drew. He was putting up at the Palace Hotel. The first shock awakened him. The next threw him through a door into a bath tub. But he finally got out on the street, where for some time he wandered about, when the military patrol impressed him into emergency service. It was an interesting and very unusual experience, which in relating lost none of its pungency. Uncle John, in response to exclamations from those who were told of it, indulged in a kindly cynicism—for he is very fond of his nephew—to the effect that one thing had engaged his attention, which was that it took an earthquake to get nephew into a bath-tub, and the United States army to get him to work. All of which is told of by Augustus Thomas, the playwright, in his extremely interesting reminiscences, which have been running in the *Saturday Evening Post*.

The Police Chiefs

There were two interesting things connected with the recent convention of the police chiefs. One attracted considerable attention, while the second escaped unnoticed. The views of William A. Pinkerton, head of the detective agency that bears his name, are always illuminative, and the convention utterances that came from him were especially so. He advocated the whipping post as a preventive of crime. This was immediately the subject of much debate. From the moment that a boy is born the question as to whether or not he shall be given a thrashing now and then is a matter for discussion in the family, and that he needs it even if he doesn't get it is usually the opinion of the neighbors. It is natural, therefore, that a pronouncement from a man of the standing of Pinkerton, that a policy of "sparing the rod" is one of "making the criminal" may well be thought about seriously. The detective contended that there is too much fun in our penal institutions, and that with moving picture shows, an occasionally play put on by a first-class company volunteering its services, a free library, and baseball on Saturdays and Sundays, some of the prisoners have a better time than when they are free. The second feature of the convention that was not commented upon at all was the absence of crime during the visit of the thief takers. There were no hold-ups and scarcely any offenses of any other character. Indeed, those of devious ways were not in evidence at all. They gave the city a wide berth, knowing that they would be recognized did they chance to meet a cop from their former stamping ground, and that they might be "shown up" to the detective heads of the country if they chanced to get in the toils while the gathering was on. It was two days after the police were on their way back home before the regular crop of robberies and burglaries were again being reported.

A Historic Character Recalled

Court proceedings over the custody of a child recalls a character that figured grimly in the early annals of California. Vasquez the bandit was one of the outlaws whose doings get considerable mention by those who write histories of the early days. The child whose custody is contested is the great-grandson of the outlaw, and the offspring of Joseph and Eleanor Vasquez, who were divorced at Monterey in February of last year. The father was awarded the custody of the child, but the mother now claims that such award was secured through threats by the father, who thus induced her to consent to such a decree. The proceedings at this time are over a court order modifying the former decree by permitting the maternal grandmother temporary custody. The father mani-

festated a family trait when he defied authority and refused to tell the sheriff's deputies, the mother and granddaughter where the child was. He was finally forced to do so, however, and the infant was recovered. Those familiar with the case are keeping watch to see if anything further happens. For it sometimes occurs that people of that class and race carry such fueds to extreme lengths.

A Desperate Outlaw of Old

Tiburcio Vasquez was perhaps the most notorious desperado in California's history. His period was 1852-1875, excepting a term of six years, 1857-1863, which he served in San Quentin. He began his career in Salinas, and operated all through the San Joaquin valley up as far as Alameda county. He was held by some to have been inferior in bloodthirstiness to Murieta, but that may have been because Murieta's head was cut off and brought to San Francisco and there exhibited in a museum, whereas Vasquez was simply hanged when he fell from his lawless throne. He was caught near Los Angeles and brought to San Jose, where he was tried for one of the many murders that he had committed and hanged on the nineteenth day of March, 1875. Vasquez had a considerable sense of humor. A reward of \$15,000 had been offered by the Governor for his capture, dead or alive. It is related that meeting an assessor of Los Angeles county Vasquez tendered him two dollars as his poll tax, with the observation that he "did not wish it to be said that Vasquez refuses to support a government which values him so highly as to offer \$15,000 for his head."

Governor Gillett Talks

Some of the newspaper men who had to do about the State capitol during the regime of Governor Gillett have been attracted by a purported interview with him in the *Washington Post*. They recall the Governor's graciousness to newspaper folk, and his readiness to inform them as to anything that was doing. He was a favorite in news-gathering circles. This trait of helping out news correspondents stays with him, as would appear. He is much in Washington, looking after affairs of such moment that they entitle his services to a higher class than that of lobbying. This interview was on the subject of newspapers. Perhaps it was not reported exactly as Governor Gillett meant; but the purport was that the newspapers of the Pacific coast do not class with Eastern papers in certain particulars. I have heard frank doubts expressed about Gillett saying it. It can be said that it does not sound like him. He is very loyal to California, and would not be likely to say overt things about its newspapers in such an abstract manner. It is to be said that few men filled the gubernatorial office and came out with greater respect from the working newspaper men than Governor Gillett.

Racing Official's Memory

Leon Wing, racing official who was shot dead recently at Reno by a jockey who held him responsible for an adverse ruling, is said to have had a remarkable memory for facts, figures and statistics concerning trotting and running contests and the general sport of horseracing. There were few records that he could not give off-hand, nor many horses that have figured importantly in races that he could not give the pedigree of from memory. Also he could recall men who had figured on the turf, and in general was a human encyclopedia on the sport of kings. Such men used to be often met with in California than they are now—though perhaps there was never one to quite equal Wing. No kind of horse racing which has a concomitant of betting is now permitted in California, and that has served to scatter the votaries of the game to other States where it is permitted. Thus Wing figured in Nevada. The important industry of breeding racers has also languished, though it is not to be forgotten that Morvich was bred here.

The Shooting of Walsh

The shooting of Policeman Joseph S. Walsh by bandits has aroused again considerable discussion as to the utility of the uniforms worn by members of the local force. The discovery that the officer had not had a chance to draw his revolver emphasizes the difficulty of sweeping aside the frock uniform coat in order to get at a patrolman's main weapon of defense. San Francisco is the only city in the West and one of the very few remaining in the country where policemen are attired in uniforms with long coats. Save for the traffic squad every one of the officers on patrol is thus garbed, and if he carries his gun in his hip pocket it is difficult of quick access. There has been agitation on this matter in the past, but it has not resulted in any change. Neither the commissioned nor non-commissioned personnel of the department are required to wear other than a short coat, except on occasions where full dress uniforms are ordered. But there is no abbreviated uniform for the men on the street who come closest to danger. During the crime scare of last year patrolmen on the late watches carried their pistols in

their hands, and their hands in their pockets ready for an instant draw. But ordinarily a patrolman is not allowed to slouch, and he would be reprimanded were he to be found with his hands continually in his pockets while making his rounds. Oakland and Los Angeles long ago discarded the frock coat for its policemen, and if some of the present discussion gets anywhere it may not be long before this city will follow suit. As far as its street equipment and system of station reporting is concerned San Francisco is way behind far smaller municipalities. Sacramento, with only one-tenth the population, has almost as many patrol boxes as this city. With one thousand police, three hundred more than Los Angeles, although that city is larger in population and area, the facilities here for keeping track of the patrolmen on the beats and informing them of crimes are twenty years behind the times.

A Booze Seizure

A pointer as to one way in which smuggling is carried on was obtained in the seizure of a quantity of whisky at what purports to be a garage, maintained by one Nick Muriale. There were 400 cases in the seizure, and the pointer comes in the representation by Muriale that the goods had been stored in the garage for months, whereas government officials say that every case was soaked from recent contact with salt water. This would argue, of course, that it had been thrown in the sea from a smuggling vessel and then picked up and brought ashore. Muriale also sought to confuse government officials by claiming that 430 cases were stored, and if but 400 were reported as seized, there is a discrepancy that should be accounted for, which carries an intimation that the officials who made the seizure may have sequestered the thirty cases. Liquor smuggling is so very profitable when it is successful that it has developed a big industry. A large share of the illicit booze brought in comes in via coasting vessels, which land it as they may, and very often are successful. In this instance the persons at this end of the route were successful in the most difficult part of the trick, but slipped up afterwards.

Growing Values of Real Estate

Evidently down-town Market street property is becoming too valuable to be devoted to the mechanical end of newspaper making. This is evidenced by the purchase by Mr. De Young of a large piece of property south of Market street, and by the more recent purchase by Mr. Hearst of the block bounded by Third, Stevenson, Jessie and Annie streets. The newspaper world, like the earth, "do move," though the words "up-town" might be added in the case of the papers. The older generation will remember the time when the newspaper Rialto was around Montgomery, Clay and Washington streets. There the old-time *Examiner*, the *Chronicle*, *Call*, *Bulletin*, *Post*, the deceased *Mail*, and the theatrical *Figaro* and *Footlight* were printed within a radius of three blocks. The *Star* was also printed in the vicinity. The *Alta California* office was on California street, near Kearny. The first considerable break was made by the *Chronicle*, which occupied a whole building at Bush and Kearny streets. This structure was erected on leased ground belonging to the Hihns of Santa Cruz, and when the lease expired the paper was moved to the present *Chronicle* building, which is now found to be too valuable to house printers and presses.

A Vaudeville Star Succumbs

The death of William Rock in a private sanitarium in Philadelphia will recall to Oaklanders the old time vaudeville team of Rock and Fulton, very popular on the other side of the bay as well as nearly everywhere in the country. Maude Fulton, after whom the Fulton playhouse was named, was Rock's partner for many years. The pair first made their great hit in a dancing act. They were the first to present in this country the famous Paris "Apache" dance, which formed the basis for one of Miss Fulton's plays. Rock had not been much in the West since the partnership was broken up. He had been on the stage about twenty years, and of late had appeared with Frances White, the team being called Rock and White. Rock, after he first discovered Miss White, was sued for \$100,000 for the alienation of her affections by the latter's divorced husband, whose name was Fay and who also was in vaudeville. Fay was paying her alimony at the time. Rock was considered one of the cleverest dancers on the stage. His settings were always most elaborate. His wife was with him when he succumbed at a private sanitarium where he had been making a hopeless fight for life.

Pearson to Run Unopposed

The Democrats are having it harmonious as to candidates. Whenever a member of the party is found who is willing to accept a nomination, and especially when there is a prospect of his candidacy being furthered by campaign funds, he finds himself approved without further question. W. H. Pearson of Los Angeles, at the conference here last Monday, was accorded the biographical indorsement of

being a "prominent business man and agriculturist," and thus received approval as the Democratic candidate for United States Senator. No other name was brought forward. I have not yet found anybody who can tell me all about him, but evidently that about a "prominent business man and agriculturist" has an alluring ring. It was not so unanimous as to gubernatorial candidates. Two were named, Thomas Lee Woolwine, District Attorney of Los Angeles, and Mattison B. Jones of Glendale. Which of them will carry the party banner will have to be decided at the primaries. Woolwine appears to have a new way of getting votes. In his speech he declared that 75 per cent of the attorneys defending criminals at the bar should themselves be in the penitentiary. Considering the well-known predilection of attorneys for politics it is not certain that this will add to his prestige as a candidate.

Wills' Class Questioned

William Unmack, reckoned a high authority on sports, does not seem to be impressed with Wills' class as a fighter, and in the discussion that is going on regarding the match with Dempsey says: "Wills is being touted as the logical man for the match with the champion. I have in mind the pictures of Harry Wills and his matches with Tate in the Pacific Northwest, neither of which appears in the record books, and in which the showing of Wills was so far from good that how he could ever have been considered of world championship caliber is a conundrum. Then we also remember that this same Bill Tate, a colored boxer of no class whatever, stayed a dozen rounds with Wills last December. Imagine what Dempsey would do to Tate; and if this man stayed twelve rounds with a prospective aspirant for Dempsey's crown it is hard to imagine just what Wills can expect to do with Dempsey." Regarding Dempsey's own confession that he is "broke," Unmack says: "The champion cannot be blamed for taking on any 'sucker' who is willing to stand up against him, but a return battle with Carpentier would be a far better dish to serve the fight fans than one with either Wills or Willard."

Building Delayed

Several months ago it was announced that the decision had been made to replace the Crocker bank building with a greatly enlarged structure both as to area and height. The particulars were that much additional ground space had been acquired, or was about to be acquired, for the area expansion, and that plans had been prepared for a thirty-six-story building, which would account for the extension skywards. The delay in beginning operations is understood to be owing to inability to acquire satisfactory title to some of the real estate for the enlarged site. The holding that adjoins the *Chronicle* building is under a fifty-year lease, without a purchasing option. The Crocker people have acquired the lease, but have not yet acquired absolute title. The owners are "somewhere in Europe," and a special agent is said to have been started to locate and get them in a frame of mind to sell, if they should happen to be disinclined that way. The scheme of building as announced was to erect a section on the additional site, and upon its completion to move the bank there while the present bank structure was demolished and its site built upon. The merging of the Crocker National with the First National bank would make the premises of the latter available, and then the building of the new Crocker structure piecemeal would not be necessary. It is surmised that the possibility of the merger still going through may be another reason why there is no hurry in building.

A Speechless Bridegroom

Stories of men who have lost the courage to "propose" are legion. Accounts of the nervousness of grooms and their inability to locate the wedding ring at the right moment are favorites in fiction and the drama; but a local theatrical man just back from Broadway tells a new one. Alfred Lunt, prominent actor, who has "popped the question" hundreds of times before the footlights, was getting married. His bride was Miss Lynn Fontanne, who appeared recently in New York. When the moment came where the husband-to-be says "I do," Lunt was speechless. He could not utter a sound. It was only after the third attempt that he managed to whisper the words. Of course, his friends thought that he would regain his composure after the festivities, but he did not. He had been playing in "Intimate Strangers," which was scheduled for the next night in a suburb of the metropolis. When the time came for the evening performance Lunt could not speak a line. It became necessary for him to make motions with his lips while a prompter off the stage read the actual speeches from the manuscript. Finally after two performances had thus been given and the actor got no better, a substitute was given the role. Presumably undue and unexpected emotion was responsible.

BAIL REFUSED IN WILKENS MURDERCASE

Preliminary Hearing Is Continued Until Monday Afternoon; Accused Spouse Will Remain in Custody

SAN FRANCISCO, July 15.—Henry Wilkens, accused of the murder on the night of Decoration day of his wife, Anna, was refused bail by Police Judge McAtee, following a preliminary hearing today.

After waiving all formalities, Wilkens' hearing was begun, but no witnesses were called, by reason of the short interval before the noon adjournment. An attempt to obtain records at the Park and Mission hospital for presentation today proved futile and none of the hospital attaches who were brought in mortally wounded could be summoned in time to give their story today.

After waiting until almost noon, Judge McAtee ordered a continuance until 2 o'clock on Monday. Thereupon Attorney Frank Murphy made a plea for bail.

COUNSEL ASKS BAIL.

"It was only on June 26 that Wilkens was apprised that one Arthur Castor had made a statement implicating him in the crime with which he is here charged," said Murphy. "He has become aware, as I have myself, of the existence of such a statement only through the public press and the queries propounded to him by the District Attorney and others. Mr. Wilkens is now moving to Redwood City. When he was arrested his goods were on the street. His two children are without his protection and companionship. I believe, therefore, that this is a case for bail. Wilkens knew, and his counsel knew, of the intention in the mind of the district attorney to bring some proceedings against him and yet he did not try to run away. Under such circumstances I believe the court should fix bail in this case as it will be a great hardship to have him locked up, especially the way he feels and under the circumstances."

Judge McAtee responded that he had never fixed bail in a murder case, and that he must adopt the same attitude in this proceeding as in any ordinary case.

"But this is not an ordinary case," Murphy responded. "That it has been the intention of the district attorney to prosecute Wilkens."

(Continued on page 3-B, Col. 3)

OAKLAND C. OF C. GETTING SECOND WIND FOR LAST LAP OF INTENSIVE FUND DRIVE

New Workers Will Give Increased Impetus to Final Move in Campaign for \$100,000 Annual Income

Oakland's move for a greater Chamber of Commerce will be resumed today.

Encouraged with the success of the first week of solicitation, the workers are set for the second drive, and are predicting that the goal of \$100,000 will have been passed when the campaign is brought to a close.

Practically all of those who took part in the work of the first four days will be found taking again this week. It was these same workers who suggested the continuation of the work. W. T. Tupper, captain of the most successful team and manager of the International Health and Safety Exposition, declared at the final meeting last week that all of his men desired to go ahead and predicted that the splendid record of twenty-two memberships in a single day made by his five men Friday would be exceeded this coming week.

NEW WORKERS. In addition to the original force which started last Tuesday, a new week will start with the entire membership of the Loyal Knights of the Round Table and twenty-five members of the sales force of the Realty Syndicate assisting. The latter group declares that selling real estate is to be a minor consideration during the days of the new drive and that their twenty-five will be the prize-winning combination when the final compilations are made.

The four days' work last week netted approximately \$10,000 in income, bringing the total from \$50,000 to \$60,000. This was done with more than 40 per cent of the field untouched. Prior to the start of the campaign the prospects were listed and cards made for each firm and individual. Of these less than 60 per cent have been taken out of the offices of the Chamber of Commerce and of those called upon call backs were provided for in many cases.

WANT QUICK WORK.

It is the desire of those in charge that the burden of the continued campaign may be as widely distributed as is possible. They wish to hurry the work through to an early and successful conclusion, and that this time be done, are urging loyal citizens with a few hours to give to their city to join in the campaign Tuesday morning.

Those who are joining in the drive for the first time are asked to call at the Chamber of Commerce Tuesday morning at 9 o'clock, where they will be assigned to teams. H. C. Capwell, director of the Chamber, in an appeal to the city for the support of her man power, calls attention to the fact that nearly 50 per cent of the workers

are either new in Oakland or new in civic work. Among these is Tupper, who came to Oakland less than three months ago, when he arrived here with his staff to begin preparations for the International Health and Safety Exposition, which is to be staged under the direction of the Chamber of Commerce this fall. Tupper took charge of a team Wednesday morning and since that time has been out in front each day.

Capt. Day to Tell Of Monkey Glands

ALAMEDA, July 15.—Dr. G. L. Pearson, superintendent of the Chinese missions, and Captain William T. Day, member of the state board of prison directors, will be the speakers tomorrow night at the evening services of the First Methodist church, Central avenue and Oak street.

Captain Day will take as his subject the experiments made with monkey glands upon prisoners in the Folsom and San Quentin state penitentiaries and will cite actual instances, giving a graphic account of the effects in each case the operations had on the patients.

Journeys of Paul To Be Illustrated

ALAMEDA, July 15.—Under the directions of Rev. O. D. Wells, the pastor, the second of a series of illustrated sermons will be given tomorrow night as the feature of the Sunday evening services of the First Christian church, Park and San Jose avenues.

The sermon to be given in conjunction with the stereopticon views will be "The Journeys of Paul," "The Life of Martin Luther," "The Story of Ruth" and "The Pilgrim's Progress" will follow on subsequent Sunday evenings.

Auto Men to Back North State Drive

Full support and co-operation in furthering the movement for a Greater Northern California has been pledged by the board of directors of the California State Automobile Association. It was stated today. Through a resolution, unanimously adopted by the board at the instigation of President George S. Forrester, the full strength of the association's membership of 30,000 is to support the movement.

W. T. TUPPER, captain of hustling team which won first place on three successive days in Chamber of Commerce drive. Tupper is manager of the International Health and Safety Exposition.

SENATORSHIP RACE MAY BE HOT IN SOUTH

Southern California District Expected to Be Chief Battle Ground in Moore-Johnson Race for the Senate

It begins to look as if Southern California will be the storm center of the contest between Senator Hiram W. Johnson and Charles C. Moore. Moore is now in Los Angeles where he is holding conferences with his supporters. It is generally understood that Senator Johnson is to return to California this month, although no definite date has been announced. From all sections of the state come reports of the organization of clubs in the interest of both candidates. During the week a largely attended meeting of women voters was held in San Francisco to further the candidacy of Senator Johnson. Similar meetings were held in San Jose and other sections. Moore headquarters claim that a majority of the members of the Republican County Central committee of Kern county have pledged themselves to the former exposition head.

JOHNSON MEN CONFIDENT.

The Johnson supporters display the most confidence and it is apparent that the senior Senator has to date by far the best organization. While it is admitted that Johnson has lost the support of certain former Progressive leaders like Chester Rowell, his friends point out, on the other hand, he has gained the friendship of a number of so-called regulars headed by former United States Senator Frank P. Flint of Los Angeles who is handling the Johnson Southern California organization.

As an illustration of the general pickup, word comes from Los Angeles that the senior Senator has a sister of the junior senator, is espousing the cause of Moore. As Senator Johnson supported Shortridge in his campaign against Phelan, his colleague as a matter of reciprocity, is expected to come out openly for Johnson, although he has made no announcement to date.

34 OUT FOR OFFICE.

With the filing of a petition by John G. Matton, Jr., of Centerville, who will run for supervisor from the First District, comprising Mur-

(Continued on page 3-B, Col. 1)

Registration in Alameda County Totals 131,000

The total registration in Alameda county to date is approximately 131,000, according to announcement yesterday by County Clerk George Gross. He had tabulated, according to precinct, the registration of 125,141 voters, and estimates that there is yet to be tabulated about 6000 registrations.

Two weeks still remain in which voters may register, the books closing on Saturday, July 29, for the primary election which comes thirty days later.

Gross pointed out that unless there was an unusually heavy registration during the next two weeks, the number of qualified electors at the primary election would be far less than in the August primary election in 1920. At that time there were 145,694 registered voters. At the present time the number falls approximately 15,000 short of that mark.

Of the 125,141 registrations, they have been segregated in the various precincts with 76,102 in Oakland; 24,910 in Berkeley; 9830 in Alameda, and 14,299 in the outside precincts.

Gross does not believe the registration will equal that of 1920. He points out that the unusual interest of a presidential election, such as that of 1920, calls out many more qualified voters than for merely a state and county election such as is now being prepared for.

Bank Plans to Open Emeryville Branch

Announcement was made yesterday by the American Bank of Oakland that it would open a branch bank in Emeryville in the near future. The location of the branch will be decided upon within a few days.

According to officials of the bank, a number of the Eastbay industries located in Emeryville have petitioned them for the branch institution. Recently the bank has opened branches in Dimond, Fruitvale and on Piedmont avenue.

The institution recently purchased the Stanislaus County Bank, at Modesto, and will operate it as a Modesto Branch. The extension of the institution is, according to officials, an indication of the growth and development of this section of the state.

BOY SCOUTS ENLISTED IN FIRE FIGHT

Committee Formed to Take Steps to Guard Against Flames in Hills Adds New Members, Widens Activities

The committee appointed at a recent mass meeting to perfect plans for co-operative fire protection in the Eastbay district met yesterday afternoon and added several new names to the working committee. Assurance was given by State District Fire Ranger E. P. Barnes that the forestry department would co-operate in every way with the fire departments of the Eastbay cities.

It was also decided at this meeting to ask the Boy Scouts to co-operate in cleaning trails and doing fire prevention work.

It was decided to take steps to impress upon the public the duty of reporting to the fire department whenever smoke was seen in the hills.

"Go to the nearest telephone and call the fire department whenever you see smoke rising from the hills," urged one of the committee members. "Of course in many cases it might be only a place where fire trails are being burned. The members added to the committee included:

Carl Eidenbach, Berkeley superintendent parks; Lee S. Kerfoot, Oakland superintendent of parks; Chief Culver, Piedmont fire department; Chief Sidney Rose, Berkeley fire department; Berkeley Scout Executive Roy Marsh; Oakland Scout Executive Beamis; W. E. Creed, representing C. A. Hooper & Company; Mayor Frank Otis, Alameda.

Representatives of the following organizations and cities will be named also: Oakland Chamber of Commerce, Oakland Traction Company, Auto Dealers' Association, Cities of Richmond, Albany and San Leandro.

Resolutions were drafted asking the hikers in the hills not to bid fires in the hills until proper fire places are provided. All hikers were also asked strictly to observe the existing law in the matter of fire prevention and protection.

A meeting of the enlarged committee will be held Tuesday afternoon at 5 o'clock in the assembly room of THE TRIBUNE, Franklin street entrance.

PLAY PIANO in 8 LESSONS

Paul Ash

Oakland's favorite Musician, Creator and Conductor of the Granada Theatre's famous Synco-Symphony Orchestra

SAYS:—

"The Nuway System is
A Positive Revelation

Anyone can Learn Piano Now! Paul Ash and other eminent musicians say that Professor Sullivan's Nuway Invention is the greatest Musical Revelation of the age. It abolishes key-board drudgery and months of meaningless study. Only 8 Lessons! But, incredible as it may seem, this Master Discovery enables anyone, young or old, to Play Piano almost at once.

What a glorious opportunity for you—Learn to Play in 8 Lessons. It can be done, is being done—and you can do it, too. Thousands of students recommend Nuway; thousands, from 10 to 60 years, are successful Players today because of the marvelous simplicity of this System.

The Cost is Small—you may pay by easy installments.

Money-Back Guarantee Protects Every Pupil.

FREE 40-Page Descriptive Booklet

Send for it! Read the story of the Musician-Inventor and his Master Invention; read the letters of world-famous Musicians who endorse Nuway; testimonials from our student-players! Get this 40-page book—its FREE.

MAIL THIS COUPON—NOW!

National Conservatory of Nuway Music,
2083 Sharon Bldg., San Francisco, California

Without obligation, send me your FREE 40-page booklet, "Play Piano in 8 Lessons," a copy of Paul Ash's letter and your special offer.

S. F. POLICE BOOZE GRAFT IS PROBED

SAN FRANCISCO, July 15.—Policeman James A. Grant of the Central Station, charged on a federal warrant with selling intoxicants, appeared today before U. S. Commissioner Krull, and was released on \$1000 bond. His case was continued one week.

It was rumored that Grant had been questioned by Theodore Roche, President of the Police Commission, acting in the absence of Chief of Police Daniel O'Brien. Roche said that the officer was expected to make a statement involving other members of the department. It is expected through him to be able to locate the higher ups in the so-called drug and narcotic rings.

Boost News Service For Eastbay Starts

To represent dozens of Eastern trade journals the Pacific Editorial Service has been established in Oakland.

This news bureau will furnish industrial publications in all parts of the country with articles describing Eastbay progress in all highly specialized lines.

The editorial service will be under the direction of Howard B. Horner, formerly connected with local newspapers, and D. Angus Vogt, son of Henry F. Vogt, secretary of the Oakland Board of Park Directors.

Gier Surrenders, Freed on Bonds

Following their indictment of charges of conspiracy to violate the Volstead act, Theodore Gier, his nephew, Henry Gier, and his employees, Fred Goeller and Gus Lindeman, surrendered to United States Commissioner Albert M. Hardie in Oakland yesterday. Bonds were furnished for each of the accused in the amount of \$2000. J. C. Rohan and S. S. Osgood being the bondsmen. The raidment was set for August 12 before Federal Judge Maurice T. Doelling in San Francisco.

WRIST BROKEN MONTH AGO BUT JUST DISCOVERED

His right wrist broken a month ago while cranking the family limousine, Traffic Sergeant Charles Hemphill discovered the fracture yesterday and now goes about with the arm in a sling.

Hemphill suffered for the past month, but thought it a bruise. Recently, he says, he has not been able to sleep because of pain, and yesterday he consulted Dr. John T. Kergan, city physician. Dr. Kergan took an X-ray and found that one of the small bones at the base of the thumb was fractured.

Texas Chiefs Send Thanks by Radio

Chief of Police James A. Drew and the chiefs of San Francisco, Berkeley and Alameda received yesterday from Chief L. W. Brog, of Dallas, Texas, the thanks of the Texas delegation for their recent reception in the bay cities.

The message from Chief Brog came from Dallas by radio. The message in part said: "The delegation takes this opportunity to express our appreciation for the magnificent reception to our delegation. We wish Texas can give the same quality of work as you Californians have given us."

A Good Rule

It is a good rule to WORK HARD when you work and to PLAY HARD when you play.

You cannot do justice to your work if your eyes are not in good condition, and nothing tends more to mar your pleasures than strained eyes.

I will show you the RIGHT GLASSES to correct your eye troubles.

New Tailored Fall Suits

\$25

\$25

So great is the demand for tailored fall suits that we can hardly get them in fast enough. The smart 38 inch length coat gives a decided air of dignity and smartness to these new arrivals. They are developed in tricotine, Poirot twill and mannish woads. Silk and crepe lined. All are splendidly tailored, assuring excellence of fit. Sizes 16 to 46.

Summer Suits

To Close Out
Novelty tricotine and sport suits, silk lined and excellently made, are offered at this exceptionally low sale price.

\$15

Greatly Reduced
A suit group supplying striking evidence of our determination to clear out Summer stocks in double-quick time.

Other NEW SUITS, COATS, DRESSES Arriving Daily

EVANGELISTS GREETED WITH CHEERS, SONGS

Mrs. Aimee Semple McPherson Enthusiastically Received on Arrival.

Well-known demonstrations of the nature of the reception of Mrs. Aimee Semple McPherson, evangelist and reputed faith healer, was greeted with song and cheers by a crowd of a thousand, when she stepped from the Los Angeles train yesterday afternoon. Churches backing her revival meetings, and the committee, which has been working for some time in making preparations for the meetings, headed by Rev. Harold Govette, pastor of the Olivet Congregational church, tendered the official welcome to Mrs. McPherson.

"This is the greatest effort we have ever witnessed in preparing for a meeting of this nature," declared Rev. Govette in his welcoming address. "Victory is already in sight. In behalf of our churches and these people I welcome you to our city."

Climbing to a baggage truck which served as a platform, Mrs. McPherson voiced her appreciation of the reception and welcome which had been tendered her and spoke of her confidence that the Los Angeles revival campaign would be a success. She closed her short talk by leading a hymn.

LEADS AUTO PARADE
Following the reception, Mrs. McPherson, accompanied by those who were actively connected with her in the revival campaign, led a parade of about fifty automobiles to the Olivet church, where she prepared for her opening meeting held last night at the large tent which had been erected on Twenty-sixth street between Telegraph and Broadway.

Accompanying Mrs. McPherson was her mother, Mrs. Minnie Kennedy, who is her constant traveling companion and has been with her at all of her campaigns.

The eagerly watching crowd at the depot failed, at first, to recognize the quiet motherly-looking lady of between 30 and 35 who stepped from the train. Then some of those who had met her on previous occasions recognized her and she was fairly overwhelmed with greetings.

AILING AMONG WAITING.
Conspicuous among those waiting were large numbers of crutches and others who it was quite evident were of frail health.

Mrs. McPherson has been spending a short vacation in Los Angeles, where she has been resting and preparing for the present revival campaign and the one she will conduct in Australia.

Leaving here, she is expected to preside over two revival meetings which will be held each day, the first and opening meeting having been held last night. The campaign will be brought to a close on Monday, July 23. She will leave for Australia August 4.

The tent which is the scene of the revival meetings is the largest which Mrs. McPherson has ever used, according to her general manager, C. Stutsman, who has been in the city for the past week making arrangements and supervising the construction of the tent.

All conveniences have been arranged at the mammoth tent for the handling of the large crowds which are expected. It is virtually a city within itself.

A large platform has been constructed for the evangelists and other leaders who are backing the move, and immediately in back of this platform a place has been arranged for the choir which will be made up of several church choirs as well as individuals who have offered their services.

ACCOMMODATE 8000
The tent will comfortably seat eight thousand people.

Dr. William R. Brown, former pastor of the First Baptist church of Oakland and at present pastor of the First Baptist church of San Jose, will assist in conducting the revival meetings. He has been actively connected with the McPherson revivals for some time. C. Stutsman, the general manager of the campaign, is the head of the organization which arranged for and made possible the present campaign.

Camera News Gives Up-to-Date Views

Mosswood Park's little Lathrop Theatre is shown in the first scene of this week's OAKLAND TRIBUNE-T. & D. Camera News at the Oakland T. & D. Theatre. The name of the play produced by the Tribune-T. & D. Camera News is "The Night Lodging." The action is very cleverly portrayed.

The parade last Saturday by the Christian Endeavorers through the streets of Oakland is also shown, together with the parade and delegation from outside towns.

The TRIBUNE Camera Man on his visit to the Oakland Recreation Camp took some interesting pictures at Chinese Camp, a famous mining town of early days which is shown in this section of the film are pictures at Jackson, on the Tuolumne River and Bret Harter's shack above Groveland. Close-ups of the famous General Grant and people now staying at the camp.

The closing scene of this week's news is the arrival of Aimee Semple McPherson, noted Evangelist, and her reception by the local committee at Sixteenth Street depot. This film will be shown today and all this week at the Oakland T. & D. Theatre.

Indian Lecturer To Speak Tomorrow

BERKELEY, July 15.—India's famous orator-journalist, Syed Hassain, will speak tomorrow night at the Berkeley high school auditorium at 8 o'clock. The subject of his lecture will be "India and World Reconstruction." This is the second lecture by Hassain in the University of California series of the Indian national conference.

He represented the Indian press at the Washington conference. It is stated that public demand for Hassain's lecture has been so great that it is expected to be held on Friday evening, due to lack of accommodations.

Evangelist Is Tendered Reception

AIMEE SEMPLE MCPHERSON, revivalist, greeting friends and well-wishers who tendered her a reception upon her arrival here yesterday. With Mrs. McPherson is Dr. William K. Townner, of San Jose, who is assisting in conducting the campaign. Insert shows Mrs. McPherson as she responded to the welcome tendered her by Rev. Harold Govette, representing those interested in her revival campaign here.

Contributed by Oakland Pioneers No. 80
HISTORY OF THE OLD SQUATTER GUN
By Henry Maloon
(Continued from last Sunday)

WHEN Abraham Lincoln was elected president, the old gun was brought out from its resting place and a salute fired in honor of his election; then the gun disappeared. She had been captured by the "Coppers," as those were known who were in sympathy with the Southern Rebellion.

A man by the name of Jack Cohane, a leader of the "Copperheads," was suspected of having taken the gun from his room by members of the Oakland Guard and was marched to the foot of Broadway wharf, where a rope was placed around his body and he was thrown overboard. He was held there until he divulged the hiding place of the old gun, which was under the waters of the creek, over the wharf. Cohane was marched back to the armory of the company and the oath of allegiance administered in a most emphatic and decided manner. He was kept there for twenty-four hours, and had to walk, as he could not sit down. He was soon followed by others.

The gun was removed from its resting place by the Oakland Guard and Captain James Brown placed it in charge of a firing squad, composed of George Chase, Charles Lufkin, Jerry Tyrell, John Potter and Henry Maloon, who is the last living person who drove home the ramrod or pulled the lanyard which fired the last shot from the old gun.

During the Civil War, on every occasion when the news came of a Union victory, the voice of Old Squatter would echo through the city, over the valley beyond the Contra Costa range, notifying the settlers and residents that the thirty-four stars were still safe.

When the news came that Lincoln had been assassinated, orders were issued to fire a half-hour salute between sunrise and sunset on the following day. It brought out the gun and found it useless, for someone had spiked the gun. Determined to fire that salute, the last in honor of the great President, we procured a small quantity of dynamite and relays Jerry Tyrell, Harry Morse, Charles Lufkin and the water drilled through that four inches of solid iron until a new vent was made, and when the gun rose in the east, the Old Squatter's voice was heard, and every half hour until the sun sank in the west. The report of each shot called to the mind of the people a great man had sacrificed his life for his country.

The last salute fired from the gun was in the year 1871, on the occasion of the arrival of the first Central Pacific train into Oakland, about 10 o'clock in the morning.

The train, composed of three cars drawn by the locomotive Reindeer, came from the East by way of Seventh street and stopped for a few minutes, at the little station on Seventh street. As the train came to a stop, I pulled the lanyard which fired the last shot which will ever pass from the muzzle of the old gun, fifty-one years ago.

She was then placed in the hands of the Oakland Guard and fifteen street and soon forgotten. At an auction, sale of old junk, ordered by the city, I protested its sale as being the property of the Oakland Guard and Jerry Tyrell, Captain Walter Petersen and myself removed her from the debris, mounted her on her carriage and placed her where she now stands at the museum building on the shore of Lake Merritt.

While removing the gun, a person who claimed to be a retired English naval man, after examining the gun, said: "That's an old English naval veteran as old as the settlement of this country."

This aroused our curiosity, and we decided to find, if possible, its origin and history. We took a photograph and measurements, length four feet with letters B P & Co. and numbers 6, 3, 11 cut on the breech. Lufkin and myself went to Mare Island for the desired information. They could give us none, but referred us to the Naval Department at Washington. Our own citizen, Victor Metcalf, being then secretary of the navy, we wrote to

him, sending a photograph, also the identification marks on the gun. After a short time we received an answer to our request as follows:

The gun was an English naval gun. The letters B P & Co. stood for an English firm, Bernard, Potter & Co., manufacturers of artillery and naval guns, during the years sixteen and seventeen hundred. The numbers 6, 3, 11 were the muzzle, chamber and breech measurement in inches. The gun was one captured from an English vessel during the War of the Revolution.

At the close of the war the gun was mounted on the deck of the John Jay, a new sloop of war, as one of her broadside guns, after serving through the War of 1812. At the outbreak of the war with Mexico, the John Jay was sent to the Pacific coast. After rounding the Horn, she met with a heavy storm and sprung a leak. Partially dismasted, she ran ashore in a harbor off the coast of South America and was abandoned. Capt. Gunn of this city purchased the vessel, repaired and brought her to San Francisco, dismantled her of her guns and other war material, which had now become absolutely of no value for war purposes, and refitted and remanufactured her into a trading vessel, sailing among the islands of the Pacific.

About twenty years ago Capt. Gunn called the John Jay up the Oakland creek, ran her bow into the mud flats, just east of the Bethlehem shipyards, dropped her anchor, and that ended the last voyage of the John Jay. Capt. Gunn, while working on her deck, missed his footing, fell down an open hatchway and was killed. It became a common report that during the hours of darkness the spirit ghost of Capt. Gunn still paced the deck of the John Jay.

His family, being of a superstitious frame of mind, destroyed her by fire, and for two weeks the flames which arose from the hull of the John Jay illuminated the waters of Oakland creek, until the night of the great earthquake, protruding above the mud flat at low tide.

A peculiar coincidence is this, that Old Squatter stands today with muzzle pointing north with a view of the ruins of the old ship, on whose deck she was mounted one hundred and forty years ago—the sloop of war, John Jay.

Officers Installed By Girl Judaens

Installation of the newly elected officers of the Girl Judaens of Oakland took place Thursday night in Cornhill Hall, Temple Sinai. The board of directors includes: President, Gladys Hupp; vice-president, Helen Einkelstein; treasurer, Helen Einkelstein; secretary, Sonia Schwab; financial secretary, Sonia Frankel; guard, Rae Wolf; installing officer, Mary Vels; trustees, Ivy Glickman, Dora Davis, Rose West.

Miss Golda Breslow and Miss Viola Eckstein arranged the program of the evening. Those who participated were: Miss Mildred Hanson, Miss Grace Heller, Fay Sheet, Miss Elsie Swanson, Esther Heller, Rae Heller, Miss Lenore Bremner and Mrs. Claire Sommer.

Officers of the local chamber will meet to prepare an outline of a booklet on San Leandro, explaining the history, industries, advantages and possibilities of the city. A year's supply will be printed.

SAN LEANDRO

BOARD THANKED FOR SCHOOL AID

SAN LEANDRO, July 15.—Adopted at a recent meeting of the board of directors of the Yolo County Chamber of Commerce, a copy of a resolution, expressing appreciation for the interest displayed in securing a junior high school for San Leandro, and to the individual members of the board.

Resolved: That the San Leandro Chamber of Commerce extends to the Oakland Board of Education its heartfelt thanks for the interest being displayed in securing a junior high school for San Leandro, and to the individual members of the board.

Further Resolved: That the San Leandro Chamber of Commerce respectfully request the board of education to select one of the sites presented.

Further Resolved: That the San Leandro Chamber of Commerce extend to the Oakland Board of Education its earnest support and approval in the selection of the site considered the most suitable.

Australia Wants Boost Literature

SAN LEANDRO, July 15.—Not until request was made at the Chamber of Commerce of this city from the American-Australasian bureau that a supply of descriptive literature be furnished, did Farley Granger, secretary, discover that the supply of the requested reading material had been exhausted. The recent "Cherry Carnival," together with the S. P. R. S. I. convention, held in this city, consumed the amount on hand.

Officials of the local chamber will meet to prepare an outline of a booklet on San Leandro, explaining the history, industries, advantages and possibilities of the city. A year's supply will be printed.

Libel of Wife Not Illegal in England

LONDON, July 15.—Owing to a decision by Recorder Sir Ernest Wild that a man cannot libel his wife, there is a widespread demand for the immediate passage of a law covering such a situation. The defendant in the case of William A. Baxter, who had been arrested for writing defamatory articles about Mrs. Baxter. The recorder held that a man cannot libel his wife, but that if he libeled his wife he had no recourse. He discharged this prisoner, who was under indictment.

Welcome to Durant Factory Is Planned

SAN LEANDRO, July 15.—On the receipt of a telegram announcing the immediate erection of a modern office building and two large warehouses adjoining the present Durant factory, near San Leandro, with the new structures ready for occupancy within ninety days, local city officials are planning an appropriate welcoming ceremony. A committee will be appointed to arrange the affair and pledges to the city to express the welcome and good will of the city. It is said that a presentation gift, preferably some locally grown or manufactured product, will be tendered.

Production will be begun at the Durant factory in September, according to information received. Although the factory is located out of the limits of San Leandro, it has been agreed that the proximity of the concern—the width of a street separating it from this city—will prove of immeasurable benefit here.

Apricot Canning Season Begins

SAN LEANDRO, July 15.—Under the supervision of James R. Brown of San Leandro the local branch of the California Packing Corporation began the season's run of apricots today. A large force of men and women have been placed at work on the canning of the fruit, other operations being practically suspended during the brief apricot season. The season's crop will hardly be as large as the crop of the past few years, according to local orchardists, but the quality of the fruit, together with the excellent price obtained, will help make up the deficit. An increase of approximately a ton over last year's price is being obtained, it is said.

Lodges Plan for Joint Entertainment

SAN LEANDRO, July 15.—Committees have been appointed to make all arrangements for the joint entertainment of the R. A. B. A. M. I. societies of San Leandro, at Laurel Grove, Hayward, Sunday, August 6. The joint picnic will be a social affair. Music, games and picnic lunches will comprise the day's outing. The I. D. B. S. will hold a social dance at I. D. E. S. hall, Ashland, tonight.

VISITOR RETURNS

SAN LEANDRO, July 15.—Miss Beatrice Rogers, of this city, has returned after a two weeks' vacation at Yosemite Lodge, it is the guest of Miss Rosabelle Scott, of Berkeley. Miss Anna Boltano, of San Leandro, and Miss Esther Sobrero, of Alameda, departed for a short stay at Castilleja. A. J. Freitas, accompanied by his wife and small son, left this city today for a two weeks' vacation at Redondo Beach. The trip was made by boat.

EVANGELISTS APPEAL BRINGS 400 TO ALTAR

Thousands Assemble at Tent Tabernacle to Hear Mrs. McPherson.

Between 350 and 400 persons left their seats in Mrs. Aimee Semple McPherson's tent-tabernacle last night, and knelt at the altar in response to an appeal made by Mrs. McPherson for signs of conversion during her revival meeting.

Those who responded considerably exceeded the number reserved around the altar. Half filling the large tent-tabernacle thousands last night attended the opening of the two week revival campaign on Twenty-sixth street between Telegraph and Broadway.

After being introduced by Dr. William K. Townner, formerly pastor of the First Baptist church here, and present pastor of the First Baptist church of San Jose, Mrs. McPherson gave a short address in which she voiced her full confidence in the success of the revival campaign.

Dressed completely in white, and carrying a bouquet of lilies which had been presented to her by the committee when they welcomed her yesterday afternoon, Mrs. McPherson in a clear voice addressed the gathering.

After reviewing the activities of the past few weeks in the revivals conducted throughout Kansas and Denver, which she said were successful, she closed with: "My strength and faith to preach the full Gospel has never been as strong as it is tonight."

GIRLS CHOR SINGS.
On a special raised platform in back of the speaker was the large choir of more than 300 voices, composed of the combined choirs of various local churches and groups of two or three young women.

Leading the singers, a choir composed of delegates attending the young people's convention at the First Norwegian Danish M. E. church, rendered a special musical number.

Rev. Harold Govette, pastor of the Olivet Congregational church, offered the opening prayer.

L. L. Sherman, who organized the committee that made possible the present campaign, briefly reviewed the work of preparing for the revival.

Following the introductory service, Mrs. McPherson delivered a sermon on "They Have Taken Him Away."

She severely scored the substituting of suppers, dinners, and entertainments for the religion and the prayer meetings of old.

"Many a Mary is weeping at an empty tomb today, because these same people who have made the substitutions for the old religion have taken Christ from the church," she declared during her talk.

Almond Growers All Join Exchange

WOODLAND, July 14.—Ninety-one almond growers of Yolo county have filed with the county recorder in the past two days with County Recorder Le R. Pierce contracts with the California Almond Growers' Exchange of San Francisco of which George W. Pierce of Davis is head. It means that practically every acre of almonds in Yolo county has joined the exchange, assuring its life for the next five years, the life of each contract.

The continuance of the exchange was threatened for a while because the Yolo county growers refused to sign the five year contract. It was finally settled with the largest acreage of almonds in the state with Butte county second. The exchange is relieved over the situation and local growers express themselves as pleased with having disposed of their crops up to and including 1926.

WITCHCRAFT TRIAL.
GENEVA.—Tried for accusing a neighbor of witchcraft, that he "put a curse" on his pigs, Adolph Groner was fined \$50 and costs.

MESSAGE OF DEATH.
CHICAGO.—Mrs. Jane Fold sent a registered letter to her daughter saying she was going to commit suicide, and then drowned herself.

Common Sense About Eczema and Eruptions!

Here's Something About S. S. That You'll Be Glad to Hear.

You might just as well know it right now—the cause of skin eruptions, pimples, blackheads, blemishes, itchy rashes, and all the other things that are so annoying to the skin, is a scientific blood-purifier. It is called S. S. S. and it will help you to get rid of them. We prove it. You skin troubles and eruptions in the blood, it isn't common sense to simply treat the skin. You must get to the cause of the trouble. S. S. S. will prove to you what is happening in your blood. S. S. S. is a scientific blood-purifier. It is called S. S. S. and it will help you to get rid of them. We prove it. You skin troubles and eruptions in the blood, it isn't common sense to simply treat the skin. You must get to the cause of the trouble. S. S. SENATE RACE TO WAX HOTTEST IN SOUTH, REPORT

Johnson-Moore Forces Prepare Heaviest Offensive for So. California.

(Continued from page 1-B.)

ray, Washington and Pleasanton townships, late yesterday, one of the largest lists ever compiled so far ahead of the last filing day is in the hands of the county clerk. Thirty-four candidates for offices in the county and sixteen for state offices have declared their intentions.

Quentin Roosevelt Unit Number 5, United Veterans of the Republic, with headquarters in Oakland, has endorsed by resolution the candidacy of Walter Brinkop for State Treasurer.

In the State Legislature fights here and there, the political situations are developing. As had been predicted, Thomas J. Horan, member of the Solano County Central Committee and a former service man in the navy, has filed his papers for the assembly nomination and will run against Robert McPherson, ex-service man and incumbent. One of the closest contests in the state is in Contra Costa, where the incumbent, John Vallejo, the pivotal city. At Modesto Senator L. L. Bennett, Assemblywoman Estro Broughton, and Congressman Henry E. Barbour have filed nomination papers with the county clerk. Assemblyman Albert Rosenhouse of San Francisco, speak pro-tem of the house, will run without opposition, according to present indications, and is being groomed as a candidate for the speakership.

Democrats within the week have organized in Berkeley a "Brinkop for Congress" and a "Jones for Governor" club. At the meeting in the interests of Mattison Jones at the Hotel Whitecoast, it was admitted that many Democrats were talking of writing in the name of James D. Phelan, but no one proposed to know of any organized campaign so far.

LIST OF CANDIDATES.

The list of those who have filed nomination papers with County Clerk George Gross includes:

Elmer E. Johnson, justice Alameda township; M. Borge, constable Eden township; Charles J. W. Deuser, constable Alameda township; Robert E. Edgerly, justice Berkeley; Joseph Roderick, constable Washington township; George E. Gross, county clerk; William J. Hamilton, supervisor of Third district; Edmund T. B. Knox, tax collector; Larken M. Locke, constable Pleasanton township; P. C. Quinn, justice Pleasanton township; Ralph V. Richmond, justice Washington township; Stanley Hand, constable Murray township; Herbert D. Wise, justice Brooklyn township; Henry T. Burns, constable Oakland township; G. S. Fitzgald, justice Murray township; T. E. Knox, supervisor First district; John G. Mattos, Jr., supervisor First district; B. C. Michie, justice Washington township; Thomas J. Power, justice Washington township; Thomas D. Carroll, constable Brooklyn township; Gilman W. Bacon, county recorder; J. J. Murphy, constable Washington township; W. J. Hendrickson, constable Alameda township; Jacob Harder Jr., justice Eden township; Ezra W. Decoto, district attorney; George A. Posey, county surveyor; Grant D. Miller, county coroner; John G. Mattos Jr., supervisor First district; Howard L. Bacon, justice city of Oakland; Joseph S. Purdalo, justice Washington township; W. J. Hendrickson, constable Alameda township.

The following candidates have filed for state offices:

Hiram W. Johnson, U. S. Senator; E. H. Christian, Chris E. Fox, Edward J. Smith and Frank W. Anderson, Assembly; Arthur A. Wenderling and Edward S. Hurley, State Senator; J. S. Webb, Attorney-General; Charles G. Johnson, State Treasurer; Ray L. Riley, State Controller; Edgar O. Farley, William P. Jost, Mrs. Anna L. Saylor and Homer R. Spence, Assembly; Friend William Richardson, Governor; Charles A. Shurtliff, Associate Justice Supreme Court, full term.

Hayward Girl to Wed Woodland Newspaper Man

MISS HAZEL IRENE THORUP, daughter of well known Hayward family, who is to be the bride of George Collins, of the Woodland Democrat, one of the most widely known newspapermen of Northern California.

Engagement of Miss Hazel Thorup to George Collins Is Announced.

WOODLAND, July 15.—The engagement has been announced of Miss Hazel Irene Thorup, eldest daughter of Mr. and Mrs. J. J. Thorup, pioneers of Hayward, and George Collins, a Sacramento Valley newspaperman. The wedding date is fixed for late in December.

POLITICAL NOTES

District Attorney Ezra Decoto yesterday announced his candidacy for re-election in the following statement:

"In presenting myself as a candidate for the office I now hold, that of district attorney of Alameda county, I feel that the people of the county are already familiar with the work of my office. Among the many things I have done during the past four years are the pursuit, capture and conviction of the Alvarado Bank robbers, two of whom we followed all over the United States; the arrest and conviction of the members of the notorious 'Thirty Strong' gang, one of the best organized gangs that has ever operated in Alameda county; the conviction under the syndicate law of all those who tried to interfere with the United States in its efforts to win the war and who were endeavoring to undo all the good work that was done by our soldiers in the war for liberty and humanity. During the past four years we have convicted 922 persons charged with felony in the Superior Court of this county. In addition I am the legal adviser of all county officers and the several boards of education and school boards and have charge of all their civil business. I can assure the people of Alameda county, if elected, the same faithful and fearless service that I have given in the past. To me public office is a public trust. I believe in giving to every member an absolutely square deal and in enforcing the law honestly, faithfully and fearlessly."

James H. MacLafferty, candidate for congress, filed a petition yesterday containing the names of 1000 men and women in all parts of Alameda county. His petition is the first to be filed in the congressional fight. The other two aspirants for this office are David Olinant and H. C. Cutting, both Republicans. As

WILKENS HELD WITHOUT BAIL IN MURDER CASE

Hearing of Man Suspected of Inciting Wife's Killing Is Continued.

(Continued from page 1-B)

kens has been banded about frequently. He was arrested on an ex-mate affidavit, sworn to by Policewoman Katherine O'Connor. I will show that Katherine O'Connor had no personal knowledge of the facts she swore to when she made the complaint. No one claims she was present at the homicide. I believe this is certainly a case for bail."

JUDGE REFUSES.

Judge McAtee reiterated that he would have to treat this as any other case; that he was not a party to any controversy; that he did not intend to talk about the case, or allow anyone else to talk to him about it, and that he was sitting solely as a committing magistrate to determine whether there was probable cause to believe that Wilkens may have had something to do with the crime.

When the court's decision was made known, Wilkens, who visibly showed the effects of weeks of worry, let his head fall in his hands and adopted a dejected attitude. Just before the adjournment, Assistant District Attorney Isadore Golden made a statement to the court as follows: "I just want to say, your honor, that we did not proceed hastily in this case and that we have not intended for weeks to proceed against this defendant. The fact is that we have not proceeded until we were convinced that the evidence in this matter and the connection of the defendants with this crime not only should be presented, but is of such a nature as to demand that we present it to a jury of his peers to demand his guilt or innocence."

Shriners to Elect Successor to Hill

Shriners of Ahmese Temple will elect a treasurer at the regular stated meeting for July next Wednesday night to complete the term of the late J. A. Hill. Potentate Thomas W. Norris will announce committees to take charge of arrangements for the temple's representation at the next session of the Imperial Council at Washington, D. C. in June, 1932, and there will be an entertainment program, including selections by the band, the jazz orchestra and the Bedouin chanters, motion pictures and refreshments.

A transcontinental automobile journey to Washington by the five California temples is contemplated, and Ahmese Temple expects also to send a special train of its own, as it is the intention to have all the underlings of the Imperial Council.

There is no Democrat in the field, it is conceded that the man of this trio who qualifies at the primary on August 29 is the man who will go to Washington. MacLafferty announced that the filing of his petition marked the opening gun in his own campaign.

The nominating petition of Attorney Howard L. Bacon, candidate for police judge, was filed yesterday.

Ernest S. Leslie has announced himself a candidate for the assembly from the forty-first district. In his statement he sets forth that he was born in California, has resided in Berkeley for twenty years, and is a graduate of the Berkeley high school and of the University of California, a member of the class of 1919.

A "Thompson for Assembly Committee" was formed last night at the home of Robert Russell, 1035 Kalms avenue, Berkeley. The meeting was attended by a number of prominent men and women of the forty-first assembly district. Plans for an intensive campaign were initiated by those present.

The committee is as follows: Lemuel Sanderson, Walter Mork, Chas. Macle, A. Klein, Ed. F. Hanna, David P. Glick, John Davis, J. Jorgensen and Mr. and Mrs. Robert Russell.

Arthur A. Wenderling, candidate for senator from the sixteenth senatorial district, sprung an advertising novelty when he released a score of balloons bearing Wenderling banners at a meeting of the Golden Gate Improvement club at the Golden Gate branch library Friday evening.

Wenderling dealt in his talk upon the legislation which he fathered for the benefit of the districts adjacent to the water front. "Emeryville asked for the grant of its tide lands from the state to the town of Emeryville," declared Wenderling, "and by an act of legislature of which I was the author, these tide lands were granted to Emeryville. Albany made the same request and also got the same results. Berkeley, too, owns her tide lands and is in preparation of the great Pacific port terminal under a fifty-year lease which has already resulted in the location along the waterfront of additional manufacturing industries to the present total of 135."

The New NATIONAL CANDIED LAXATIVE "MOVIES"

Greatest "Actors" in the World! Leading Midgets! At all good Drug Stores.

DR. STEVENSON TO SPEAK. SAN LEANDRO, July 15.—Dr. T. Stevenson of Berkeley will take the place of Rev. Moore Drew in the pulpit of the First Presbyterian church of San Leandro Sunday morning. Evening services at the church will be discontinued until the middle of August.

San Leandro and Hayward to Play

SAN LEANDRO, July 15.—The San Leandro Merchants' baseball team and the Hayward Boosters will play the third of a five-game

series tomorrow afternoon on the Hayward diamond. Each team has one victory to its credit. The battles will be J. McFadden and Andy Varg for San Leandro, Tom Hammond and W. Lowdyn for the Boosters. McFadden has recently arrived from the Calgary team in Canada.

Arrested 'Cyclist Is Taken to Palo Alto

SAN LEANDRO, July 15.—Theodore Garcia, a Hayward was arrested today with a stolen motorcycle in his possession. The arrest, made at Elmhurst, followed information from the authorities at Palo Alto that he was wanted in that city. Garcia was removed to Palo Alto late this afternoon. The arrest was made by Traffic Officer Joseph Brandon and Officer Harry Lyons.

A STORM OF PRICE WRECKING NO ORDINARY STORE COULD WEATHER!

If it wasn't for the fact that we are forced to quit business due to doubled rent and the expiration of our lease, prices such as we are quoting would put us into bankruptcy in a week. We would be tickled to death to break even on what we invested in this big store. Profits are entirely forgotten, in fact we have sliced a good portion of the cost away to make these offerings the biggest ever presented to the people of Oakland. We're almost through. Eleven more days and this wonder-opportunity will be history. You have no time to lose. Now—now is the time to buy. Anticipate your needs, as the prices we are quoting are less than half what you would have to pay to other dealers now or later. Come early Monday. No disappointments here, folks.

GRASS RUGS

5x12 size; various patterns and colors. These sold as high as \$25. Now there isn't one priced over, and most are even less \$8.95

SUNDAY, JULY 16, 1922.

UPPER CALIFORNIA'S CLAIMS.

There is a surprising wealth of statistics upon which claims for the advancement of Northern and Central California may be based. In the fact that this record has not been recognized or emphasized to the community good is one of the strongest arguments for just such a movement for development as is now binding this part of the state into a united force for advancement.

Seventy-four per cent of all of the state's products and sixty per cent of the state's fruit is produced in the northern section. Crops generally supposed to grow nowhere but in the south are great industries on this side of the Tehachapi.

Many who know that olives were planted first at the missions in Southern California do not know that 75 per cent of the crop is now grown in the northern half of the state and that this means close to 7000 acres. Upper California has over a third of the citrus crop which has made the other part of the state famous.

The figures are startling and romantic. Plums, figs, almonds, cherries, apples, pears, peaches and apricots, all are grown in greater abundance in Northern California and the percentages of excess run from 90 to 68. The figures come from the State Department of Agriculture.

There is to be no more indifference to natural wealth and no more passing over, as a matter of course, the record of achievement in the richest part of the state. All that was needed was the stimulus and that has been applied. Newspapers, farm bureaus, chambers of commerce, and city councils have joined the movement. A great railroad system is advertising in the Middle West and East the advantages of the San Joaquin and Sacramento valleys and is following up inquiries to bring a substantial class of farmers this way.

"There are brains, initiative and determination back of this co-operation plan and we must back it to the limit," says the Woodland Democrat which expresses a sentiment existing in all of the valley and coast cities. The movement, already, is greater than any leader or any city. It is a translation into terms of enthusiasm, effort and publicity of the record of a land superlatively endowed with wealth and opportunity.

FOR COMING CITIZENS.

Climatic conditions and transportation facilities in California have been responsible for a growing migratory population, a group of agricultural workers who claim residence in no certain section and who earn their living by "following the fruit" or other crops. In the old days they used to walk or pack their families into the same sort of prairie schooner which brought the first settlers across the plains. Now they use gasoline, camp in the open and, in many instances, become prosperous.

The State of California is concerned in the education of the children of these itinerant workers. It was for them the Migratory School Law was passed by the last Legislature and approved by the governor. Until the report of Georgiana C. Carden, State Supervisor of School Attendance, was made the other day there has been no record of the accomplishments under the act.

Approximately 200 children of migratory families have been instructed under the direct supervision of the State Department of Education in the last year, the report says, and more than 1,000 others have been helped to educational training by exacting administration of the new statute in every county in California. The work is out of the stage of experimentation; next year thousands will be given assistance.

The law authorizes the Superintendent of Public Instruction to establish and maintain schools for the children of migratory workers in all the rural districts of California. For it has appropriated \$10,000 of which less than \$1000 has been expended.

Of the children whose parents

follow the crops up and down the state is one of more aspects than might first appear. Educational training for these boys and girls will decrease juvenile delinquency and check the growth of lawless tendencies. And, above all, the children are entitled to schooling.

OUT OF THE BALKANS.

Rumors and propaganda come from the Balkans where, as in the past, kings rest uneasy on the checkerboard of Europe. The Balkan diplomat glances fearfully in all directions, the politician sees menace on every side. Follows the old game of move and countermove, a balancing of intrigue with intrigue and the development of a mysterious, hush-and-shudder program called policy and diplomacy.

Jugoslavia is convinced Italy is seeking to turn the Albanians against it and suitable offers are urged. Bulgaria is suspected of cherishing hopes of stirring up trouble in the southern provinces of Jugoslavia and, it is whispered, has been given the promise of assistance from Albanian outlaws. There is a disturbance in Macedonia and the story is spread that, though they originated in the so-called neutral Albania, the initiative was from Bulgaria.

Not even the greatest expert, no solemn conference of Powers, could draw the frontier between Albania and Jugoslavia, for instance, because the respective peoples are so intermixed. Fighting down the years has produced strong feeling and in the indeterminate zones there are chips on every shoulder.

It is to be wondered how long it will be before the peace idea may be implanted in the Balkans. Are all the incubators for war and trouble which have been allowed to run there, and even encouraged, for so many years, to be maintained in the newer generation?

Rumors and propaganda come from the Balkans. So have they come for years and years.

ADMIRAL JOHN MORESBY.

A despatch the other day bearing the news that Admiral John Moresby had died at Portsmouth in England carried with it little to indicate that there had passed a man who had known romance and high adventure.

As an explorer this Englishman found twenty-five large inhabited islands off the coast of New Guinea, and more than a hundred smaller ones. He cruised along six hundred miles of previously unknown coast line, visited the pearl shelling stations in the Torres Straits and found the finest harbor in New Guinea, on which Port Moresby now stands.

The old admiral who was more than ninety years of age when he died had served in the Baltic, in China and Japan. He was a holder of medals, a writer of books, and a spinner of yarns. When British shipping was of the rough and uncertain school described by Captain Marryatt, young Moresby was before the mast. Before the romance of island and atoll had been capitalized and recorded in celluloid, he put his ship into ports where no white man had ever been seen.

BRAZIL'S WILLIAM PENN.

Into a wilderness never before penetrated by a white man Candido Mariano da Silva Rondon, thirty years ago, took his life in his hands for the sake of adventure and his country. The Motto Grasso country, the "Wild West" of Brazil, was known for its savage tribes, ferocious animals, and dangerous pitfalls.

Rondon stretched telegraph wires across this jungle and won the natives over so completely they aided him in the task. He was able to persuade his government to guarantee lands and privileges to the tribes and, in the thirty years of his work, has seen this wild territory under to a peaceful and useful one.

The other day the National Geographic Society honored General Rondon by making him an honorary member, the ninth man to be so chosen. Brazil has named a part of the Matto Grasso, a part fifteen per cent larger than California, Rondonia and he is being called the William Penn of his country.

A private checking of Contra Costa county's census would show twenty thousand or more inhabitants than the Federal count revealed. When the new figures are in the county will be one of the few in the country which can present its population claims backed by a house-to-house survey and which may dispute with reason and facts a too small estimate made in the official count.

Freight received in Berkeley in June was almost twice that of the same month a year ago. Bank clearings show large increase over 1921. These are but two of the latest indications that the entire Eastbay is moving forward as it has never moved in the past.

A woman who has lived to be one hundred advises steady and consistent work as the secret of longevity. No doubt she is right, but why say such a thing in fishing season?

Whether he cares or not, the Oakland speed cop who leaped out of an automobile onto the neck of a motorcyclist has qualified for the movies.

Franklin Hough was "the father of forestry." Those who came later are chips off the old block.

AFFAIRS
WASHINGTON

By R. T. S.

(Copyright, 1922, by The Oakland TRIBUNE.)

WASHINGTON, July 15. — He has been in Washington the past week—the man who knows more of human foibles and frailties and troubles and joy than any other person under the sun. He is the man who opened all the mail in England during the war. He is old "opened" by the censor, himself. And a mighty fine man at that. If anyone had to open your letter to your wife, or your husband or your business associate or your sweetheart, you would have voted unhesitatingly for Frank V. Worthington.

Unquestionably, there was no more difficult task in all the war to deal with than the postal censorship in England, but so well was it handled by Mr. Worthington that when the United States came into the war he was asked by us to take over the censorship of all mail for continental Europe passing through England. That was the highest tribute which could be paid the British censor, for during the early years of the war there was much grumbling and discontent in this country over mail delays supposed to have been caused by the British.

Of course, it is only in theory that Mr. Worthington opened all the mail. And it was only in theory that any censor opened all the mail. There wasn't time for that. It was necessary most of the time to select a bag here and there and accept it as typical. But, take it from the writer, the British missed mighty few of them. The task of organizing the postal censorship was something enormous and it was here that the Worthington genius showed at its best. Oddly enough, he came all the way from South Africa to London to do the job. For years he was one of the native commissioners for Northern Rhodesia.

He soon headed for England when the war broke out and became deputy chief postal censor. Today he is regarded as the greatest authority on postal censorship in the world. He was one of the two Britishers sent for by President Wilson when the latter was visiting the King at Buckingham Palace to be thanked for their invaluable assistance to the United States Government. The other was Admiral Sir Reginald Hall, head of the British naval intelligence, and, with all due respect, one of the wisest old birds who ever wore a uniform. What "Blinker" Hall didn't know about what was going on wasn't worth knowing. "Blinker" was a great favorite with all the American correspondents who went to war. The afternoons spent with him at the Admiralty over tea and cigarettes were a real delight. Frankness itself to the American correspondents, I don't believe British press men ever ventured to invade the sacred precincts of his office, which always had an air of mystery or suppressed excitement about it.

Mr. Worthington, accompanied by his wife, passed through Washington on the last leg of a journey around the world. He saw Secretary Hughes while here and was entertained by some of the men attached to the American Embassy in London during the war. As a reward for his work in the censorship the British gave Mr. Worthington a grant of 10,000 acres of valuable land in Uganda, East Africa.

Women, fickle women. Only last week it was pointed out in this column that Mrs. O. H. P. Belmont, in presenting a national headquarters for women in this city, stipulated that no man should be employed about the place except in a menial capacity. Now comes Miss Alice Hughes who went to war militant and declares there is no occupation on the face of the earth too menial for women. That is, she says, there ought not to be any calling too menial. In other words, Miss Paul believes instead of making a forbidding women to participate in certain classes of work, there should be legislation making all trades safe and decent for women. It was so in Europe during the war and to a large extent in this country.

One forbids women to shine shoes or operate taxicabs. Miss Paul avows this is all wrong. The National Women's Party has ten women lawyers working in the library of the United States Supreme court, making the first comprehensive report on the legal position of women in the United States. This is no easy task. It is comparatively easy to define woman's legal status under the Federal laws, but each State has its own particular ideas as to how women must be regarded in the eyes of the law.

What Miss Paul seems to present is the idea that laws should be passed to prevent women from working at certain trades because mere man believes these trades to be sacred unto himself. It is admitted that most of these exclusive trades may be regarded as menial.

A real "old sleuth" in the Department of Justice gave some of his friends a bit of advice a day or two ago.

"Never hold the transmitter of the telephone to your chest with the idea that you can prevent the person at the other end of the line hearing what you are saying to," he said. "Many a woman thinks that simply by pressing the phone to their chest they are shutting off all possibility of being heard over the line. That is not the case. Every word you say vibrates the chest, and the words are carried over the wire almost as plainly as if you had said them in the moonlight. Turn the transmitter in an opposite direction and whisper if you will, or place the hand over it, but never hold it to the chest."

All those yearning for secrecy please note.

There's joy in the smile of an artless child; there's joy in a maiden's eye; there's joy in the spring when the song-birds sing; there's joy in a lover's "ah. But such joys all pale and easily fall to compare with the joyous thrill of the woman who knows that her new spring clothes give her rivals a nervous chill.

The news that King George of Britain has started an eliminating movement as to the silk hat will not greatly intrigue this country, for the reason that the silk hat has been practically eliminated here for some time. Those who remember its vogue twenty-five years ago will agree, and the rarity with which the two-part tie is seen today as normal headgear will substantiate this. Even the dicer, or "bowler," as it may be more properly called, is now rarely seen.

The question is being debated by baseball writers whether the "Yankees" are not beginning to look upon Babe Ruth as a liability rather than an asset. It is possible that he has felt a hunch to this effect himself, for all at once he quit "crabbing" and went to hitting the ball. But in the meantime the fans, who have to be constantly "shown" to keep their enthusiasm for a player at white heat, became somewhat lukewarm, and it is a question whether they can be got back to that attitude of object worship that formerly characterized them.

The action of the Glenn county grand jury in passing a resolution in favor of the deportation of aliens who violate Federal prohibitions on narcotic laws is a reminder of a growing sentiment in favor of such a course of action. There is an undoubted feeling that laws as to aliens should be tightened, and it would not seem to be a violence if all who violate any laws, and are convicted thereof, should be put without the boundaries of the United States.

The sugar orgy hit Cuba harder than has been generally understood. When prices began to soar around 30 cents Cuban planters jumped to the conclusion that mature orange groves simply cum-

NOTES and COMMENT

The impressive showing in Friday's issue of this paper, of sky-scrapers that are planned, financed and some of them under way, will give a better idea of how Oakland is growing than any amount of descriptive matter. A picture everybody can read and comprehend at a glance, and the group that was printed—which by no means represents all that is doing in the more important construction—will end those who may not have the hay, or who may have been skeptical as to popular representations, to realize the progress that is being made.

It seems to be reasonable that an intoxicated person who runs amuck with an automobile and inflicts personal injuries or damage upon others should be promptly jailed and punished. Such offenses are read of not infrequently, but in almost no instance does anything appear as to the subsequent proceedings. There is nothing in this era of automobile congestion that is more dangerous to life than a drunken man at the wheel. The most careful driving and the strictest observance of traffic laws do not insure immunity from his menace.

The news that King George of Britain has started an eliminating movement as to the silk hat will not greatly intrigue this country, for the reason that the silk hat has been practically eliminated here for some time. Those who remember its vogue twenty-five years ago will agree, and the rarity with which the two-part tie is seen today as normal headgear will substantiate this. Even the dicer, or "bowler," as it may be more properly called, is now rarely seen.

about YOUR HEALTH

Just What You Can Do to Combat "Yellow Jaundice"

By ROYAL S. COPELAND, M. D., Commissioner of Health, New York City.

In the country they speak of certain symptoms as indicating "yaller janders" or, among the precise, "yellow jaundice."

Jaundice is not a disease. It is a symptom of various conditions which interfere with the free escape of the bile from the liver and gall-bladder.

If this obstruction, whatever may be the cause, continues for a few days there will be discoloration of the skin and of the whites of the eyes. The normal complexion and color are changed, becoming yellow or greenish-yellow.

Bile is essential to the digestion of fat. If it does not flow as it should there will be delayed absorption and assimilation of the fatty foods. The intestinal action which is stimulated by the bile is greatly reduced, and putrefaction of the intestinal contents follows. Gas formation, bloating and constipation result. The absence of bile causes the stools to be white, pasty and very offensive.

If the obstruction is so great that the bile cannot escape in the usual way, it is absorbed by the blood and is carried by the circulation to every part of the body. This produces what is commonly called "biliousness." The brain and nervous system seem poisoned. As a result there is lowered mental activity, gloom of spirit, sadness, depression and loss of ability to work. The heart's action is slowed, perhaps to 40 per minute. All in all, the victim feels miserable and useless.

Not only is the skin discolored, but it itches terribly. There may be black spots from hemorrhage under the skin. The urine, too, is colored yellow.

Jaundice may be due to a catarrhal inflammation of the bile-duct with such swelling as to interfere with the passage of the bile. Exposure to cold may cause this. Certain diseases, too, such as malaria, Bright's disease, pneumonia and typhoid fever may produce catarrhal jaundice.

Recently there have been seen a great many cases of "epidemic jaundice," a condition like catarrhal jaundice, but due to an infection carried by rats.

In the treatment of jaundice, first consideration is given the diet. Fat is not well digested without the bile, so they should be omitted from the dietary. Fats, oils, fatty, rich, seasoned food and sweets should be avoided.

Buttermilk, skimmed milk, vichy and Saratoga waters and lemonade are useful. Lots of water, internally and externally, is indicated. The bowels should be kept open by the use of saline waters, oil, etc. All alkaline waters are valuable. Enemas of cool water to which bicarbonate of soda is added, will prove helpful.

There are various local applications which will help in relieving the itching of the skin. Hyposulphite of soda, a tablespoonful to a cup of water, will add to the comfort. This is used to bathe the itching parts.

There is a form of jaundice met with in new-born babies. This is observed on the second or third day after birth. It lasts two or three weeks. It has been suggested that chloroform used for the mother may have caused this trouble.

WHAT IS BEING DONE TODAY.

Half-Hour Music, Greek theater, U. S. 4 m.

Yeomen, outing, Sunny Cove, Alameda.

Norwegian-Danish church convention.

Contra Costa Hills club outing, Camp Cindarella.

Eagles' picnic, Canyon park, Dr. Hamlin.

Irish Clans reunion, Shellmound Park.

Auditorium—The Gelsa.

Bu-ton—Thanks to You.

Orpheum—Some Wild Oats.

Pantages—Vaudeville.

American—The Woman Who Walked Alone.

Century—Forrest and Loss.

State—Viola Dana.

T. & D.—Constance Talmadge.

Franklin—Golden Idylms.

Broadway—The Right That Failed.

Lake Merritt—Boating.

EVENTS FOR TOMORROW.

TRIBUNE radio broadcast.

Alameda W. B. A. meets, Eagle clubhouse, evening.

Ruffalo—Findlay speaks, Soroptomist club luncheon, Hotel Oakland.

Oakland W. B. A. whist, I. O. O. F. evening.

Fuller-Patriarch Militants meet Odd Fellows' Temple, evening.

HE NEVER HAD 'EM!

Representative Carl Riddick, of Montana, says the introduction of nature studies in the public schools leads to some rather amusing situations. A teacher had just given an interesting talk about English sparrows, explaining in detail how they had been imported into this country for the purpose of combating the huge numbers of worms that existed everywhere, but that the sparrows had gotten to be almost as great a nuisance as the worms. In order to ascertain the views of her charges upon the subject, she asked a little boy which he considered the worst affliction, worms. In order to ascertain the boy's moment, she then said, "Please, ma'am, I don't know, I ain't never had sparrows."—National Republican.

A Rural Contemporary Sings.

The gentle bee is humming and the summer girl is coming, while the sprinkling cart the street is going through, and the host of city people that in summer we shall keep 't soon be coming up to spend a month or two. The hammock will be swaying and the breezes 'neath the trees and the farmer will go haying in the meadow if he pleases, and this rhyme would be complete if less rocky were the meter.

JUST FOLKS

By EDGAR A. GUEST—

FRECKLES AND TAN.

Finest of garbs for a glad little man!
Give me the noses
Turned upward and spotted,
Pudgy as roses
And sunburned and dotted;
Give me the faces
As brown as the berries,
Wearing the graces
God gives to the cherries;
Give me the grin and the glorious span
Of the mouth that is bordered with freckles and tan.

Freckles and tan, freckles and tan;
Badge of a boy since the world first began,
Hair that is tousled
And matted and wiry,
Frequently frownsled
And stubborn and fiery;
Eyes that are never
Dull-colored or teary,
Mouth that forever
Is mouthful and cherry;
Some may resist him, but I never can,
The boy that God blesses with freckles and tan.

Freckles and tan, freckles and tan,
Proud of a youthful and glorious clan!
Give me the grinning
And mischievous faces,
Waists that need pinning
In several places,
Give me the snickers
Of boyhood and chuckles,
Ill-fitting knickers
And scarred faces and
knuckles—
There's where the future may look for its man,
For never a weakling wears freckles and tan.

TODAY 20 YEARS AGO

A local music house is loaning graphophones to responsible parties for dances and other entertainments.

It is believed that there will be a surplus on hand when all bills for the Fourth of July celebration have been settled. Grand Marshal Arper told of the celebration last night at a meeting of the executive committee.

Camp Commander C. E. Raymond of the local camp of the Woodmen of the World was installed Monday night.

Mrs. A. L. McPherson will go to Skaggs Springs this week for her summer vacation.

101 1/2	101 3/4	101 1/2	101 3/4

Fullness and an irregularity of prices in many divisions of the stock list offset by a fair distribution of business at a higher level in the bond market, were the conflicting features of the week in Wall Street.

Prolongation of the coal strike and latest developments of the railway workers' walkout exerted an increasing influence, regardless of the time-worn theory that labor disturbances are not to be regarded as more than a seasonal factor.

At the end of the week's unsettledness was occasioned by a sharp setback in oil. Mexicans were severely depressed on a revival of "salt water" rumors, while domestic shares of the type owned their heaviness to fears of federal regulation.

The money market was in no sense accountable for the settling of the week's fluctuations. Call loans ended at the unusually low quotations of the preceding month, commercial paper being in better demand and at another cut in the rate of discount.

Germany's more acute problems were the subject of earnest discussion in banking circles, and a sense of nervousness in the wide range of foreign currencies, sterling almost alone displaying relative steadiness.

WHEAT VALUES SHOW UPTURN DURING WEEK.

Possibilities of transportation of wheat being curtailed as a result of strikes have been effective in bringing about a recovery in the value of wheat. Compared with a week ago, wheat yesterday showed gains ranging from 1/2 to 1 1/2¢ a bushel, corn down 1/2 to 1 1/2¢ a bushel, and oats 1/2 to 1 1/2¢ a bushel.

Reports that rural loading of wheat had been checked by coal shortage and by other consequences of labor unrest were quickly refuted by bullish traders seen to act as more than a counter-balance for the opposing influences.

German embargo on shipments of livestock and perishable commodities gave special point to talk about likelihood of contracts for wheat deliveries.

BUSINESS FEELS EFFECTS OF TWO LABOR CONFLICTS

Coal and Rail Strikes Act As
Brakes on Trade; Future
Events Awaited.

By HARDEN COLFAX.
BY CONSOLIDATED PRESS
LEASING WIRE TO TRIBUNE.
Copyright, 1922 by OAKLAND TRIBUNE.
WASHINGTON, July 15.—Business is beginning to feel the first touch of brake. The two great strikes in progress at the present time, according to reports from field workers to the government and private agencies, have resulted during the past week in diminishing somewhat the volume of transactions, the tonnage carried over the rails and the amount of coal mined. In other respects their effect has been so slight as to have been hardly noticeable.

Wall street, discounting the present unsettled conditions, began a month ago to lessen its activities. The stock market has been practically deserted by the public and it has been several weeks since a million share day.

Money is in large supply and demand, according to latest figures of the federal reserve board. The money market is listless, apparently awaiting developments. The demand for money for business purposes which has been proceeding steadily toward normal figures, has subsided materially.

STEEL INDUSTRY ACTIVE.
The iron and steel industry, according to dispatches from Pittsburgh, and other centers, continues active and with prices still rising but with both buyers and sellers still hesitant over contracts.

All reports to the various government departments and trade organizations here indicate that business is generally marking time in anticipation of future events. The strikes of railway workers and coal mine employees are the big outstanding features of the situation and are for the first time assuming a dominant position in the business world. While advances to the post office department indicate that less than a score of passenger trains have been taken off because of the shopmen's strike, there is no record whatever of the number of freight trains affected and no measure as yet of the effects of the strike on freight movement throughout the country. Carloadings are reported, however, to have shown a continued decrease of small proportions since July 1. The Cincinnati gateway, one of the most important bottle necks in the country's transportation system, is somewhat congested but the carriers are hopeful of clearing it in reasonably short order.

The last period for which carload figures are available is the week ending July 1, or the seven days immediately prior to the beginning of the shopmen's strike. It has shown steady increase. During that week they showed a decrease of 980 cars and since then they have gone lower. The Association of Railway Executives, which makes public the figures each week, states that during the week ending July 1 coal loadings decreased 2,212 cars.

Coal strikes, according to the geological survey's estimate, have reached a dangerous line of 20,000,000 to 24,000,000 tons. So active has the market become that Secretary Hoover has found it necessary to meet with representatives of the non-union mines for the second time—the meeting held today—for the purpose of putting a check on the rising price tendency. Eighty per cent of the non-union mine operators, the department estimates, have not exceeded the Hoover price scale, but the remaining 20 per cent have seized the opportunity to profiteer.

The next two or three weeks, in the belief of officials here, will be somewhat in the nature of a test period for industry generally throughout the country. The combination of a coal shortage and a rail strike is counted upon to slow down business to some extent but the period of quiet, it is believed, can be made short if the causes of the trouble are eliminated.

A DISTURBING FACTOR.
One of the disturbing factors in the present situation is the possibility of an offensive and defensive alliance between the striking groups whereby neither would return to work unless the others' grievances were settled. There has been considerable talk here within the past few days of such an alliance and some indication that it was contemplated, but no official verification of this report has as yet been made. Observers have based their belief that such a combination was in progress of formation, or had actually been formed, by the attitude of the mine workers toward President Harding's proposals for the settlement of the coal strike.

Without doubt there has been a change in the miners' attitude within the past two weeks. A fortnight ago they would have welcomed with delight, according to all indications, an opportunity to return to work under the old wage scale. No such manifestation of satisfaction was evident today at the meeting of the miners' policy committee, however.

Bank deposits decreased by \$46,000,000 during the week and are today at the level of five weeks ago, according to the Federal Reserve Board's weekly statement.

Colombia Regulates Fishing For Pearls

The exportation of Colombian pearls taken from the waters of the Caribbean Sea and in the Gulf of Maracaibo has been the subject of new regulations issued by the Colombian government, says a recent report from Consul Soule, Cartagena.

Pearls may be fished for by private parties subject to a fee of 10 per cent of the value of the pearls to be exported, the value to be determined in each case by a board of three experts, two representing the government and one

NEW REDUCTIONS ON MONEY RATES FEATURE MARKET

Drop in U. S. Expected to
Follow Bank of England's
Fourth Slash

BY CONSOLIDATED PRESS
LEASING WIRE TO TRIBUNE.

NEW YORK, July 15.—The most important event of the past week in the financial situation has been the resumption of the downward tendency in money rates and of the coincident upward tendency in the investment market. For the fourth time this year the Bank of England reduced its discount rate and the money market here has been following the English lead, on the assumption that it means another cut in our own Federal Reserve rate.

The chief objection of the reserve board to lowering rediscounts has all along been the fear of encouraging speculation. This was not, however, the effect produced when rates were reduced from 4 1/2 to 4 per cent a month ago. Rediscount stood at their lowest in the early part of June. The increase since then, even on bills secured by United States obligations, which take account of transactions originating in Wall street, has been negligible. The total stands now at \$157,875,000 against \$140,639,000 in the week of June 14 and the high record of \$1,573,000 in February, 1920. On the other hand government paper, that is on purely commercial operations, the rediscount increase has been smaller.

The present total is \$272,330,000 against \$271,305,000, the low record on June 7, and the maximum of \$1,616,000 in December, 1920.

Whether or not the fact that last month's reduction had no inflationary results will influence the Federal Reserve attitude now, remains to be seen. The investment community is manifestly reckoning that rates will come down probably to 3 1/2 per cent from the 4 per cent. It has been tentatively discounting such action during the last week with a buying movement which has swept liberty bonds forward to new high records and has carried the high grade railway mortgages up close to their high of April and May.

The German financial crisis has been delayed for another month by payments which the Germans made in goods, turned into cash, and thereby, the July installment of 50,000,000 gold marks was reduced to 32,000,000. This smaller sum the German government was able to pay. The latest Reichsbank statement shows, however, at what a terrific cost in paper note expansion the interested party.

Payment of the fee is due within ten days of the appraisal, and in any case must be paid before exportation will be permitted.

sion even this comparatively moderate sum of gold was gathered together. Within a single month German bank note circulation has risen from 155,000,000,000 to nearly 175,000,000,000 marks. Similar increases to obtain future monthly installments are unthinkable. The German mark would sink to the level of the Austrian krone and Germany would make a formal confession of bankruptcy.

LOAN OR MORATORIUM.

The solution of the German problem clearly lies along one of the other of two lines—either an international loan or the sort of moratorium which Germany has applied for, during which reparations claims will be met in kind instead of money. That Germany sincerely wishes to meet her obligations cannot be doubted when there is considered the great political risk the Berlin government is running in trying to put through the huge forced loan.

There is reason to believe that the French will agree to a modified reparations program under which the form of payment would be goods and labor instead of cash. Already the French minister of public works has proposed that Germany be allowed to construct public works in France to the extent of 18,000,000,000 francs, in part payment of the war indemnity. This scheme may be defeated through the opposition of French labor. But even so France is not interested for the next two years in the question of cash as compared with good payments, because for that time the Belgian priority claim would allow Belgium to get most of the German gold.

ENGLAND TO SEND GOLD.

Gold transfers from London to New York, in preparation for meeting the interest on England's war debt to the United States government, are likely to be a feature for the next month or more. The agreement is not expected to be large.

For Great Britain undoubtedly to provide the necessary funds as she did in the case of the Anglo-French bond redemption through accumulation of dollar credits in the exchange market.

In the meantime the British treasury has been pressing France for the interest on war advances for the British to the French, and selling of francs to meet these claims has been one of the causes for the decline in French exchange.

Labor troubles are the one deep shadow at the moment in the business situation at home. The threat of fuel scarcity, increased by the railway shopmen's strike, at length has begun to effect the steel mills. Continued for another month or so, there is no doubt that not only in the steel trade but in many other lines, production would have to be seriously curtailed.

The stock market has not allowed itself to be worked up over the labor difficulty because it still believes that the shopmen's strike soon will fizzle out and that the president will force a settlement in the coal strike before any vital injury is done. But the fact remains that until the strikes are dispensed of the business situation will be uncertain and this uncertainty will have its reflection in Wall street operations.

STOCKS UNSTABLE UNDER STRESS OF LABOR TROUBLES

Propaganda of "Bad News"
Now Having Effect on Oils
and Industrials.

By HERBERT R. JACKSON
OF Wm. C. Bryant & Co.

If a questionnaire should be sent to investors, traders and persons engaged in financial pursuits, it would probably be found that the consensus of opinion is that the markets are affected more by present time by the coal and rail strikes than by the threatened bankruptcy of Germany and European chaos. Though this latter factor is really serious and may be seized upon by professional bears from time to time to depress prices of securities in general.

Unfavorable news has a bad habit of circulating very freely and very rapidly. Take for instance the entrance of salt water into the oil wells in Mexico. This factor is really serious and may be seized upon by professional bears from time to time to depress prices of securities in general.

few years back. Those recently reorganized, namely Chicago & Eastern Illinois and Missouri Kansas & Texas are expected to show exceptional progress both from an earnings standpoint and marketwise.

The investor who waits to purchase rail stocks until the strike has been ended will doubtless pay considerably more than prevailing prices, for it is noticed that railroads are quickly absorbed on the slightest reaction and the stocks respond very quickly to favorable news.

For the long pull, and this means for a period of six months to a year, probably the greatest profits will be given by the railroads. Next should come the sugars and coppers, though a number of industrial specialities are affected more or less. The leather will doubtless attain very much higher levels. Studying all fundamental economic factors, one must come to the conclusion that this is not a time for pessimism, but rather a time to take advantage of the pessimism of others by buying the securities on reactions and not being in any haste to sell.

Export of Shoes

Shows Increase

The export trade in leather, boots, and shoes is increasing in volume in both the United States and the United Kingdom, says the Leather Division of the Department of Commerce. The United States exports 515,373 pairs of leather boots and shoes, valued at \$4,757,875, to the United Kingdom in May, 1922, the United States exports 515,373 pairs of leather boots and shoes, valued at \$4,757,875, to the United Kingdom in May, 1922, the United States exports 515,373 pairs of leather boots and shoes, valued at \$4,757,875, to the United Kingdom in May, 1922.

R. R. EQUIPMENT STOCKS ADVANCE 1 TO 3 POINTS

Crude Oil Drops 25 Cents a
Barrel; Bonds Are
Strong.

By BROADWAY WALK

NEW YORK, July 15.—Railroad and equipment stocks broke away from heaviness in the domestic oil shares today and scored advances of from one to three points in the most active issues. The maximum gains were recorded in the equipment manufacturing companies which were turned over in heavy volume. Statements that the government would take over the coal mines and operate them if necessary had a stimulating influence. Irregularly developed in the late dealings, but the general undertone was one of strength.

CRUDE OIL DROPS.
Predictions that the price of crude oil would be cut materialized when three companies announced reductions of 25 cents a barrel. Standard of California took the leadership and was followed by Prairie Oil and Gas and Sinclair. The cuts made by the latter two companies are on Midcontinent. In announcing the action of Standard of California said the reductions were due to continued over-production of crude oil and subnormal demand for fuel oil.

Domestic oils have been under pressure the last week in anticipation of these reductions. The cuts would have been made sooner had it not been for the record consumption of gasoline.

EQUIPMENT SHARES STRONG.
Expansion in the inquiry for the equipment shares was led by Baldwin Locomotive, which advanced more than four points. The demand was urgent and caused the issue to close at the best figure. This strength spread to Railway Steel Springs, Locomotive and Pullman.

Good buying, continued in the public utilities shares, although Consolidated Gas went lower because of week-end profit taking by speculators. Western Union did better.

DO YOU KNOW
That as Radio Ales, Mars is only about four minutes away from us?

ter because of the favorable report of earnings for the first half of this year and the prospect that revenues the next six months will show a greater ratio of expansion. American Telephone & Telegraph continued to seek a higher level.

Bond dealers reported an improved demand for high grade railroad issues that are legal investments for savings banks. Advances were scored in the best issues. Liberty bonds held steady around their high prices.

Swedish Shipping Conditions Improve
STOCKHOLM, July 15.—Less than 8 per cent of Swedish shipping is now idle, according to the latest report of the Swedish Shipping Association. This report shows a sharp contrast to conditions a year ago, when, in June, Swedish shipping depression reached bottom mark with over 44 per cent of the country's total tonnage idle and nearly 45 per cent of the men employed laid off. The report of the Shipowners Association covers only its membership, but virtually all of the country's shipping is owned by members of the association.

The recovery of Sweden in shipping is based largely on the country's approach to normal in many of its most important industries and the rapid increase in exports.

Tired of poverty?
If you are tired of slaving for wages or salary, or the poor rewards of small business, while others around you grow rich and independent—if you have the ambition that every American ought to have, and are determined not to stay poor in this land of opportunity, then I have something you want to hear about.

I don't want to hear from "widows and orphans," or those unable or unwilling to take an intelligent risk. I can't offer you something for nothing, for nothing worth having is to be had without risk, but if you are willing to back me, provided you find after careful investigation that my project is just as I say it is, and you have the ambition and spirit of the American Pioneer, then tear out this ad right now and mail with your name and address, and without obligation to you, I will send you my references and full, interesting information. Do it now before you forget.

Pacific Gas and Electric Company

A California Corporation with over 32,000 California Investors

Controlled and managed by Californians and built up by California capital

Offers Its First Preferred Stock—to Yield 6.86% on the Investment

For California investors this stock combines, in a pre-eminent degree, the element of safety with a number of special advantages due to the present unusually favorable investment conditions

1. Factors of Safety

(1) **The Company Supplies Every-day Necessities.** Its business is, therefore, inherently stable and has increased in every single year of the Company's history, regardless of fluctuating general business conditions.

Number of Consumers May 31, 1907	160,485
Number of Consumers May 31, 1922	610,067
Gain in 15 years	449,582
Average gain per year	29,972
Gross Business, 1907	\$11,342,140
Gross Business, 1921	\$7,509,706
Gain in 15 years	\$26,167,568
Average gain per year	1,744,504

(2) **It Occupies an Unexcelled Business Field.** California is one of the wealthiest and most rapidly growing of the forty-nine States. Its population in 1920 of 3,426,861 represented an increase of 1,049,312, or 44%, in the last census period. The Company's business field, in which 610,067 consumers were being served on May 31, 1922, includes more than one-half of this population.

(3) **Sixty-eight Years of Experience are Back of its Trained Organization** of more than 8,000 employees, a large number of whom are also stockholders. Its properties and service are maintained at a high standard.

(4) **Its Surplus Earnings, Upon Which Preferred Stock Dividends Have the First Call,** are based upon sound property values and have never been less than double these dividend requirements.

RECENT EARNINGS

Year	Surplus Available for Dividends	Preferred Stock Dividends	Balance
1918	\$3,071,303	\$1,490,463	\$1,580,840
1919	3,340,353	1,528,961	1,811,392
1920	3,922,060	1,777,933	2,144,127
1921	4,969,230	2,132,283	2,836,947
*1922	5,372,213	2,375,586	2,996,627

*Twelve Months Ended May 31.

(5) **Dividends on Preferred Stock Paid Continuously for Thirteen Years.**

(6) **A Consistently Strong Financial Position,** with ample cash resources, has been the Company's policy for years. It is rated as one of the financially soundest and strongest public service corporations in America.

(7) **The Stock Is Strongly Protected by Property Values.** With respect to earnings and assets, it occupies a preferred position ahead of the investment represented by \$34,684,000 of Common Stock, having a market value exceeding \$24,000,000.

(8) **The Proceeds From This Issue of Stock Will Be Expended for Income-Producing Additions and Extensions,** including extensive hydro-electric developments recently completed or now under way, aggregating 137,000 H. P. In the past five years the Company has invested more than fifty millions of dollars of new capital in additional properties necessary to meet the growth of its business.

2. Special Advantages

(1) **It is Non-Assessable and Non-Callable.**

(2) **It is Free from All State, County and Municipal Taxes** in California, except inheritance taxes.

(3) **It is Exempt from the Normal Federal Individual Income Tax.**

(4) **It Assures a Continuation of the Liberal Return** obtainable under the present favorable market conditions, as distinguished from short term investments which may and many of which probably will be redeemed when opportunities for reinvestment are not as advantageous as at present.

(5) **Dividends Are Paid at Convenient Intervals—four times a year,** on the 15th day of February, May, August and November.

(6) **Established Market for this Stock** in New York, Chicago, San Francisco and other financial centers make it acceptable security to banks for loans. It is, therefore, an excellent medium for the investment of private and business reserve funds.

OBsolete LAWS STIR BERKELEY REVISION MOVE

Public Spirit Club Will Ask
Council to Revamp Old
Ordinances.

BERKELEY, July 15.—A general housecleaning is in store for the machinery by which the legislative end of municipal affairs is run in Berkeley.

Because there are declared to be too many old and obsolete laws regulating conditions which no longer exist in the college city, a committee of the Public Spirit Club, recently organized civic body, will wait on the council to ask that municipal ordinances be thoroughly gone over in an effort to bring the laws to a concise and modern form.

Action of the club in sponsoring the legal "housecleaning" was taken following an address given by Frank V. Cornish, former city attorney of Berkeley, on the subject of "The Elimination of Berkeley City Ordinances." Cornish declares that in 1909, following the adoption of a freeholders charter, the ordinances of the old town of Berkeley were "overhauled" by Frank Stringham, as city attorney and Beverly Hodgehead as mayor. Such of the number as were useful were incorporated with new ordinances to meet modified conditions, said Cornish.

Court Recognizes 'White Mule's' Kick

ATLANTA, Ga., July 15.—The kick in Lowndes county's particular brand of "white lightning" is paid a high tribute in a document filed with the Georgia prison commission here seeking commutation of the death sentence of Dolphus Bell, negro sentenced to die for the murder of Ed Kelly, another negro.

"Kelly persuaded Bell to take two drinks of 'white liquor' and when he had taken them Bell lost what little mind he had," the petition said.

"The two drinks absolutely paralyzed his mind and dethroned his reason. When he regained his reason the next day he found that he had killed his best friend."

Munich Train Station Is Largest in World

BERLIN, July 15.—Munich for the Leipzig station.

Vanity Causes Girl's Death on Way to Wedding

BERLIN, July 15.—Vanity causes the death of a bride-to-be at Gonceau, Silesia, just as the wedding was about to begin.

Her fiancé was waiting on the steps of the church, and called to her to hurry. The girl started running. When she was a few feet from her future husband she fell dead.

A doctor who was hurriedly summoned made an examination on the spot, and announced that her death was due to tightly laced corsets.

Man Believed Dead Found in Shasta Co.

SALINAS, July 15.—The mystery concerning the supposed tragedy of Sam Trotter, near Granite canyon, south of Monterey, last November, when his automobile went over the cliffs into the ocean and his body supposed to have been washed out to sea, has to some extent been cleared and the faith of his family triumphed.

A local man reports that he saw Trotter in San Francisco not so long ago and he was definitely discovered in a Shasta county camp where he was foreman of a power company gang. Since his disappearance on November 11, 1921, and his supposed death, after several current rumors he was located and his activities since that time traced from place to place. He had spent at least four months in Stockton. Many reasons are given for the disappearance of Trotter on the cold November night, chief among which is the fact that he was badly involved in debt and said to be brooding over his financial difficulties.

Sam Trotter is well known to Montereyans with his gigantic proportions and big booming voice. He has a wife and five children. His wife is now living at the Sweetnam ranch near Nettle's Landing where Mr. Trotter was formerly foreman for the Nettle company.

Central Station, with its thirty-two rails, is now the biggest railway station in the world. Next to it comes St. Louis, U. S. A., with thirty-one rails, Paris Gare du Nord, with twenty-eight rails, and Leipzig, with twenty-six rails.

The total cost of the Munich station amounted to only 30,000,000 marks, against 135,000,000 marks for the Leipzig station.

New Eponge Suitings \$3.79 yd.

Truly a wonderful value at this low price. It is of a very high quality and comes in all the popular colors of the day. 54 inches wide and all wool.

You'll find food odors do not mix—because of the automatic circulation of air. The refrigerator is so scientifically constructed that air passes downward over the top and around all sides of the ice. Under the ice chamber there is an opening into which the air turns, passing into the food compartments. Because of the automatic constructions the air is always cold, always moving—and in constant circulation.

Whenever air comes into contact with ice it becomes purified. You can put the automatic in contact with the severest test. The automatic is economical—does not waste ice. The automatic trap cannot clog—lets the water out freely, prevents cold air from escaping and warm air from entering. Let us demonstrate the automatic—show you its very good points. Prices start at \$40 for the 65-lb. capacity without the water cooler. Other refrigerators—top ice models start at \$12.00, special. (Kahn's third floor.)

SARAZEN WINS GOLF CHAMPIONSHIP

Oaks Drop Fifth Straight Game To Sacramento Team After Taking The Lead

LOCAL MAN FINISHES
ONLY STROKE BEHIND
NEW NATIONAL CHAMP

Bobby Jones Tied for Second Place; Winner Unknown Until the Present Tournament.

By J. L. O'SULLIVAN,
(United Press Staff Correspondent).

SKOKIE COUNTRY CLUB, Glencoe, Ill., July 15.—In the most sensational "whipping finish" ever seen in the history of the open golf championship tournament classic, Gene Sarazen, Pittsburgh, won premier honors here today. Sarazen had a medal score of 288.

One stroke behind were Bobby Jones, Atlanta, Ga., amateur, and John Black, the Pacific Coast "dark horse," tied for second with 289. Bill Mehlhorn, Shreveport, and Walter Hagen, British open champion, were third and fourth with 290 and 291.

While the flashy young Pittsburgh ex-caddie played marvelous golf and deserved his victory, only heart-breaking luck kept both Jones and Black from beating him.

Thousands of spectators, banked in colorful masses about every green, watched Jones fighting with all the wizardry at his command, come into the home stretch just two holes away from the home green needing but par golf to tie Sarazen, and one birdie to win.

Jones missed the championship by a single stroke in the seventeenth green, when he had to shoot out from under a tree. Still fighting desperately, he recovered beautifully, and reached the edge of the greening three.

Putting carefully, he edged his ball towards the cup. Within a foot—six inches—three—two—the ball stopped on the rim of the cup, and Bobby Jones had lost the chance for which he had fought like a tiger to be the open champion. He finished with a par four, just one stroke behind Sarazen.

But John Black, the silent Scotchman, had passed the turn with a 33 needed but a 35 to beat Sarazen. He started the round with a five but picking up played par golf, within two holes of the finish. Here, like Jones, needing but two par fours to win, he met his fate, as did Jones.

Black Out of Bounds
For the First Time.

His drive went out of bounds, for the first time in the tournament. His second was in a trap and his third rolled off the green. A heart-breaking six was his portion and with it most of his championship hopes.

But the 18th was still to be played. It is a par five, and Black needed a three. His drive sang down the fairway like a bullet. The great mob of spectators, dashing ahead of the players in a frenzy of excitement forgot the quiet of golf gallery conduct and begged Black to "lay it up there." He did—within ten feet of the pin, but it rolled off the edge. Using a mashie, Black tried desperately to hole this almost impossible chance. He chopped, and the ball rose and fell—within a foot of the cup.

It was over. Gene Sarazen was the champion—a stock little fellow with a flashing smile, sparkling black eyes, and matinee idol profile, who had gone out earlier in the day without the horde of golf-mad enthusiasts in his wake, and whipped around at the dizzy rate of 75-15-15-15-15. Sarazen finished at noon with 220, standing fifth behind Jones, Mehlhorn, Black and Hagen.

While the thousand spectators, including hundreds of gaily-clad women in a hundred hues of summer costume, were waiting for the believed headlines to start, he started off with his partner, Johnnie Farrell, Quaker Ridge, N. Y., for the sensational round that was to bring him the championship.

Sarazen Shoots Great
Golf to Win the Title.

He holed on the first green with an easy par four. A missed putt on the next had him one over. But here Sarazen gave the first indication of what was coming. On the third he had a beauty drive, and his midiron flashed on his second and cut the ball dead to the pin, 175 yards. He was down in a birdie there. On the next hole, 440 yards, he drove 325 yards, one of the most terrific smashes of the tournament, pitched up to the pin, and sunk another birdie. It was super golf, and the small gallery made so much noise, hundreds dashed over to watch him. Two missed putts on the long fifth, gave him a six, the worst hole of the day for smiling Gene.

Then on the 215-yard seventh, he used a spoon and dropped his ball dead to the pin for another birdie—a two.

Encouraged by his good fortune, the Pittsburgh flash played the hard eighth in a par four and finished the nine with a beautiful three. This gave him a 33, one under par.

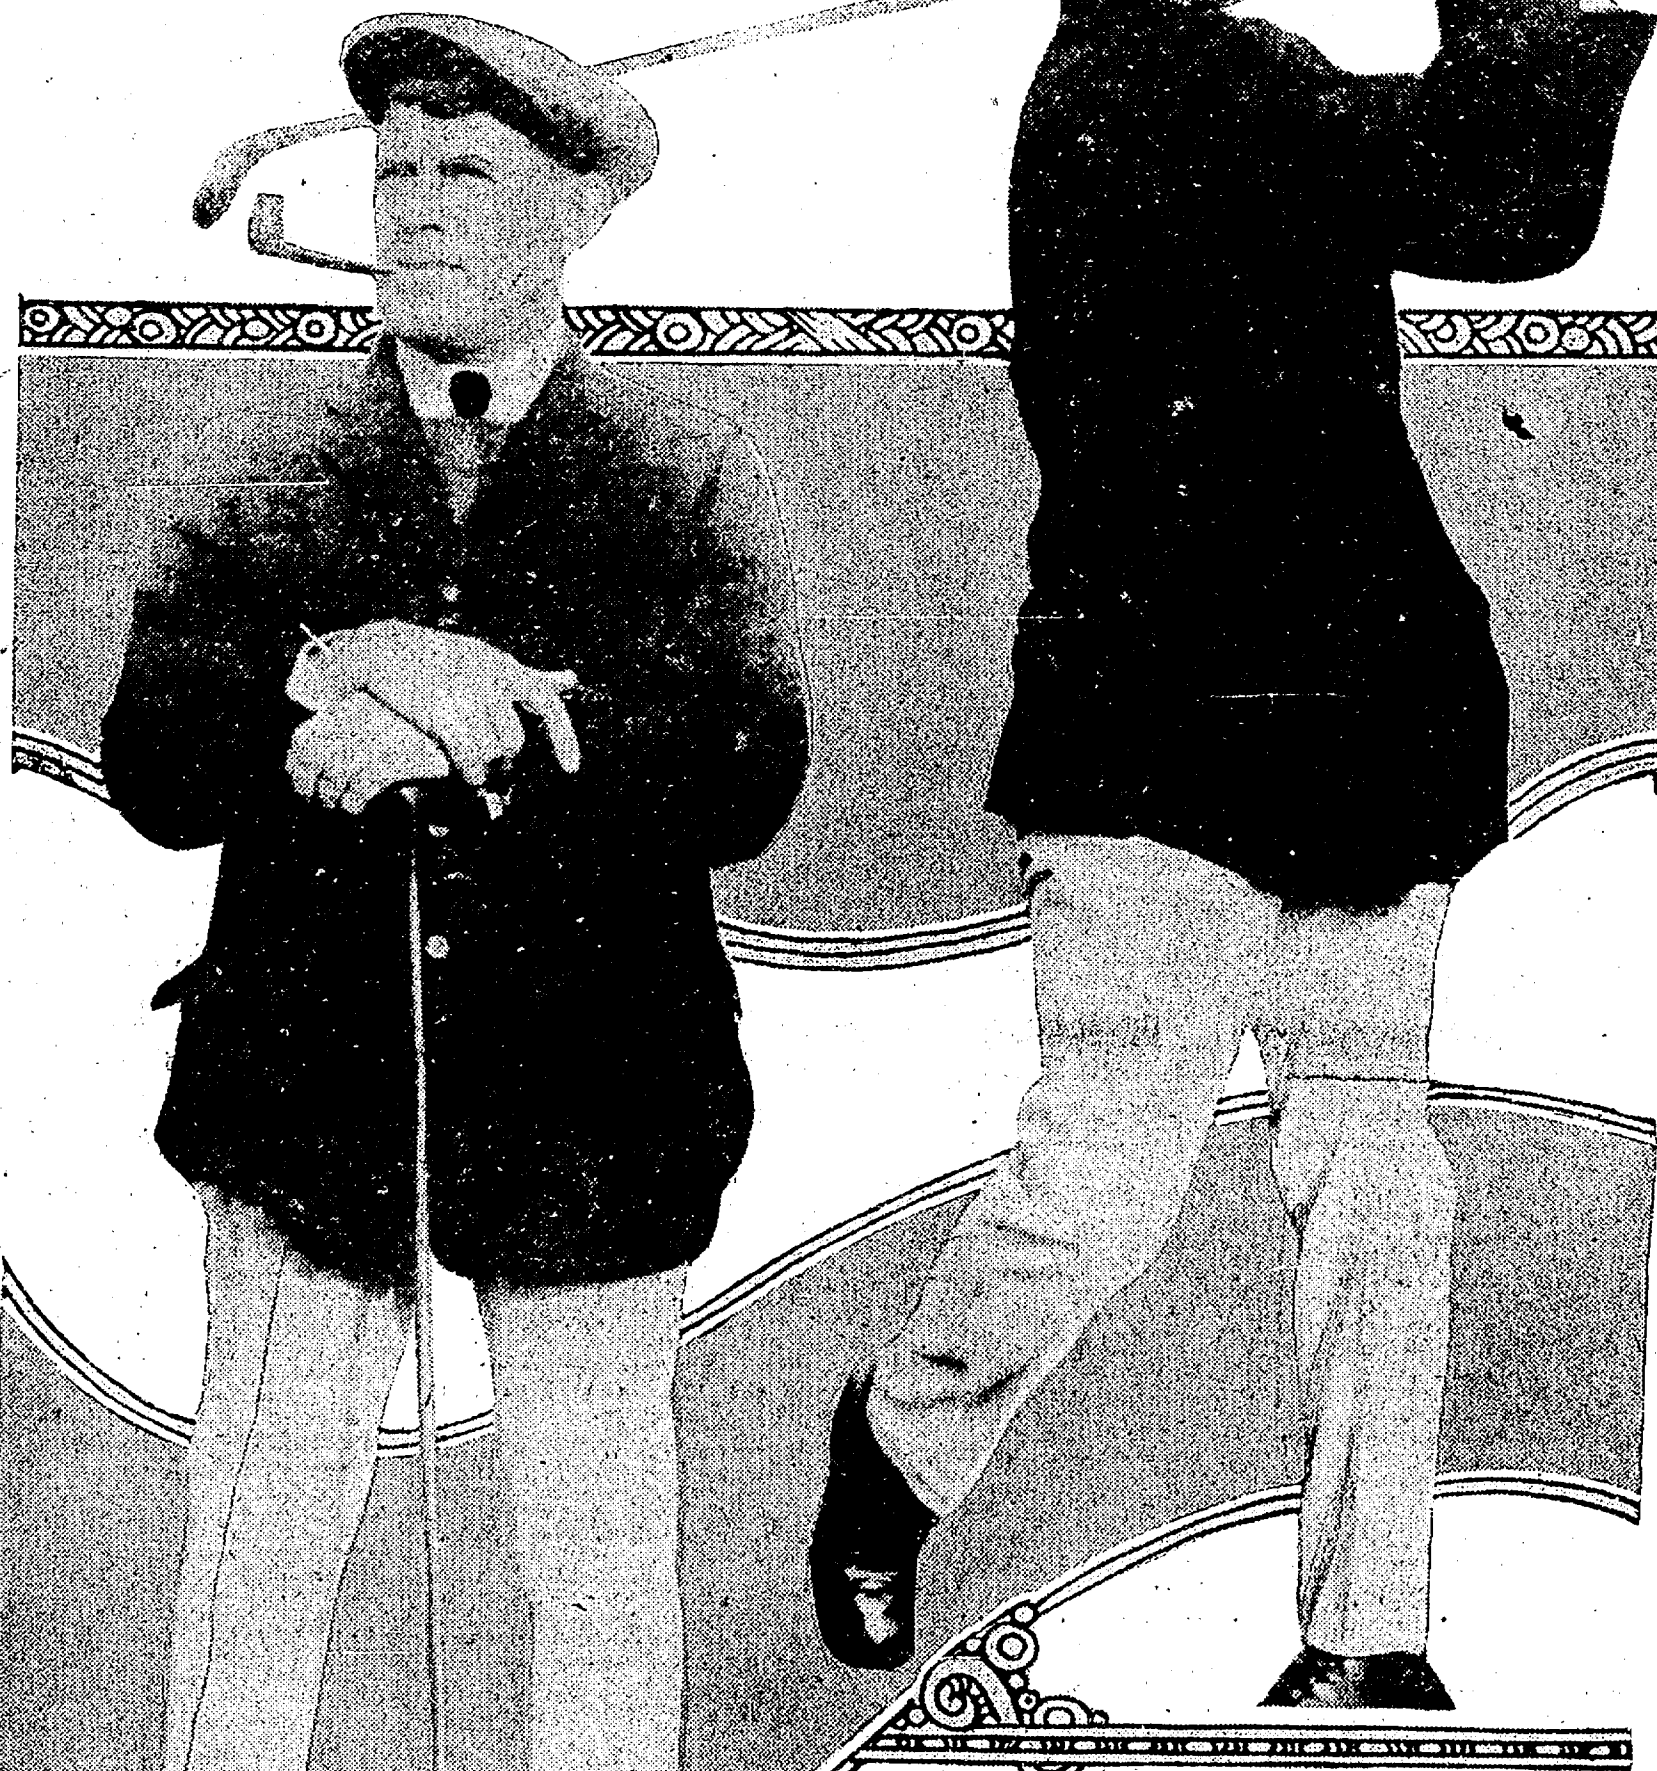

He drove off the tenth with thousands of eyes upon him, with a dash that betokened bad news for the others. He was going like a whirlwind and nothing could stop him. The first hole on the last nine gave him little trouble, and he took a five by a missed putt after he had got on out of trap.

The eleventh was an easy par four and the twelfth, a tough one, he added to his birdie list, with a sensational three.

It seemed as he had to do was to slap his iron shots and they

"Old Master" John Black Finishes in Second Place

JOHN BLACK, the Claremont club professional, lost the national golf championship yesterday through sheer hard luck. John was going along nicely until the second last hole, when he drove out of bounds and lost all chance of the championship in his recovery. In finishing second, tied with Bobby Jones, the Troon Scotchman, gained international fame for Oakland. Local golfers are planning a big reception for John when he returns home. He is the first player from this district to gain such prominence in the world of golf.

Gene Sarazen
Is a Young
Italian Boy

Skokie Links, July 15.—Gene Sarazen is a young Italian boy, professional, 21 years old. He started in the game as a caddie in New York City. Later he went to Pittsburgh and worked as a clubmaker. He became assistant professional and finally assumed full responsibility. He triumphed this spring over many of his present competitors at New Orleans in the open tournament held in connection with the Mardi Gras. He went along quietly at Skokie and reserved his best punch, 68, for the final effort.

headed for the pin like homing pigeons.

Five Thousand People
Follow the Ex-Caddie.

By this time 5,000 people were following the gritty little ex-caddie. The 13th was a par three and coming into the home stretch he rang up four par fours. Par was coming too easy—he was pushing birds every step of the way.

Coming into the home green, with the eyes of all golfers on him, he drove like a fiend. This hole is a par five, 470 yards. His drive rolled within 125 yards of the cup—a smash of nearly 350 yards. He slapped up his iron shop with all the confidence in the world, was within 20 feet of the pin. He tried desperately for an eagle three, but the ball stopped within inches of the cup.

He put it down in debonair, cocksure fashion—and Gene Sarazen, the little Italian ex-caddie, 25 years old, was the new champion. No one knew it then, but he did not make any more fuss about it when his victory was ascertained than he did when he stepped away from the last hole.

"I tried hard and am mighty glad," he said. "Bobby and Black had tough luck. But we all had some of it. I'm too happy to talk much."

With due ceremony a magnificent silver cup was placed in his arms here tonight, and young Gene grinned from ear to ear.

Old Guard in Golf
Completely Broken

SKOKIE COUNTRY CLUB, Glencoe, Ill., July 15.—(United Press)—This marks a new day in golf—the old guard is broken.

This comment was on the lips of every golf fan here tonight, for with Sarazen, Jones, Black and Mehlhorn all finishing ahead of Hagen, Hutchinson, Barney, Evans, Duncan, Mitchell and McDonald, the biggest upset in the history of the open championship had been achieved.

John's Wife Is Quite
Proud of Her Hubby

SKOKIE COUNTRY CLUB, GLENCOE, Ill., July 15.—(United Press)—"It's all right, John, you did the very best you could and I'm proud of you."

This from a grandmotherly little woman when John Black, Oakland, Calif., lost his chance to win the championship and came in second place bitterly disappointed.

"You're very nice to say it, mother," Black replied, patting his wife on the shoulder, "now we will go home and see how the grandchild is getting along."

Nobody Was Interested
In Young Mr. Sarazen

By DAMON RUNYON,
(Universal Service Staff Correspondent).

SKOKIE COUNTRY CLUB, Glencoe, Ill., July 15.—Gene Sarazen, who is the "dead split" of Rodolfo Valentino, as Mr. Valentino appeared to be doing his stuff in the "Four Horsemen," grabbed the American golf championship this afternoon.

In accomplishing this feat, Sarazen ruined a lot of excellent thoughts which many newspaper gentlemen, including the writer, were all set to put on paper if Johnny Black of California came through, about age triumphing over youth. Age, as represented by Johnny Black, did its absolute darndest, but the years become a heavy load on a man's back in this sporting life when youth lays up alongside and looks you in the eye.

Johnny plodded and plugged and pegged away at what you might call the home stretch, and at the finish he was one stroke behind Gene.

One stroke in golf is just the same as a mile in the final reckoning. It was a game finish for age, at that, and the middle ages need not feel despondent.

Sarazen is just 21 and looks it. He is an Italian, born at Rye, N. Y., and a few years ago he was a caddie at the Apawamis club, toting

the same way as Walter. Gene is about four hands shorter than Walter.

NOBODY KNEW HIM.

At this time Gene is the professional at the Highlands club at Pittsburg. The reader will note that we seem to have considerable information about Gene now in view of the fact that his name has not hitherto appeared in these columns. We can explain this paucity of mention in a few words. We candidly admit that we are one of the many who did not even know Gene was in the tournament.

We say him go past this morning, little and brown, and kiddish looking, with Johnny Farrell, who used to be a caddy contemporaneous with Gene, and we confess his passing left us quite cold. No palpitating gallery of spectators followed Gene and Johnny, just their scorer and club bearers.

No one paid much attention when Gene turned in a score of 75 for the morning. If anyone should have happened to mention it you would have said absently, "Is that so? Well, what did Black do?" A lot of folks couldn't even pronounce Gene's name this morning. Now they roll it off their tongues glibly.

When Gene came home in the afternoon with his faithful companion, Johnny Farrell, a big gallery was collected about the last hole and some politely inquired the identity of the young man, while looking over their heads to see if any of the big chaps were in the offing.

EVERYBODY WOKE UP.

Then when Gene plunked the ball in everybody suddenly awoke to the fact that here was a championship possibility. They gathered about the dark little fellow, slap-

ping him on the back and cheering wildly. Gene grinned amicably.

"There's still two or three out there who have a chance to get 288, too," we suggested timidly to young Sarazen, as he stood posing for the moving picture operators after rounding out that score.

"I know," said the brown skinned youth, gazing into the distance where his competitors were still struggling along.

"They've got a chance to get—but I've got mine." Bobby Jones, of Atlanta, another "kid" in the tournament, made a finish as valiant as that of Johnny Black. The Georgia boy finished with the same score as Black, 289. It was the final hours of the tournament that gave one some idea of the real thrill in golf, when half a dozen were coming in neck and neck, so to speak. Furthermore, there was something of the dramatic in this dark youth suddenly bobbing up right out of the haze, unknown, as fresh as paint, and topping all the men whose names are bywords throughout the world of golf.

OAKS ROW WITH THE
UMPIRE WHILE ENEMY
TAKES ANOTHER GAMEHerb Brenton Drops Another Bat Has Hard Luck.
Eason and Howard Have Trouble.

SACRAMENTO, July 15.—The Sacramento Senators made it five straight wins by the margin of one run over Ivan Howard's Oaks when they took the long end of a 4 to 3 game today that was featured by arguments between the visitors and Umpire Eason, who seemed to be in trouble all afternoon. The Oaks, as usual, got off to a lead in the first inning, and by the third they were leading 3 to 1. The Senators scored three in the fifth to take a lead that was never overcome. The Oaks believe Umpire Eason kept them from winning. Eason was off form in calling balls and strikes, and his first trouble was in the fifth, when he allowed a walk to Schinkel. In the eighth inning he again called them wrong in the opinion of Brenton, Manager Howard and the rest of the Oaks, and another big row took place. In the ninth inning Willie and Cooper led off with hits for the Oaks, and Willie was forced by Cather, who tried to sacrifice. Knight was the next batter, and when Eason called a bad second strike on him, Knight kicked and Eason put him out of the game. Arlett batted for Knight and fanned on his one attempt to hit. Lafayette closed the game with a fly to Fitzgerald.

The new arrangement of the batting order brought good results to Manager Howard in the early innings. Ivan saw his athletes put a run over in each of the first three frames. Don Brown opened the contest by nicking Fitzgery's delivery for a double, and he went to third when Willie sacrificed. Claude Cooper wanted to show he has no weakness against left handed pitching, so he cracked out a single to score. Don Adolph Schinkel, who has found the Oakland pitcher just as he likes it, tied the score in the Senators' half when he tripled to score Schang and had singled and advanced on Mollwitz's sacrifice.

Lafayette, who was dropped down two places in the batting order, opened the second with a single, but was forced by Brubaker who reached second when Cooper hit to Fittery; and Pearce dropped the pitcher's throw. Brenton popped out, and Don Brown got his second hit to score Brubaker, as Koehler took third. Willie was an easy out. The Senators passed out in order in the second, and then the Oaks grabbed one more on a double by Jack Knight, and a single by Lafayette.

Oscar Stange had a chance to help the locals to a couple of runs in the fourth when Sheehan got a double and Pearce was hit by a pitched ball, but the best he could do was to hit to Brubaker for an out.

Oaks Get Disgusted At
Decisions by Eason.

The Oaks created a small riot in the fifth inning when they raised objection to the way that Umpire Eason was calling balls and strikes. The Senators went into the lead in this frame by scoring three runs. Fittery started off with a single. Schang popped out, and Mollwitz singled. Schinkel drew a walk, and the Oaks howled that and loud because they believed that Eason missed some strikes on Schinkel. Brenton and Manager Howard started the argument, and in five seconds every member of the visiting team was around Eason. Brenton probably suffered by standing around too long, as Ryan, the next batter crashed one for a double that cleaned the full house and put the Senators in the lead. Ryan was out trying to turn the hit into a triple.

In the seventh inning Cooper and Cather singled with one out, and Knight fouled out. A walk to Lafayette filled the bag, but Brubaker hoisted a fly to Schinkel.

CAMBLERS ARE AGAIN OPERATING AT COAST LEAGUE PARKS

WILLIE KAM, \$100,000 BALL PLAYER QUILTS SAN FRANCISCO CLUB WHEN HE IS REFUSED BONUS

WAGERS OPENLY MADE ON BASEBALL GAMES AT LOCAL GROUNDS

Time Opportune to Wage Relentless War on Men Making Living Gambling on Games.

By EDDIE MURPHY.

Gambling is again rampant at the Oakland Coast league park and other cities of the Pacific Coast league, and it looks like the time is about ripe for J. Cal Ewing and other directors of the league to open another war on the parties responsible for it. A few years ago Ewing and President McCarthy waged a winning war on the fellows who did nothing but go to the ball games and gamble, and for a long time the Oakland ball park was free from the evil. But after winning the fight on the gamblers, the league directors failed to keep their eyes wide open and slowly the parties who bet on ball games worked their way into the parks and are again operating in the wide open. When the Salt Lake Bees and Oaks staged their series here a week ago, the gamblers worked openly. They offered odds right under the eyes of the special police officers. When gamblers start calling aloud for bets at the ball park, the time is ripe to start another war, and Ewing is the fellow who is going to do it. Cal has always been against gaming on ball games.

Many of the gamblers make their quarters in Oakland, but as many more come over from San Francisco. They occupy a large space in the section back of first base in the grandstand. For long time they worked quietly and only those who knew them would suspect that they were in a body and ready to take a bet, some over the hundred-dollar mark. They were out in full force for the two Sunday games in which the Oaks met the Bees and any body occupying a seat around first base, just before the start of the game and even during their progress, could hear the calls for bets. Many complaints have been registered by regular fans because they cannot occupy favorite seats around first base without having to listen to the gamblers arguing about odds and shouting for takers.

Seal Series Would Be Big One for the Gamblers.

Cal Ewing, president of the Oaks, and Vice-President Del Howard have been up at Castella for the past week, and the directors have interviewed on what their intentions are toward getting rid of the gambling conditions which now exist at their park, but the chances are that they will get busy just before the return home today or tomorrow, and the pests out of the lot. Unless an effort is made to kill off the gambling immediately the chances are that it will be carried on in plain view of the regular fans the coming week, when the Oaks and Seals tangle in a series of games on the local lot.

Even though the Seals almost made a clean sweep on the Oaks in their last series, the baseball public is looking forward to next week's series as one of the tightest the Seals and Oaks have ever put up. For the first time this season, the Oaks will be able to present their best line-up against Jack Miller's Seals and maybe things will turn out different than they have in the past. Jack Knight is back in the game at second base. Many Oakland fans figured that at least one-quarter of the Oaks' punch is missing when Jack is out of the line-up. It is now up to Cal Ewing and Del Howard to see that the gamblers do not come as wild in the future as they did when the Bees and Seals met here the last time. The gamblers are not only working in top form at the Oakland ball park, but reports are that they are going back to work in the Coast League circuit. Not so very long ago the courts handled a case where the Seattle owners ejected gamblers from their park and were then sued, and the courts ruled in favor of the gamblers. So Cal Ewing and the rest of the club owners have no reason to fear that they will bring suit upon themselves by trying to keep the gamblers out of the park, and at the same time keep baseball clean.

Senators Are Entitled To Have Some Breaks.

Losing so many games at Sacramento by one run has made the throwers of gloom in the camp of Ivan Howard's Oaks, for his athletes have often times remarked that they would rather be defeated by a half dozen runs than lose three weeks at home, and during the season they have lost many of them. As for Charley Pick's Senators, the breaks of all kinds were against them practically since the start of the season, and they are now the classed as lucky for the games they won by one run off the Oaks. They were long overdue for Pick, and now that they have reached him the Senators are looking for a change of fortune in the future. The one tough part about the Senators getting the breaks now is that they are playing the Oaks, and have had plenty of tough breaks themselves this season.

If the Oaks can return home next week and get away with the series from the San Francisco Seals, local fans will soon forget about what has happened at Sacramento. It is hard for a team to recover from a slump which causes them to lose by one and two runs, but local fans are hoping that things will start breaking for the Oaks again before the series with the Seals is over. The Oaks have faced some mighty well pitching at Sacramento, and on the other hand, the Oakland pitchers have gone along fine. The

Rubber!---Rubber Bathing Suits

Popular models at Deauville, France, are these attractive bathing costumes made entirely of rubber—they promise to be quite a fad on European beaches and the idea may even reach America.

Knepper Wins Final Match From Von Elm

By UNITED PRESS.
OMAHA, July 15.—Rudolph Knepper, 21-year-old Sioux City golfer, annexed the Trans-Mississippi golf championship Saturday afternoon, when he outplayed George Von Elm, Salt Lake, 1921 title holder, in the tournament finale, winning 5 up and 4 to play.

The match, which ended on the fourteenth green of the second eighteen holes, was followed by the largest gallery that ever watched a pair of golfers over an Omaha course.

Neither Knepper nor Von Elm played the game today that they had been showing during the week. Knepper played the first eighteen holes in 71, one above par, while Von Elm took a 77. In the afternoon both Knepper and his opponent were off their tournament form.

The cards follow:

MORNING ROUND	
Knepper, Out.	546 431 353—37
Von Elm, In.	615 413 416—40
Knepper, In.	315 435 433—41
Von Elm, Out.	315 446 241—40-77
AFTERNOON ROUND	
Knepper, Out.	635 564 454—39
Von Elm, In.	543 425 404—38
Knepper, In.	344 444—44
Von Elm, Out.	344 24—42

series with the Seals will be played on the Oakland lot starting next Tuesday afternoon at three o'clock.

SPORTING GOULASH

The Oaks went up to Sacramento to swipe everything from the Senators but their togs, and now just look what happened to them. They'll get tired picking on Pick. Tommy Simpson bought a new suit for his baby last Thursday.

Incidentally it is all wrong about Tommy's baby being Thomas Jeremiah. He was named "Leonard" after the world's lightweight champion. Another Irish-Hebrew alliance.

Goats slip it to the National Conference. They are holding their annual convention aboard a palatial ship.

When the boys get thirsty they just sign the tap water, bent in for the three-mile limit and then they can go the limit.

Maybe they have a cable three miles long and just let the boat drift out on the outgoing tide.

Only trouble with that scheme would be that they would have to stick inside the limit half the time.

Unless, of course, some bright nut who got thirsty eating connections tossed out nine or ten anchors when they reached the three-mile limit.

Willie Wants Some Part of The \$100,000

Strub Says It Can't Be Done Under the Rules of Baseball.

By ROBERT A. DONALDSON, United Press Staff Correspondent.
SAN FRANCISCO, July 15.—Willie Kamm, San Francisco third sacker, recently purchased by Charles A. Comiskey of the Chicago White Sox for \$100,000 and two players, today announced his retirement from the game, effective Sunday.

Kamm's retirement may be only temporarily. Kamm believes he is entitled to a cut in the \$100,000 purchase price. Dr. Charles H. Strub, president of the San Francisco club, agrees that he is entitled to some of the money, but stated that he couldn't give him anything without breaking a law Judge Landis put into effect last winter.

AGAINST THE LAW.
This rule stipulates that ball players cannot be given emoluments of any description beyond their salaries.

Willie DENIES TO QUIT.
"I think I am entitled to part of the money," said Kamm, after his conference with the Seal owners late today, during which he announced his determination to quit.

COMISKEY HEARS NEWS.
Chicago, July 15.—President Charles A. Comiskey, president of the Chicago White Sox, expressed surprise tonight when told by the United Press of the announcement of Willie Kamm, \$100,000 San Francisco third sacker, to retire from the game.

Del Monte Bakers Will Play Crystals

The Del Monte Bakers, who have defeated the Mare Island Marines and Best Tractors, two of the strong amateur teams around here, will play the Crystals at Bay View diamond in the afternoon.

Melrose Merchants Have Tough Contest

The Melrose Merchants, under the leadership of Paul Edstrom, will take the field this afternoon at High and East Tenth streets for a game with the Byron Jackson Ironworkers.

Tribune Leaguers Star for Groveland

The Groveland baseball team trounced Tomlinson to the tune of 10 to 1. "Claret" Foy, home run pitcher, was again the big factor in Groveland's victory.

MAONAVOX CO. ALL STARS 4.
The Magnavox boys took the All-Stars at Durant field, 14 to 4. Kaiser was never in danger after a first inning, when he was scored on a base on balls, an error and two hits. He struck out twenty.

GIANTS, CARDS ONLY HIGH CLASS TEAMS IN NATIONAL LEAGUE

Yankees Will Find Rough Going from Now On If They Live Up to Road Reputation

By GEORGE CHADWICK, Special Correspondent of The Oakland TRIBUNE.
(Copyright, 1922)
NEW YORK, July 15.—Miller Huggins was asked today whether he thought finishing at home had a salutary effect on a baseball team that was trying to win the championship.

"If it is a close race, yes," was the reply.
"Why?"
"Players eat home food, sleep on home beds and can get away from the fans. On the road they eat what they find before them, sleep at least half of the time in Pullmans and don't know where to go to get away from the fans unless they lock themselves in their rooms, and they are not safe there."

Now Look What Somebody Went and Stirred Up

Scotch Writer Picks An All-British Golf Team for Yankees to Beat.

By WALTER CAMP, Copyright, 1922, by The Oakland TRIBUNE.
NEW YORK, July 15.—A Scotchman writes that the finest golfer in the world, but he also objects strenuously to the Yankees speaking of "the slump of British golf" and asks us to show a team of home bred players to beat these eight British born players.

Until you look the National League schedule over you don't realize how far gone the Giants are. The markings of scheduled games are given out and they times out 120 times could not have done as well themselves. Remember first of all, that the season is now more than half over and then analyze what confronts the Giants for the remainder of the season.

HAGEN STEADIED DOWN.
Walter Hagen was a temporary but he steadied down. Walter Travis had the controlled disposition that more nearly approaches the British characteristic, and remember, Walter Travis won the golf championship of the world. Many of our young golfers are excited—brilliant, but flighty. Too many of our amateurs think too much of a distance and too little of direction and they are all too prone to believe that that beautiful "pull" which on our Broad and Parallel fairways is not sufficiently punished.

Not Much Chance of the Giants Taking a Drop.

The New York club is now in its second western trip. It may get a setback here and there, but to date it is going the other way. When it is finished with the western tour, the Giants will be coming back to the Polo grounds and play the western clubs, and then it will paddle back to the west for the last time this season.

They have three contests with the Cardinals, two with the Cubs and one with the Pirates. They have five games with two soft teams in the east. If five games are needed to win the championship and only five, these may be the five games that the Giants will take into camp for their own. They have three games on the Polo grounds with the Crumbling Pittsburghers, who are right where every club goes when it loses its manager and its confidence in itself.

Durant Motors to Play at Los Gatos

The Durant Motors travel to Los Gatos today for a return game with the country boys. The Oaklanders won the first contest, and hope to annex another. Manager Edde Vitt of the Durants will take his regular lineup to the town of Danville.

Yankoes Are Not Any Too Strong on Road.

All this time the New York club is planted on its own little polo grounds, where it is making its own club to make headway against it this year.

Livermore Nine to Entertain Oak N. S.

Livermore baseball fans are looking forward to seeing one of the best frames of the season in their town today for a return game with the country boys. The Oaklanders won the first contest, and hope to annex another.

Boy Scouts Will Wage War on Ants

ALAMEDA, July 15.—An appropriation of \$250 will be made to finance the annual "ant campagna" of the Alameda Board of Health. City Manager E. H. Hickok announced today. The money will be used to purchase ingredients of the poison, which is prepared by City Bacteriologist Lillian Ellefson each year. Citizens of the city supply the cans used as receptacles for the poison. The campaign will open within the next week, Quartermaster E. H. Levy stated.
